<b>No.</b>	<b>Level 2 Results Framework Indicators (Key Outputs and Beneficiaries)</b>	<b>Targets</b>	<b>Methods/Comments</b>
1	Installed energy generation capacity	127 MW	The power plant has six units with installed capacity of 240 MW. The project envisages replacement of 3 fully depreciated units (with total capacity 115 MW) with new units with total capacity of minimum of 127 MW. From the remaining three units, one unit was replaced in 2012 and two others will be partially refurbished.

MW = megawatt.
