Description	Introducing innovative and best practices in addressing food and nutrition security issues appears to be common interest of many DMCs. Many DMCs share the thrusts to (i) build resilience against climate change impacts in ANR sector and (ii) agribusiness development and market orientation of rural economy, which are reflected in Country Partnership Strategies (CPS). The proposed TA will assist DMCs in addressing their diverse thrusts for food and nutrition security through testing and introducing relevant international best practices and innovative approaches under ADB's ANR sector operations.	
Project Rationale and Linkage to Country/Regional Strategy	In order to build sustainable food and nutrition security in DMCs and augment ADB's engagement in this area, innovations and novel approaches need to be brought into ADB's operations. The proposed TA is to assist DMCs in introducing essential innovations, promising technologies and new business development approaches in agriculture and rural development (ANR) sector. It aims to support pipeline development through pilot testing, evaluating and upscaling, knowledge, technology and business models in key areas of ADB operations in ANR.	
Impact	Safe, nutritious, and affordable food for all in DMCs
