Land Acquisition and Resettlement Plan

Document stage: Draft (5th revision)

24 April 2018

PAK: 48078-005 MFF II Power Transmission Enhancement Program (PTEIP II), Tranche 3

Draft Land Acquistion and Resettlement Plan of 500 kV Lahore North Grid Station with allied Transmission Lines, totaling 194 km

Part 2

Prepared by:

Environment & Social Impact Cell of National Transmission and Despatch Company (NTDC), Water and Power Development Authority, WAPDA House, Lahore.

This Land Acquisition and Resettlement Plan (LARP) is a document of the borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff, and may be preliminary in nature.

This resettlement plan is a document of the borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff, and may be preliminary in nature. Your attention is directed to the “terms of use” section of this website.

NATIONAL TRANSMISSION AND DESPATCH COMPANY, PAKISTAN

2nd POWER TRANSMISSION ENHANCEMENT INVESTMENT PROGRAM Funded by ADB through MFF 2

(Tranche 3)

Draft Land Acquisition and Resettlement Plan (LARP) of 500 kV Lahore North Grid Station with allied Transmission Lines, totaling 194 km.

25th March 2018

Prepared By:

Environment & Social Impact Cell of National Transmission and Despatch Company (NTDC), Water and Power Development Authority) WAPDA House, Lahore.

