

Project Outcome

Regional: Program to Enhance Capabilities of Sovereign Institutions in the Central and West Asia Region to Introduce Innovative Financing Modalities

Project Name	Program to Enhance Capabilities of Sovereign Institutions in the Central and West Asia Region to Introduce Innovative Financing Modalities
Project Number	56136-001
Country / Economy	Regional Kyrgyz Republic Pakistan Tajikistan Uzbekistan
Project Status	Active
Project Type / Modality of Assistance	Technical Assistance
Source of Funding / Amount	TA 10041-REG: Program to Enhance Capabilities of Sovereign Institutions in the Central and West Asia Region to Introduce Innovative Financing Modalities
	Technical Assistance Special Fund US\$ 3.13 million
Strategic Agendas	Inclusive economic growth
Drivers of Change	Gender Equity and Mainstreaming Governance and capacity development Knowledge solutions Partnerships Private sector development
Sector / Subsector	Public sector management / Reforms of state owned enterprises
Gender Equity and Mainstreaming	Some gender elements
Description	The knowledge and support technical assistance (TA) program will address interest expressed by the governments of the Asian Development Bank (ADB) developing member countries (DMCs) of Central and West Asia in leveraging private capital to address gaps in the financing of the Sustainable Development Goals (SDGs) using innovative financing modalities. The TA will focus on advising and assisting sovereign institutions_and their stakeholders_on strengthening their institutional capabilities to (i) develop a better understanding of various innovative financing modalities being implemented globally to correct specific market failures, realize opportunities, and overcome institutional limitations; (ii) validate the use of complex financing modalities and de-risking mechanisms to tap new sources of private financing for SDG financing gaps; (iii) strengthen the role of sovereign institutions in enabling the flow of private institutional capital for economic additionality, such as high social impact investments; (iv) facilitate novel partnership and contracting arrangements with the private sector, such as outcome-based financing; (v) explore innovative financing instruments to transfer disaster risks at the central and regional levels; and (vi) explore approaches and modalities that encourage the blending of other sources of capital (official development assistance, and private and other similar sources) with traditional forms of ADB financing, such as sovereign loans funded by ordinary capital resources and/or grants_The TA is aligned with ADB's Strategy 2030 vision of supporting DMCs in accelerating the development of approaches to catalyze private financing for achieving the SDGs_The TA supports the implementation of SDG 9 and SDG 17.
Project Rationale and Linkage to Country/Regional Strategy	Limited fiscal resources of developing member countries of ADB's Central and West Asia region for financing the Sustainable Development Goals. To achieve the operational priorities of ADB's Strategy 2030, sovereign institutions in Central and West Asia DMCs must accelerate the mobilization of resources for SDG financing. The impact of the coronavirus disease (COVID-19) pandemic has been felt most acutely by some of the most vulnerable populations, and may delay the achievement of the SDGs in these DMCs by several years. The immediate consequences of COVID-19 have been rising public debt, increased sovereign risk, rating downgrades, capital outflow, reduced tax revenues, a marked drop in overseas remittances, and the reversal of social policy mandates. For women and girls, COVID 19 has further exacerbated gender inequalities. Developing economies in Centra and West Asia have been further strained by the invasion of Ukraine. Pakistant's economic growth is expected to be slow in FY2023 (ending 30 June 2023) amid ongoing policy tightening, devastating floods, and a high inflation rate. Furthermore, because of the global investment and remittances, economic growth in Tajikistan and Uzbekistan is projected to be slower in FY2022 than in FY2021. Weak sovereign institutional mechanisms. The COVID-19 pandemic has further exacerbated the challenges of mobilizing private sector funds for SDG-related investments. The challenges for sovereign institutions in operationalizing or scaling innovative financing modalities in public-private partnership for SDG-related sectors that are public service in nature, such as health care and education, include (i) ineffective cooperation modalities between private and public institutions. Liii diverse organizational set-ups and management techniques, (iii) varied incentive mechanisms and risk return metrics, (iv) diverse legal provisions and governance mechanisms, and (v) inadequate oversight from public sources. Insufficient links to private sector resources to address financing gaps.
Impact	Institutional capacity of Central and West Asia DMCs enhanced and financial resources for development mobilized.

Progress Toward Outcome Implementation Progress Description of Project Outputs Institutional capability of sovereign institutions for adopting innovative financing modalities for the SDGs enhanced. Knowledge support to sovereign institutions on innovative financing modalities provided Status of Implementation Progress (Outputs, Activities, and Issues) Geographical Location Kyrgyz Republic - Nation-wide; Pakistan - Nation-wide; Uzbekistan - Nation-wide;	Description of Outcome	Capacity of Central and West Asia DMCs to facilitate the mobilization of capital for financing the SDGs mproved
