

CONTRIBUTION TO THE ADB RESULTS FRAMEWORK

No.	Level 2 Results Framework Indicators (Outputs and Outcomes)	Targets	Methods/Comments
Transport			
1.	Use of roads built or upgraded (average daily vehicle-km in the first full year of operation, million)	1.15	Based on projected traffic flow from travel demand forecast model and can be evaluated through traffic counts in the project completion report.
2.	Expressway and national highways built or upgraded (km)	39	Based on assessments during feasibility studies and preliminary designs and can be evaluated through a final survey in the project completion report.
3.	Provincial, district, and rural roads built or upgraded (km)	84	Based on assessments during feasibility studies and preliminary designs and can be evaluated through a final survey in the project completion report.

km = kilometer.

Note: In addition the project will also upgrade 44 km of inland waterway which will handle 186 thousand average daily ton-km in the first full year of operation.
