

Land Acquisition and Resettlement Framework

Document Stage: Draft Final
Project Number: 50259-002
August 2017

UZB: Western Uzbekistan Water Supply System Development Project

Prepared by Communal Services Agency under the Ministry of Housing and Communal Services
of the Republic of Uzbekistan for the Asian Development Bank (ADB)

CURRENCY EQUIVALENTS

(As of August 15, 2017)

Currency Unit	–	Sum (UZS)
UZS 1.00	=	\$0.00024
\$1.00	=	UZS 4154.36

ABBREVIATIONS

ADB	–	Asian Development Bank
AP	–	affected person
AH	–	affected household
COM	–	Cabinet of Ministers of Uzbekistan
CSA	–	Communal Services Agency
DMS	–	detailed measurement survey
DLARC	–	District Land Acquisition and Resettlement Committee
EA	–	executing agency
FGD	–	focus group discussion
GRM	–	grievance redress mechanism
HH	–	household
IA	–	implementing agency
LAR	–	land acquisition and resettlement
LARP	–	land acquisition and resettlement plan
MOF	–	Ministry of Finance
MHCS	–	Ministry of Housing and Communal Services
NGO	–	nongovernmental organization
O&M	–	operation and maintenance
PCU	–	project coordination unit
PMC	–	project management consultant
PPTA	–	project preparatory technical assistance
RDD	–	resettlement due diligence report
RoW	–	right-of-way
SCLRGCS	–	State Committee on Land Resources, Geodesy, Cartography and State Cadastre
SPS	–	Safeguard Policy Statement
ToR	–	terms of reference
TN	–	The Department of Operation Inter-regional Water Supply System “Tuyamuyun-Nukus” (Water Supply Company of the Republic of Karakalpakstan)
UZS	–	Uzbek Sum
WDC	–	Water Distribution Center
WUWSSDP	–	Western Uzbekistan Water Supply System Development Project

NOTE

In this report,

- i. “\$” refers to United State Dollars (USD)
- ii. UZS refers to Uzbekistan Sum

This Land Acquisition and Resettlement Framework is a document of the borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff, and may be preliminary in nature. Your attention is directed to the “terms of use” section of this website.

In preparing any country program or strategy, financing any project, or by making any designation of or reference to a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area.

GLOSSARY

Affected Persons	Affected persons (APs) are the members of the affected households those who experience full or partial, permanent or temporary physical displacement (relocation, loss of residential land, or loss of shelter) and economic displacement (loss of land, assets, access to assets, income sources, or means of livelihoods) resulting from (i) involuntary acquisition of land, or (ii) involuntary restrictions on land use or on access to legally designated parks and protected areas. Although this definition of affected person is at variance with the usage in the SPS-2009, this is how it is understood and officially used in Uzbekistan, and it is not different from 'displaced person' defined in the SPS-2009.
Affected Household	A household consist of one or more people who live in the same dwelling and share meals or living accommodation, and may consist of a single family. In the project, household is the unit for compensation and all the members in a household are considered as affected persons.
Compensation	Payment for an asset to be acquired or affected by a project at replacement cost.
Cut-off-date	The date after which people will not be considered eligible for compensation i.e. they are not included in the list of AHs as defined by the census. If the country expropriation law does not specify a cut-off date, normally, the cut-off date is the date of the detailed measurement survey which will be based on the detailed and final engineering design.
Economic Displacement	Loss of land, assets, access to assets, income sources, or means of livelihoods, as a result of (i) involuntary acquisition of land, or (ii) involuntary restrictions on land use or on access to legally designated parks and protected areas.
Entitlement	The range of measures comprising cost of compensation, relocation cost, income rehabilitation assistance, transfer assistance, income substitution, and relocation which are due to /business restoration which are due to AH, depending on the type and degree nature of their losses, to restore their social and economic base. All entitlements will be given to all affected households as per the entitlement matrix.
Inventory of Loss	The inventory of assets getting affected by project.
Illegal/Non legalizable/Non recognizable	HHs that are not registered their business, agriculture, residential and orchard and those who have no recognizable rights or claims to the land that they are occupying and includes people using private or state land without permission, permit or grant i.e. those people without legal lease to land and/or structures occupied or used by them. ADB's SPS explicitly states that such people are entitled to compensation for their non-land assets.

Hokimiyat	Local government authority that interfaces between local communities and the government at the regional and national level. It has ultimate administrative and legal authority over local populations residing within its jurisdiction.
Land acquisition	The process whereby a person is compelled by a public agency to alienate all or part of the land s/he owns or possesses, to the ownership and possession of that agency, for public purposes, in return for fair compensation.
Land Use rights	According to Land Code (article 17) real persons (can have the land plot under the right of lifelong inheritable possession and land parcel use transferred as descent. This right is given to individual residential housing construction and collective gardening and vineyard (orchards), peasant farms. Juridical persons (enterprises, stores, and business) can possess land parcels according to the right to permanent possession, permanent use, temporary use, lease and property. In two above cases when person wants to sell the Property (land and building), he will sell the building & structure and subsequently land parcel will be sold as an attachment (right is being sold).
Leaseholder	Juridical person (farm) running agricultural production with the use of land parcels granted to him on a long-term lease. Lease term is limited up to fifty years but not less than for ten years. Leaseholder cannot sell - buy, mortgage, present, exchange the land
Low Income	Low-income households are classified as households where the monthly per capita income is less than US\$ 2 per capita per day).
Makhalla	Is a local level community-based organization recognized official by the GoU that serves as the interface between state and community and is responsible for facilitating a range of social support facilities and ensuring the internal social and cultural cohesiveness of its members. Mahalla leaders are elected by their local communities.
Meaningful Consultation	A process that (i) begins early in the project preparation stage and is carried out on an ongoing basis throughout the project cycle; (ii) provides timely disclosure of relevant and adequate information that is understandable and readily accessible to affected people; (iii) is undertaken in an atmosphere free of intimidation or coercion; (iv) is gender inclusive and responsive, and tailored to the needs of disadvantaged and vulnerable groups; and (v) enables the incorporation of all relevant views of affected people and other stakeholders into decision making, such as project design, mitigation measures, the sharing of development benefits and opportunities, and implementation issues.

Replacement cost

Replacement cost is the principle to be complied with in compensating for lost assets. Calculation of which should include: (i) fair market value; (ii) transaction costs; (iii) interest accrued, (iv) transitional and restoration costs; and (v) other applicable payments, if any. Where market conditions are absent or in a formative stage, APs and host populations will be consulted to obtain adequate information about recent land transactions, land value by types, land titles, land use, cropping patterns and crop production, availability of land in the project area and region, and other related information. Baseline data on housing, house types, and construction materials will also be collected. Qualified and experienced experts will undertake the valuation of acquired assets. In applying this method of valuation, depreciation of structures and assets should not be taken into account.

Severely Affected Households

Severely affected households are those who lose more than 10% of their productive asset (income generating productive land) and or physically displaced

Vulnerable Households

Low-income households, female-headed households, the elderly headed household, households having physically challenged persons

Contents

	EXECUTIVE SUMMARY
CHAPTER 1	INTRODUCTION AND PROJECT DESCRIPTION
1.1	Overview and Background of the Project
1.2	Project Components
1.3	Scope of Land Acquisition and Resettlement Impact
CHAPTER 2	SOCIO-ECONOMIC PROFILE OF THE PROJECT AREA

4.3	Community Consultations
4.4	Public Consultations
4.5	Future Consultation Strategy
4.6	Disclosure
CHAPTER 5	GRIEVANCE REDRESS MECHANISM
5.1	General
5.2	Grievance Redress Mechanism
5.3	GRM Records and Documentation
CHAPTER 6	POLICY AND LEGAL FRAMEWORK
6.1	General
6.2	Laws, Regulation and Provision relating to LAR in Uzbekistan
6.2.1	The Constitution of the Republic of Uzbekistan

- 6.2.2 The Land Code of the Republic of Uzbekistan
- 6.2.3 Civil Code of the Republic of Uzbekistan
- 6.2.4 The Resolution of the Cabinet Ministers of the Republic of Uzbekistan "About approval of the regulations on procedure of compensations payments to citizens and legal entities for withdrawal of land plots for the state and public needs"
- 6.2.5 Resolution of Cabinet of Ministers "About the measures of improvement the order of provision of land plots for implementation of urban development activity and for other non-agricultural needs"
- 6.2.6 Additional Procedures or Principles Relating to Expropriation of Urban Land
- 6.2.7 Construction Standard and Rules No. KMK 2.10.03-97
- 6.2.8 Resolution of Cabinet of Ministers "On Approval of the Regulations on the Procedure of Assignment and Payment of Social Benefits and Material Assistance to Low-Income Families"
- 6.3 ADB Safeguard Policy Statement (2009)
- 6.4 Comparison of Policies
- 6.5 Core LAR Policy Principle for the Project

CHAPTER 7 ELIGIBILITY AND ENTITLEMENT

- 7.1 Eligibility
- 7.2 Cut-off-Date
- 7.3 Compensation and Valuation of Assets
 - 7.3.1 Valuation of Assets
 - 7.3.2 Compensation for Land
 - 7.3.3 Compensation for Structures
 - 7.3.4 Compensation for Crops and Trees
 - 7.3.5 Loss of Income/Livelihood
 - 7.3.6 Shifting and Relocation Allowances
 - 7.3.7 Allowances for Vulnerable Household
 - 7.3.8 Common Properties
 - 7.3.9 Loss of Crops Due to Temporary Land Acquisition Along the Right of Way of Trunk Main and Water Networks Pipeline
- 7.4 Entitlement Matrix

CHAPTER 8 INSTITUTIONAL ARRANGEMENTS

- 8.1 General
- 8.2 Executing Agency (EA)
 - 8.2.1 Communal Services Agency "Kommunkhizmat" (CSA)
 - 8.2.2 Project Coordination Unit (PCU)
 - 8.2.3 Project Management Consultant (PMC)
- 8.3 Design Company
- 8.4 Departments of State Committee on Land Resources, Geodesy, Cartography and State Cadastre for Karakalpak Republic and relevant districts
- 8.5 The Council of Ministers of the Republic of Karakalpakstan and district hokimiyats (local governments)
- 8.6 Self-Government Representatives

8.7	Independent Valuation Firms
8.8	Independent External Monitor
CHAPTER 9	IMPLEMENTATION SCHEDULE
CHAPTER 10	MONITORING AND REPORTING
10.1	Overview and Objective
10.2	Internal Monitoring
10.3	Independent External Monitoring
10.4	Reporting
CHAPTER 11	CONCLUSION AND RECOMENDATIONS

ANNEXES

Annex 1. Detailed Description of Project Works

Annex 2. Copies of Certificates of Deputy Hokims of Amudarya, Beruniy, Karauzak, Kungrad, Nukus And Muynak Districts confirming that Implementation of WUWSSD Project Components will not entail any LAR Impact and their translation

Annex 3. Copies of Notices Published in Local Newspapers

Annex 4. Lists of Participants of Public Consultations

EXECUTIVE SUMMARY

(i) **Project Description.** This is a draft Land Acquisition and Resettlement Framework (LARF) which has been prepared for the "Western Uzbekistan Water Supply System Development Project (WUWSSDP)" to be financed by the Asian Development Bank (ADB). The project development objective is to improve water supply systems and quality of water supply services in Amudarya, Beruniy, Karauzak, Kungrad, Muynak and Nukus districts of Karakalpakstan. The project objective will be achieved through construction, rehabilitation and upgrade of water supply systems. The project's scope includes various components, such as: (i) construction and reconstruction of 315 kilometers of trunk mains with diameters $D=110-400$ mm., (ii) construction and reconstruction of 921 kilometers of water supply networks with diameters $D=76-350$ mm in 120 settlements including 6 urban, (iii) construction of 4 new water distribution centers, (iv) rehabilitation of 21 existing water supply facilities, (vi) upgrade of 2 existing water supply facilities located outside the project districts. Expected project implementation period is 2017 – 2022.

(ii) **Background.** This Land Acquisition and Resettlement Framework (LARF) is prepared and agreed between ADB and The Communal Services Agency under the Ministry of Housing and Communal Services of Uzbekistan to address LAR issues, if they occur during planning and implementation of project. It establishes the principles and procedures for the compensation of possible loss of land, houses, buildings, crops, and livelihoods during the Program implementation in line with the ADB Safeguard Policy Statement (SPS 2009) and relevant policies and guidelines on land acquisition of the Government of Uzbekistan. Land Acquisition and Resettlement Plan (LARP), if necessary, will be prepared in accordance with this LARF if any LAR impacts are identified during detailed design or implementation or in case of any unanticipated resettlement impacts. This document has been endorsed by CSA, the Project Executing Agency (EA).

(iii) A resettlement due diligence report based on a feasibility study findings and preliminary lines route alignments has been prepared for the project. This due diligence report is in its draft form as it is based on preliminary surveys. Municipal land for construction of new facilities have been identified. Exact route alignments of trunk mains and distribution lines are not detailed and not final at this stage. Therefore, assessment has been done based on survey which is walkover survey. The Communal Services Agency under the Ministry of Housing and Communal Services of Uzbekistan which is the Executing Agency of the project will be responsible for finalizing the route alignments prior to construction and the resettlement due diligence report will be updated accordingly and if any resettlement impacts are identified, LARP will be prepared in accordance with the LARF and ADB's SPS. The LARP will be reviewed by ADB prior to award of contracts and the LARP will be implemented and all compensation and assistance paid to the affected persons prior to start of any construction works.

(iv) **Impacts.** The project will have neither permanent nor temporary impact in terms of land acquisition. There will be no physical displacement. Construction of new water supply facilities will not require allocation of new lands as the new facilities will be constructed on barren lands which belong to local water supply companies. Relevant certifications on land ownership were provided by local water supply companies. Reconstruction and upgrade of existing water supply facilities will be carried out within perimeters of existing water supply facilities. Construction and reconstruction of trunk mains and water distribution networks will be carried out along highways and roads within right-of-way which will not entail temporary or permanent impact. Due diligence survey was carried out which revealed that neither temporary nor permanent impact is expected due to implementation of project components. Resettlement Due Diligence report was prepared in this regard.

(v) **Consultations.** Consultations were conducted with stakeholders at various stages of project preparation i.e., during preparation of the resettlement due diligence report, during environment consultations and social-economic consultations. It ensured that the affected people and other stakeholders are informed, consulted and allowed to participate in project preparation and implementation. Community consultations were arranged through focused group discussions (FGDs), interviews and in-depth interviews were carried out at various locations during the social-economic consultations. Interviews with stakeholders and beneficiaries covering 1200 households had been conducted in April, 2017 where the households were informed of the project. 71 in-depth interviews were conducted in 6 project districts which involved both men and women participants. FGDs covering 121 people in 6 project districts were arranged in April, 2017. Besides, 9 public consultations had been carried out in 6 project districts in May, 2017 where the participants were informed on project design, compensations, assistance, eligibility, entitlement, grievance redress mechanism in case if there is LAR impact after detailed design or unanticipated impact during the construction. Consultations will be continued throughout the whole project cycle.

