

China, People's Republic of: Preparing the Yellow River Ecological Corridor and Climate Resilient Agriculture Development

Project Name	Preparing the Yellow River Ecological Corridor and Climate Resilient Agriculture Development	
Project Number	54027-001	
Country	China, People's Republic of	
Project Status	Proposed	
Project Type / Modality of Assistance	Technical Assistance	
Source of Funding / Amount	TA: Yellow River Ecological Corridor and Climate Resilient Agriculture Development	
	Technical Assistance Special Fund	US\$ 800,000.00
Strategic Agendas	Environmentally sustainable growth Inclusive economic growth	
Drivers of Change	Governance and capacity development Knowledge solutions Partnerships Private sector development	
Sector / Subsector	Agriculture, natural resources and rural development - Agricultural production	
Gender Equity and Mainstreaming	Effective gender mainstreaming	
Description	The proposed project will support the Government of the People's Republic of China's efforts to promote sustainable and resilient agricultural and food systems by addressing the constraints across three levels, the enabling environment (institutional, governance and policy), the production bases and the value chain to transform the way food is produced, processed and delivered to consumers. These systems will provide a more secure livelihood base for the rural population as the drivers for economic growth, higher rural incomes, and employment opportunities, meet increased food security demands and contribute to achieving the Sustainable Development Goals. Additional benefits will see a closing of the gap between rural and urban areas with increased livelihood and income opportunities, which will in part be supported by increased private sector agribusinesses as the new leaders in agricultural value chain development. The proposed project will be implemented in the Yellow River basin, through the participating seven provinces and two autonomous regions.	
Project Rationale and Linkage to Country/Regional Strategy	The government requested the Asian Development Bank (ADB) to assist in preparing the Yellow River Ecological Corridor and Climate Resilient Agriculture Development. The transaction technical assistance (TA) will help the government prepare the project, develop the capacity to implement the ensuing project and undertake due diligence in technical, safeguards, economic and financial, and poverty and social areas. The proposed project is included in ADB's lending program for 2022.
