| Strategic Agendas | Inclusive economic growth |
| Drivers of Change | Governance and capacity development Knowledge solutions Partnerships Private sector development |
| Sector / Subsector | Health - Health sector development and reform |
| Gender Equity and Mainstreaming | Gender equity |
| Description | The proposed Integrated Health Care Development Project will help enhance health service delivery in Kazakhstan by using a combination of government financing and private sector resources to meet the rehabilitation and construction demand for health facilities. The project will be implemented from 2019 to 2015. |
| Project Rationale and Linkage to Country/Regional Strategy | At independence, in 1991, the health system in Kazakhstan faced significant challenges and emphasized inpatient hospital care. Hospital infrastructure was over supplied and not well maintained. Of the 877 inpatient and 7,276 outpatient facilities in the country, around 17% were built before 1965, and a further 47% were built between then and 1985. There is considerable rehabilitation and construction required to repair and/or modernize the facilities. The current Healthcare Development Program for 2016-2019 focuses on (i) developing a modern and integrated health system with primary health care at the core of the system and (ii) enhancing the quality and financial sustainability of health service delivery. Like the country's previous health strategy, it actively explores private sector participation including public-private partnerships (PPP), and increasing the use of innovation and modern technologies to more effectively develop and deliver health services. |

Business Opportunities

| | |
|---------------------|--|
| Consulting Services | ADB will select and engage consultants in accordance with ADB's Guidelines on the Use of Consultants (March 2013, as amended from time to time). Additional experts, both international and national, may be needed in the areas of project administration and management, finance, laboratory, public health, and behavioral change communication; and resources persons during workshops to be identified as needed. The consultants may procure equipment through shopping in accordance with ADB's Procurement Guidelines (April 2015, as amended from time to time). |
| Procurement | Due diligence to be undertaken during project preparatory technical assistance (PPTA) will cover financial management assessment, procurement risk assessment, and project level procurement risk assessments. The procurement components will include consulting services, equipment, studies, research, and other activities. |