(vi) The project information will be disseminated through disclosure of the LARF and the resettlement due diligence report. After the approval of the LARF by EA and ADB a copy of the LARF will be disclosed in ADB's website (in English) and in the website of EA (in English and local language). The same procedure will also be followed during the disclosure of LARP, as required during detailed design stage. The provisions under LARF and LARP will be disclosed to communities and affected persons, if any, in local language.

(vii) **GRM.** A grievance redress mechanism will be established at the project level by co-opting the local grievance mechanism to allow affected persons, if any un-identified after completion of detailed design, appealing any disagreeable decision, practice or activity arising from LAR impact, land or other assets compensation during the project implementation. Affected persons will be fully informed of their rights and procedures for addressing complaints whether verbally or in writing during consultation, survey and time of compensation. The project level grievance mechanism shall not impede an aggrieved person's access to the country's judicial or administrative remedies. The aggrieved persons can approach a court of law at any time and independently of the project level grievance redress process. The Executing Agency will ensure that grievances and complaints on any aspect of the land acquisition, compensation, and resettlement are addressed in a timely and satisfactory manner. Three level grievance redress mechanism has been proposed such as (i) Level-1 (District Branches of the Department for Operation of the Inter-Regional Water Supply "Tuyamuyun-Nukus"), (ii) Level-2 Grievance Redress Committee under the Department for Operation of Inter-regional Water Supply "Tuyamuyun-Nukus" (TN) and (iii) Level-3 (Economic Court). CSA and its PCU will keep records of complaints received for its use and monitoring as well as for review by ADB during regular supervision missions.

(viii) **Legal Framework and Compensation Eligibility.** The LARF has been prepared in line with national laws and regulations and ADB's Safeguard Policy Statement 2009 (SPS). In case of any gaps between the national law and ADB SPS 2009, for this project purpose the ADB SPS 2009 shall prevail. In case if LAR impact is identified after detailed design or during implementation, all affected households will be entitled to receive compensation and assistance for all losses and affected assets based on replacement cost. All compensations and assistance will be paid as per the entitlement matrix included in the LARF and LARP, if needed which will be prepared if any impact is identified. Special assistance will be provided to vulnerable and severely affected households. LARP will be fully implemented prior to commencement of civil works. Compensations and other assistance will be paid to APs prior to commencement of civil works. Cut-off date will be published and communicated to APs by the EA prior to the start of final AP

census survey. APs who settle in the affected areas after the cut-off date will not be eligible for compensation. However, they will be given sufficient advanced notice prior to construction. The project will not lead to any physical displacement and therefore, relocation is not deemed required in this project.

(ix) **Institutional Arrangement.** CSA, as the executing agency (EA) will be responsible for implementation of the WUWSSD project with due participation and coordination from the Department for Operation of the Inter-Regional Water Supply "Tuyamuyun-Nukus" which will be acting as implementing agency related to construction. However, CSA will be responsible for implementation of land acquisition and resettlement activities. Project Coordination Unit already existing under the CSA will be responsible for overall project implementation including LAR activities of the project, in case if there are any. PCU already has a designated safeguard specialist who will ensure that the LARF prepared under the ADB's Project Preparatory Technical Assistance (PPTA) during the feasibility study is updated after completion of detailed design and if any LAR impact is identified at that stage a LARP will be prepared and implemented prior to start of civil works. The PCU will be supported by Project Management Consultant which is international consulting firm. PMC will have international social safeguards and resettlement specialist and national resettlement specialist in its contract to support the PCU.

I. INTRODUCTION AND PROJECT DESCRIPTION

1.1 Overview and Background of the Project

1. This Land Acquisition and Resettlement Framework has been prepared for the Western Uzbekistan Water Supply System Development (WUWSSD) project to be financed by the Asian Development Bank (ADB) and which includes construction and reconstruction of water treatment and supply facilities, trunk mains and water distribution networks in rural and urban settlements of six districts of the Republic of Karakalpakstan. The framework will guide the preparation of LARP if required at the detailed design stage or during implementation if any resettlement impacts are identified or in case of unanticipated impacts. A resettlement due diligence report based on draft design has been prepared within the feasibility study ADB PPTA 9286 UZB "Western Uzbekistan Water Supply System Development Project". The resettlement due diligence report has been prepared based on feasibility study findings and shall be updated after completion of detailed design.

2. The proposed project is being developed in accordance with the Decree of the President of Uzbekistan No. 2731 dated 18.01.2017 "About the State Program of Development of Aral Sea Region in 2017-2021". The project has been designed to address the water supply shortage, quality and operational maintenance issues in six districts of the Republic of Karakalpakstan such as Amudarya, Beruniy, Karauzak, Kungrad, Nukus and Muynak districts. Alternative technical options were analysed and the optimum design solution for water supply system was identified based on efficiency of investment and operational expenditures and reduction of social and environmental impacts. The upgraded water supply systems will provide clean drinking water daily, sufficient to cover the projected water demand of a population of about 380 000 people living in 120 rural and 6 urban settlements up to the year 2043. A 315 km of new trunk mains ranging from 110 to 400 mm in diameter, integrated with new 921 km distribution network system will secure expanded distribution of safe drinking water on a permanent basis within the service area.

3. The proposed project development technology is based on sustainable criteria with respect to both conservative use of water resource, use of materials and construction technologies. The non-revenue water (NRW) issue is addressed primarily through implementation of 100% consumer metering. Polyethylene pipes characterized by extremely low roughness coefficient will be used for the construction of the water network. The proposed technology is compatible with local conditions and capacity of TN. The project will induce improvement of hygiene and health and create opportunities for business development and therefore enhancement of local economies, therefore alleviating poverty in Amudarya, Beruniy, Karauzak, Kungrad, Nukus and Muynak districts.

4. The project outcome will be improved living standards, environment, and public health in the Republic of Karakalpakstan which is the area of Aral Sea disaster. The outcome of the project will be improved and expanded access to reliable, sustainable and affordable water supply services in 120 rural and urban settlements in six districts including: Amudarya district – 23 settlements (1 town and 22 villages), Beruniy district – 16 settlements (1 town and 15 villages), Karauzak district – 27 settlements including (1 town and 26 villages), Kungrad district – 21 settlements (1 town and 20 villages), Muynak district – 12 settlements (1 town and 11 villages) and Nukus district – 21 settlements (1 town and 20 villages).

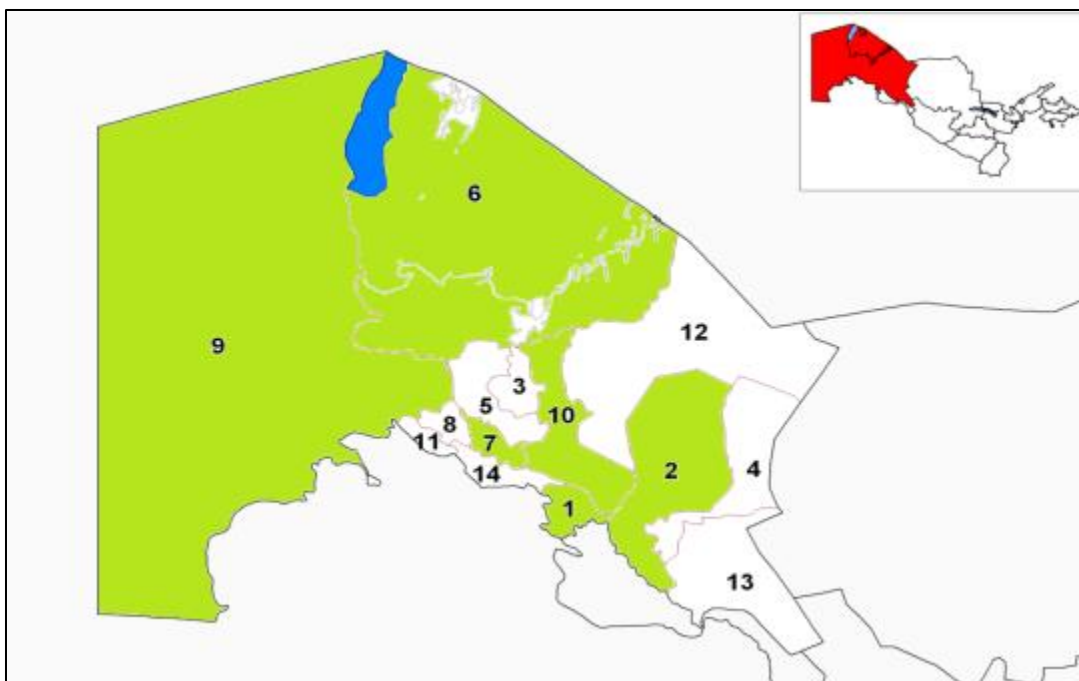

Figure 1.1: Map of the project area. The numbers show the following districts of the republic: 1. Amudarya, 2. Beruniy, 3. Shimbay, 4. Ellikkala, 5. Kegeyli, 6. Muynak, 7. Nukus, 8. Konlikul, 9. Kungrad, 10. Karauzak, 11. Shumanay, 12. Takhtakupir, 13. Torkul and 14. Khodjeyli district. The project districts are highlighted in green.

1.2 Project Components

5. The main physical components of the project are described below. Detailed description of these components is provided as **Annex 1**.

i. Amudarya district.

Project works in Amudarya district will include (i) upgrade and extension of existing treatment facility «Amudarya» in Mangit city; (ii) construction of new water distribution center in rural settlement Kuyukkupir; (iii) rehabilitation of existing ground water intake facility “Urazbay”, water distribution center Kilichbay and “RU-1”; (iv) construction and reconstruction of 54.3 kilometers of trunk mains D=110-400 mm; (v) construction and reconstruction of 236.5 kilometers of water distribution networks D=76-350 mm in 22 rural settlements and 1 Mangit city which is administrative center of Amudarya district.

ii. Beruniy district.

Project works in Beruniy district will include (i) construction of new water distribution centers in rural settlements Shimom and Bodombosh; (ii) rehabilitation of existing water distribution centers RU-1, NRS-15 and NRS-17; (iii) construction and reconstruction of 43 kilometers of trunk mains D=110-400; (v) construction and reconstruction of 221 kilometers of small diameter water networks D=76-200 in 15 rural settlements and 1 city of Beruniy which is administrative center of Beruniy district.

iii. Karauzak district.

Project works in Karauzak district will include (i) reconstruction of water distribution centers Karauzak, Samat and Koratol; (ii) construction and reconstruction of 52 kilometers of trunk mains D=110-400 mm; (iii) construction and reconstruction of 88.6 kilometers of water

networks in 26 rural settlements and 1 urban settlement of Karauzak which is administrative center of Karauzak district.

iv. Kungrad district.

Project works in Kungrad district will include (i) reconstruction of water distribution centers Kungrad, Ustyurt, Altinkul, Akhunbabaev, Korezm, Kanjigali and Kizil Kush; (ii) construction and reconstruction of 66 kilometers of trunk mains D=110-400 mm; (iii) construction and reconstruction of 180,2 kilometers of water networks D=76-350 mm in 20 rural settlements and 1 urban settlement of Kungrad which is administrative center of Kungrad district.

v. Nukus district.

Project works in Nukus district will include (i) reconstruction of existing water distribution centers Nukus, Madaniyet, Kerder and Abadan; (ii) construction and reconstruction of 39 kilometers of existing trunk mains D=110-400; (iii) construction and reconstruction of 127.4 kilometers of water networks D=76-250 mm in 20 rural settlements and 1 town Akmangit which is administrative center of Nukus district which is administrative center of Nukus district.

vi. Muynak district.

Project works in Muynak district will include (i) construction of 1 new water distribution center «Shagirlik»; (ii) deep upgrade of existing water distribution centers «Shege», «Muynak» and «Uchsay»; (iii) construction and reconstruction 61 kilometers of existing trunk mains D=110-400; (iv) construction and reconstruction of 67.3 kilometers of networks D=76-250 in 10 rural settlements and 1 urban settlement of Muynak which is administrative center of Muynak district.

vii. Regional water treatment and supply facilities Takhiatash and Tuyamuyun

Upgrade of existing regional water treatment and supply facilities «Takhiatash» and «Tuyamuyun» outside the project area.

1.3 Scope of Land Acquisition and Resettlement Impact

6. The resettlement due diligence report is based on a feasibility study findings and preliminary lines route alignments. The line route alignments for trunk main and network routes are subject to modification during the detailed design. Exact route alignments for trunk mains and water networks are not detailed and not final at this stage. Therefore, assessment has been done based on the survey which is walkover survey. The executing agency will be responsible for updating the resettlement due diligence based on the LARF and ADB's SPS after completion of detailed design, if any impact is determined at that stage, then a LARP will be prepared and implemented prior to start of construction. The following steps will be taken by the executing agency - CSA to finalize and update the resettlement due diligence report:

- (i) finalization of route alignment design to the detailed extent during detailed design;
- (ii) collection of land details if there is any change in location of water supply facilities or other structures and accordingly carrying out census survey for affected persons, if any.
- (iii) based on the final alignments, detailed assessment on loss of crops and trees, if any, need to be enumerated and recorded.
- (iv) upon collection of all necessary data, the resettlement due diligence report needs to be updated/finalized and if any LAR impacts are identified LARP needs to be prepared sent to ADB for approval and disclosure prior to award of contracts. LARP needs to be implemented prior to start of civil works.

II. SOCIO-ECONOMIC PROFILE OF THE PROJECT AREA

2.1 General

7. Being Autonomous republic of the Republic of Uzbekistan, the Republic of Karakalpakstan is located at the western part of Uzbekistan with a total area of 166 600 square kilometers. The republic consists of the following 14 districts: Amudarya, Beruniy, Shimbay, Ellikkala, Kegeyli, Muynak, Nukus, Konlikul, Kungrad, Karauzak, Shumanay, Takhtakupir, Tortkul and Khodjeyli districts. Nukus city is the capital of the republic. Largest cities of the republic are Turtkul, Beruniy, Takhiatash, Hodjeyli and Kungrad which are concentrated on south-eastern part of Karakalpakstan. Karakalpakstan is located near the Aral Sea in the lowest part of the Amu Darya basin. More than 80% of territory of the republic consists of deserts. It is surrounded by the Kyzyl Kum desert on the east and the Kara Kum desert on the south. A rocky plateau Ustyurt extends west to the Caspian Sea.

8. As of 1 July, 2016, total number population of Karakalpakstan was 1.802 mln. people. Major ethnic groups living in Karakalpakstan are Uzbeks, Karakalpaks and Kazakhs. Average life expectancy is 72.6 years including men 74.9 years and women 70.4. Population density in the province is quite low, on average 10.4 people per square kilometer. About 50% of the population live in urban areas and remaining half in rural areas. Most of the population is concentrated in south and south-eastern part of the republic.

