Description	<p>The proposed TA will contribute to strengthening selected DMC public financial management (PFM) and procurement systems in alignment with Strategy 2030 Operational Priority 6 - Strengthening Governance and Institutional Capacity. One of the three strategic pillars of successful OP6 outcomes is strengthening country systems and standards with a focus on improving the efficient and effective implementation of ADB operations, both sovereign and non-sovereign. Moreover, section C4 (Governance) of the Operations Manual (OM) identifies PFM and procurement as key governance priorities required to be included in Country Partnership Strategy (CPS) risk assessment and risk management plans (RAMP). Strategy 2030 also recognizes that the development of strong country governance and institutional capacity fosters public and private confidence, thus providing an environment conducive to private investment, including through the increased engagement of ADB's private sector operations.</p> <p>Given their inherent weak institutions, the proposed KSTA will prioritize support to low-income countries (LICs), fragile, conflict-affected and emergency situation (FCAES) countries, and small islands developing states (SIDS), as these countries have considerable need for institutional capacity strengthening.</p>
