Country/Regional Strategy million is provided to eligible expenditure. Impact and that there are strategy Project Outcome Description of Outcome	mprovements in recent years, Georgia's public health system remains vulnerable to the health burden posed by the c and crisis. The health sector capacity is limited, physical health infrastructure is inadequate, and there is a lack of sonnel to respond to the COVID-19 pandemic. Out-of-pocket spending has been declining after the introduction of the e Program in 2013, but still accounted for 54.8% of total health spending in 2017. This points to an underlying income groups, which are particularly at risk as COVID-19 unfolds. About 17.5% of Georgia's population is older than & of the population is older than 80 years. This poses additional challenges in dealing with the COVID-19 emergency on ther countries suggests that the older populations, especially those with pre-existing health conditions, are at higher he disease and, if infected, often require more intensive care. bola Health Security Index, Georgia's health capacity in clinics, hospitals and community care centers scores low: 18.3 argely due to the deficit of nursing staff and low hospital bed density. Georgia has only 47.3 nurses per 10,000 pospital beds per 10,000 population compared with neighboring countries such as Armenia which has 42 beds per Critical skills gaps exist in Georgia's health care sector and a number of health workers and laboratory staff have to be or respond to COVID-19. Some 62% of frontline medical doctors, who are higher risk of infection, are women. on of virus transmission rate since September 2020, Georgia's health system is increasingly overwhelmed. According to second week of November, about 4,500 beds in more than 30 hospitals were already occupied by COVID-19 patients, were available. The Ministry is working to increase the number of infected health workers surpassed 1,700 or 5% of reted as of end October 2020. More resources are needed for management of severe cases, prevention of onward virus leviation of strains on health-care services. The government needs support to augment its capacity and constraine
Project Outcome Description of Outcome	istantial impact of COVID-19 and the government's constrained resources, it is recommended that an amount of \$2.5 to the government as a grant financed by the APDRF, and up to 30% of the grant amount can be used retroactively for the sincurred prior to grant effectiveness, but not earlier than 22 October 2020. and Disaster Risk Management Division (SDCD), Sustainable Development and Climate Change Department (SDCC) and, in consultation with the Health Sector Group, SDCC confirmed that the conditions for assistance have been met sufficient balances available under the APDRF to meet the proposed grant (attachments 5 and 6).