9. Economy of the Republic of Karakalpakstan is mostly based on industrial and services sectors. Share of agriculture in gross domestic products is the lowest compared to the previous two sectors. Structure of gross domestic product of Karakalpakstan in Jan-Sept, 2016 was as follows: services – 50.78%, industry – 34.14 and agriculture – 15%. Industrial sector of economy is represented by such productions as sodium and carbide producing factories, Urga gas processing factory and “Ustyurt” gas and chemical production factory in Kungrad district, glass producing factory in Khodjeyli district, marble and cable producing factories in Nukus district. Main sectors of agriculture are mainly represented by grain (production of wheat and raw rice), cotton growing, livestock and silk production. Services sector includes logistics, public catering, information and communication, trading etc.

10. Climate of Karakalpakstan is extreme continental. In the summer, solar radiation is high and humidity is relatively low. Maximum summer temperatures can reach 45°C, while in the open desert they can exceed 50°C. Winters are moderately cold with little snow. Minimum recorded winter temperatures can reach as low as -32°C. However, the flatlands of the Amu Darya river delta are sometimes exposed to the cold winds from the Siberian Arctic so, with the wind chill effect, temperatures can often feel much colder. Precipitation varies significantly across Karakalpakstan being much lower in sandy desert regions than in irrigated areas. The wettest months are March and April, while the driest are August and September. Strong ground winds are relatively frequent in the north-western part of the river delta, which experiences storms for about 50 days per annum. Wind velocity reaches a maximum of 70 to 90 km per hour.

2.2 Population profile

11. As of 1 July, 2016, total number population of six project district was 617.8 thousand people which is 34.3% of total population of Karakalpakstan of 1.802 mln. people. Major ethnic groups living in Karakalpakstan are Uzbeks, Karakalpaks and Kazakhs. The average life expectancy in the RK, including the project areas, is on average of 69.4 years including women 71.2 and men - 67.8 years. This is about 3.4 years less than in other areas of Uzbekistan where

71.2 years for women and 67.8 years for men¹. Population density in the province is quite low, on average 10.4 people per square kilometer. About 50% of the population lives in urban areas and remaining half in rural areas. Most of the population is concentrated in south and south-eastern part of the republic. Total number of population to be covered by the project in six districts is 317.12 thousand people. Summary of population information is given in below **Table 2.1**.

12. As the below table shows total number of population in six project districts of the province is 617.8 thousand people including 230.2 thousand people (37.3%) living in urban areas and 387.6 thousand people (62.7%) living in rural areas. Most of the population lives in rural area. Only in Kungrad district 78.4 thnd.people (63%) from 124.4 thnd. people live in urban areas. Population of the six project districts equals to 34.3% of total population of the Republic of Karakalpakstan. Population density in project districts differs significantly from 0.8 people per square kilometer in Muynak district to 182.9 people per square kilometer in Amudarya district. About 80% of population in project districts live in three districts: Amudarya, Beruniy and Kungrad.

Table 2.1 Summary project district population information

District	Population as of 1 July 2016 (000)	Population living in:		Total area (km ²)	Population density (people per 1 km ²)	% of district population to be covered by the project
		Urban area (000)	Rural area (000)			
Amudarya	186.8	49.2	137.6	1 021	182.9	28%
Beruniy	178.5	64.2	114.3	3 900	45.7	53%
Kungrad	124.4	78.4	46	76 000	1.63	78%
Karauzak	51.2	15.3	35.9	5 890	8.7	46%
Nukus	46.5	9.8	36.7	943.9	49.2	61%
Muynak	30.4	13.3	17.1	37 900	0.8	79%
Total	617.8	230.2	387.6	125 654.9	-	52%
Total the province	1 802.4	888.3	914.1	166 600	10.4	
Six districts as % of the total province	34.3 %	26 %	42.4%	75.5%	-	

Source: <http://sovminrk.gov.uz>. The web site of the Council of Ministers of the Republic of Karakalpakstan. <https://data.gov.uz/ru/datasets/2004> The open data portal of the Republic of Uzbekistan

13. Population of the project area is mainly concentrated in cities and urban-type settlements. As the above table shows, in total, more than 50% of total population of six districts will be covered by the project. However, this indicator varies significantly from one district to another. In Amudarya district 28 % of population will be covered by the project while in Muynak district this indicator equals to 79 %. The project will cover mostly urban population in six districts. On average, 62.5% of population covered by the project lives in urban areas and 37.5 % in rural areas. The urban trend is increasing and expected to continue to grow as a result of internal migration from rural areas to cities and cities that apply to cities, where access to education, health care, drinking water, gas and electricity is higher.

¹"Strategy for socio-economic development of the Republic of Karakalpakstan". The Institute of Forecasting and Macroeconomic Research under the Cabinet of Ministers of the Republic of Uzbekistan. 2013. Page 13.

14. Analysis of structure of population in areas covered by the project shows that 61% of people are within working age, 30% people is under the age 16 and 9 % are pensioners. Age and gender structure diagrams are given in the below **Figures 2.1 and 2.2**.

Figure 2.1. Population age structure

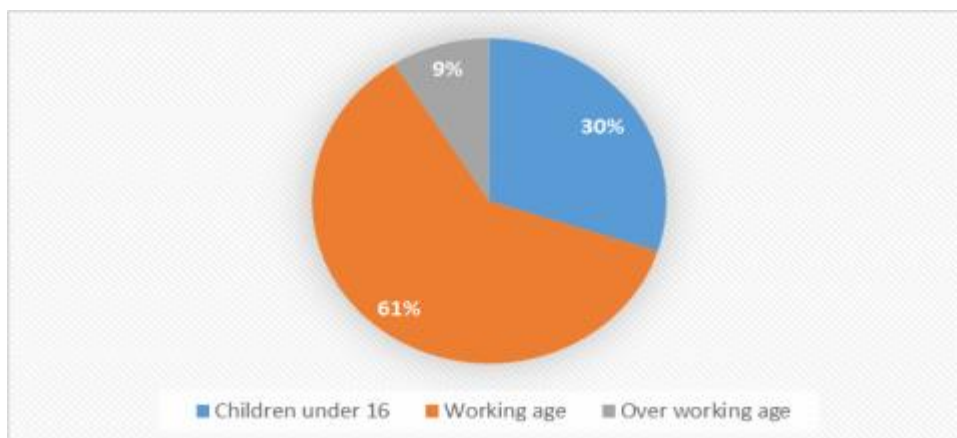

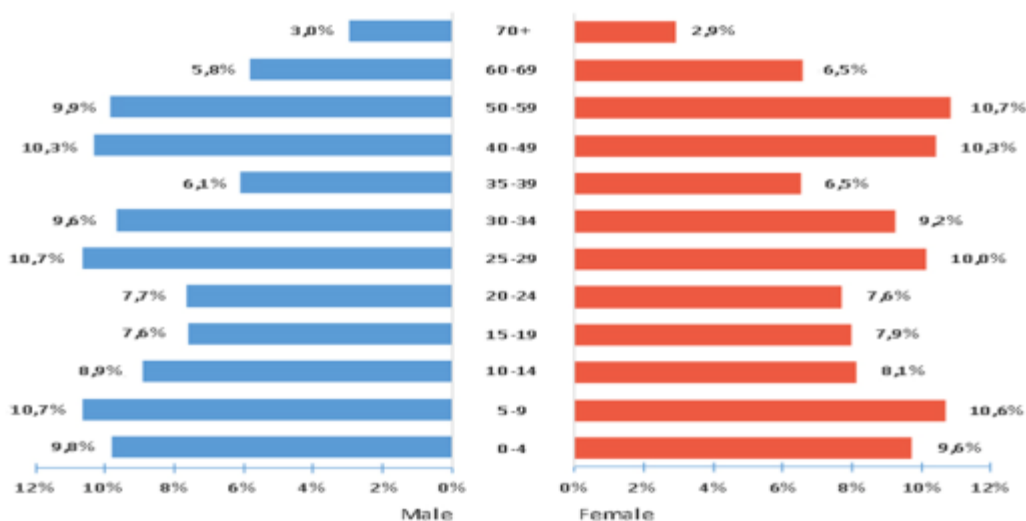

Figure 2.2. Gender-age pyramid of the population of the project area

Source: PSA report, June, 2017

2.3. Project Area Households Profile

15. Survey of 1,200 households carried out under the project Poverty and Social Analysis shows that there were 6,956 people in these households including women of 50%, only in the ethnic Turkmen group, women make up 44%. Average HH size is 6 people, the minimum number is 1 person, and the maximum number is 16 people. Size of a HH headed by a woman without a man aged 18 years and old, ranges from the minimum of 2 to the maximum of 6 people. Average age of a household member in the project area is 29 years old. 58% of household members are 16

years and older of which 60.4% are men and 55.3% are women. 11.7% of household members are older than the retirement age while the group of children under the age of 16 is 30%. These figures resemble the age distribution in Uzbekistan, where a part of the population over 60 is 4.7%, and the youngest age group (0-15 years) is 26.5%. Totally 62% of households are located in urban areas and 38% in rural areas.

Table 2.2. Summary information of households in the project area

Districts	Households in project districts	Percent of total	Urban	Rural
Amudarya	84 80	16%	67%	33%
Beruniy	15 088	29%	62%	38%
Karauzak	4 335	7%	63%	37%
Kungrad	17 528	30%	69%	31%
Muynak	41 82	8%	54%	46%
Nukus	5 222	9%	35%	65%
Total	54 676	100%	62%	38%

Source: PSA report, June 2017

16. In the project area, the level of the population's economic activity is rather high- 66.8%. It is household members who neither work nor seek employment (20.5%) along with students (9.8%) who comprise the economically inactive group. Unemployment rate of the surveyed household stands at a relatively low level - 5.4%: however, only one of twenty of the unemployed is officially registered with labor agencies. The largest group among employed workers is those who work in the non-public sector, accounting for 40% of all workers. Workers of public organizations make up 25% of the total employed. Entrepreneurs comprise about 23% of all employed people, and most of them are not registered entrepreneurs (84%). About 12% of the employed people do not have permanent work (temporary and seasonal workers).

17. **Education, employment and economic activity in households.** There is a clear correlation between poverty status and educational levels of not only for heads but also for the rest members of households. Share of members with higher education degrees is much lower for poor households, at 7.1% in comparison with the corresponding figure for the non-poor at 17.91%. Among the heads of households with low incomes there prevail people having either complete secondary or vocational education (**Table 2.3**).

Table 2.3. Educational Levels of Household Members and Heads

	Total	Poor	Non-poor
household members, as % of household members over 24 Years of age			
No education	0,3%	0,3%	0,4%
Basic School Education (1-4 classes)	0,6%	0,6%	0,8%
Complete School Education (5-11 classes)	20,2%	21,8%	17,7%
Secondary Vocational Education	67,4%	70,2%	63,2%
Higher education	11,5%	7,1%	17,9%
No education	0,2%	0,1%	0,2%
Basic School Education (1-5- classes))	1,2%	1,0%	1,4%
Complete School Education (5-11 classes)	19,3%	21,2%	16,6%
Secondary Vocational Education	63,4%	67,2%	58,1%
Higher education	15,9%	10,5%	23,7%
Female head	20%	22%	17%

Source: PSA report, June 2017

18. Unemployed people in poor households who are ready to start working immediately make up 41% in poor households and 23% in non-poor. The main barriers to the employment of the unemployed are basically the inability to find a job (profession), as 29% of households noted and lack of work places in general. This reason was stated on average by 42% of households in Amudarya and Beruniy districts, and 64% of households in Kungrad and Karauzak districts. Impossibility of doing business was indicated by 15% of all households in the project area, especially this problem is acute in Beruniy district where it was noted by 30% of households.

19. **Poverty rates and household incomes.** The PSA analysis of households revealed the poverty rate at 59% for the project area in April 2017, i.e. in 59% of the surveyed households the average per capita income did not exceed 1.5 of minimal wage or 224,662 UZS.

Table 2.4. Poor HHs share in project districts (% of HHs)

District	Share of Poor HHs	Urban Poor HHs	Rural Poor HHs	Poor HHs headed by women
Amudarya	61%	60%	62%	75%
Beruniy	68%	71%	61%	86%
Karauzak	39%	39%	39%	0%
Kungrad	48%	50%	45%	63%
Muynak	59%	49%	71%	0%
Nukus	80%	86%	77%	100%
Total	59%	59%	59%	76%

Source: PSA report, June, 2017

20. Overall, the average per capita income in the poor households (126 thousand sums) in the project area is almost 3 times lower than that of the non-poor (366 thousand sums). It is noticeable that the average per capita expenses do not differ significantly from the average per capita incomes: expenditure is only 24% lower than incomes. Whereas, in poor households, expenses are 7% higher than incomes, by contrast, in non-poor households expenditure consisted of 60% of the incomes. The data on the structure of incomes proves the high differentiation of the indicator for the population. It should be noted that the findings on the incomes and expenses of households closely correlate with the data on the household size: the larger a household is, the smaller the income and expenditure per capita is shown.

21. Distribution of income indicates a significant differentiation of population according to quintile income distribution indicators. 18% of all households are concentrated in the lowest income quintile (with monthly income up to 600 thousand UZS). 38% of households have incomes below the average monthly income (1,300 thousand UZS/month) of all surveyed households. As for the poor households, 39% of them fall into low-income quintile, with 79% having incomes below the average figure. It should be noted that findings on incomes and expenditures of households closely correlate with the data on the household size: the larger a household is, the smaller the income and expenditure per capita is shown.

2.4 Ethnic Minorities and Indigenous People

22. In terms of ethnic composition according to socio-economic survey data the project area is populated by Karakalpaks, Uzbeks, Kazakhs and Turkmens. There were not identified any ethnic groups maintaining cultural and social identities separate from the mainstream Uzbekistan's society fitting the ADB definition of Indigenous Peoples. Therefore, the ADB's policy, as described in ADB's SPS, 2009 in the Indigenous Peoples is not triggered. No special action is required for this LARF.

III. SCOPE OF PROJECT WORKS AND LAND ACQUISITION AND INVOLUNTARY RESETTLEMENT IMPACT

3.1 General

23. The project's scope includes various components, such as (i) construction and reconstruction of 315 kilometers of trunk mains, D=110-400 mm., (ii) construction and reconstruction of 921 kilometers of water supply networks D=76-350 mm in 120 settlements including 6 urban, (iii) construction of 4 new water distribution centers, (iv) rehabilitation of 21 existing water supply facilities, and (vi) upgrade of 2 existing water supply facilities located outside the project districts.

24. The project has no land acquisition and involuntary resettlement impact, neither permanent nor temporary. New facilities in project districts will be constructed on barren lands belonging to local water supply companies. Reconstruction works on existing water supply facilities will be implemented within perimeters of these facilities and will not require allocation of land. Construction and reconstruction of trunk mains and water networks will be implemented along existing highways and roads within right-of-way of these roads.