Annexures

Annex 1

List of Approved Subprojects Under Tranche 3

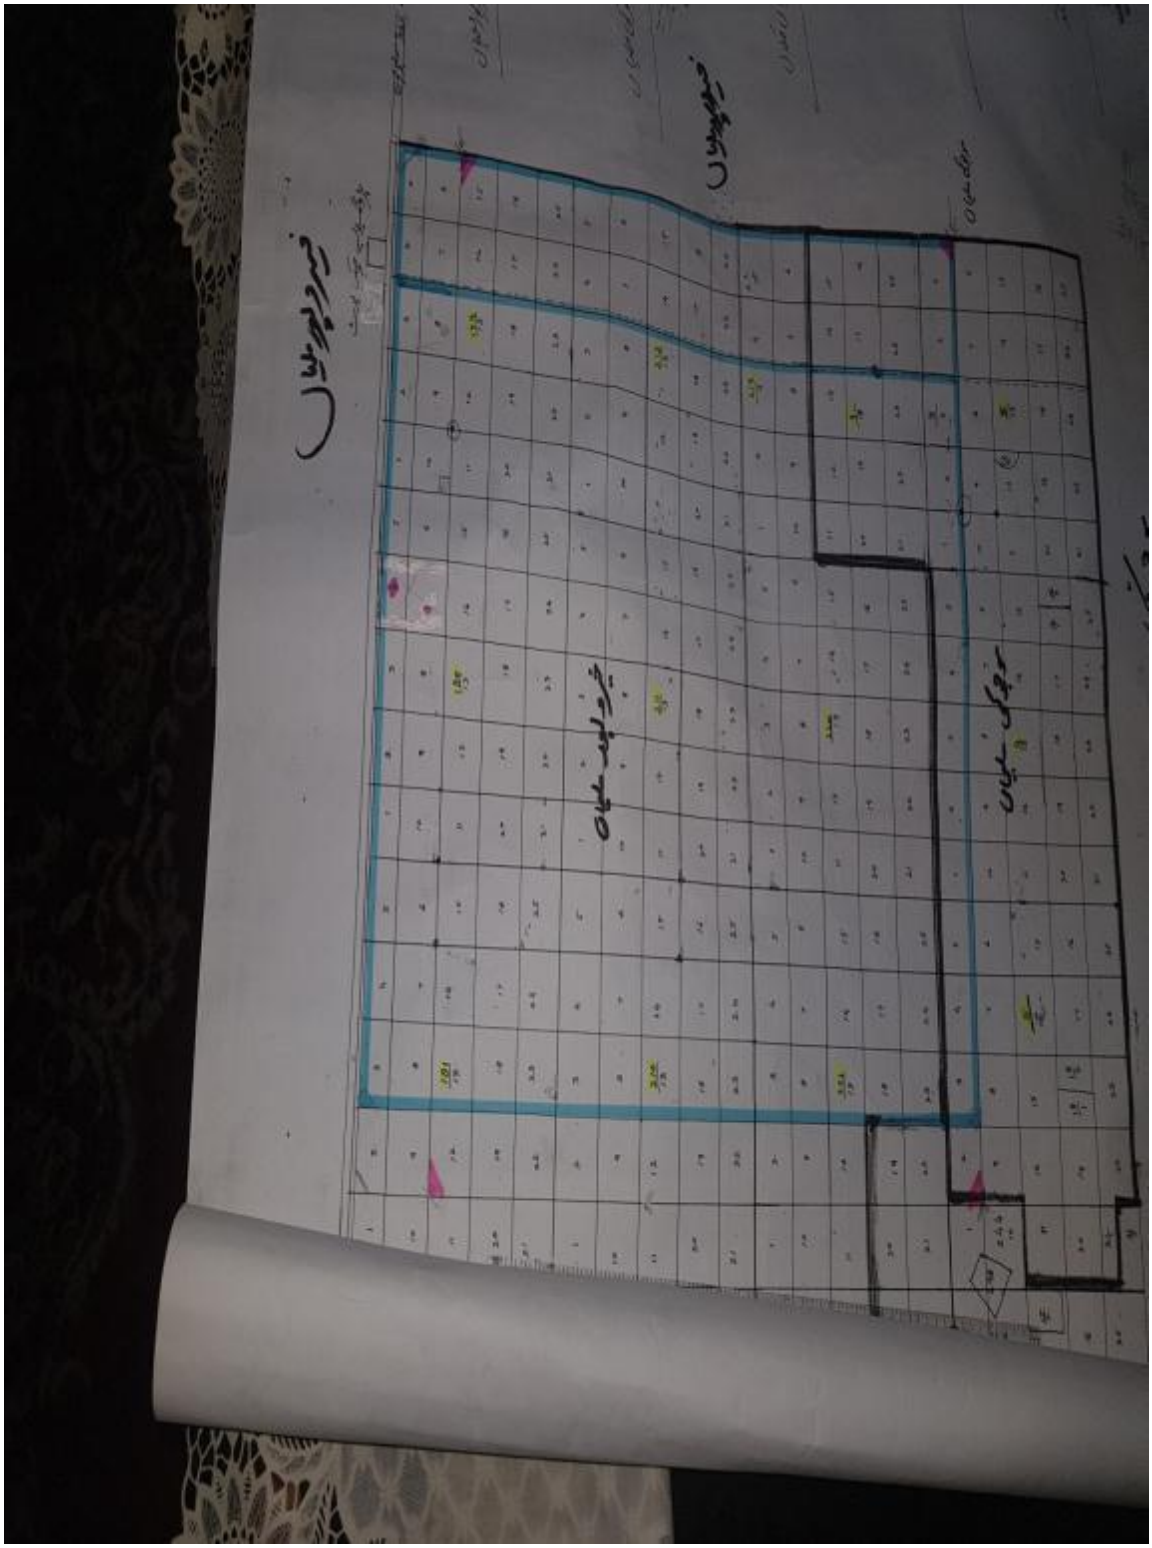
Subprojects	Technical Justification
Subproject 1: 500 kV Lahore North Grid Station with associated Transmission Line	
• 500/220/132kV S/S with 4x750 MVA, 500/220kV, and 3 x250 MVA 220/132 kV transformers • Six 500 kV line bays, six 220kV line bays, and two 132kV line bays • Extension at 500 kV of Gujranwala S/S of two 500 kV line bays • 500 kV D/C T/L Lahore North -proposed Lahore HVDC switching/ converter station (105km) • 500 kV D/C T/L Lahore North -existing Gujranwala S/S (45km) • 220kV D/C T/L for in/out of 220 kV Ghazi Rd.-KSK S/C T/L (15km) • 220kV D/C T/L for in/out of 220 kV Lahore-Ravi Rd. S/C T/L (14km) • 220kV D/C T/L for in/out of 220 kV KSK-Ravi Rd. S/C T/L (15km)	The project is needed to meet the load demand in the Lahore north area at acceptable quality levels. In the absence of the project there will be substantial suppressed load and insufficient reliability to major load centers. In addition, the project will enable an alternate supply route for the North-South power transfers at 500 kV from the proposed new converter station at Lahore South to the substations at Gujranwala and Maira. At the expected project commissioning year 2023, the project benefits will include: (a) enabling a load of approximately 1100 MW representing 6300 GWh of energy which would otherwise be suppressed or poorly supplied, (b) the reduction of system losses by 60 MW (peak) amounting to a generation saving of 259 GWh p.a., and (c) the provision of N-1 reliability to a large section of the Lahore North load.
• Transmission line construction equipment, washing units, live line, and dead line crew equipment • Replacement with fog resistant insulators for existing transmission system at heavily polluted area	The transmission line construction equipment and live line crew equipment are needed to enhance line construction work, including live line maintenance operations. The replacement with fog resistant insulators is needed to replace insulators which have been compromised by contamination with fog
• Reconductoring with HTLS conductors for 220 kV New Kotlakhpat - Bund Road - Sheikhupura D/C T/L (44 km) • Reconductoring with ACSR conductors for a part of 220kV Gatti - Bandala D/C T/L (5 km) • Replacement of 3x37 MVAR shunt reactors at 500 kV Sheikhupura substation & 3x37 MVAR shunt reactors at 500 kV Gatti substation, and 2x22 MVAR shunt reactors at 500 kV Sheikhupura substation • Replacement of 1x450MVA 500/220kV Transformer at Gatti 500 kV substation • Replacement of existing electro-mechanical protection relays with numerical relays for Islamabad, Lahore & Multan regions	(a) Reconductoring with HTLS conductors for 220 kV New Kotlakhpat - Bund Road - Sheikhupura D/C T/L (44 km): The existing line is dilapidated and overloaded. Furthermore, the increasing load demand in the area requires larger power flows but new line construction is restricted by unavailability of access routes. These triple problems will be resolved by reconductoring the existing lines with HTLS conductors utilizing the exiting towers. Furthermore, the HTLS conductors have substantially lower losses than the equivalent ACSR conductors and lower system losses will be realized. (b) Reconductoring with ASCR conductors for a part of 220kV Gatti - Bandala D/C T/L (5 km): The reconductoring of the conductors is primarily necessitated by the poor technical condition of the line (31km). This is an important line in the network and need to be maintained in service.

