Financial Management Assessment

1 Summary

1. The financial management assessment (FMA) was carried out in accordance with ADB's Guidelines for the Financial Management and Analysis of Projects¹ and the publication Financial Due Diligence – A Methodology Note². The instrument used for the assessment was Asian Development Bank's (ADB) financial management assessment questionnaire (FMAQ). The completed FMAQs are presented in attachment 1.

2. Zixing City Government (ZCG) is the executing agency (EA) of the project, and has extensive experience in the preparation and implementation management of projects funded by the World Bank. A new Zixing Project Management Office (ZPMO) has been established within the ZCG. It is responsible, on behalf of ZXG, for daily coordination and management of project preparation and implementation. Zixing City Finance Department (ZCFD) will be responsible, on behalf of ZCG, for financial management of the project, including ADB loan application, payment and repayment, providing counterpart fund for the project and so on.

3. Zixing Urban and Rural Environmental Protection Investment and Financing Center (ZIFC) is the implementation agency (IA) of the project. It is responsible for implementation of all subcomponents in Zixing city. It is an institutional agency which was established in 2014.

4. The scope of the FMA is to assess the financial management capacity of ZCFD and ZIFC. The assessment includes review of fund-flow arrangements, staffing, accounting policies and procedures, internal and external auditing arrangements, reporting and monitoring, and financial information systems and so on.

5. ZCFD has adequate financial staff, accounting policies and procedures, internal and external controls, audit arrangements, and reporting system. It has experience on World Bank and ADB projects. Therefore, proper training and support will still be required on ADB policies and procedures, including procurement, disbursement and project management.

6. ZIFC has sound financial management systems which can meet the minimum financial management requirements for their current activities. There are 4 staff in the financial department. They have experience with local large capital projects and foreign-funded projects. The proper training and support will also be required at IA level on ADB policies and procedures, including procurement, disbursement and project management. Therefore, external financial management assistance will be required.

7. ZCFB has sound financial management systems which can meet the minimum financial management requirements for their current activities. There is 5 staff in the Foreign Economic and Trade Division. They have experience on financial management of local large capital projects and foreign-funded projects. The proper training and support will also be required at EA level on ADB policies and procedures, including procurement, disbursement and project management.

8. The Hunan Provincial Finance Department (HPFD) will operate and administer the imprest account of the project and will be responsible for withdrawal applications and

withdrawals of the ADB loan. HPFD has many years' experience in these activities and in the general financial oversight of ADB and WB funded projects.

9. Specifically the FMA recommends capacity development measures to ensure that the EA, IA and PIUs are able to meet the project's financial management requirements. It was agreed that the EA, IA and PIUs will strengthen their financial management capability to manage the project, including (i) undertaking training, particularly on ADB policy and procedural requirements; and (ii) seeking external financial management assistance as needed.

10. The overall financial management risk-rating of the project, after considering mitigating measures, is low. The identified financial management risks will be closely monitored during project implementation. Besides the risks mentioned in Table 1 and Table 2 below, no other significant weaknesses were identified.

2 Executing Agency

11. Zixing City Government (ZCG) is the executing agency (EA) of the project, and has extensive experience in the preparation and implementation management of projects funded by the World Bank, ADB.

12. A new project management office (PMO) has been established within the ZCG, which is responsible, on behalf of ZCG, for daily coordination and management of project preparation and implementation.

13. Zixing City Finance Department (ZCFD) will be responsible, on behalf of ZCG, for financial management of the project, including ADB loan withdrawal applications, payments and repayment, providing counterpart funds for the project and so on. There are 5 persons in the Foreign Economic and Trade Division, who are responsible for project supervision and management, and fund accounting.

14. ZCFD has adequate financial staff, accounting policies and procedures, internal and external controls, audit arrangements, and reporting systems. It has experience on World Bank, ADB and foreign government projects³. The proper training and support will be required on ADB policies and procedures, including procurement, disbursement and project management.

15. The Hunan Provincial Finance Department (HPFD) will operate and administer the imprest account of the project and will be responsible for withdrawal applications and withdrawals of the ADB loan. HPFD has many years' experience in these activities and in the general financial oversight of ADB and WB funded projects.