3.2 Project Components

3.2.1 Construction of New Water Supply Facilities

25. The project components include construction of new water supply facilities such as water distribution centers (WDCs). The project will construct four new water distribution centers in three districts as follows. One water distribution center "Kuyukkupir" in Amudarya district, two water distribution centers "Shimom" and "Bodombosh" in Beruniy district and one water distribution center "Shagirl" in Muynak district. Sizes of WDC vary from 0.6 ha to 1 ha. New facilities will be constructed on barren lands which already belong to water supply companies.

26. Also, the project will upgrade existing water intake facility "Amudarya" in Mangit town of Amudarya district. This facility includes two water sedimentation ponds 240 x 60 meters each and associated support facilities such as pumps and pipeworks. The new water treatment plant will be constructed adjacent to the existing water intake facility on land belonging to local water supply company and there is no need to acquire new lands.

3.2.2 Reconstruction of Existing Water Supply Facilities

27. Another project component includes reconstruction of existing water supply facilities in 6 project districts and upgrade of 2 water supply facilities outside the project area as follows: (i) surface water intake facility "Amudarya", ground water intake facility "Urazbay", water distribution center RU-1 and Kilichbay in Amudarya district; (ii) ground water intake facility "Beruniy", water distribution centers "Beruniy", RU-1, NRS-15 and NRS-15 in Beruniy district; (iii) water distribution centers "Karauzak", RU-1, "Samat" and "Koratal" in Karauzak district; (iv) water distribution centers "Kungrad", "Altinkul", "Khorezm", "Akhunbabaev", "Ustyurt", "Kanjigali" and "Kizilkush" in Kungrad district; (v) water distribution centers "Madaniyat", "Kerder" and "Abadan" in Nukus district and (vi) water distribution centers "Muynak", "Shege" and "Uchsay" in Muynak district. Plus upgrade of two regional water treatment and supply centers outside the project area such as water treatment facility "Takhiatash" and water treatment facility "Tuyamuyun".

28. Reconstruction and upgrade works will be carried out within perimeters of existing facilities. Reconstruction works will mostly include such works as repair of clean water reservoirs, pumping stations including replacement of pumps, in-site pipeworks, replacement of equipment, construction of new small size buildings such as toilet, checkpoint etc. Some water distribution centers can be completely demolished and newly constructed within existing perimeters. Decision

on exact types of reconstruction works will be taken after detailed study to be carried out during detailed design stage. Details of project works are described in **Annex 1**.

29. Reconstruction works will not entail any land acquisition and resettlement impact because all the works will be implemented within perimeters of existing water facilities. However, after completion of detailed design the LARF shall be updated based on examination of water supply facilities to be reconstructed.

3.2.3 Construction and Reconstruction of New Water Supply Trunk Mains and Water Networks

30. Another project component is construction of new trunk mains and water networks. Findings of survey of preliminary alignments of new trunk mains and water networks show that they will be laid along existing roads, within right-of-way of roads. The project works will not entail any land acquisition and resettlement impact. No lands, trees, structures will be impacted neither permanently nor temporarily. No trees will be cut.

31. Similarly, to abovementioned new trunk mains and water networks, the works related to reconstruction of already existing trunk mains and water networks will be carried out along existing roads, within right-of-way of roads. The old metal pipes will be replaced with new polyethylene pipes which are corrosion resistant and whose service life is much longer. Totally 315 kilometers of trunk mains with diameter D=110-400 mm. will be constructed and reconstructed, (ii) 921 kilometers of water supply networks with diameters D=76-350 mm will be constructed and reconstructed in 120 settlements including 6 urban.

32. Findings of survey of alignments of existing trunk mains and water networks show that trunk mains and water networks were laid along existing roads, within right-of-way of roads. The project works will not entail any land acquisition and resettlement impact. No lands, trees, structures will be impacted neither permanently nor temporarily. No trees will be cut.

33. After completion of detailed design exact alignments of new trunk mains and water networks will be surveyed. If at that stage any impact will be determined land acquisition and resettlement planning document will be prepared and implemented prior to the start of project works.

34. Certificates of Deputy Hokims of Amudarya, Beruniy, Karauzak, Kungrad, Nukus and Muynak districts confirming that implementation of WUWSSD project components will not entail any LAR impact and their translations are provided as **Annex 2**.

3.3 Scope of Works in Project Areas

3.3.1 Amudarya District

35. Project works in Amudarya district will include (i) upgrade and extension of existing treatment facility «Amudarya» in Mangit city; (ii) construction of new water distribution center in rural settlement Kuyukkupir; (iii) rehabilitation of existing ground water intake facility “Urazbay”, water distribution center “Kilichbay” and “RU-1”; (iv) construction and reconstruction of 54.3 kilometers of trunk mains D=110-400 mm; (v) construction and reconstruction of 236.5 kilometers of water distribution networks D=76-350 mm in 22 rural settlements and 1 Mangit city which is administrative center of Amudarya district.

Figure 3.1 Construction sites of new Water Distribution Center “Kuyukkupir” and new water treatment plant in Amudarya district

3.3.2 Beruniy district

36. Project works in Beruniy district will include (i) construction of new water distribution centers in rural settlements “Shimom” and “Bodombosh”; (ii) rehabilitation of existing water distribution centers RU-1, NRS-15 and NRS-17; (iii) construction and reconstruction of 43 kilometers of trunk mains $D=110-400$; (v) construction and reconstruction of 221 kilometers of small diameter water networks $D=76-200$ in 15 rural settlements and 1 city of Beruniy which is administrative center of Beruniy district.

Figure 3.2 Construction site of water distribution center “Bodombosh” in Beruniy district

Figure 3.3 Alignment of new trunk main in Beruniy district (highlighted in yellow)

3.3.3 Karauzak district.

37. Project works in Karauzak district will include (i) reconstruction of water distribution centers Karauzak, Samat and Koratol; (ii) construction and reconstruction of 52 kilometers of trunk mains $D=110-400$ mm; (iii) construction and reconstruction of 88,6 kilometers of water networks in 26 rural settlements and 1 urban settlement of Karauzak which is administrative center of Karauzak district.

Figure 3.4. Existing network to be reconstructed by the project in Karauzak town. Alignment of existing network to be reconstructed is highlighted in red.

3.3.4 Kungrad district.

38. Project works in Kungrad district will include (i) reconstruction of water distribution centers Kungrad, Ustyurt, Altimkul, Akhunbabaev, Korezm, Kanjigali and Kizil Kush; (ii) construction and reconstruction of 66 kilometers of trunk mains $D=110-400$ mm; (iii) construction and reconstruction of 180,2 kilometers of water networks $D=76-350$ mm in 20 rural settlements and 1 urban settlement of Kungrad which is administrative center of Kungrad district.

Figure 3.5. Not operational facilities of water distribution center Usrt yurt in Kungrad district to be rehabilitated by the project

3.3.5 Nukus district

39. Project works in Nukus district will include (i) reconstruction of existing water distribution centers Nukus, Madaniyet, Kerder and Abadan; (ii) construction and reconstruction of 39 kilometers of existing trunk mains D=110-400; (iii) construction and reconstruction of 127.4 kilometers of water networks D=76-250 mm in 20 rural settlements and 1 town Akmangit which is administrative center of Nukus district which is administrative center of Nukus district.

3.3.6 Muynak district.

40. Project works in Muynak district will include (i) construction of 1 new water distribution center, Shagirlık; (ii) deep upgrade of existing water distribution centers “Shege”, “Muynak” and “Uchsay”; (iii) construction and reconstruction 61 kilometers of existing trunk mains D=110-400; (iv) construction and reconstruction of 67.3 kilometers of networks D=76-250 in 10 rural settlements and 1 urban settlement of Muynak which is administrative center of Muynak district.

3.4. Conclusion

41. Findings of study of project areas show that no impact is expected due to implementation of project works. New water supply facilities will be constructed on barren lands not suitable for agriculture which belong to water supply companies. Reconstruction works will be implemented within perimeters of existing water supply facilities which will not require allocation of new. Construction and reconstruction of trunk mains and water networks which are of small diameters will be carried out on existing roads or right-of-way of these roads which will not entail any impact to farm enterprises, households or businesses.

42. However, anticipated impacts may occur during construction stage. These are related to construction and rehabilitation of trunk mains and distribution networks. These impacts which have temporary short term nature can consist mainly of interferences with normal road traffic, temporary occurrence of noise, disturbance to access to private and public sites during construction of pipeworks which may lead to short term loss of livelihood. Such kind of impacts will be known after completion of detailed design and/or during implementation of construction works. For this purpose, Environmental Management Plan (EMP) was developed for the project including Environmental Mitigation Measures which require contractors to provide safe access to facilities of people, businesses and the public. In this regard, Site Specific Environmental Management Plans will be developed by contractors where they will describe how they will mitigate adverse impacts.

43. After completion of detailed design for the project the EA will ensure that all project components are surveyed. In case if any LAR impact is identified on that stage a LARP will be prepared. Such LARP shall include the following sections which will provide detailed information on the situation: (i) Introduction and project background, (ii) Scope of land acquisition and resettlement, (iii) Socio-economic information and profile, (iv) Information disclosure, consultation and participation, (v) Grievance redress mechanism, (vi) Policy and legal framework, (vii) Eligibility and entitlement, (viii) Relocation and income restoration, (ix) Resettlement budget and Financing Plan, (x) Institutional arrangements, (xi) Implementation schedule and (xii) Monitoring and Reporting. The LARP will be fully implemented prior to commencement of any civil works.

IV. INFORMATION DISCLOSURE, CONSULTATION AND PARTICIPATION

4.1 General

44. Consultations were carried out with stakeholders at various stages of project preparation. Consultations were carried out with the Communal Services Agency, the National Communal Design Institute “Uzbekkomunalloyixhakurilish” and the Department for Operation of Inter-Regional Trunk-Main “Tuyamuyun-Nukus” to discuss about the project design and to seek their guidance on various issues related to land acquisition and resettlement. Public consultations were combined with environment public consultations where local government officials, representatives of NGOs and local people from the project areas were targeted. Environment and social safeguard issues were discussed among the participants during public hearings. Also, focused group discussions, interviews and in-depth interviews were carried out in the project areas within socio-economic survey.

4.2 Objectives of Consultations

45. The main objectives of the consultations are as follows:
- (i) to make people aware about the project and let the beneficiaries know about the positive outcome of the project in terms of reliable water supply.
 - (ii) to disseminate information to the people about the project in terms of its activities and scope of work;
 - (iii) to involve people as stakeholders in project planning and further during implementation;
 - (iv) to seek local peoples' views on minimizing probable adverse impacts on land acquisition and involuntary resettlement;
 - (v) to make people aware about the future plan of action;
 - (vi) to seek peoples' participation and involvement during collection of actual information during the detailed surveys.
 - (vii) to assess the local people's willingness to get involved with the project; and enumerate the measures to be taken during the implementation of the project.
 - (viii) to make people aware about the general policy principles of national laws and ADB Safeguard Policy Statement, 2009 and broad eligibility and entitlements.

4.3 Community Consultations

46. Community consultations were arranged through focused group discussions (FGDs), interviews and in-depth interviews at various locations during socio-economic survey in April, 2017. Summary information on participants of these consultations is provided in below tables.

Table 4.1: Summary of interviews with stakeholders and beneficiaries

No	Districts	Households covered	Dates of interviews
1	Amudarya district	196	12.04.2017 - 22.04.2017
2	Beruniy district	354	11.04.2017 - 22.04.2017
3	Karauzak district	89	18.04.2017 - 21.04.2017
4	Kungrad district	365	10.04.2017 - 17.04.2017
5	Muynak district	90	10.04.2017 - 17.04.2017
6	Nukus district	106	11.04.2017 - 17.04.2017
	Total	1200	

Table 4.2: Summary of focus group discussions with stakeholders and beneficiaries

	Total	Amudarya district	Beruniy district	Karauzak district	Kungrad district	Muynak district	Nukus district

District Departments for Site Improvement and Planting	4						4

47. Consultations with households during socio-economic survey showed a great interest of people in the implementation of this water supply systems development project. People are supportive about the project as they do not have good and reliable drinking water supply and the improved drinking water supply will improve their health standard, will ease the burden of people, create new opportunities for new businesses, new workplaces. Moreover, considerable interest in the results of the project is demonstrated by representatives of educational and healthcare establishments, self-governance bodies, NGOs as well as the experts from Tuymuyn-Nukus and entrepreneurs.

Table 4.3: Summary of In-depth Interviews with stakeholders and beneficiaries

48. The majority of consulted households (93%) are convinced that after the project implementation they will get a regularly functioning water supply system. Overall, the level of confidence in the project correlates mostly with the current access of surveyed households to centralized piped water. 7% of respondents who were skeptical about the statement that after the project implementation they will have piped water of good quality around the clock, had doubts about the ability of TN to maintain the water pipelines in good operational condition, rather than about the proposed results.

49. The participants of both the survey and the in-depth interviews made it absolutely clear that construction and rehabilitation of the water supply mains should be supported by efforts aimed at improvement of water treatment, access of population to sewerage and ensuring regular electric power supply to the pumps providing the population with water.

50. According to the population in project areas, in order to enable a comprehensive approach to resolving water and sanitation issues nowadays, the Project's efforts should be focused on first of all to laying of new pipelines in areas without any water supply pipelines; second, the improvement of water treatment; and finally, the replacement of the current water supply network. Thus, the project fully meets expectations and needs of population in the project area.

51. The main socio economic effect of the project will be creation employment opportunities for population in project area. 5% of working age of households members stated that they would start entrepreneurial activity in case of stable water delivery and 10% of household members stated that new jobs would appear in new and existing enterprises upon the project completion. 22% of households, including the poor, plan to start various types of entrepreneurial activities in the case of sustainable supply of quality water to settlements - from bread baking, clothing and cooking to opening cafes, hotels or their further development. 8% of households in Nukus district and 35% of Amudarya district households expressed their intention to open a business after the project was completed, 25% of them men and 18% of women.

4.4 Public Consultations

52. Public consultations combined with environmental public consultations had been arranged during the period of 26-30 May, 2017 in the six project districts. As per requirements of ADB with the aim to inform the communities in the project areas about the upcoming consultations, announcements were published in national local daily newspapers "Vesti Karakalpakstana" (News of Karakalpakstan) and "Erkin Karakalpakstan" (Free Karakalpakstan) on May 23, 2017. In addition, for people living in remote areas, announcements about the planning public consultations were posted at the public places at the district centers and in the most of settlements. Copies of notices, list of participants and presentation are attached to this LARF.

53. Totally, 9 public consultations had been carried out during the mentioned period as follows: Amudarya district – 1, Beruniy district – 2; Karauzak district – 1; Kungrad district – 1; Nukus district – 1 and Muynak district – 3, total – 9. Almost all the public consultations were arranged in offices

of district hokimiyats excluding one in Beruniy district which was arranged in local school. Totally 378 people participated in these public consultations including 102 females. Summary of participants is given in below table.

