

Regional: Support to Improve Cross-Border Railway Services between Armenia and Georgia

Project Name	Support to Improve Cross-Border Railway Services between Armenia and Georgia						
Project Number	55329-001						
Country	RegionalArmeniaGeorgia						
Project Status	Active						
Project Type / Modality of Assistance	Technical Assistance						
Source of Funding / Amount	TA 6861-REG: Support to Improve Cross-Border Railway Services between Armenia and Georgia						
	Technical Assistance Special Fund	\$ 225,000.00					
Strategic Agendas	Inclusive economic growth Regional integration						
Drivers of Change	Governance and capacity development Knowledge solutions Private sector development						
Sector / Subsector	Transport - Rail transport (non-urban)						
Gender Equity and Mainstreaming	No gender elements						
Description	This SSTA will assess the economic potential of the Tbilisi-Yerevan rail corridor and identify viable investment interventions. It analyses on (i) rail freight and passenger demand assessment, including competition from other modes of transportation; (ii) pure current freight and passenger services; (iii) infrastructure investment needs to enable competitive rail services; (iv) required rinvestment; (v) connectivity options and obstacles on the Armenian and Georgian railway networks; and (vi) required organization building, in particular in terms of business development and marketing.	oricing of olling stock					
Project Rationale and Linkage to Country/Regional Strategy	Railways have the potential to transform a country from being landlocked into being land-linked and facilitate increased region cooperation and integration. Armenia's railway sector is significantly contributing to maintaining the competitiveness of the consignificant modal share of approximately 27%. The country's railway sector involves many stakeholders, the main one being the Caucasus Railway (SCR) in Armenia and Georgian Railway (GR) in Georgia. Besides SCR and GR, these include the mining industrieight forwarding and logistics sector, the tourism sector, and municipalities served by the rail passenger services. The Yerevan-Tbilisi corridor is a vital economic axis. The combined population of the two capitals is 2.2 million, and the corridor entry gate for land-traveling tourists. The distance from Yerevan to Tbilisi on the existing railway is 370 km which is within the competitive distance-range for passenger train services. Current technical performance of the Armenian railway is low the averages 30 km/hour except for an express service between Yerevan and Gyumri that averages 70 km/hour. Travel to	untry, with a ne South stry, the or is the main ideal rage					
	Yerevan and Tbilisi in Georgia is currently 5-6 hours by road and around 10 hours by rail.						
Impact	Yerevan and Tbilisi in Georgia is currently 5-6 hours by road and around 10 hours by rail. Efficient, modern, demand-driven and affordable railway transport developed.
