## Trimmu Panjnad Barrages Improvement Project (TPBIP) Internal Resettlement Monitoring Report

### 1. Background

1. The Government of Punjab is intended to improve and rehabilitate the barrages through Punjab Irrigation Department with the funding from the Asian Development Bank (ADB). The main objective of the up-grading & rehabilitation program is to improve the water supply for sustainable irrigated agriculture. The TPBIP is the part of this rehabilitation and up-grading program. The rehabilitation involved the land acquisition and resettlement impact of the project. Hence, a Land Acquisition and Resettlement Plan (LARP) was prepared by the PMO and approved by ADB.

#### 1.1. Resettlement Impact

2. The Barrage construction work is limited to government owned land and no impact was reported on the private land. In term of resettlement impact there are total 112 households, impacted through structure, crop and trees by the construction activities. In addition, there is impacted one community structure (Mosque) permanently. Hence, a comprehensive LARP was prepared by the PMO (approved from the bank) to address the remedial measures for project adverse impact. The measures included are the compensation payment and livelihood rehabilitation assistance. Hence, the LARP implementation is needed to fully monitor internally and externally. Accordingly, the PMO has initiated the implementation of LARP and internal resettlement monitoring report is prepared in this regard. Monitoring is an integral part of resettlement process that entails monitoring of preparation and implementation of Land Acquisition & Resettlement Plans (LARP), as laid down in the ADBs SPS 2009.

### 2.0 Status of Implementation

3. The compensation payment is going on right track, as 31% of the total compensation payment has been disbursed yet among the DPs in term of compensation for the loss of residential structures. The detail of paid DPs is given in Annexure-I of the report while the detail is discussed as below;

#### 2.1. Consultation and Disclosure

4. PMO and Consultant are conducting regular consultations with DPs communities since the LARP preparation and implementation. The consultations focused on the compensation assessment, eligibility criterion and entitlements, and compensation disbursement process. These meetings are organized at the village level and no issue was reported by DPs.

5. The information brochure summarizing the provisions of the LARP have been given to the DPs whose houses, trees, and other assets and incomes are affected by the proposed project. The objective was to inform the DPs and locals regarding Project, entitled

compensation and livelihood allowances and other related concerns regarding the modalities of implementation of the compensation.

## 2.2. Gender Consultation

6. A Gender consultation was conducted on May 9, 2016 in Basti Muhammad Bakhsh, Union Council No. 85, Tehsil Athara Hazari, and District Jhang. Group meetings were arranged at two places in the Basti, where numbers of women were gathered regarding consultation for Trimmu Barrage Improvement Project. The resettlement plan was discussed in detail for the purpose to satisfy the community and various questions were asked about their settlement at new location, distance, facilities and the problems they visual face in relocation.

7. During group discussion, it was observed that most of the people are poor. They did not decide yet about new location. Reason behind their issue, they could not arrange money/resources to purchase land for relocation due to non-affordability. They are seeking for the compensation amount to buy a small piece of land to relocate. The women participants were informed about the financial and other incentives to be paid as compensation, which could be helpful for them to settle at new site. Pamphlets showing project introduction, objective, project impact, degree of impact, number of affected families of Basti Muhammad Bakhsh and relocation compensation were distributed amongst the women and explained in detail in their native language (snaps are provided in Annexure-II).

## 2.3. Compensation Disbursement

8. The compensation disbursement process was initiated in June 2016, and 35 APs were given the compensation for the loss of their residential structures. The list of paid DPs is reflected in the Annexure- I. The DPs were well informed in advance be present at site. The compensation cheques were handed over to the APs at Trimmu Canal Rest house.

9. The Cheques were handed over by the Deputy Project Director, Mr. Sajid Iftekhar followed by Malik Pervaiz Arif Director Environment & Social PMO Barrages. (Photos of few DPs are reflected in the Photo Gallery).

10. During the distribution of the compensation cheques to DPs, they were assured that the remaining DPs will be compensated very soon, which is at present in the process with PMO to prepare their compensation cheques.

11. The other following officials also participated in the event:

- Mr. Shabeeb Hussain Dy. Director PMO Barrages
- Mr. Muhammad Ajmal SDO, Trimmu Barrage,
- Rana Abdur Rehman Safe guards Specialist, TPB Consultants

### **3. Relocation of PARCO Oil Pipeline and others Optical Fiber Cables (PTCL, Multi Net and Mobilink) crossing from Trimmu Barrage**

12. Refer to the visit made on January 07, 2016, it was observed that PARCO Oil Pipeline and other three Optical fiber cables are crossing over the Trimmu Headworks are creating hindrance in the construction activity of 13 additional bays of the barrage. To relocate these fixtures, all concerned departments/Organizations were contacted by ESU-PMO Barrages in person to have a joint visit of site to plan to remove these cables and pipe well in time. A follow up meeting was held on January 13, 2016, in the Consultants office Lahore and they were explained to relocate these fixtures and further Project Director PMO Punjab Barrages met with the Managing Director, PARCO at Karachi in March 09, 2016 for settlement of this issue.

13. Later as a mitigation measures, Chief PARCO came at site of Trimmu Barrage on April 12, 2016 for deciding the route of relocation of PARCO pipeline with three options (1. temporary relocation; 2. relocation on pairs after construction of 13 additional bays and; 3. independent / dedicated line across the river. Now PARCO is busy in preparation of drawings and estimates of three options. After finalization of cost estimates by PARCO, work on temporary relocation will be started in first phase after sharing 50% cost by PMO Barrages. In second phase, after decision on options No. 2 or 3, the work will be started after sharing 50% cost by PMO Punjab Barrages. Now, the follow up is going on by the PMO to make implementations of different options.

### **4. Application of PAPs for Employment with the Contractor**

14. A contract clause support the AFs that the Contractor will hire AFs skilled, preferably unskilled laborers from the affected community. For this purpose, AFs were explained the criteria to apply by the ESU-PMO Barrages and consultants, Sociologists. Total 45 applications included AFs themselves and their sons of 18 years and above were received during December, 2015 and January, 2016. These applications were verified from the LARP document and found correct .After compiling the data, these applications were also submitted on Jan 20, 2016 to the Client for further processes. On commencement of work of contractor, he will accommodate these applicants in different jobs keeping in view their age, health and education. The follow up is made by the PMO to ensure the implementation.

### **5. Identification of Affected Persons Residential Structure**

15. The site was visited by the Sociologist TPB Consultants for the identification of existing residential condition of each AF. For this purpose, the Chairman committee of affected community was informed to ask all AFs loosing residential structures must be present in their house on May 9-10, 2016. The team visited each AFs house and taken photograph of each house. The same identity code mentioned in the LARP document was displayed on each house or carrying by each AF standing in front of his residential structure. The purpose of doing so that after relocation of each AF, survey will be conducted to compare their living condition as

pre-project and post project that the project stress upon that AFs should be better and not worse off.

16. The participants took part in the discussion and shared their problems regarding health and education and pressing needs of women and children. It is believed that an economic growth, poverty reduction, human development including population planning and sound management of natural resources and environment cannot be fully achieved without increased investments in women and greater attention in their needs, concerns and contribution. Investing in health and education of females not only results in positive returns to women themselves, but return to the society is even larger and last for generations. So their basic needs must be considered to improve their social status.

## **6. Conclusions**

17. Based on above facts, the report confirms that the LARP implementation in term of compensation for the loss of residential assets is progressing satisfactorily. PMO has made all necessary good faith efforts to make 100% disbursement of compensation to the entitled APs. The report confirms that no issue or any payment related encumbrance found in the Project.