Figure 4.1. During public consultations in Karauzak district

54. List of participants included representatives of almost all settlements to be covered by the project. Most part of participants were presented by heads of rural communities (RC), citizens, representatives of district branches of nature protection committee, land cadastre department, architecture department, local hokimiyat representatives, sanitarian epidemiological station, NGOs, schools, hospitals etc. Representative of IA attended each meeting. List of participants is given as **Annex 4**.

Table 4.4: Summary of participants of public consultations

No.	Districts	Number of participants	including:		Dates of public consultations
			male	female	
1	Amudarya district	55	39	16	30 May, 2017
2	Beruniy district	51	38	13	30 May, 2017
3	Karauzak district	54	37	17	26 May, 2017
4	Kungrad district	46	37	9	29 May, 2017
5	Muynak district	119	75	44	27, 29 May, 2017
6	Nukus district	53	50	3	26 May, 2017
	Total	378	276	102	

55. During the consultations, the participants were informed about main features of the project, findings of due diligence study, local legal texts regulating LAR issues, ADB SPS 2009 principles, compensations payment measures, eligibility for compensations and grievance redress mechanisms (GRM). The information was presented using Microsoft Power Point presentation facility.

Figure 4.2. During public consultations in Nukus district

56. During the consultations, the stakeholders and participants were informed that project contractors would develop an informative banner including information on project objectives, activities, implementers, schedule of construction works, deadlines, contact information and logbooks for complaints and suggestions on each construction site.

Figure 4.3. During public consultations in Amudarya district

57. People were requested to give their questions, opinions and suggestions. In addition, participants were provided with contact information of focal points from district branches of TN, inter regional level and PPTA for further suggestions and questions.

58. Summary of questions received from participants and replied answers are given in the below table.

Table 4.5: Summary of questions received from participants and replied answers.

	Questions	Answer
Amudarya district		
1.	What changes will be in Mangit town after project implementation?	The project will provide clean and reliable drinking water supply to people of Mangit town. Quality of water will be within the national standards for drinking water. Totally about 35 000 people will be covered by the project.
2.	How many kilometers of pipes will be reconstructed and constructed by the project?	Totally 110 kilometers of networks will be reconstructed and constructed in Mangit town.
3.	Some local schools in the district do not have water. Will the project also cover schools?	Yes. The project will cover not only people but also other public institutions including schools.
4.	Which settlements of the district will be covered by the project?	Detail information on requested settlements was provided.
5.	If there will be temporary impact on cotton field what will be compensations?	Currently no impact is expected to fields. However, if after detailed design or change of project design there will be impact on to field all the losses will be compensated fully at market price. The land will be restored to original condition after completion of works. The project will try to minimize the losses and implement works after crop is harvested. Also, the government does not allow to implement any construction works on cotton and wheat fields while their crop is standing. Such works are permitted only after harvesting all crops.
Beruniy district		
1.	What will be tariff setting principles? Tariff will be based on existing standard of consumption of liters by person per day (lpd)?	No. Each household will have water meter on house connection. Tariff will be based on actual consumption not per-capita basis.
2.	How the project will know how much water will be needed by each settlement?	The project collects information on actual population in a settlement and forecast of population growth by 2045. Based on this data volumes will be calculated.
3.	Will each household be connected to new pipes?	The project will construct house connection offtakes outside houses (manholes) equipped with water meters. Houses will connect to these offtakes.
4.	The project will drill new wells on water intake facility. But salinity of water in these wells is very high. Any	Official data of water test says that salinity of water satisfies national standards for drinking water. However, we will pass this information to

	Questions	Answer
	actions will be taken to decrease salinity of water?	project engineers to double check and take necessary actions.
5.	How construction works will be implemented? By one contractor and step by step or by different contractors working in parallel?	There will be different contractors for different components. They will implement works in parallel. Different components must complete parallelly.
6.	During pipe laying works asphalt coating of roads will be broken. What actions will be taken to restore broken asphalt coating?	Yes. Asphalt coatings will be broken. Broken asphalts will be restored to original condition by the project. Contractors will have budget in their contracts for this purpose.
7.	Water meters for houses will be installed free of charge?	Water meters will be installed by the project and paid back by households within a fixed period by several installments.
Karauzak district		
1.	Scope and area of the project activities, including type of works to be implemented within the project?	Detailed information on the question was provided
2.	What is the project implementation period?	Expected project implementation period is 4 years, starting from second half of 2018 to December 2021
3.	Who will be contractor for the project? Will it be local or international company?	Contractor will be selected in accordance with ADB procurement rules and it can be both: national or international.
4.	If auxiliary structures such as barn or shelter are affected by the project will they be compensated?	Yes. If such structure is affected by the project it will be compensated at market price based on evaluation value made by licensed valuation firm. Valuation firm will evaluate real price of a structure based on used materials, type of structure and other expenditures incurred. Owner of a household will be allowed to remain the materials after demolition.
5.	What is the source of water for new pipelines?	New pipelines will be supplied with water from "Tuyamuyun-Nukus" trunk main.
Kungrad district		
1.	Transmission main Kungrad-Muynak is crossing our territory. Can we connect directly to it and get water directly?	No, this transmission main will supply water to Muynak district inhabitants. Kungrad city and adjacent settlements will be covered by transmission main from Takhiatash Water Treatment Plant.
2.	The project is going significantly increase coverage with water supply network. Will Takhiatash Water Treatment Plant have enough capacity to cover the increased demand?	In according with the project design capacity of Takhiatash WTP will increase two times, which means instead current 60000 m ³ /day 120000 m ³ /day will be produced. This amount will be enough to cover demand of whole Kungrad district

	Questions	Answer
3.	Is there a risk that after project implementation and connection Muynak district to the transmission main, Kungrad city will have water shortage?	No there is no such risk. As mentioned before Kungrad city will be supplied from Takhiatash Water Treatment Plant which is a separate system. Capacity of WTP will be enough to meet demand of all Kungrad district.
4.	Who will be selected as a contractor? Local or international company?	The bidding process for the project will comply with ADB procurements procedure. Both national, international firm or consortium may participate in the bidding
5.	If ADB is a donor for the project who will be a client for contractors?	The Department for Operation of Inter-Regional Trunk Main "Tuyamuyun-Nukus" will be the client for contractors.
Muynak district		
1.	What is project implementation period?	Expected project implementation period is 2017 – 2021.
2.	If there is permanent impact on land what will be compensation if several families are registered in a house? Will each family receive compensation?	Due diligence study shows that there is no permanent land acquisition. If after detailed design or change of project design there will be need for land acquisition, the compensation will be provided on "land for land" basis. The same amount of land with similar soil quality will be provided to affected person in nearest locality. For example, if 1 ha of land is acquired 1 ha of land will be provided. All losses related to land acquisition will be paid in cash for example loss of tree, crops, structures etc.
3.	A new trunk main is being paid from Kungrad to Muynak city, totally 101 kilometres. Is it ADB financed project? When it will be completed?	This is government financed project which will be completed in 1 July, 2017. Pipelines constructed under our project will be connected to this trunk main.
4.	There is a water desalination plant in Porlitau village which is not working properly. Will the project rehabilitate this plant?	No. The project will not rehabilitate this desalination plant. Operation of the desalination plant is very expensive and energy consuming. New water networks will be constructed in Porlitau village which will be connected to new trunk main Kungrad-Muynak. The desalination plant will remain as reserve supply source during emergency situations.
5.	How much water we will get during the day? Currently we received couple hours per day and quality is not good	The project is designed to supply 24 hours for all settlements included in the project. Reconstruction works at the WTP will ensure quality of water meeting national standards
6.	In some years, we do not have water in the canal. Last several years we had more water. Is it possible to construct dam to keep water and develop fishing on surrounded areas	This question out of scope of work of this project. But you can develop this proposal for another funding agencies.

	Questions	Answer
7.	Will each house be connected to new water networks?	During construction of water network the project will construct manholes near houses with connection offtakes and water meters. Houses will connect to the manhole by themselves.
8.	Will we pay for installation of water meters?	The project will install water meters for each household. Households will return cost of the meters in a fixed period of time by several instalments. This will be agreed implementation of the project.
9.	In case of cut of public trees what will compensations be paid?	Contractors will pay for cut of trees to local government. Compensation amounts will be included in to contracts of contractors.
Nukus district		
1.	Number of water distribution centers will be constructed within the project. But we have places where we have pipes and WDCs, but there is no water. Is there any possibility that after your project will be commissioned	Capacity of rehabilitated WTP is designed to produce amount of water efficient for supplying whole area included in the project.
2.	Can you please list – which street in Samanbay village will be included in the project?	A map indicating water supply network in Samanbay was shown and explained.
3.	Proper repairing of the roads in makhallas after completion of the civil works	After completion works all roads shall be rehabilitated at least up to condition of pre-construction stage
4.	Project implementation timing	Expected duration of the project is 4 years, starting date – second half of 2018 and completion date – December 2021
5.	Is it possible to include in the project development of sewage system in this project?	No. this project doesn't include any physical works on sewage system rehabilitation. However, as part of capacity building program trainings and awareness program on sanitary, proper collection and disposal of sewage water will be implemented within the project. Moreover, purchase of 6 Sewage vehicles under the project dedicated to improve situation on this issue.
6.	It was noted about possibility of cutting trees. Could we know about in advance?	First of all, the project will try to avoid cutting trees and bushes as much as possible. However, if cutting trees would be unavoidable, local community will be informed in advance, and trees or bushes will be done after receiving permission from nature protection committee.

59. As it is seen from above table, questions of participants of public consultations were mostly related to technical and organizational aspects of the project. The participants were mostly interested in project implementation period, settlements to be covered, tariffs after the project

completion, quality of water to be supplied, project contractors and other questions related to project implementation and the project outcomes. Questions related to land acquisition and resettlement matters consisted only about 8% of total questions asked.

60. Public consultations were attended by representatives of water supply companies (IA), hokimiyats, nature protection committees, district architecture departments who also helped to provide detailed answers to questions of participants.

61. During each public consultation participants emphasized importance of the project and thanked the project for the effort being taken to improve living conditions of people in project areas.

4.5 Future Consultation Strategy

62. Consultation will be continued throughout the project cycle. Additional rounds of consultations with local communities will be required after updating of the LARF during detailed design and, if any impacts are identified, during implementation of LARP which to be prepared for such case. The next rounds of consultations will occur during detailed design and when compensation and assistance are provided.

4.6 Disclosure

63. The project information will be disseminated through disclosure of the Land Acquisition and Resettlement Framework. Copy of the LARF will be disclosed in ADB's website (in English Language) and in the website of CSA (in English, and local language) upon approval. The same procedure will also be followed during the disclosure of updated/final LARF (or LARP) during detailed design.

V. GRIEVANCE REDRESS MECHANISM

5.1 General

64. Withdrawal of lands and involuntary resettlement of citizens is often a complex process which can be accompanied by judicial proceedings in view of complaints concerning compensation payments as well as non-fulfilment of other obligations on resettlement related assistance to citizens. To enable people to voice their questions and concern throughout the project, the grievance procedure described below was developed. This mechanism provides for the appeal of any actions and decisions violating the rights and freedoms of citizen affected by the project and it complies with the law of the Republic of Uzbekistan No. ZRU-378 dated 3 December 2014 “About appeals of physical and legal persons” which guarantees rights of citizens and regulates responsible parties to handle appeals from citizens. This law also clearly determines types of queries, deadlines of submitting applications, proposals and complaints. A special appeal mechanism will be managed by heads of organizations or responsible persons especially appointed for grievances arise from affected households.

65. The ADB requires the Executing Agency to establish a project related grievance redress mechanism with suitable grievance redress procedure to receive and facilitate resolution of concerns, complaints and grievances of affected persons. A grievance mechanism will be established to allow affected persons to appeal any disagreeable decision, practice or activity arising from assessment or valuation of land or other assets, acquisition and compensation in case if there is impact after completion of detailed design or any unanticipated impact during construction period. The Executing Agency will ensure that grievances and complaints on any aspect of land acquisition, compensation and resettlement are addressed in a timely and satisfactory manner. During surveys after completion of detailed design and related consultations all affected persons will be fully informed of their rights and procedures for addressing complaints whether verbally or in writing, including, if necessary resort to the courts through the Government’s grievance mechanism. All possible instruments will be made available to affected persons to resolve their grievances at the project level. In case if after completion of detailed design any impact is determined, the information on the project grievance mechanism will be disseminated to affected households on local language through mahalla or village assembly of citizens or farmers councils.

66. The grievance mechanism shall not impede access to the country’s judicial or administrative remedies. Affected persons can approach a court of law at any time and independent from the project level grievance redress process. The Executing Agency will establish appeal mechanism based on the legislation of the Republic of Uzbekistan.

5.2 Grievance Redress Mechanism

67. The Project Coordination Unit of the Communal Services Agency will establish a simple and accessible grievance redress mechanism which shall ensure number of instruments and levels for grievance resolution and appeals process. PCU will have a Project Coordinator on the site who will be responsible for the project implementation and therefore implementation of GRM.

68. The Project Grievance Redress Mechanism shall not prevent any AP to approach the national/government GRM system to resolve their complaints at any stage of the grievance redress process. The national GRM system which is regulated with the law of the Republic of Uzbekistan No. ZRU-378 dated 3 December 2014 “About Appeals of Physical and Legal Persons” which guarantees rights of citizens and regulates responsible parties to handle appeals from citizens. This law clearly determines types of queries, deadlines of submitting applications, proposals and complaints. Particularly, the Article 4 says that grievances can be applied orally or

in written, both in hard copy or by e-mail. Article 6 says that a grievance can be applied in official language or in any other language convenient for an applicant. Article 19 fixes the dates for review and solving grievances received. Particularly, a government body must solve a grievance in 15 days. If additional documents are required, then this timeframe can be extended to 1 month. According, to the Article 21 an aggrieved person has a right to obtain information on the process of review of the grievance, provide additional information which can help to solve the grievance efficiently etc.

69. The main objective of the project specific grievance mechanism is to ensure timely and user-friendly solution of complaints received from affected persons. However, the Project Grievance Redress Mechanism shall not prevent any affected person, if any, to approach the national legal system to resolve their complaints at any stage of the grievance redress process. The affected persons can address their complaints to local courts at any time and not only after using the grievance redress mechanism of the project.

