

Lao People's Democratic Republic: Northern Rural Infrastructure Development Sector Project (Additional Financing)

Project Number S0236-002 Lao People's Democratic Republic Project Type / Modality of Assistance Canat	Project Name	Northern Rural Infrastructure Development Sector Project (Additional Financing)		
Project Status Proposed Carant Specific Type / Modality of Carant Sustainable Rural Infrastructure and Watershed Management Project Concessional ordinary capital resources lending / Asian Development Fund US\$ 4.70 million Loan: Sustainable Rural Infrastructure and Watershed Management Project concessional ordinary capital resources lending / Asian Development Fund US\$ 30.00 million Concessional ordinary capital resources lending / Asian Development Fund US\$ 30.00 million Concessional ordinary capital resources lending / Asian Development Fund US\$ 30.00 million Concessional ordinary capital resources lending / Asian Development Fund US\$ 30.00 million Concessional Ordinary Capital Resources - Agriculture, natural resources and rural development Knowledge solutions Partnerships Sector / Subsector Agriculture and Natural Resources - Agriculture, natural resources and rural development Effective gender mainstreaming Description The project is intended to address issues of PRI and watershed management in mountainous provinces of Northern Lao PDB by using an integrated land use planning approach that integrates efficient, sustainable and climate resilient rural infrastructure, and feasible watershed protection measures. For an ecosystem based sustainable rural development, infrastructure and the watershed have to be considered simultaneously. The expected impact of the project will be to achieve sustainable and climate resilient, entral development, infrastructure and the watershed have to be considered simultaneously. The expected impact of the project will be to achieve sustainable and climate resources management in selected watersheds. Project Rationale and Linkage to Country/Regional Strategy of the agriculture, natural resources management in selected watershed agricultural production and natural resources management. The project will: (b) upgrade selected productive rural infrastructure (RIV) schemes to be the profitability of the agriculture, natural resources management in selected watershed enhanced.
