| Country/Regional Strategy Collaboration are Achieving the mambitions will redevelopment, in planning, public Facilitating accessory success of mitigular project Outcome Project Outcome Description of Outcome Implementation Progress Description of Project Outputs Status of Implementation Progress (Outputs, Activity Geographical Location Safeguard Categories Environment Involuntary Resettlement Indigenous Peoples | ogram constitutes a multi-sector approach to support ambitious climatems. It seeks to help the Government enhance the policy and regulator ally Determined Contribution (NDC) under the Paris Agreement. The threation, and finance closely mirror the key elements of the NDC, in pursu climate- and disaster-resilient development. The program is aligned with Development Plan 2017-2022, the Asian Development Bank (ADB | ry environment for the effective implementation of the ree reform areas of the program climate change uit of post-pandemic green growth based on low carbon, ith the national policy framework governing climate | |
| Project Outcome Description of Outcome Progress Toward Outcome Implementation Progress Description of Project Outputs Status of Implementation Progress (Outputs, Activity Geographical Location Safeguard Categories Environment Involuntary Resettlement Indigenous Peoples | Subject to the establishment of specific legislation and enabling mechanisms, the NDC offers a unique opportunity to mobilize public-private collaboration around climate action. The implementation of the NDC requires a comprehensive and concerted effort across multiple sectors. Achieving the mitigation targets will require action across the energy, transport, industry, and agriculture sectors, while meeting the adaptation ambitions will require action in agriculture, forestry, coastal ecosystems, natural capital, environmental stability, water management, urban development, industry, infrastructure, services, health and human security. The main drivers of change will be the policy agenda, decentralized planning, public and private investment, research and technology, knowledge flows, and sustainable production and consumption practices. Facilitating access to green and sustainable finance and establishing clear roadmaps to catalyze green investments will be fundamental for the success of mitigation and adaptation efforts. | | |
