

Philippines: Disaster Resilience Improvement Program

Project Name	Disaster Resilience Improvement Program	
Project Number	54022-001	
Country	Philippines	
Project Status	Proposed	
Project Type / Modality of Assistance	Loan	
Source of Funding / Amount	Loan: Disaster Resilience Improvement Program	
	Ordinary capital resources	US\$ 500.00 million
Strategic Agendas	Environmentally sustainable growth Inclusive economic growth Regional integration	
Drivers of Change	Governance and capacity development Knowledge solutions Private sector development	
Sector / Subsector	Finance - Insurance and contractual savings Health - Disease control of communicable disease Public sector management - Decentralization - Public administration	
Gender Equity and Mainstreaming	Effective gender mainstreaming	
Description	The proposed program will provide the government with rapid access to resources to initiate disaster response and early recovery efforts and/or to address the health and economic impacts of health-related emergencies with minimal delay. The program is aligned with the Philippine Development Plan (PDP), 2017 -2022 in supporting the integration of disaster resilience in various sectors of the economy and providing better access to healthcare, particularly in light of the vulnerabilities exposed by the coronavirus disease (COVID-19) pandemic.	
Project Rationale and Linkage to Country/Regional Strategy	The policy actions under the proposed program will strengthen disaster resilience of Philippine institutions and communities and the government's response to pandemics through three reform areas: policy and institutional arrangements for disaster risk management and health-related emergencies, including social protection, resilience of LGUs and physical assets to disaster and climate risks, and disaster risk financing. The outcome of the program is disaster resilience and pandemic response of institutions and communities strengthened, and financial preparedness for disasters improved. The DRIP supports medium-term pandemic response reforms beyond the government's immediate COVID-19 needs supported by the PHI CARES program.	
Impact	Vulnerability to climate change and disaster risk reduced, integration of disaster resilience in various sectors of the economy strengthened, and access to healthcare improved.	
Outcome	Disaster resilience and pandemic response of institutions and communities strengthened, and financial preparedness for disasters improved	
Outputs	1. Policy and institutional arrangements for disaster risk management and health-related emergencies, including social protection 2. Resilience of LGUs and physical assets to disaster and climate risks 3. Disaster risk financing