3 Implementing Agency and Project Implementation Unit

16. Zixing Urban and Rural Environmental Protection Investment and Financing Center (ZIFC) is the implementation agency (IA) of the project. It is responsible for implementation of all subcomponents in Zixing city. It was established in 2014 and is a government institution. It is not

³ The projects completed include WB-financed Second Red Soil Development Project, WB-financed national forestation project; the projects under construction include WB-loaned Infectious diseases and endemic diseases control, WB forest restoration and development project; the project under the beginning of the implementation includes ADB-financed Hunan Vocational Education Project.

responsible for asset's operating of subcomponents in Zixing. Historical financial statements of ZIFC are shown in attachment 2.

17. The evaluation of the ZIFC included a review of their legal status, existing organizational structure, current management regulations and institutional arrangements to undertake the Project. The FMA also included a review of proposed funds flow arrangements, staffing, accounting policies and procedures, internal and external audit, reporting and monitoring and information systems.

3.1 Organization Legal Status and Institutional Arrangement

18. ZIFC was established in 2014, which is responsible for construction of Dongjiang Lake ecology environmental protection project. Therefore, it has experience with local large capital projects and has no foreign-financed projects. Its current organization structure can meet project management requirements. In order to strengthen the project financial management, the two persons from ZCFD, who have financial management experiences of the World Bank and ADB is designated as financial manager of the financial department and chief accountant of the ADB project.

19. ZCFD is a department of the ZCG and has implementation experience of WB and ADB projects. Its current organization structure can meet project management requirements. The persons who involved into financial management of the ADB project have experience of WB and ADB projects' implementation.

