

CONTRIBUTION TO THE ADB RESULTS FRAMEWORK

No.	Level 2 Results Framework Indicators (Outputs and Outcomes)	Targets	Methods/Comments
1	Installed energy generation capacity (MW equivalent)	510	The project will construct and install two units of 255 MW designed capacity (ISO conditions) combined cycle gas turbines.
2	Greenhouse Gas Emission Reduction (tons carbon-dioxide-equivalent/year)	418,000	Estimated based on using more efficient technology.
3	Energy saved (terawatt-hour equivalent per year)	5.6	Estimated based on using more efficient technology.

ISO = International Organization for Standardization, MW = megawatt.
