

CONTRIBUTION TO THE ADB RESULTS FRAMEWORK

No.	Level 2 Results Framework Indicators (Outputs and Outcomes)	Targets	Methods/Comments
1.	Greenhouse gas emission reduction (tCO ₂ -equiv/year)	20,000 tCO ₂ equivalent per year	GHG Emissions Reduction = RE Generation*Emission factor = 32,500 MWh/yr*0.617 tCO ₂ e/MWh = 20,000 tCO ₂ e per year

ADB = Asian Development Bank, EPSO = Electro Power Systems Operator, HVEN = High Voltage Electrical Networks Closed Joint-Stock Company, tCO₂e = tons carbon dioxide equivalent.