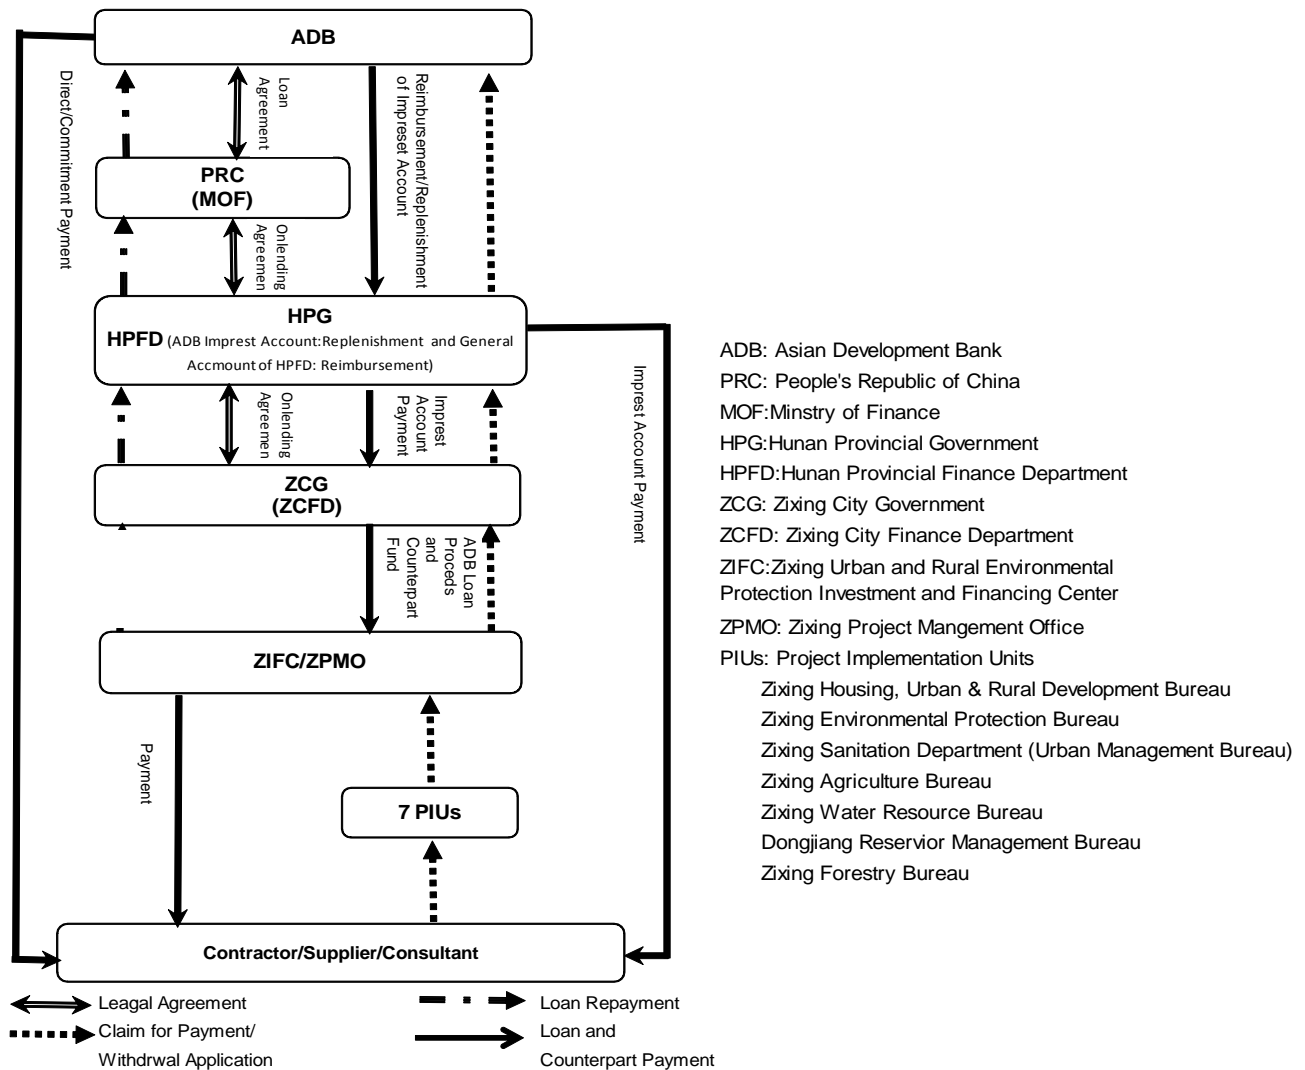

3.2 Fund Flow Arrangement

20. An imprest account for disbursing the ADB loan will be established in HPDF, who will be responsible for application and management for ADB loan funds and disburse the funds including counterpart funds based on project progress. ADB loan proceeds will be disbursed in accordance with the procedures set out in ADB's Loan Disbursement Handbook (2007, as amended from time to time), and detailed arrangements agreed upon between the Government and ADB. Pursuant to ADB's Safeguard Policy Statement (2009) (SPS), ADB funds may not be applied to the activities described on the ADB Prohibited Investment Activities List set forth at Appendix 5 of the SPS. All financial institutions will ensure that their investments are in compliance with applicable national laws and regulations and will apply the prohibited investment activities list to all the project contracts wholly or partly financed by ADB.

21. ZCFD, PMO and the ZIFC will be involved in fund withdrawal applications and disbursement during the project implementation. There are 7 project implementation units (PIUs) which will be involved into project implementation construction management. Therefore, they are also involved into the withdrawal application process. They are Zixing Housing, Urban & Rural Development Bureau, Zixing Environmental Protection Bureau, Zixing Sanitation Department (Urban Management Bureau), Zixing Agriculture Bureau, Zixing Water Resource Bureau, Dongjiang Reservoir Management Bureau and Zixing Forestry Bureau.

22. The proposed funds flow arrangement is shown in Figure 1.

Figure 1: Fund Flow Diagram of the Project

3.3 Staffing

23. There are 4 and 5 financial staff in the Financial Department of ZIFC and ZCFD respectively. They have sound financial management skills and comply with ADB minimum standards for project accounting and financial management. In order to strengthen financial management capacity of the ADB project, the two persons from ZCFD with more financial management experience of World Bank and ADB project management are designated as the financial manager and chief accountant of financial department in ZIFC. Therefore, ZIFC has experience of financial management for local large capital projects and foreign-funded project, such as World Bank and ADB project. The person of ZCFB, who will be involved into the ADB project, has experience of financial management for World Bank project and on-going ADB project. But they still think it is proper that the finance and technical staff who will be assigned to the Project should be trained in ADB disbursement guidelines and procedures, project accounting requirements, project and contract management, financial monitoring and report preparation.

3.4 Accounting Policies and Procedures

24. The ZIFC are establishing an accounting system that will maintain separate project accounts and records by funding source for all expenditures incurred on the project. Subsidiary ledgers are adequate for the reconciliation of accounts with the general ledger. All annual financial statements and accounting file inventory books would be stored and retained on a permanent basis, and other accounting files and records are maintained in retention period of 3, 5, 10, 15, or 25 years depending on the nature of the files according to the regulation of Ministry of Finance. All accounting records and files are accessible by authorized users, and are available for audit. The consolidated project financial statements will be prepared annually in accordance with applicable PRC laws, guidelines and regulations,⁴ and these are generally consistent with internationally recognized accounting principles and practices.

25. **Segregation of duties.** ZIFC has established clear segregation in the allocation of financial management duties.

