

## China, People's Republic of: Henan Tianlun Resilient Energy Supply Project

Project Name	Henan Tianlun Resilient Energy Supply Project
Project Number	54359-001
Borrower/Company	China Tian Lun Gas Holdings Limited Henan Tian Lun Gas Group Limited
Country	China, People's Republic of
Location	Nation-wide
Approval Number	
Type of ADB Assistance / Amount	Ordinary capital resources USD 50.00 million Proposed
Strategic Agendas	Inclusive economic growth
Drivers of Change	Gender Equity and Mainstreaming Private sector development
Sector / Subsector	Energy - Oil and gas transmission and distribution
Gender Equity and Mainstreaming	Effective gender mainstreaming
Responsible ADB Department	
Responsible ADB Division	
Responsible ADB Officer	Clancy, Shane
Project Sponsor(s)	China Tian Lun Gas Holdings Limited
Description	HTL is a private sector gas distribution company operating in the PRC. " The project will provide up to USD 50 million equivalent in USD or CNY for a senior loan facility to fund increased working capital needs to ensure piped natural gas supplies to end users.
Objectives and Scope	The loan will support HTL's continuing operations of natural gas delivery for approximately 510,000 residential and business customers in Henan Province. This will support that HTL and five operating subsidiaries can ensure timely uninterrupted procurement of upstream energy supplies for onward city distribution to end users through existing distribution networks within each subsidiary's existing operating footprint.
Linkage to Country/Regional Strategy	The project is aligned with ADBs Strategy 2030 Operational Priority 2 (Accelerating Progress in Gender Equality) and Operational Priority 4 (Livable Cities). HTL's Single Mother Care Action program, which will be implemented until the end of 2023 in line with the agreed ADB Gender Action Plan, directly addresses the economic and social welfare of single-mother households supplied by HTL's distribution network. Ensuring the supply of natural gas will mitigate urban air pollution and enhance the resilience of cities as they continue to recover from the economic impacts of the pandemic. The provision of gas to meet basic energy demand contributes to building livable cities by benefiting households through uninterrupted access to energy in urban areas and surrounding communities. No climate mitigation or adaptation financing has been estimated for this project.