Subprojects	Technical Justification
	(c) Replacement of 37 MVAR shunt reactors at Sheikhupura & Gatti 500 kV substations, and 22MVAR shunt reactors at Sheikhupura 500 kV substation: The existing shunt reactors are damaged and do not work as designed. Replacing the damaged shunt reactors with the new one is expected to reduce outage triggered by the over voltage, improving the reliability. (d) Replacement of 1x450 MVA 500/220kV transformer at Gatti 500 kV substation: The recent inspection result shows the transformer's condition is at risk of possible explosion due to deteriorated insulation after over 40-year operation. The replacement is needed for both safety considerations and widespread outage (450MW) if the transformer is taken out of service. (e) Replacement of electro-mechanical relays with digital numerical relays in Islamabad, Lahore & Multan regions: The existing electro-mechanical relays are outdated and provide limited information when outage happen. Digital numerical relays are needed to improve outage response and system performance.
Subproject 2: 500kV Maira Switching Station	
• Eight 500 kV line bays with four shunt reactor banks.	This switching station is an integral part of the overall evacuation arrangement of the hydro power plants: 870 MW Suki Kinari, 1,100MW Kohala and 640MW Mahal. The arrangement and location of the switching station has been selected on the basis of an Interconnection Study carried out by NTDC's consultants. The project may be considered as an essential part of the least cost arrangement for the evacuation of the power from the above three hydro stations. The shunt reactors are needed for voltage control of the network at light load conditions.
Subproject 3: 220kV Jauharabad Substation with associated transmission line	