26. **Budgeting system.** ZIFC has sound budget management system. The ADB project budgets will be prepared annually by the responsible project persons, and will include physical and financial targets. The ZIFC' higher level managers will approve the final budget, which will then be forwarded to higher level agencies, ZPMO and ZCFD for their endorsement.

27. Budget monitoring reports present a comparison between budgeted and actual amounts, and highlight budget variances.

28. **Payments.** Processing of the project payment invoices involves comparison of quantities, prices and terms in purchase orders and those reported in the receipts. All invoices are stamped PAID, dated, reviewed, and approved as well as clearly marked for account code assignment. Controls are in place for the preparation of payroll while changes to the payroll are properly approved by the relevant Department.

29. **Policies and procedures.** At present, the ZIFC has adopted an Institutional Accounting Standard with an accrual basis of accounting for the institution. State-owned Construction Enterprise Accounting Regulations and Accounting Methods for Projects Financed by the World Bank (accrual basis) will be applied for the ADB project. The regulations have an adequate chart of accounts to properly account for and report on the project activities and disbursement categories. Moreover, cost allocations to various funding sources are made accurately in accordance with established agreements. The ZIFC's existing financial staff has accounting experience using the State-owned Construction Enterprise Accounting Regulations or Accounting Methods for Projects Financed by the World Bank. But they also expressed a strong desire for training in these standards.

30. **Cash and bank.** All fund payments are made using bank cheques or bank transfers. All cash received is deposited to the relevant bank account leaving minimal amounts necessary for the office operations. A cashbook is maintained and bank reconciliation is undertaken at the end of each month.

⁴ Applicable laws, regulations and guidelines include

- The Accounting Law of the PRC (2000).
- State-owned Construction Enterprise Accounting Regulations.
- Capital Construction Financial Control Regulations.
- Accounting Methods for Projects Financed by the World Bank.

31. **Safeguarding assets.** ZIFC has an established system of safeguards to protect assets from fraud, waste, and abuse. Subsidiary records of fixed assets and stocks are kept up-to-date and reconciled with control accounts periodically. ZIFC will conduct annual physical inventory of all assets in place.

3.5 Internal Audit and External Audit

32. The ZIFC has no internal audit department, but there is an internal audit person who is responsible for all daily transaction audit. All accounts are audited annually by an independent external auditor or Zixing City Audit Office. Meanwhile, it is subject to periodic financial inspection by finance staff from higher authorities (eg ZCFD). The audit is carried out in accordance with the auditing standards and requirements of the PRC.

33. The National Audit Office of PRC will authorize Hunan Province Audit Department to be responsible for the auditing of the ADB project. The audit will be carried out in accordance with the auditing standards and requirements of the PRC. The PMO/Hunan Province Audit Department will submit to ADB the auditor's report and management letter in English within 6 months of each financial year-end during the period of project implementation.

3.6 Reporting and Monitoring

34. The project financial reports will be prepared using an accounting software system and are submitted on a monthly, quarterly and annual basis. The reports will highlight the physical and financial progress of projects being undertaken. For this Project, the ZIFC will prepare and submit to ADB (via PMO) quarterly progress reports for individual outputs, which will include: (i) a narrative description of progress made during the reporting period; (ii) changes in the implementation schedule; (iii) problems or difficulties encountered; and (iv) activities to be undertaken in the next reporting period. ZIFC will also prepare and submit to ADB (via PMO) a project completion report within 3 months of the completion of each sub-project, and an investment project completion report after completion of all outputs under the proposed Project.

3.7 Information System

35. The existing automated accounting software of the ZIFC is capable of generating the project reports required for both external and internal use. In addition, all relevant staff has been trained and are familiar with the system, although supplementary training in reporting requirements for the ADB financed project will be provided. Regular back-ups of all accounting systems and appropriate security measures over backed-up data are in place.

4 Risk Assessment

36. The following risk assessments are based on the above description of existing circumstances, staffing and procedures and assume proposed risk mitigation measures are put into effect. The assessment also reviewed if accounting and internal controls are adequate to ensure that project funds are used economically and efficiently and for the purpose intended, and that the use of the funds is properly reported. Particular weaknesses concern the low understanding of and adherence to financial management policies and procedures of ADB and the current financial management arrangements of the ZIFC. The results of the risk assessment for inherent and control risks are in Table 1 and Table 2 respectively.

4.1 Inherent Risk

37. Inherent risk is the susceptibility of the project financial management system to factors arising from the environment in which it operates, such as country roles and regulations and entity working environment (assuming absence of any counter checks or internal controls).