70. The below table describes the grievance redressing process of the project.

Table 5.1: Grievance redress mechanism of the project and its levels

Level	Process
Level-1. District Branches of the Department for Operation of Inter-regional Water Supply “Tuyamuyun-Nukus” (TN).	The aggrieved person applies to relevant district branch of TN. After registration of received complaints the relevant branch of TN will review nature/specificity of the complaint and will forward it to relevant party for resolving. In parallel, the branch of TN shall inform its headquarter in Nukus city and the PCU coordinator about the received complaint. Depending on the nature of complaint it may go to project contractor, land cadaster department, makhalla or other local entity. During implementation of the GRM the branch of TN will be assisted by the Project Management Consultant and social safeguards specialist of PCU. At this level, the complaint should be resolved during 2 weeks. The local branch of TN will inform the aggrieved person and PCU coordinator about undertaken measures and the outcome of the submitted question or complaint. APs also may submit their appeals to TN through the following e-government web site www.my.gov.uz .
Level – 2. Grievance Redress Committee under the Department for Operation of Inter-regional Water Supply “Tuyamuyun-Nukus” (TN)	In case if the grievance was not redressed on the first stage or an applicant is not satisfied with the decision made/solution, she/he can submit the grievance directly to Grievance Redress Committee (GRC) under Inter regional trunk main in Nukus city which will consist of officials of Hokimiyat, coordinator of PCU in the Republic of Karakalpakstan, officers of IA and PMC. The committee will review the complaint and made decision on its redress. Complaints shall be resolved in 15 days, and in case additional details are required, a maximum of 30 days will be used to resolve and close the complaint. In case this additional time is necessary, the complainant will be informed of the additional delay in writing. In case the grievance is not related directly to the project, the further instance will be recommended to the applicant where she/he should apply for the decision making. The EA through its PCU coordinator on a regular basis will check with the TN whether any complaint is received by district branches. At this stage APs also may submit their appeals to EA through the following e-government web site www.my.gov.uz .
Level 3. Economic Court	If the issue was not solved or the applicant is not satisfied with the decision/resolution, the aggrieved person may submit grievance to local Economic Court where decision will be made in accordance with relevant national legislation.

71. The aggrieved persons can also use the ADB Accountability Mechanism (AM) through the direct citizens' application to the Head Quarter in Manila, particularly to Complaints Receiving Officer, Accountability Mechanism Asian Development Bank Headquarters 6 ADB Avenue, Mandaluyong City 1550, Philippines Email: amcro@adb.org, Fax +63-2-636-2086

72. AM is the last resort and ADB has its availability as a recourse in case other mechanisms for dealing with harmful project effects are not successful. GRM is required by SPS and the use of project level GRM should be encouraged first.

5.3 GRM Records and Documentation

73. The Communal Services Agency and its Project Coordination Unit will keep record of complaints received for its use as well as for review by ADB during regular missions. The grievance mechanism applies equally to all affected households. When reference is made to the makhalla, it is to the makhalla that the affected persons are located. The PCU will be responsible for recording the complaint, the step taken to address grievance, minutes of the meetings and preparation of a report for each complaint. The complaint handling process will be reported to ADB through project progress reports.

VI. POLICY AND LEGAL FRAMEWORK

6.1 General

74. This section presents the review of legal texts of the Republic of Uzbekistan regulating resettlement and compensation issues and provisions of ADB Safeguard Policy Statement 2009 (SPS). These documents provide guarantee of the rights of the project affected persons and the order of compensation payments to these persons in case if their assets are under impact. Based on the analysis of the national applicable laws and policies and ADB's Policy requirement, project related LAR principles have been adopted.

6.2 Laws, Regulation and Provision relating to LAR in Uzbekistan

6.2.1 The Constitution of the Republic of Uzbekistan

75. The Constitution of the Republic of Uzbekistan adopted on 08.12.1992 with the latest amendment on 07.04.2017 provides that:

- (i) everyone shall have the right to own property (Article 36). The economy of Uzbekistan, evolving towards market relations, is based on various forms of ownership. The state shall guarantee freedom of economic activity, entrepreneurship and labour with due regard for the priority of consumers' rights, equality and legal protection of all forms of ownership (Article 53);
- (ii) an owner, at his discretion, shall possess, use and dispose of his property. The use of any property must not be harmful to the ecological environment nor shall it infringe on the rights and legally protected interests of citizens, juridical entities and the state (Article 54);
- (iii) the land, its mineral resources, waters, fauna and flora, other natural resources shall constitute the national wealth and shall be rationally used and protected by the state (Article 55).

76. The Constitution guarantees the rights of its citizens and their equality before the law. In accordance with the Constitution, all citizens of Uzbekistan have equal rights and freedoms and are equal before the law without distinction of sex, race, nationality, language, religion, social origin, convictions, personal or social status (Article 18). Citizen of the Republic of Karakalpakstan at the same time is a citizen of the Republic of Uzbekistan (Article 43). Laws of Uzbekistan are mandatory on the territory of the Republic of Karakalpakstan (Article 72).

6.2.2 The Land Code of the Republic of Uzbekistan

77. The Land Code of the Republic of Uzbekistan was adopted on 30.04.1998 with amendments as for 30.08.2003 and 03.12.2004. The code regulates the issues of withdrawal and provision of land plots for non-agricultural needs, compensation of losses of agricultural production, defines ownership and rights on land. It describes responsibilities of different state authorities of Uzbekistan related to land management; rights and obligations of land possessor, user, tenant and owner; land category types, land acquisition and compensation, resolution of land disputes and land protection. The Land Code also defines the terms of rights termination on land plot, seizure and land acquisition of land plot for state and public needs, and terms of seizure of land plot in violation of land legislation.

78. According, to the Land Code of the Republic of Uzbekistan, all land in Uzbekistan is state property and permits for use of land are granted and monitored by the State through the district and province administrations. National legislation envisages the following types of land transfers:

for use, lease, or ownership by legal entities (only with objects of trade and services infrastructure), and for lifelong inheritable ownership (with housing), use, or lease by individuals. While all land transactions are subject to state regulation some transactions occur with special permission of the state. The laws and procedures for expropriating agricultural and urban land are treated differently under Uzbek Law. While agricultural land issues are covered and treated under the Land Code, urban land issues are covered under the Civil Code, the Housing Code, and the Urban Construction Code.

79. The Land Code identifies several categories of land users, who are eligible for compensation for losses and damages in connection with land acquisition:

- (i) Land tenants – citizens who were allocated land plots for individual housing construction and/or dehkan farming on the basis of life-long tenure
- (ii) Lessees (leaseholders) – farmers, who were allocated land plots for agricultural production purposes, on the basis of a long-term lease
- (iii) Land owners – users of land plots occupied by trade and services infrastructure, which are used as private property. Land, occupied by trade and services infrastructure, however, may not be sold separately from the latter
- (iv) Land users – all other enterprises, organizations and institutions, which are entitled to use non-agricultural lands. This is the largest category, which includes enterprises and institutions of all types (private and public). Examples include hospitals, schools, private enterprises, and factories.

80. Legislation envisages compensation for damages to land users in full, including lost profits, in the following instances: (a) seizure, purchase or temporary occupation of land; (b) limitation of the rights of users; (c) deterioration of land quality due to the effects of construction works, servicing, and other activities that lead to reductions in the quantity or quality of agricultural products. According to the legislation, compensation for loss of agricultural production is not provided if: (i) land is acquired for the construction and servicing of individual housing; (ii) land is acquired for the construction of schools, boarding-schools, orphanages, preschool and healthcare establishments; and (iii) land was allocated for water management purposes and for the construction of irrigation and water related facilities.

6.2.3 Civil Code of the Republic of Uzbekistan

81. The Civil Code of the Republic of Uzbekistan was approved by the Laws of the Republic of Uzbekistan No.163-I dated 21.12.1995 and No.256-I dated 29.08.1996 with the last amendments No. ZRU-260 dated 22.09.2010. The Civil Code provides definition of the property, main concepts to property objects, basics of termination of the property rights and the right for compensation payments in view of the property right loss, rights on intellectual property, regulates the contractual and other obligations, as well as other property and related personal non-property relations. The Code defines general rules of property seizure, determination of property cost and rights for compensation, terms of rights termination.

82. The Code provides that: person whose right has been violated may demand full compensation for damages, unless the law or the contract provides compensation for losses in a smaller size (Article 14, Clause 1). The Civil Code (Article 14, Clause 2) also specifies that losses are understood as:

- (i) expenses that the person whose right is violated, made or must make to restore the violated right;
- (ii) the loss of or damage to property (real damage);

- (iii) the revenues that this person would have received under normal conditions of civil turnover if his right had not been violated (lost profits).

83. According to Article 14, Clause 3 “If the person has violated law, revenues received as a result of this, the person whose rights were violated, has the right to demand compensation along with other losses, lost profits in the amount not less than such profits”.

84. According to Article 7 “If an international treaty or agreement stipulates other rules than those stipulated by civil legislation, rules of the international treaty or agreement shall be applied”. This rule is a common rule for all Uzbekistan’s laws.

85. According to the Article 8, Clause 3, the rights to the property which are subject to state registration shall arise upon the registration of the relevant rights to it, unless otherwise provided by law. Article 84, Clause 1 provides that the right of ownership and other real property rights, creation, transfer, restriction and termination of these rights are subject to state registration. This means that without registration the right to real estate property does not enter into the force. This statement is very important for the further understanding of LAR processes related to land acquisition and building’s demolition.

6.2.4 The Resolution of the Cabinet Ministers of the Republic of Uzbekistan "About Approval of the Regulations on Procedure of Compensations Payments to Citizens and Legal Entities for Withdrawal of Land Plots for the State and Public Needs"

86. The resolution with the reference number 97 was adopted on 29 May, 2006. This resolution sets out the procedures for the compensation individuals and legal entities in the event that the urban land they occupy or use is needed to be acquired for state and public needs. This regulation is mainly dealing with land plots, houses, building and structures of individuals and legal entities.

87. The following are the general principles and procedures of the resolution that will be carried out for acquiring a land plot or portion of it and compensating individuals and legal entities for residential, manufacturing, or other special purpose buildings, facilities, and plantings subject to demolition in connection with land withdrawal for government or public needs.

- (i) Withdrawal (or acquisition) of a land plot for public needs shall be carried out with landowner’s consent or upon agreement with the land-user/tenant, by a resolution of the Hokim of a particular jurisdiction (district, town, city, province), or by the resolution of the Cabinet of Ministers of the Republic of Uzbekistan.
- (ii) If the landowner, land-user, or landholder disagrees with the resolution of the Hokim of the relevant jurisdiction or the Cabinet of Ministers on withdrawal of a land plot, then the resolution may be appealed in a court.
- (iii) A resolution on the withdrawal of a land plot and demolition of residential, manufacturing, or other assets (that is, buildings, facilities, and plantings) shall be made in accordance with the general layouts, as well as the detailed plans for the development of residential areas and neighborhoods in cities and settlements.
- (iv) Unjustified demolition of residential, manufacturing, or other buildings, facilities, or plantings shall be prevented.
- (v) Based on a resolution of the Cabinet of Ministers, the Hokims of the respective districts/towns shall adopt their own resolutions on withdrawing a land plot and demolishing residential, manufacturing, and other buildings, facilities, and plantings.

- (vi) The Hokimiyats of the respective districts/towns shall notify the owners of relevant residential, manufacturing and other buildings, facilities, and plantings in writing and against a receipt about the resolution at least six months before the targeted demolition date. The notification shall be supported by copies of the respective resolutions on withdrawal of the land plot and demolition of residential, manufacturing, and other buildings, facilities, and plantings located on the land plot.
- (vii) Landowners may appeal the Resolution of the respective District/Town Hokim on demolition and approval of the value of residential, manufacturing, and other-purpose buildings, facilities, and plantings subject to demolition in the Hokimiyats of the Provinces as well as in the court system.
- (viii) The value of residential, manufacturing, or other-purpose buildings and facilities built without proper authorization shall not be reimbursed.
- (ix) If the withdrawn lands are allocated to enterprises, institutions, or agencies, those entities will be responsible for the payment of compensation, provision of houses or apartments, and temporary housing, as well as the reimbursement of all relocation costs based on the decision of the respective District/Town Hokim.

88. The following are the specific procedures and terms for compensating individuals and legal entities for houses, buildings, facilities, and plantings to be demolished.

- (i) The respective Hokimiyats shall establish commissions (hereafter referred to as the "Commission") to determine the size and type of compensation. The Commission will be headed by the Deputy Hokim of the district/town and include the representatives of financial and other departments of Hokimiyats, the State Inspector for Supervision over Land Use and Protection, local authorities, landowner (that is, land-user or landholder) in charge of the land plot to be withdrawn, representative of the enterprise, institution, or agency to which the land plot is to be allocated, as well as representatives of other relevant authorities at the discretion of Hokimiyats.
- (ii) The technical condition of houses or apartments, buildings, and facilities are appraised, and the value of plantings to be withdrawn will be determined by the District/Town Land Resource and State Cadaster Departments at the expense of the applicant. In case of disagreement with the results of the appraisal by the District/Town Land Resource and State Cadastre Departments, the owner has the right to contract independent licensed appraisers which will be paid for by the applicant. The appraisal materials are to be submitted to the Commission.
- (iii) If the land plot to be withdrawn is owned by an individual who has acquired a lifetime ownership with the right of inheritance through an auction, the individual will be provided with lifetime ownership to an equivalent new land plot with the right of inheritance. The appraisal will be performed by the licensed appraisers of the District/Town Land Resource and State Cadaster Departments in current prices at the expense of the applicant.
- (iv) Any materials resulting from the dismantlement of houses or apartments, other buildings, and facilities (except unauthorized constructions) shall remain at the disposal of the developer or landowner (land-user, landholder) who pays full-scale compensation to the owner. In specific cases, at the request of the owner of the demolished property or plantings, and by the decision of the respective Hokim, the materials resulting from the dismantling of the property may be transferred to the owner. In this case, the Commission shall determine the value of the materials

transferred to the owner at current market prices, taking into account wear-and-tear.

- (v) The specific timing and procedures of monetary compensation payment shall be set forth by resolutions of the relevant jurisdiction. However, monetary compensation is to be paid prior to commencement of demolition process.

89. Procedure and Terms for the Provision of Housing to the Owners of Houses to be demolished.

- (i) If privately owned are to be demolished, the individuals, members of their families, as well as the individuals permanently residing in these houses or apartments at their own choice and subject to agreement of the parties, will be provided with an equivalent suitable dwelling with the floor space meeting the public norms on an ownership basis, and will receive compensation for the value of the plantings, or will get compensated for the value of demolished houses or apartments, other buildings, facilities, and plantings. Equivalence is determined as being an amount equal to the value of the house or apartment to be demolished. If the value of the house or apartment to be demolished is higher than the value of the housing provided, the owner will be compensated for the difference.
- (ii) The respective District/Town Hokimiyats will be responsible for providing housing and/or paying other types of compensations to the owners of the demolished houses or apartments out of the funds from local budget revenues.
- (iii) In order to get living quarters, the owner of the residential house or apartment to be demolished after receipt of a notification about the upcoming demolition shall, within a month's time, file an application agreed with family members and other people residing (registered) in the house or apartment to the respective District/Town Hokimiyat requesting assignment of living quarters in exchange for the housing to be demolished, specifying family members, number of permanently residing persons, as well as any available benefits which entitle them to extra housing floor space in addition to the public norm.
- (iv) After the respective District/Town Hokimiyats approve the Commission resolution on the size and type of compensation, assignment of living quarters in exchange for the demolished residential house or apartment, or, at the request of the owner, on provision of monetary compensation, the owner shall file with the Hokimiyat a letter providing a guarantee to vacate the residential house (apartment) subject to demolition.
- (v) A house or apartment may only be demolished subject to agreement of the parties and after the owner was provided with living quarters in exchange for the house or apartment to be demolished.
- (vi) In specific cases, subject to agreement of the owner of the house or apartment to be demolished, the District/Town Hokimiyat may provide living quarters in houses, which are in the course of construction, specifying in the resolutions the exact timing when the house is to be commissioned. If the living quarters in the houses being constructed are not provided by the established date, the Hokimiyat shall be responsible for providing the living quarters within a month's time.
- (vii) Belongings of the owner of the residential house (apartment) to be demolished shall be moved to a new location at the expense of the developer or landowner (land-user, landholder) to whom the plot was allocated.
- (viii) The respective District/Town Hokimiyats will compensate the owner of the house to be demolished due to the withdrawal of the land plot.