Subprojects	Technical Justification
• 220kV S/S at Jauharabad with 3x160 MVA 220/132kV transformers along with allied equipment and accessories • Four 220kV line bays and eight 132kV line bays • Two 220kV D/C T/L of twin bundle Rail conductor for looping In/Out of existing Ludewala – Chashnupp D/C T/L at 220kV Jauharabad (12km)	The project is needed to meet the future load demand in the Jauharabad, Quaid Abad, and Adi Kot areas at acceptable quality levels. In the absence of the project major load centers will have poor reliability of supply. At the expected project commissioning year 2023, the project benefits will include: (a) enabling a load of approximately 32 MW representing 139 GWh of energy which would otherwise be suppressed or poorly supplied, (b) the reduction of system losses by 15.5 MW (peak) amounting to a generation saving of 44.3 GWh p.a., and (c) the provision of N-1 reliability to a large section of area loads.
Subproject 4: Grid Connected Battery Energy Storage System Pilot Project	
• Lithium-ion Battery Packs (5 MWh) • Balance of system including inverters (20MW) • Transformers (220kV/33kV, 30MVA 1unit and 33kV/0.44kV, 5MVA 6 units)	A 20 MW/5MWh battery energy storage system at the proposed location of the Jhimpir-1 substation would provide two major benefits – network stability support by primary frequency control and improved dispatch of variable renewable generation.

D/C =Double circuit, HTLS = high temperature low sag, km = kilometer, kV = kilovolt, MVA = megavolt-ampere, MW = megawatt, T/L = transmission line, S/S = substation.

Annexure – 2: Location Map of Grid Station



Annexure – 3.1: List of Land Owners of proposed 500 kV Lahore North G/S

Sr. No.	Name of DP	Father Name	Tehsil	District	Total Land Holding (Acres)	Affected Land (Acres)	Land Use Category	Ownership Status	Total Family Member	Primary Source of Income	Secondary Source of Income	Monthly Income (Rs.)
1	Abdul Ghafoor	Ghulam Muhammad	Sheikhupura	Sheikhupura	5	4	Agriculture Land	Owner	7	Farming		80,000

Annexure – 6: Summary Pamphlet of the Resettlement Plan

Land Acquisition and Resettlement Plan of Lahore North G/S along with allied Transmission Lines (194 km)

Background

This LARP for subproject has been prepared for LARP of Lahore North G/S along with allied Transmission Lines (194 km). The proposed 220 kV D/C T/L route alignment of 194 km long passes through 93 villages belonging to 5 tehsils (Sheikhupura, Muridke, Ferozwala, Naushra Virkan and Nankana Sahib) fall in the jurisdiction of 3 districts Sheikhupura, Gujranwala and Nankana Sahib. The Ministry of Water and Power and the National Transmission and Dispatch Company Limited (NTDCL) are the Executing Agency (EA) and the Implementing Agency (IA), respectively. The execution of the project will commence in current financial year and is envisaged to be completed in the year 2017-21.

The Government of Pakistan is implementing the "Power Transmission Enhancement Investment Program (PTEIP) under the financial assistance of ADB through a multi tranche financing facility (MFF) to meet the requirements of NTDC for financing of the sub-projects planned for implementation under short, medium and long term. This Investment Program seeks to (i) rehabilitate, augment, and expand parts of the system to meet current generation capacities; (ii) expand and augment the system to cope with future power generation stations; and (iii) ensure continued operation and maintenance in accordance with best international practices. Thus, the major aim of PTEIP is enhancement in the capacity of the transmission system by rehabilitation, extension, augmentation & expansion of existing 500 kV & 220 kV network of NTDC, to meet the growing power demand in the country.

Project Description

The sub-project consists of six components; i) 500/220 kV substation with 3X750 MVA transformers and allied equipment & accessories; ii) 220 kV double circuit T/L for In/Out of Lahore (old) - Ravi at 500 kV Lahore North; iii) 500 kV D/C T/L from Lahore North to proposed Lahore HVDC switching/ CS; iv) 220 kV double circuit T/L for In/ Out of 220 kV KSK- Ravi at 500 kV Lahore North; v) 500 kV D/C T/L from Lahore North to existing Gujranwala (Nokhar) substation; vi) 220 kV double circuit T/L for In/Out of Ghazi road –KSK at 500 kV Lahore North. There will be installation of 524 towers, i.e. each tower will be installed at varying distance ranging from 350 m to 365 m. No civil work has been awarded until preparation of LARP which is expected to be awarded in November 2018. LARP will be finalized in September 2018. Civil work will be started in December 2018 following the payment of compensation. The RoW is 25 m on either side from the centre of transmission line and is 15m in case of tower spotting.