Table 1: Summary of Inherent Risk

Risks Considered	Risk level Without Mitigation	Risk Management Measures	Risk level With Mitigation
(i) Country-Specific Risks: ➤ Adequate financial management ➤ Adequate management and skills capacity	Medium	<ul style="list-style-type: none"> • There are sufficient resident skills, expertise and experience in most areas for timely and successful implementation. • In addition, there is a high level coordinating body in Government to systematically and critically assess directions and outcomes of the Project. • Training will be given to financial staff of ZCFD and ZIFC so they become familiar with ADB requirements. 	Low
(ii) Entity specific risks: ➤ Understanding of roles between EA, IA and other agencies ➤ internal audit function and budget system exists within the IA	Medium	<ul style="list-style-type: none"> • A clear organizational structure of the EA/IA is already established in relation to the Project, separation of roles and responsibilities between the parties are clear. • Work plans of core activities for EA/IAs personnel are well developed. • ZIFC has internal audit capability, several forms of government/external audit will be applied in recognition of this. • ZIFC will receive extensive training and capacity building support. 	Low
(iii) Project specific risks: ➤ EA, ZPMO and IA's experience of ADB projects	Medium	<p>(a) EA has management experience of ADB project implementation. Financial persons with more financial management experiences of World Bank and ADB project has been designated into the project implementation.</p> <p>(b) Technical assistance to be provided in the following areas:</p> <ul style="list-style-type: none"> ➤ Disbursement procedures of ADB ➤ Project accounting ➤ Procurement training and so on. <p>(c) Leveraging and making available experience and capacity that exists at the EA (ZCG) level.</p>	Low
Overall Inherent related risk:			Low

4.2 Control Risk

38. Control risk is the risk that the Project's accounting and internal control framework proves inadequate to ensure project funds are used economically and efficiently for the purpose intended, and that the use of the funds is properly recorded.

Table 2: Summary of Control Risk

Risks Considered	Risk level Without Mitigation	Risk Management Measures	Risk level With Mitigation
(i) Implementing entity: <ul style="list-style-type: none"> ▪ Financial management policies and procedures for the Project are adequate. (viii) Information systems: <ul style="list-style-type: none"> Information system is secure and back up of financial data is done on a regular and timely basis. 	Low	The financial management assessment concludes that existing arrangements are adequate.	Low
Overall Control Risk Assessment			Low

39. Therefore, the overall FM risk assessment of the project at appraisal stage is low. The identified risks in financial management should be closely monitored during project implementation. Besides the above-mentioned risks, no other significant weaknesses were identified.

5 Action Plan

40. This section summarizes the necessary actions identified as a result of the financial management assessment for managing the risks associated with the proposed project investments.

41. The following are the proposed actions:

(a) To be undertaken in advance of loan effectiveness

- (i) Training on ADB disbursement procedure and ADB project accounting and financial reporting requirements to be provided to EA and IA;

(b) To be undertaken during the implementation of the proposed Project:

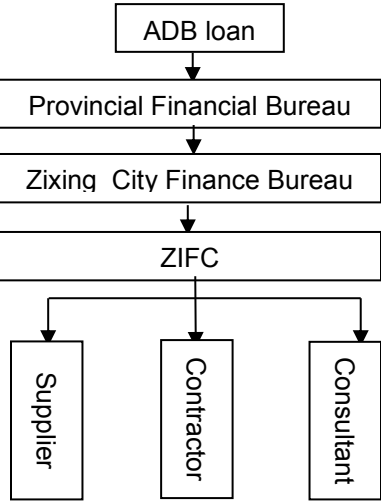

- (i) Regular liaison between the EA, IA and the ADB to ensure that ADB guidelines are followed;

- (ii) Regular training on ADB disbursement procedures and ADB project accounting and financial reporting requirements to be provided;
- (iii) Regular inter-agency coordination at all levels to be put in place to discuss the portfolio performance of the loan;
- (iv) Separate accounts to be maintained for all project outputs financed by ADB and the Government, and to be audited by an independent external auditor;
- (v) Annual project accounts and underlying working papers prepared on a timely basis in preparation for the annual financial statement audit;
- (vi) Prompt reporting to project stakeholders after the end of each accounting period;
- (vii) Quarter-annual progress reports on project implementation and operations prepared;
- (viii) Compliance with loan covenants monitored, including submission of audited project accounts;
- (ix) Regular backup of all accounting systems and appropriate security measures over backup data to be put in place; and
- (x) Annual training plans for accounting staff developed.