90. Procedure and terms for provision of land plots for private housing construction to individuals in exchange for residential houses (apartments) to be demolished.

- (i) In case of demolition of privately owned residential houses or apartments, in connection with a land plot acquisition for public purposes, the owners of the properties, their family members, as well as individuals permanently residing in these houses or apartments at their request could be provided with a land plot for private housing construction within the established norms. Here, temporary housing under the terms of a lease shall be provided for the development period of up to two years along with full-scale compensation for the value of the houses or apartments, buildings, facilities, and plantings to be demolished.
- (ii) A land plot for private housing construction and monetary compensation shall be provided to the owner of the demolished houses or apartments by the respective District/Town Hokimiyat. If the withdrawn land plots are to be allocated to enterprises, institutions, or agencies, these entities will be responsible for providing compensation land plots for private housing construction and compensation payments to the owners of the demolished residences.
- (iii) To obtain a land plot, the owner of a house or apartment to be demolished after receipt of notification on the upcoming demolition shall, within a month's time, file with the respective District/Town Hokimiyat an application for assignment of a land plot for private housing construction specifying the family members, number of permanently residing persons, and the need for temporary housing.
- (iv) After the respective District/Town Hokimiyat approves the Commission resolution on the size and type of compensation, the owner shall file with the Hokimiyat a letter providing a guarantee to vacate the house (apartment) subject to demolition within the term specified by the respective District/Town Hokimiyats.
- (v) A house or apartment may be demolished only after the owner is provided with a land plot for private housing construction and with temporary housing on terms of a lease for the period of development of the land plot of up to two years.

91. Procedure for compensating legal entities for damages resulting from land withdrawal for government and public needs.

- (i) In the case of withdrawal of a land plot that accommodates residential, manufacturing, or other buildings, facilities, or plantings owned by a legal entity, the legal entity is to be provided with equivalent property and is fully compensated for all damages due to the withdrawal of land plot for public needs.
- (ii) Land-owners/users/tenants/proprietors of land plots in urban areas shall be compensated for the damages in agriculture and forestry-based production in accordance with the land laws of the Republic of Uzbekistan.
- (iii) Legal entities shall be compensated for damages resulting from withdrawal of land plots by the respective district/Town Hokimiyat. If the withdrawn land plots are to be allocated to enterprises, institutions, or agencies, then payment of compensation, provision of living quarter and temporary housing, as well as moving the property to the new location shall be carried out at the expense of such enterprises, institutions, and agencies according to the resolution of the respective District/Town Hokimiyat.
- (iv) To be compensated for the withdrawal of a land plot, the legal entity following the receipt of notification of the upcoming demolition shall, with a month's time, file an application specifying the type of compensation with the respective District/Town Hokimiyat.

- (v) After the respective District/Town Hokimiyat approve the resolution of the Commission, the legal entity shall file with the Hokimiyat a letter providing a guarantee to vacate the residential house, other buildings, and facilities subject to demolition within the term specified by the respective District/Town Hokimiyats.
- (vi) Residential, manufacturing, and other special purpose buildings as well as facilities belonging to a legal entity may be demolished only after the type and size of compensation and timing of payment thereof are agreed to with the owner.

92. Procedure and terms of movement and restoration in a new location of residential houses, buildings, and facilities subject to demolition.

- (i) At the request of individuals and legal entities, the residential, manufacturing, and other purpose buildings and facilities owned by them, which are subject to demolition may be moved and restored in a new location in accordance with a resolution of the respective District/Town Hokimiyats, and shall be funded out of local budget revenues. The individuals and legal entities who own the housing shall be provided with temporary housing under a lease for the period of land plot development up to two years.
- (ii) The property will be moved and restored within the limits of a given locality on land plots assigned in accordance with the established norms, subject to a condition that the technical state of houses, buildings, and facilities allows for their movement, i.e. the condition of the engineering structures and structural components must be able to withstand disassembly, transport, and reassembly in a new location. The Commission will determine the feasibility of moving the houses, buildings, and facilities based on a feasibility study and design estimates developed by specialized design agencies at the expense of the developer to whom the withdrawn land plot is allotted. The movement of residential, industrial, or other buildings and facilities and their restoration in a new location shall be carried out within the timeframe set forth by the respective District/Town Hokimiyats. However, the term should not exceed a period of one year.
- (iii) All costs associated with the movement of residential, manufacturing, and other buildings and facilities and restoration thereof in a new location, rent of temporary housing, movement of property of individuals or legal entities to the temporary housing and from there to the restored buildings/facilities based on the decision of the respective District/Town Hokimiyats shall be borne by the developer or land owner (land-user, landholder) to whom the plot was allocated.
- (iv) Relocation of equivalent residential, manufacturing, or other-purpose buildings and facilities owned by a legal entity shall be carried out only after the type, the size, and the timing of payment of compensation are agreed to with the owner.

93. Procedure and terms of settlement in cases of construction of houses and buildings in a new location for individuals and legal entities whose residential houses (apartments) are subject to demolition.

- (i) At the request of individuals and legal entities whose houses or apartments are subject to demolition, residential houses and buildings may be constructed in a new location and transferred to their ownership. In this case, no monetary compensation for the demolished residential houses or apartments is paid.
- (ii) Construction of residential houses and buildings in a new location and their transfer to the ownership of individuals and legal entities whose residential houses or apartments are subject to demolition shall be carried out by the respective District/Town Hokimiyats.

- (iii) If the withdrawn land plots are to be allocated to enterprises, institutions, or agencies, then the construction of residential houses and buildings in a new location and transfer thereof to the ownership of individuals and legal entities, whose residential houses or apartments are subject to demolition, will be carried out at the expense of such enterprises, institutions, or agencies.
- (iv) Construction of residential houses and buildings in a new location for individuals and legal entities, whose residential houses or apartments are subject to demolition shall be carried out within the limits of a given locality (population center). Here, for the period of construction of residential house/building at the new location, the respective District/Town Hokimiyats will provide the individuals and legal entities concerned with temporary housing on terms of a lease.
- (v) All costs related to the leasing of temporary housing, movement of property of the individuals and legal entities to the temporary housing, and from there to the residential houses built in a new location based on the decision of the respective District/Town Hokimiyats, shall be borne by the developer or land owner (that is, land-user, landholder) to whom the withdrawn land plot was allocated.
- (vi) In order to get the residential house/building constructed in the new location in exchange for the house or apartment to be demolished, the individuals and legal entities, owning houses or apartments subject to demolition shall, within one month after receipt of notification about demolition, file an application specifying the family members, number of permanently residing persons, as well as the available housing benefits with the respective District/Town Hokimiyats.

6.2.5 Resolution of Cabinet of Ministers “About the Measures of Improvement the Order of Provision of Land Plots for Implementation of Urban Development Activity and for Other Non-Agricultural Needs”

94. Being adopted on 25 May 2011 with the reference number 146 the resolution is aimed to improve the procedure of providing land plots, protect the rights of legal entities and individuals on land, improve the architecture of settlements and the efficient use of their land for construction in accordance with the land code and the town planning code. This resolution has approved two regulations: (i) regulation on the procedure for providing land plots for urban development and other non-agricultural purposes, (ii) regulation on the procedure of compensation for land possessors, users, tenants and owners, as well as losses of agriculture and forestry:

95. The Regulation on the procedure for providing land plots for urban development and other non-agricultural purposes contains the following provisions:

- Order of land plot location, preparation and approval of site selection and land allocation documents without approved planning documentation;
- Order of placement, selection and land allocation with approved planning documentation,
- Order for rejection in the selection and land allocation for construction;
- Provision(sale) of land plots for individual housing construction;
- Elements of urban planning documents and development regulation lines.

96. The Regulation on the procedure of compensation for possessors, users, tenants and land owners, as well as losses of agriculture and forestry includes the following:

- Compensation for losses of owners, users, tenants and land owners;
- Compensation for losses of agriculture and forestry;
- cost of irrigation and developing equal new land plot in return for seized irrigated agricultural land;

- Cost of fundamental improvement of grassland and pasture;
- Scheme for determination of losses of land possessors, users, tenants and owners, as well as losses of agriculture and forestry;
- Coefficients on location of seized land plots.

97. The losses of land possessors, users, tenants and owners, as well as losses of agriculture and forestry should be compensated before granting of documents certifying rights on land plot. The regulation also orders that demolition of house, or building shall be done only after agreeing on compensation and providing replacement premises. The regulation orders that compensation has to be paid before starting any construction work. The land possessors, users, tenants and owners, whose land plots are seized and to whom land plots are granted, in case of disagreement with defined amount of losses, can appeal to court. In case of acquisition and temporary occupation of land plot or part thereof, the following would be subject to compensation:

- Cost of land plot, owned by individuals and legal entities;
- Cost of residential houses, constructions and installations, including incomplete constructions, also located outside of allocated plot, if its further utilization is impossible due to seize of land plot.
- Cost of fruits and berries, protection and other perennial plants;
- Cost of incomplete agricultural production;
- Lost profit.

98. Above described Laws and Regulations mention that non-titled and squatters on land and building/structures are ineligible for any compensation.

99. Collectively, these regulations provide a sound basis for acquiring land for public purposes and for compensating land users according to the registered use of the land in Uzbekistan

6.2.6 Additional Procedures or Principles Relating to Expropriation of Urban Land

100. Based on the Civil Code, the Housing Code, and the Urban Construction Code, the real estate value and corresponding compensation are determined on the basis of the registered price in the Cadastre. However, this price may be an underestimation of the real price of the property. In some cases, the registered price can be several times below a real estate's actual market value. The real estate owner is given a choice between cash compensation or the provision of real estate of equal value on a different plot of land. Given that all land in Uzbekistan is state owned, loss of land is not compensated in cash. Enterprises or businesses that are expropriated will be compensated by a new plot of land and building, thus allowing affected people to pursue their activities.

101. There is no provision for compensation for loss of income or profits. This is in contrast to the Land Code, according to which farmers are compensated for lost income. It is important to note that because of State ownership of lands in Uzbekistan, land use is only possible with the permission of local authorities on the basis of a lease or on other terms. Accordingly, land use issues are fully covered by land legislation and are not governed by provisions of customary law, traditional practices, or neighborhood relationships, etc. Thus, according to Uzbek laws, those who use or occupy land without a lease or other type of official permission will not be entitled to legal compensation. The State will have the right to seize the land from those "illegal land users".

102. Within implementation of this project the order of compensations payment to these persons in case of loss of property and other objects of property is also governed by the following standard and legal documents:

- (i) Law of the Republic of Uzbekistan "On Evaluation Activity" as for 19.08.1999. No. 811-I;
- (ii) Decree of the President of the Republic of Uzbekistan "On further improvement of activity of evaluation companies and increases of their responsibility for the quality of rendered services" (No. PP-843 as for 24.04.2008).

6.2.7 Construction Standard and Rules No. KMK 2.10.03-97

103. The KMK Instruction regulates construction norms for temporary and permanent allocation of land plot to main water and sewerage pipelines. This construction norm is issued by State Committee on Architecture and Construction of Uzbekistan which is the controlling authority for all type of constructions within Uzbekistan. According to this KMK permanent land acquisition will be allowed for on ground pipelines only and in case there will be underground pipeline laying down then temporary land acquisition will be applied only.

6.2.8 Resolution of Cabinet of Ministers “On Approval of the Regulations on the Procedure of Assignment and Payment of Social Benefits and Material Assistance to Low-Income Families”

104. This resolution with reference number 44 dated 15 February 2913 determines the procedure for the appointment and payment by Makhalla allowances for families with children under the age of 14 years, allowances for child care until the age of two years and allowance for low income families. According to this resolution the following types of families are entitled for allowances:

- families who have lost both parents and children involved in family education;
- families where one or both parents are disabled children;
- widow (er), raising two or more children under the age of 14, living separately from other relatives;
- family with disabled children;
- mothers or fathers who are bringing up the children in a single-parent family. In this case the fact of child rearing mother (father) in an incomplete family established by Makhalla;
- families in which one or both parents are unemployed who has been registered at centers to promote employment and social protection of the population as job-seekers;
- single retired persons.

105. The Uzbekistan’s legislation does not define compensation as targeting the rehabilitation of the APs livelihood. It instead focuses on the mere compensation of directly measurable physical impacts or incomes. This may create some reconciliation problem with ADB requirements especially for what concerns the compensation of indirectly affected items that become unusable after impacts or for the provision of severe impacts, vulnerable APs and relocation allowances. The legislation, however, has enough span (for instance indicates that the poor, the disadvantaged and the people leaving in frontier areas require special attention during LAR) to allow an interpretation of its mandates to cover ADB requirements without the need of legal reform.

6.3 ADB Involuntary Resettlement Safeguard Policy review

106. ADB adopted its Safeguard Policy Statement (SPS) in 2009 including safeguard requirements for environment, involuntary resettlement and indigenous people. The objective of the involuntary resettlement safeguard policy is to avoid involuntary resettlement wherever possible; to minimize involuntary resettlement by exploring project and design alternatives; to enhance, or at least restore, the livelihoods of all displaced persons in real terms relative to pre-project levels; and to improve the standards of living of the displaced poor and other vulnerable groups.

107. The involuntary resettlement safeguards cover physical displacement (relocation, loss of residential land, or loss of shelter) and economic displacement (loss of land, assets, access to assets, income sources, or means of livelihoods) as a result of (i) involuntary acquisition of land, or (ii) involuntary restrictions on land use or on access to legally designated parks and protected areas. It covers them whether such losses and involuntary restrictions are full or partial, permanent or temporary. The three important elements of ADB's SPS are: (i) compensation at replacement cost for lost assets, livelihood, and income prior to displacement; (ii) assistance for relocation, including provision of relocation sites with appropriate facilities and services; and (iii) assistance for rehabilitation to achieve at least the same level of well-being with the project as without it. The SPS gives special attention to poor and vulnerable households to ensure their improved well-being as a result of project interventions

108. As per SPS, the rate of compensation for acquired housing, land and other assets will be calculated at full replacement costs. The calculation of full replacement cost will be based on the following elements: (i) fair market value; (ii) transaction costs; (iii) interest accrued, (iv) transitional and restoration costs; and (v) other applicable payments, if any. Where market conditions are absent or in a formative stage, the borrower/client will consult with the displaced persons and host populations to obtain adequate information about recent land transactions, land value by types, land titles, land use, cropping patterns and crop production, availability of land in the project area and region, and other related information.

