

CONTRIBUTION TO THE ADB RESULTS FRAMEWORK

Level 2 Results Framework Indicators (Output and Outcome)	Targets	Methods/Comments
GHG emission reduction	5 million tCO ₂ e to be avoided (per year from 2023)	GHG emission reduction is estimated based on the appraisal of representative subprojects. This estimate will need to be adjusted after completing the appraisal of all subprojects in the first batch for which onlending is approved. The measurement and verification of emissions reductions can be undertaken only after subprojects are commissioned.

ADB = Asian Development Bank, GHG = greenhouse gas, tCO₂e = tons of carbon dioxide equivalent.
