

## CONTRIBUTION TO THE ADB RESULTS FRAMEWORK

No.	Level 2 Results Framework Indicators (Outputs and Outcomes)	Targets	Methods / Comments
1	Transmission lines installed or upgraded (km)	About 268 km	<p>This reflects the length of the transmission lines financed under the project by 2024, including</p> <ul style="list-style-type: none"> <li>(i) 126 km Barisal (North)-Gopalganj (North)-Faridpur 230 kV double circuit line</li> <li>(ii) 104 km Bogra (West)-Rohanpur 400 kV double circuit line</li> <li>(iii) 26 km Chapainawabganj-Rohanpur 132 kV double circuit transmission line</li> <li>(iv) 11 km line-in line-out connection from Barapukuria-Bogra (South) 230 kV transmission line</li> <li>(v) 1 km line-in line-out connection from Chowdala-Niamatpur 132 kV transmission line to Rohanpur substation</li> </ul>
2	Greenhouse gas emission reduction (tCO <sub>2</sub> -equivalent/year)	174,595 tCO <sub>2</sub> equivalent per year	Reduction based on estimated benefits from transmission loss reduction by 2024.

ADB = Asian Development Bank, tCO<sub>2</sub> = tons carbon dioxide, km = kilometer, kV = kilovolt.  
 Source: ADB estimates based on the development project proposals and feasibility studies.
