| Description | The project will support government's policy of strengthening resilience through rural livelihoods and village infrastructure by incorporating climate and disaster risk considerations in planning, design and implementation of community interventions. The project will also build capacities of villagers, township and village tract level administrations and strengthen mechanisms in delivering basic services and livelihood support to the poorest communities in rural Myanmar. It will adopt a proven community based development approach to deliver community infrastructure and livelihood projects to 25 poor townships covering 1,000 village tracts and an estimated 4,000 villages, covering approximately 600,000 households. | | | | | | | |
| Project Rationale and Linkage to Country/Regional Strategy | The project supports the government's RDSF (2014) that promotes resilient communities in pursuit of agricultural and rural development and advances implementation of the Myanmar National Framework for Community Disaster Resilience. The project is consistent with ADB's country partnership strategy (2017-2021) and is included in ADB's country operations business plan (2018-2020). | | | | | | | |
