INITIAL POVERTY AND SOCIAL ANALYSIS

Country:	People's Republic of China	Project Title:	Air Quality Improvement in the Greater
			Beijing–Tianjin–Hebei Region—Green
			Financing Scale up Project
Lending/Financing	Project Loan/Financial	Department/	East Asia Department/Sustainable
Modality:	Intermediary Loan	Division:	Infrastructure Division

I. POVERTY IMPACT AND SOCIAL DIMENSIONS

A. Links to the National Poverty Reduction Strategy and Country Partnership Strategy

The project aims to help address emerging challenges in air quality improvement by scaling up clean energy technologies and systems applications in both the greater Beijing–Tianjin–Hebei (BTH) and Yangtze River Delta (YRD) regions.^a The project is aligned with the Government of the People's Republic of China's (PRC) action plan on air pollution prevention and control. The project supports the PRC's Thirteenth Five-Year Plan, 2016–2020, on environmental improvement and low-carbon transformation. The project also supports the Development-oriented Poverty Reduction for China's Rural Areas, 2011–2020, which promotes poverty reduction through environmentally friendly urbanization and balanced resource allocation to avoid disproportional impacts on the poor. The project is (i) aligned with the Country Partnership Strategy, 2016–2020 of the Asian Development Bank (ADB) for the PRC and ADB's paper on new partnership with upper middle-income countries; (ii) consistent with ADB's environment operational directions, which promote investing in natural capital to ensure environmental goods and services can sustain future economic growth;^b and (iii) in line with ADB's Strategy 2030, including tackling climate change, building resilience, enhancing environmental sustainability, making cities more livable, and accelerating gender equality.

B. Poverty Targeting	
----------------------	--

☐ Geographic (TI-G) ☐ Non-Income MDGs (TI-M1, M2, etc.)

In the greater BTH region and YRD region, there are 14.2 million people receiving the minimum living guarantee subsidy (MLGS).^c The impact of the project will improve the environment and reduce adverse health impacts in the greater BTH region and YRD region. In general, the poor and the vulnerable people are more at risk of health issues from air pollution as they normally have (i) less access to public information on air quality, (ii) facilities and equipment without any protection against air pollution, and (iii) little choice of working hours and places. Often, they cannot afford good medical treatments. The proposed project will indirectly benefit the poor and the vulnerable people with improved environment.

C. Poverty and Social Analysis

- 1. **Key issues and potential beneficiaries.** The proposed project will directly benefit enterprises that promote clean technologies and applications in agriculture, energy, transportation, and urban sectors. Improved air quality will indirectly benefit about 614 million people, including 10.4 million poor people in the BTH region and 3.8 million poor people in the YRD region who are receiving the MLGS. Broadly, the project will benefit the surrounding provinces and visitors to the greater BTH region and YRD region now suffering from deteriorated environment.
- 2. **Impact channels and expected systemic changes.** The subprojects financed under the proposed project will contribute to improving air quality in the BTH and YRD region. Better environment will have a significant impact on public health in terms of reduced health care and medicinal expenses. It will benefit particularly children and the elderly, who are the most vulnerable to cardiovascular and respiratory diseases. The project is designed to promote clean technologies and application by offering different financial products to energy savings companies and small and medium-sized enterprises. This may create new employment opportunities in green industries.
- 3. **Focus of due diligence.** Poverty and social analysis will be conducted and reported in a summary of poverty reduction and social strategy. Gender analysis as part of the poverty and social analysis will also be conducted.

II. GENDER AND DEVELOPMENT

- 1.What are the key gender issues in the sector and/or subsector that are likely to be relevant to this project or program? While labor force participation of women in the PRC remains relatively high at 61.5% (2017), it has been declining and occupational segregation increasing. This is also observed in the energy sector, in which women's share in this industry has fallen from 29.4% in 2008 to 27.3% in 2018.^d Data on women participation in clean energy entrepreneurship is lacking and the project will identify specific barriers for women entrepreneurs in the BTH and YRD regions to transition to clean energy and green production. ADB has started to take an active role in promoting gender equality practices in the green energy sector though previous projects, including Loan 3824-PRC: Shandong Green Development Fund^e and Loan 3879-PRC: Air Quality Improvement in the Greater Beijing—Tianjin—Hebei Region—Henan Cleaner Fuel Switch Investment Program.^f The project will build and expand on this work
- 2. Does the proposed project or program have the potential to contribute to the promotion of gender equity and/or empowerment of women by providing women's access to and use of opportunities, services, resources, assets, and participation in decision making?

⊠Yes ☐ No The project will assess the situation of gender issues in the project areas. A GAP containing the design features
will be prepared to ensure the project contributes to increasing gender equity. 3.Could the proposed project have an adverse impact on women and/or girls or widen gender inequality?
☐ Yes ☐ No
The project will have no adverse impact on women, and it is not expected to increase gender inequality. 4.Indicate the intended gender mainstreaming category:
☐ GEN (gender equity) ☐ EGM (effective gender mainstreaming)
SGE (some gender elements) SGE (no gender elements)
III. PARTICIPATION AND EMPOWERMENT
New the main stakeholders of the project, including beneficiaries and negatively affected people? Identify how they will participate in the project design.
The main stakeholders of the project include government bureaus in each province and municipality covered by the greater BTH and YRD region that play a part in environment improvement, energy savings companies and small- and medium-sized enterprises (SME). All stakeholders will be consulted, and participatory meetings
held to ensure their voices are heard during project preparation.
2.How can the project contribute (in a systemic way) to engaging and empowering stakeholders and beneficiaries, particularly, the poor, vulnerable and excluded groups? What issues in the project design require participation of the poor and excluded?
The local women's association will contribute input to the gender assessment and is included as a stakeholder in the GAP.
3. What are the key, active, and relevant civil society organizations in the project area? What is the level of civil society organization participation in the project design?
☐ Information generation and sharing (M) ☐ Consultation (M) ☐ Collaboration ☐ Partnership
All China Women's Federation will be consulted during project preparation to outline the issues related to women
and women-led SMEs. Other civil society organizations related to renewable energy and green
production/services will be further consulted during the project implementation for better design. 4.Are there issues during project design for which participation of the poor and excluded is important? What are
they and how shall they be addressed? Yes 🔲 No
IV. SOCIAL SAFEGUARDS
A. Involuntary Resettlement Category ☐ A ☐ B ☐ C ☒ FI
1. Dogs the program have the potential to involve involved and convicition reculting in physical and convenie

V. OTHER SOCIAL ISSUES AND RISKS
1. What other social issues and risks should be considered in the program design?
☑ Creating decent jobs and employment (M) ☑ Adhering to core labor standards (L) ☐ Labor retrenchment
☐ Spread of communicable diseases, including HIV/AIDS ☐ Increase in human trafficking ☐ Affordability
☐ Increase in unplanned migration ☐ Increase in vulnerability to natural disasters ☐ Creating political
instability Creating internal social conflicts Others, please specify
2. How are these additional social issues and risks going to be addressed in the program design?
Standard assurance on labor will be included in the project agreement. Impact on new employment opportunities
will be assessed.
VI. TRANSACTION TA OR DUE DILIGENCE RESOURCE REQUIREMENT
