SEMI-ANNUAL SOCIAL SAFEGUARD MONITORING REPORT

1 INTRODUCTION AND PROJECT BACKGROUND

Asian Development Bank (ADB) assistance under Madhya Pradesh District Connectivity Sector Project (MPDCSP) project loan 3189-IND has identified, 07 stretches of existing Major District Roads (MDRs) with total length of **380.580** kms for widening and reconstruction in the state of Madhya Pradesh. The 7 identified MDRs are scattered across in the districts of the Ujjain, Gwalior, Shivpuri, Rewa, Singrauli and Sidhi.

The proposed program for widening and reconstruction of MDRs, from single lane/ intermediate lane/ two lane carriageway to two lane road. The MPRDC aimed at improving the major district roads to provide reliable road transport services in the state of Madhya Pradesh. ✓

3 RESETTLEMENT IMPACTS IN THE SUB-PROJECTS

No involuntary land acquisition will be required under any subproject; however, there would be temporary disruption of livelihood on roadside vendors during construction period. The affected households have willingly signed MOUs during the DPR stage that they willingly forgo small assistance in favor of better roads and based on that their business and income will increase.

4 SOCIAL SAFEGUARD ACTIVITIES DURING THE REPORTING PERIOD

4.1 Social Issues

In order to identify any social impact, due to the project implementation, the client and the Consultants have carried out several site visits and consultations in the project areas during the reporting period of this document. Based on site visit and discussions held with the local residents in the project areas, it has been confirmed that the implementation of the concerned project will not have any negative social impact. However, public consultation shall be continued throughout the project implementation period to ensure that no social/ resettlement issues remain unaddressed.

4.2 Impact on Land, Structure and Livelihood

It has been stated earlier in the Due Diligence Report that these subprojects are classified as category 'C' for involuntary resettlement in consideration of the ADB's Safeguards Policy Statement.

The resettlement monitoring review has been done periodically and it has been found that there is no negative impact, which requires mitigation measures as the construction activities are being done within the available RoW of roads. No land acquisition will be required under any subproject. There will be no loss of livelihood permanently but there will be temporarily disruption of livelihood of mainly roadside vendors/ shop keepers during civil work activity.

Based on the signed MOUs during DPR, again verified and consulted with the vendors/ shop keepers after the construction of the project road for their willingness about the project, they stated their assistance for the better roads and based on that their business and income have increased and again obtained signed consent after completion of the construction work of few shop keepers.

4.3 Verification of Community Structures (CPRs)

Impact on CPRs is critical from the point of view of community. In terms of CPR, only hand pumps will be impacted. The hand pump list recorded in the SDDR has been verified on ground in accordance with the detailed design. Also, efforts have been made to avoid impact on the hand pumps along the

road and a revised list has been prepared. List of Hand pumps affected are provided in Table-3 and the details of the same are attached in Annexure-1.

The provision of shifting of hand pumps have been incorporated in the civil contract and the hand pumps are being relocated in consultation with the community and Sarpanch of the concerned village.

5 CONSULTATION WITH THE STAKEHOLDERS

Public consultation/ meetings were organized with local communities including construction workers as well as women about the importance of the project for their betterment. In the meetings people were made aware about social issues, redressal of grievances, if any, advantages of the project and documented their suggestion regarding project.

The Public consultation were conducted to comprehend expectation from proposed project and also to understand the need and concerns of the local people including vulnerable and elderly population. The list of the participants were documented and photographed during consultation are attached as Annexure-2.

The list of consultations held with date, location and number of participants are presented in Table-4.

6 STATUS OF CONTRACTOR SOCIAL ASPECT COMPLIANCE

Contractors are maintaining compliance by following the social safeguard norms set by the Project. Contractors have been instructed to avoid loss of assets, livelihood of the people and safety of construction workers. The supervision consultant is responsible for ensuring the same.

6.1 Action on HIV/AIDS Awareness Prevention Campaigns

In order to make the people aware about the diseases, the HIV/AIDS Awareness and Prevention Campaign has been conducted at different Locations on sub-project roads. Awareness programs have been organised for construction workers' to provide counselling/ advisory on HIV/AIDS and provision of free condoms. Approximately 160 sets of condoms have been distributed in the program. Additionally, to promote and ensure healthy living, workers have been made aware about cleanliness, garbage disposal etc.

The details of HIV/AIDS Awareness Programme are reported in Table-5, attendance list is attached in Annexure-3, and Photographs of HIV/AIDS awareness is attached in Annexure-4.

7 GRIEVANCE REDRESS

It would be pertinent here to refer the Asian Development Bank's policy, which requires proper mechanisms for resolution of disputes that may arise from any aspect of the compensation and development process. The mechanisms should be "affordable and accessible," and third parties independent of the implementers should be available at the appropriate point in the process. The grievance procedure need to be simple, administered in the first instance at the local level to facilitate access, flexibility and open to various proofs taking into account the need for speedy, just and fair resolution of their grievances.

Grievances Redress Mechanism of the subproject is an integral part of Resettlement Framework. Resettlement Framework insists forming of a Grievance Redressal Committee (GRC) at the PIU level to deal with the disputes, complaints, receiving suggestions and facilitate timely implementation of the sub-project. Grievance Redress Mechanism has been established in two levels firstly Grievance Redress Committee (State Level) at MPRDC, Bhopal and secondly Grievance Redress Committee (Divisional Level) in each Division set up to monitor project implementation. The Details of State level and divisional level GRCs are attached in Annexure-5.

A complaint register is maintaining at each divisions and contractor camp for recording of complaints of local public and other stakeholders. During this reporting period, asked most of the people during public consultation and no any grievances were received from any of the community. When asked, most of the people told that they are not having any serious grievances against the project, while few grievances demure in nature are settled by Consultant Team and Divisional Manager in the beginning itself. no 9.

8 COMPLIANCE STATUS WITH RESPECT TO LOAN COVENANT

The compliance status with respect to loan covenant is presented in the Table-6 below:

Table-6: Compliance Status

	for work of equal value.		
6	Within six months of the Effective Date, the State shall have established a grievance redressal mechanism	GoMP	GRC has been Constituted

9 CONCLUSIONS

The project does not involve any land acquisition and involuntary resettlement. All road construction work is being undertaken within the available RoW. Also, Contractors have been clearly instructed to construct the road without affecting any boundary/ fencing of built up property. In event of any conflict, the contractors were advised to get such incidents to the knowledge of supervision consultant and the local MPRDC office well in advance to find out alternate solutions. In case any complaints are submitted, an effective and efficient Grievance Redress Mechanism is already in place for timely and sensible hearings and facilitates solutions. Also through effective consultation the participation of the community in the process will be ensured. This in turn will certify that a sustainable growth model is put into action benefitting the local residents and the users of the road after the completion of the Project.

The report confirms that the project does not have adverse social impacts associated with land acquisition and resettlement (LAR) and it is expected that the project will benefit entire population after the completion of the Project.
