| **Loan Amount (USD)** | $ 200.00 million |

# Cote d'Ivoire: National Electricity Digitalization and Access NEDA extended financing

## Project Description

According to bank provided information, the objectives of the operation are to (i) increase access to electricity; (ii) improve the quality of electricity service in lagging regions; and (iii) enhance institutional capacity to support electrification programs in Cote d'Ivoire.

The Project will support the expanded financing of the Cote d'Ivoire National Electricity Digitalization and Access Operation (NEDA or the "Program"), initially approved by the World Bank (WB) in 2022. AIIB's proposed USD200 million financing forms part of the first scale-up phase, alongside EUR150 million financing from Cassa Depositi e Prestiti signed in August 2026.

The Program supports the Government of Cote d'Ivoire's efforts to expand electricity access, improve network reliability, and modernize the power sector through three national programs: the Programme Electricite Pour Tous (PEPT), which promotes affordable household connections; the Programme National d'Extension des Reseaux Electriques (PRONEX), which expands and reinforces electricity distribution networks; and the Programme de Digitalisation et d'Automatisation du Transport et des Smart Grids (PDATSG), which supports grid digitalization and automation. AIIB financing will contribute to: (i) 100,000 new household electricity connections; and the construction and rehabilitation of climate-resilient medium- and low-voltage distribution infrastructure in underserved areas; (ii) improvements in system reliability and operational efficiency through regional control centers, network automation, remote-control equipment, and digitalized substations under PDATSG; and (iii) strengthening the implementation capacity of CI-Energies and supporting sector modernization.

ACCESS TO INFORMATION

You can submit an information request for project information at: https://www.aiib.org/en/contact/information-request/index.html

ACCOUNTABILITY MECHANISM OF AIIB

The AIIB has established the Accountability Mechanism for Project-Affected People (PPM). The PPM provides Òan opportunity for an independent and impartial review of submissions from Project-affected people who believe they have been or are likely to be adversely affected by AIIBÕs failure to implement the ESP in situations when their concerns cannot be addressed satisfactorily through Project level GRMs or AIIB Management processes.Ó Two or more project-affected people can file a complaint. Under the current AIIB policy, when the bank co-finances a project with another development bank, it may apply the other bank's standards. You can refer to the Project Summary Information document to find out which standards apply. You can learn more about the PPM and how to file a complaint at: https://www.aiib.org/en/about-aiib/who-we-are/project-affected-peoples-mechanism/how-we-assist-you/index.html
