

## Indonesia: Eastern Indonesia Renewable Energy Project (Phase 1)

Project Name	Eastern Indonesia Renewable Energy Project (Phase 1)		
Project Number	51209-001		
Borrower/Company	PT Energi Bayu Jeneponto		
Country	Indonesia		
Location	Jeneponto, South Sulawesi		
Approval Number	3606/3606		
Type of ADB Assistance / Amount	Canadian Climate Fund for the Private Sector in Asia II (CFPS II)	USD 0.00	Approved
	Leading Asia's Private Infrastructure Fund (LEAP)	USD 0.00	Approved
	Ordinary capital resources	USD 0.00	Approved
Strategic Agendas	Environmentally sustainable growth Inclusive economic growth		
Drivers of Change	Private sector development		
Sector / Subsector	<b>Energy</b> - Renewable energy generation - wind		
Gender Equity and Mainstreaming	No gender elements		
Responsible ADB Department	Private Sector Operations Department		
Responsible ADB Division	Infrastructure Finance Division 2		
Responsible ADB Officer	Leusink, Juliette N.		
Project Sponsor(s)	Equis Group PT Global Pasifik Terbarukan		
Description	Phase 1 of the project will construct, operate and maintain a 72 MW wind power plant in Jeneponto (South Sulawesi).		
Objectives and Scope	<p>The Government of Indonesia has set ambitious targets to increase the share of energy supplied from renewable energy from 12% in 2013 to 23% in 2025. Therefore, the Ministry of Energy and Mineral plans to increase the capacity of grid power generation through new and renewable energy to 45 GW by 2025 and wind energy shall contribute 1.8 GW thereof. The Project contributes to the acceleration and expansion of private sector investments in clean energy infrastructure in Indonesia.</p> <p>The Project supports a leading private sector player (Equis Group) in its contributions towards this goal. The concessional financing from the Canadian Climate Fund for the Private Sector in Asia II (CFPS II) was needed to assist with implementation of one of the first utility scale wind power projects in Indonesia and to help the project sponsors to address its first mover costs and disadvantages as well as overcome various technical and regulatory challenges.</p>		
Linkage to Country/Regional Strategy	The project supports private sector infrastructure and environment, two of the five core pillars of the ADB strategy as reaffirmed by the Midterm Review of Strategy 2020. The project is consistent with the country partnership strategy for Indonesia, 2016-2019 by supporting the expansion of infrastructure and environment-friendly technologies for clean energy generation. The project is consistent with ADB's Energy Policy, which states that support for renewable energy projects will be prioritized and broadened.		

### Safeguard Categories

Environment	B
Involuntary Resettlement	C
Indigenous Peoples	C

### Summary of Environmental and Social Aspects

Environmental Aspects	To meet ADBs SPS requirement for an environment category B project, EBJ has undertaken the preparation of the Environmental and Social Impact Assessments (ESIA) for both wind power project and power transmission line which identified and assessed the project's environmental and social impacts and risks, and outlined appropriate measures to avoid, minimize and mitigate measures in the environmental management plan (EMP).The project site is neither a habitat of terrestrial or avian faunal species, nor it is situated along the global route of migratory birds. Short-term impacts during construction are likely to be limited within the project site and include dust, noise, traffic disturbance due to frequency of delivery trucks, solid waste generated by construction workers and related occupational health and safety risks.
Involuntary Resettlement	The project is classified as category C for involuntary resettlement. The project is sited on land purchased on a willing-buyer willing-seller negotiated settlement process. The project will not result in physical or economic displacement arising from involuntary resettlement activities.
Indigenous Peoples	The project is classified as category C for indigenous peoples. The project is sited on land, not identified as traditional lands or lands with customary rights. Communities residing near the project area are either from the dominant ethnic Makassar group or in-migrants.
Stakeholder Communication, Participation, and Consultation	

#### Timetable for assistance design, processing and implementation

Concept Clearance	05 Sep 2017
Due Diligence	
Credit Committee Meeting	29 Nov 2017 to 29 Nov 2017
Approval	29 Nov 2017
Last PDS Update	12 Feb 2018