Objectives of LARP

The major objective of this LARP is the assessment of type and magnitude of LAR impacts, eligibility and entitlement of compensation; institutional arrangements for the implementation of LAR activities as well as redress of community complaints, cost, implementation schedule and conducting internal and external monitoring.

Project Impacts

The project involves acquisition of 176 acres of private agricultural land for the construction of grid station; and installation of 194 km transmission lines, due to which, there will be loss of land, crops, structures, trees and other structures including one fish farm and poultry farm. The project will be implemented in various stages, such as: i) construction of grid

station and installation of transmission lines (i.e. excavation/ foundation; towers and stringing). Out of total 2,442.82 acres, 176 acres of private land will need to be acquired for the construction of grid station, whereas the activity of tower spotting, erection and stringing of transmission lines will be carried on 2,242.82 acres of private and government land. In case of private land, crops on an area of 2,121.51 acres and 80.61 acres will be affected due to installation of transmission lines and towers spotting respectively. Out of total affected 1,077 private trees, 40 trees will need to be cut-down due to the construction G/S, while 837 trees due the installation of transmission line owned by 250 DPs. In case of total 1,495 private trees, 842 wood trees and 195 fruit trees were found 1,077 affected trees. Total 16 Nos. of building and other structures will be affected due to the construction of grid station. No indigenous people/ or group of people is located in the area of this sub-project or its surroundings.

Resettlement Principles

In accordance with the LAA (1894), Telegraph Act 1885 and ADB SPS (2009), land acquisition and resettlement activities of this sub-project will be carried out ensuring that compensation to be provided at replacement cost basis for all direct and indirect losses, so that no one could be worsen-off because of the sub-project. The provision of subsidies or allowances will also need to be given for affected households (AHs) that may be relocated, suffer business losses, or may be vulnerable.

In this context, the following principles will be taken into consideration:

i). Need to screen the sub-project early on in the planning stage

ii). Carry out meaningful consultations

iii). At the minimum restore livelihood levels to what they were before the sub-project, improve the livelihoods of affected vulnerable groups

iv). Prompt compensation at full replacement cost is to be paid

v). Provide affected people with adequate assistance

vi). Ensure that affected people who have no statutory rights to the land that they are working and eligible for resettlement assistance and compensation for the loss of non-land assets; and

vii). Disclose all reports

Entitlement for Compensation

The “cut-off date” was set as March 21, 2018. This refers to the people who will settle/ started any activity after the cut-off date will not be entitled for any compensation under this sub-project. In accordance with this LARP and updated LARF, the affected persons will be eligible for compensation or rehabilitation assistance as discussed below:

i). All land owning displaced persons losing land or non-land assets, whether covered by legal title or customary land rights, whether for temporary or permanent acquisition.

ii). Tenants and sharecroppers, whether registered or not; for all non-land assets, based on prevailing tenancy arrangements.

iii). Displaced persons/ parties losing the use of structures and utilities, including titled and non-titled owners, registered, unregistered, tenants and lease holders plus encroachers and squatters.

iv). Displaced persons losing business, income and salaries of workers, or a person or business suffering temporary effects, such as disturbance to land, crops, and business operations both permanently and also temporarily during construction.

v). Loss of communal property, lands (*shamlat*) and public infrastructure.

vi). Vulnerable displaced persons identified through the social impact assessment survey/ analysis

vii). In the event of relocation, all affected persons will receive transitional and other support to re-establish their livelihoods.

