ADB

Viet Nam: Binh Duong Water Treatment Expansion Project

Project Name	Binh Duong Water Treatment Expansion Project		
Project Number	54074-001		
Borrower/Company	Binh Duong Water Environment JSC		
Country	Viet Nam		
Location	Binh Duong, Tinh Binh Duong		
Approval Number	7651/3989		
Type of ADB Assistance / Amount	Japan	USD 8.00 r	nillion Approved
	Ordinary capital resources	USD 8.00 r	nillion Proposed
Strategic Agendas	Inclusive economic growth		
Drivers of Change	Gender Equity and Mainstreaming Partnerships Private sector development		
Sector / Subsector	Water and other urban infrastructure and services - Urban wa	ter supply	
Gender Equity and Mainstreaming	Effective gender mainstreaming		
Responsible ADB Department			
Responsible ADB Division			
Responsible ADB Officer	Hong, Won Myong		
Project Sponsor(s)			
Description	The Project involves the expansion by 100 million liters per da	v (MLD) water production capacity in the	Tan Hiep Water Treatment Plant.
Description	The Project involves the expansion by 100 million liters per da Viet Nam. This capacity will serve domestic consumption and expansion includes additional water intake pumps and 9 km o distribution network. The total project cost will be \$[46] millio downstream distribution network connection and project prep and works within the Tan Hiep Water Treatment Plan would be	industrial zones in Ben Cat Town, Tan Uye f raw water transmission pipes from the D n, of which the upstream water intake wor aration would cost \$[30] million and the a	n Town and Thu Dau Mot City. The ong Nai River and the downstream k and raw water transmission,
	Viet Nam. This capacity will serve domestic consumption and expansion includes additional water intake pumps and 9 km or distribution network. The total project cost will be \$[46] millio downstream distribution network connection and project prep	industrial zones in Ben Cat Town, Tan Uye f raw water transmission pipes from the D n, of which the upstream water intake wor aration would cost \$[30] million and the a	n Town and Thu Dau Mot City. The ong Nai River and the downstream k and raw water transmission,
Objectives and Scope	Viet Nam. This capacity will serve domestic consumption and expansion includes additional water intake pumps and 9 km o distribution network. The total project cost will be \$[46] millio downstream distribution network connection and project prep and works within the Tan Hiep Water Treatment Plan would be	industrial zones in Ben Cat Town, Tan Uye f raw water transmission pipes from the D n, of which the upstream water intake wor aration would cost \$[30] million and the a	n Town and Thu Dau Mot City. The ong Nai River and the downstream k and raw water transmission,
Objectives and Scope	Viet Nam. This capacity will serve domestic consumption and expansion includes additional water intake pumps and 9 km o distribution network. The total project cost will be \$[46] millio downstream distribution network connection and project prep and works within the Tan Hiep Water Treatment Plan would be	industrial zones in Ben Cat Town, Tan Uye f raw water transmission pipes from the D n, of which the upstream water intake wor aration would cost \$[30] million and the a	n Town and Thu Dau Mot City. The ong Nai River and the downstream k and raw water transmission,
Objectives and Scope Linkage to Country/Regional Strategy	Viet Nam. This capacity will serve domestic consumption and expansion includes additional water intake pumps and 9 km o distribution network. The total project cost will be \$[46] millio downstream distribution network connection and project prep and works within the Tan Hiep Water Treatment Plan would be	industrial zones in Ben Cat Town, Tan Uye f raw water transmission pipes from the D n, of which the upstream water intake wor aration would cost \$[30] million and the a	n Town and Thu Dau Mot City. The ong Nai River and the downstream k and raw water transmission,
Objectives and Scope Linkage to Country/Regional Strategy Safeguard Categories	Viet Nam. This capacity will serve domestic consumption and expansion includes additional water intake pumps and 9 km o distribution network. The total project cost will be \$[46] millio downstream distribution network connection and project prep and works within the Tan Hiep Water Treatment Plan would be	industrial zones in Ben Cat Town, Tan Uye f raw water transmission pipes from the D n, of which the upstream water intake wor aration would cost \$[30] million and the a	n Town and Thu Dau Mot City. The ong Nai River and the downstream k and raw water transmission,
Objectives and Scope Linkage to Country/Regional Strategy Safeguard Categories Environment	Viet Nam. This capacity will serve domestic consumption and expansion includes additional water intake pumps and 9 km o distribution network. The total project cost will be \$[46] millio downstream distribution network connection and project prep and works within the Tan Hiep Water Treatment Plan would be	industrial zones in Ben Cat Town, Tan Uye f raw water transmission pipes from the D n, of which the upstream water intake wor aration would cost \$[30] million and the a	n Town and Thu Dau Mot City. The ong Nai River and the downstream k and raw water transmission, dditional water production capacity
Objectives and Scope Linkage to Country/Regional Strategy Safeguard Categories Environment Involuntary Resettlement	Viet Nam. This capacity will serve domestic consumption and expansion includes additional water intake pumps and 9 km o distribution network. The total project cost will be \$[46] millio downstream distribution network connection and project prep and works within the Tan Hiep Water Treatment Plan would be	industrial zones in Ben Cat Town, Tan Uye f raw water transmission pipes from the D n, of which the upstream water intake wor aration would cost \$[30] million and the a	n Town and Thu Dau Mot City. The ong Nai River and the downstream k and raw water transmission, dditional water production capacity B
