

India: ABIS Climate-Resilient Aquaculture Value Chain Project

Project Name	ABIS Climate-Resilient Aquaculture Value Chain Project	
Project Number	56123-001	
Borrower / Company	ABIS Exports (India) Private Limited	
Country / Economy	India	
Location		
Type or Modality of Assistance	e Loan Ordinary capital resources	USD 16.00 million Approved
Strategic Agendas	Environmentally sustainable growth Inclusive economic growth	
Drivers of Change	Private sector development	
Sector / Subsector	Agriculture, natural resources and rural development / Agro-industry, marketing, and trade	
Gender Equity and Mainstrear	Effective gender mainstreaming	
Responsible ADB Department	Private Sector Operations Department	
Responsible ADB Division Office of the Director General, PSOD		
Responsible ADB Officer	Dora, Tushna	
Project Sponsor(s)		
Description		
Objectives and Scope	The project will finance capital expenditure for the construction of a new, micro fish-feed plant. The specialized micro fish feed, which is new to the market, will support farmers in adopting higher-efficiency fish feed, which in turn will increase food production and contribute to increased farmer income and food security in India. More efficient delivery of nutrients to the fish will result in increased agricultural productivity, reduced water contamination, and improved resilience to climate change. The project will also support gender inclusion. The project is fully aligned with the Government of India's goal of enhancing fish production, resulting in increased export earnings and employment. The TA will focus on building climate-resilient fish farming practices and financial literacy of 2,700 farmers, including at least 540 women farmers.	
Linkage to Country/Regional S	Strategy The project is consistent with ADB's Strategy 2030 Operational Plan for Priority 5, pesticides contaminates soil, water, and marine resources; and that smallholder for and markets. The plan calls for ADB to mobilize investments to 'sustainably incread quality farm inputs The project is also aligned with the Operational Plan for Privational Plan for Priority 5, pesticides contaminates soil, water, and marine resources; and that smallholder for Privational Plan for Priority 5, pesticides contaminates soil, water, and marine resources; and that smallholder for Privational Plan for Priority 5, pesticides contaminates soil, water, and marine resources; and that smallholder for Privational Plan for Privationa	armers have limited access to modern inputs, financing, ase farm productivity and incomes_ and promote 'better-