The compensation and rehabilitation entitlements are summarized in the Entitlement Matrix presented as below:

Entitlement Matrix for Compensation

Asset	Specification	Entitled Persons	Compensation Entitlements
Arable Land	Access is not restricted and existing or current land use will remain unchanged	Farmer/ Titleholder	• No compensation for land provided that the land is rehabilitated/ restored to its former quality following completion of works;
		Leaseholder/ Sharecropper *(registered or not)*	• No compensation for land provided that the land is rehabilitated/ restored to its former quality following completion of works;
		Agricultural workers	• Compensation, in cash or kind, for all damaged crops and trees
		Squatters	• Compensation, in cash, for all damaged crops and trees
Arable Land where access is restricted and/or land use will be affected	All adverse effects on land use independent of severity of impact	Farmer/ Titleholder	• Land for land compensation with plots of equal value and productivity to the plots lost; or; • Cash compensation for affected land at replacement cost based on market value plus 15% CAS, [a] free of taxes, registration, and transfer costs. • Negotiated rates agreed by both the parties, DPs and EA.
		Leaseholder/ Sharecropper *(registered or not)*	• Renewal of lease/ sharecropping contract in other plots of equal value/ productivity of plots lost, or • Cash equivalent to market value of gross yield of affected land for the remaining lease/ contract years (up to a maximum of 3 years).
		Agricultural workers losing their contract	• Cash indemnity corresponding to their salary (including portions in kind) for the remaining part of the agricultural year.
		Squatters	• 1 rehabilitation allowance equal to market value of 1 gross harvest (in addition to crop compensation) for land use loss.
	Additional provisions for severe impacts (More than 10% of land loss)	Farmer/Titleholder Leaseholder	• 1 severe impact allowance equal to market value of gross harvest of the affected land for 1 year (inclusive of winter and summer crop and additional to standard crop compensation)
		Sharecroppers *(registered or not)*	• 1 severe impact allowance equal to market value of share of harvest lost (additional to standard crop compensation)
		Squatters	• 1 severe impact allowance equal to market value of gross harvest of the affected land for 1 year (inclusive of winter and summer crop and additional to standard crop compensation)

Asset	Specification	Entitled Persons	Compensation Entitlements
Residential/ Commercial Land		Titleholder	• Land for land compensation through provision of a plots comparable in value/ location to plot lost or • Cash compensation for affected land at full replacement cost plus 15% CAS, free of taxes, registration, and transfer costs
		Renter/ Leaseholder	• 1-3 months allowance *(at OPL level Rs. 15,000/ month)*
		Squatters	• Accommodation in available alternate land/ or a self-relocation allowance (*Rs. 15,000).*
Houses/ Structures		Owner of house structures	• Cash compensation at replacement rates for affected structure and other fixed assets free of salvageable materials, depreciation and transaction costs. • In case of partial impacts full cash assistance to restore remaining structure.
Crops	Crops affected	All DPs (including squatters)	• Crop compensation in cash at full market rate for one harvest (either winter or summer) by default for impacts caused by grid construction, tower base, stringing and access. • All other crop losses will be compensated at market rates based on actual losses.
Trees	Trees affected	Owner of trees	• For timber/ wood trees, the compensation will be at market value of tree's wood content. • Fruit trees: Cash compensation based on lost production based on the yearly produce of tree and investment cost needed to re-grow the tree.
Business/ Employment	Temporary or permanent loss of business or employment	All DPs suffering income losses (including squatters, agriculture workers)	• Business owner: i) Cash compensation equal to one year income, if loss is permanent; (ii) cash compensation for the period of business interruption, if loss is temporary. • Workers/ employees: Indemnity for lost wages for the period of business interruption up to a maximum of 3 months *(at OPL level Rs. 15,000/ month)*.
Relocation	Transport costs	Owners of structures	• Provision of transport expenses *(Rs. 15,000).*
Community assets	Mosques, footbridges, roads, schools, health center	Affected community	• Rehabilitation/ substitution of affected structures/ utilities (i.e. mosques, footbridges, roads, schools, health centers).
Vulnerable DPs livelihood	Households' below poverty line and female headed households, disable persons of HH.	All affected vulnerable DPs	• Lump sum one time livelihood assistance allowance (Rs. 15,000 at OPL Punjab) on account of livelihood restoration support. • Temporary or permanent employment during construction or operation, wherever feasible.
Unidentified Losses	Unanticipated impacts	All DPs	• Deal appropriately during sub-project implementation according to the ADB Safeguard Policy
