In its initial phase, i will address systemic gaps in existing ADB and DMC disaster risk management capacity by establishing technical guidance for geophysical parameters are according to the properties of the project				
Project Rationale and Linkage to Di Country/Regional Strategy Cc GA AL th dif	vill address systemic gaps in existing ADB and DMC disaster risk management capacity by establishing technical guidance for geophysicazard risk management and preparing country studies on disaster resilient infrastructure standards in priority Group A countries. Disasters pose a substantial threat to sustainable socioeconomic development in Asia and the Pacific. Comprehensive approaches are needed to strengthen ADB and DMC disaster risk understanding and deliver resilient investments.				
Country/Regional Strategy Co Ge AL th. diti so	Comprehensive approaches are needed to strengthen ADB and DMC disaster risk understanding and deliver resilient investments.				
	Disasters pose a substantial threat to sustainable socioeconomic development in Asia and the Pacific. Comprehensive approaches are needed to strengthen ADB and DMC disaster risk understanding and deliver resilient investments. Geophysical hazards are not systematically addressed in DMC programming. ADB's 2021 Disaster and Emergency Assistance Policy emphasizes that risk management begins with risk reduction; and acknowledges that DMCs have differentiated risk profiles and, thus, opportunities for enhanced resilience. The TA will directly support improved differentiated risk information and disaster risk reduction by (i) developing best practice technical guidance and innovative knowledge solutions for geophysical hazard assessment and management, (ii) assessing the current landscape of geophysical hazard resistant codes and standards in priority Group A DMCs, and (iii) developing action plans and convening regional dialogue to enhance country systems and standards for resilient infrastructure and urban development.				
Impact Im	mpact of ADB's support to DMCs to strengthen resilience to disasters enhanced				
Project Outcome					
Description of Outcome	ADB investments that are informed by comprehensive disaster risk assessment and incorporate disaster resilience measures increased

Business Opportunities					

months of international and 6 person-months of national consultants will be recruited through individual consultant selection. Output-based contracts will be

considered where appropriate. Resource persons will likewise be engaged to support the delivery of knowledge-sharing events under the TA.

Procurement (for workshops, training, seminars, and conferences) will follow ADB's Procurement Policy (2017, as amended from time to time).
