Description	The proposed knowledge and support technical assistance (TA) will support the development of a scalable pipeline of infrastructure projects that can attract private sector investments and generate efficiency gains through the screening of new and existing projects in the deal pipelines developed by the developing member country (DMC) governments and their public sector agencies (PSA) and the provision of capacity building-related assistance, including knowledge sharing and training events in the Central and West Asia (CW) region. The TA will also help develop credible concepts for the: (i) introduction and/or strengthening of sustainable and integrated financing solutions, and (ii) deployment of efficient and responsive ADB transaction support, for the purposes of augmenting public private partnerships (PPP) and private sector participation (PSP) for the delivery of infrastructure projects in the CW region.								
Project Rationale and Linkage to Country/Regional Strategy	The TA responds directly to ADB's Strategy 2030 which identifies private sector operations, including PPPs, and strengthening of the ADB's knowledge services as key operational priorities. The TA is also consistent with the ADB's PPP Operational Plan 2012-2020, which requires the ADB's regional departments to play the leadership role in advocating PPPs within DMCs.								
Impact	Sustainability of private sector investments in infrastructure projects in CWRD's DMCs improved. DMC's' capacity to plan, develop and sustainably finance infrastructure using PSP/PPPs modalities increased. ADB' knowledge services strengthened.								
Outcome	CWRD DMCs' capacity in identification, preparation and financial support of sustainable and gender sensitive infrastructure PSP/PPP projects improved.								
Outputs	PSP/PPP projects identified and initially screened PSP/PPP financing solutions and transaction support developed. Transaction focused PPSP/PPP knowledge sharing, training and capacity building activities carried out.