109. The borrower/client will also collect baseline data on housing, house types, and construction materials. Qualified and experienced experts will undertake the valuation of acquired assets. In applying this method of valuation, depreciation of structures and assets should not be taken into account. The following are the basic policy principle of ADB's SPS, 2009:

- (i) Screen the project early on to identify past, present, and future involuntary resettlement impacts and risks. Determine the scope of resettlement planning through a survey and/or census of displaced persons, including a gender analysis, specifically related to resettlement impacts and risks.
- (ii) Carry out meaningful consultations with affected persons, host communities, and concerned non-government organizations. Inform all displaced persons of their entitlements and resettlement options. Ensure their participation in planning, implementation, and monitoring and evaluation of resettlement programs. Pay particular attention to the needs of vulnerable groups, especially those below the poverty line, the landless, the elderly, women and children, and Indigenous Peoples, and those without legal title to land, and ensure their participation in consultations. Establish a grievance redress mechanism to receive and facilitate resolution of the affected persons' concerns. Support the social and cultural institutions of displaced persons and their host population. Where involuntary resettlement impacts and risks are highly complex and sensitive, compensation and resettlement decisions should be preceded by a social preparation phase.

- (iii) Improve, or at least restore, the livelihoods of all displaced persons through (i) land-based resettlement strategies when affected livelihoods are land based where possible or cash compensation at replacement value for land when the loss of land does not undermine livelihoods, (ii) prompt replacement of assets with access to assets of equal or higher value, (iii) prompt compensation at full replacement cost for assets that cannot be restored, and (iv) additional revenues and services through benefit sharing schemes where possible.
- (iv) Provide physically and economically displaced persons with needed assistance, including the following: (i) if there is relocation, secured tenure to relocation land, better housing at resettlement sites with comparable access to employment and production opportunities, integration of resettled persons economically and socially into their host communities, and extension of project benefits to host communities; (ii) transitional support and development assistance, such as land development, credit facilities, training, or employment opportunities; and (iii) civic infrastructure and community services, as required.
- (v) Improve the standards of living of the displaced poor and other vulnerable groups, including women, to at least national minimum standards. In rural areas provide them with legal and affordable access to land and resources, and in urban areas provide them with appropriate income sources and legal and affordable access to adequate housing.
- (vi) Develop procedures in a transparent, consistent, and equitable manner if land acquisition is through negotiated settlement to ensure that those people who enter into negotiated settlements will maintain the same or better income and livelihood status.
- (vii) Ensure that displaced persons without titles to land or any recognizable legal rights to land are eligible for resettlement assistance and compensation for loss of non-land assets.
- (viii) Prepare a resettlement plan elaborating on displaced persons' entitlements, the income and livelihood restoration strategy, institutional arrangements, monitoring and reporting framework, budget, and time-bound implementation schedule.
- (ix) Disclose a draft resettlement plan, including documentation of the consultation process in a timely manner, before project appraisal, in an accessible place and a form and language(s) understandable to affected persons and other stakeholders. Disclose the final resettlement plan and its updates to affected persons and other stakeholders.
- (x) Conceive and execute involuntary resettlement as part of a development project or program. Include the full costs of resettlement in the presentation of project's costs and benefits. For a project with significant involuntary resettlement impacts, consider implementing the involuntary resettlement component of the project as a stand-alone operation.
- (xi) Pay compensation and provide other resettlement entitlements before physical or economic displacement. Implement the resettlement plan under close supervision throughout project implementation.
- (xii) Monitor and assess resettlement outcomes, their impacts on the standards of living of displaced persons, and whether the objectives of the resettlement plan have been achieved by taking into account the baseline conditions and the results of resettlement monitoring. Disclose monitoring reports.

6.4 Comparison of Policies

110. The legislation of Uzbekistan and involuntary resettlement safeguards policy of ADB provide for compensations to affected persons who have losses because of land/assets acquisition under a public interest project. However, both differ substantially on how the matter is conceptualized and resolved in practice. ADB policy compounds the matter as an income rehabilitation issue and thus requires that the actual income lost by affected persons is fully reimbursed to them. This approach covers temporary and permanent losses and is generally implemented through an allowance providing the affected persons their declared monthly salary (what should be substantiated by the supporting documents) for the number of months of business stoppage up to a maximum of 12 months which is the benchmark for permanent job loss. For informal permanent jobs without declared salaries the approach is the same but based on national minimum salary. To guarantee proper policy application the payment of the job loss allowances are to be directly disbursed to the APs by the project proponent.

111. The national legislation, instead, limits the matter to the payment as mandated by the Labor Code of fixed employment termination indemnities due by an employer to his employees and to the obligation of the project proponent to reimburse the employer of the cost of those indemnities mandate by the Civil Code. Such an approach excludes from job loss compensation informal employees without a declared salary, applies only to permanently affected jobs and does not automatically guarantee that the APs receive their job termination dues. Based on the Labor Code of 1996, last amended on 2015 (Article 67) loss of employment is to be compensated with 2 months average salary plus a severance pay of a maximum of 1 month average salary depending on the length of the employment lost. Also, according to the Civil Code (Article 14) all losses (including real damage, lost profits) are to be compensated.

112. Comparison of the Uzbekistan LAR Policy with the ADB Involuntary Resettlement Safeguard Policy indicates that key elements of the ADB Policy are present - particularly those related to valuation of immovable property. The ADB's principle of avoidance or minimization of resettlement is reflected in the Uzbekistan legislation (Civil and Land codes, related governmental resolutions). The key policy difference relate to AP's without title, or registration (businesses and structures). However, the LARP ensures that: (a) compensation is provided at replacement cost for market value for all items, (b) non-titled APs are eligible for compensation for non-land assets, provision for additional assistance especially severe impacted households and APs who are vulnerable.

113. A policy comparison between ADB's SPS and Uzbekistan's national legislation is presented in the below Table.

Comparison of LAR provisions between ADB Policy and National Legislation

Issues	ADB's SPS (2009) and ADB practice for application	Republic of Uzbekistan	Reconciliation Needs
1. Livelihood rehabilitation	ADB Policy requires rehabilitation/ improvement of AP livelihood standards.	Notion of livelihood rehabilitation not sanctioned by national law.	<u>No policy reconciliation needs.</u> Application already reconciled in previous ADB projects but to be formalized regarding <i>indirect/livelihood impacts rehabilitation for severely affected APs.</i>

Issues	ADB's SPS (2009) and ADB practice for application	Republic of Uzbekistan	Reconciliation Needs
2. Compensation entitlements	<p>A. APs with formal title have to be compensated for lost land/other assets.</p> <p>B. APs with legalizable title have right to be compensated for lost land and assets after the EAs helps them in legalizing their assets.</p> <p>APs with no legal title are compensated for lost non-land assets.</p>	<p>A. APs with formal title are compensated for lost land/other assets.</p> <p>B/C. APs with legalizable or no legal title. Legalizable are not distinguished and considered non-legal as legalization is a burden of the APs. Non-legal APs have no right to be compensated for land and non-land assets.</p>	<p>A. Same in principle/application. No reconciliation needed. B/C. Critically different in principle and application. Application already reconciled in previous ADB projects but formal Reconciliation on both counts is needed through a Decree for ADB projects as well as through inclusion of additional safeguard covenants into the loan agreements which are equivalent of the international treaty or agreement.</p>
3. Compensation	<p>A. Permanent loss of land. Replacement land as preferred option or cash compensation at full market rate. At least for legal/legalizable APs.</p>	<p>A. Permanent loss of land. Replacement land for legal APs.</p>	<p>A. Same in principle/application for legal APs. <u>Reconciliation needed both for principle and application</u> to allow the compensation all non-land losses of legalizable and non-legal APs. It is hoped that this could be achieved through a special decree for ADB projects or through inclusion of additional safeguard covenants into the loan agreements which are equivalent of the international treaty or agreement.</p>
	<p>B. Replacement of leased land. Based on replacement of lost income through cash compensation of gross income x the remaining lease years or through a replacement land lease</p>	<p>B. Replacement of leased land. Based on lease replacement and compensation in cash all losses including lost profit.</p>	<p>B. Same in principle. Application to be further improved. <u>No reconciliation needed.</u> <i>To be reflected through an instruction for ADB projects.</i></p>
	<p>C. Loss of structures/buildings. Cash compensation at replacement cost for lost item free of depreciation, transaction costs, and other deductions.</p>	<p>C. Loss of structures/buildings. Cash compensation at replacement cost for lost item free of depreciation, transaction costs, and other deductions.</p>	<p>C. <u>No reconciliation of principles and application needed.</u> However, it is required the establishment of a protocol allowing the compensation of structures/ building at replacement cost, when the salvaged materials remain with the developer or landowner provides full reimbursement to the owner. It is hoped that this can be formalized without legal reform but only a Decree for ADB projects or through inclusion of additional</p>

Issues	ADB's SPS (2009) and ADB practice for application	Republic of Uzbekistan	Reconciliation Needs
			safeguard covenants into the loan agreements which are equivalent of the international treaty or agreement.
	D. Loss of indirectly affected items. Non-affected parts of an asset no longer usable after impact will have to be compensated as well.	D. Loss of indirectly affected assets. Law requires that all losses including lost profits is to be compensated to all legal APs	D. <u>No reconciliation of principles and application needed.</u>
	E. Business losses. Reimbursement of actual losses + business re-establishment costs. For application based on tax declared income for period of business stoppage. In absence of tax declaration based on maximum non-taxable salary.	E. Loss of business. Cash compensation at market value for all damages/opportunity costs incurred. Burden of proving opportunity costs rest on the AP based on recognized documented evidence but no clear methodology.	E. Same in principle but ADB does not consider opportunity cost. <u>Application reconciliation needed</u> to define a clear methodology and distinguish short- and long- term losses.
	F. Loss of trees: i) Unproductive. Irrespective of legal land occupancy status compensation at market rate. Application based on tree type/wood volume or other methods ensuring AP rehabilitation. ii) Productive. Compensation at replacement cost based for application on various methods: tree reproduction cost, income lost (x tree type x market value of 1 year income x full production years lost).	F. Loss of unproductive and productive trees. Unproductive as well as productive trees affected by a public project are to be compensated. There are different approaches using in evaluation of unproductive and productive trees but they are in general comparable to the tree valuation methods allowed under the SPS 2009. Compensation for the lost trees is a separated from compensation for lost profits.	F. Same in principle, different in application. Already adjusted for previous ADB projects but <u>Application reconciliation is needed</u> through a decree for ADB projects ensuring systematic law implementation and also cash compensation is provided by default, ensuring and use of valuation standards fitting SPS.
	G. Loss of crops. Compensation of crop in cash at market price.	G. Loss of crops. Loss of crops to be compensated. There are two forms of compensation of loss of crops: i) compensation of uncompleted agriculture production and ii) compensation of lost profit as average income for the last three years.	G. <u>No reconciliation for policy is needed but reconciliation of policy application is necessary</u> to ensure that crops are compensated at the moment close as much as possible to the date of calculation lost profit.
	H. Loss of jobs. Indemnity for lost income ensuring AP rehabilitation. Based for application on stoppage period up to a maximum of 12 months of declared salary (formal employees) or minimum salary (informal employees.) Compensation directly	H. Loss of jobs. Loss of employment is to be compensated with 2 months average salary plus a severance pay of a maximum of 1 month average salary depending on the length of the employment lost. All losses (including real damage, lost profits) are to	H. <u>No reconciliation is needed for principles.</u> <u>Application reconciliation is however needed</u> to: a) ensure the rehabilitation of both formal and informal permanent employees; b) provide compensation parameters ensuring the compensation

Issues	ADB's SPS (2009) and ADB practice for application	Republic of Uzbekistan	Reconciliation Needs
	disbursed to APs.	be compensated.	of actual income losses of both temporarily and permanently affected employees and c) guarantee that the APs automatically receive their compensation. Application has been already reconciled on a case by case basis for previous projects but needs to be mainstreamed through a relevant Decree for ADB projects.
4. LAR Planning, assessment and valuation of impacts	<p>A. Resettlement Plan (LARP). LARP preparation includes: a) impacts assessment/AP census; b) definition of entitlements, income/livelihood restoration strategy, compliance & grievance mechanisms, institutional arrangements; c) consultation results; d) monitoring schemes; e) budget and implementation schedule. RP requires the following surveys:</p> <p>i. Measurement survey. Measures all affected items.</p> <p>ii. AP Census. Identifies all APs and establishes legitimate beneficiaries based on legal status.</p> <p>iii. Socio-economic survey. Provides background information on AP' socio-economic features.</p> <p>iv. Valuation survey</p> <p>a) Land: If land market exist based on a survey of recent transactions; without land market based on land productivity/ income;</p> <p>b) Buildings and structures. Replacement cost of materials, labor and transport and special features of building/structure without discounting depreciation, salvaged materials and transaction costs;</p> <p>c) Trees/crops. Based on the methodology detailed in section 2.</p>	<p>A. Resettlement Plan. There are no requirements to prepare integrated and stand-alone LARPs. LAR planning entails similar but less extensive/simpler assessment/survey efforts than ADB Policy, as detailed below:</p> <p>i. Measurement survey. Land and buildings impacts measured. Other impacts identified but not measured.</p> <p>ii. APs Identification. Identifies only legal APs</p> <p>iii. Socio-economic survey. <u>No comparable requirements exist.</u></p> <p>iv. Valuation survey</p> <p>a) Land: valued at market rate based on a transactions survey. Valuation includes transaction costs/third party liabilities.</p> <p>b) Buildings and structures. Replacement cost but the salvaged materials remain with the developer or landowner provides full reimbursement to the owner;</p> <p>c) Trees/crops. If compensated is provided based on the methodology detailed in section 3.F. and 3.G. or based on an agreed lump sum.</p>	<p>A. Partly different in principle and application. No reconciliation needed as law/regulation is silent on this matter and SPS requirements have been already applied in previous ADB projects. Still, clear instructions regarding ADB projects ensuring the measurement of all impacts and the counting of all AP are needed for mainstreaming purposes.</p> <p>i. Detailed Measurement Surveys to be mainstreamed for all impacts.</p> <p>ii. Detailed count of individuals to be mainstreamed.</p> <p>iii. The execution of the survey is to be mainstreamed.</p> <p>iv. Valuation survey</p> <p>a) Land is not valued because of compensation land to land; there is only measuring land area and valuation of land quality (productivity/soil quality) in order to compensate land to equal land.</p> <p>b) Already reconciled for previous ADB projects but <u>Formal reconciliation needed.</u></p> <p>c) Already reconciled for previous ADB projects but <u>Formal reconciliation needed</u> (See 3.F. and 3.G. above.) Detailed valuation for each tree based on SPS requirements to be mainstreamed.</p>

Issues	ADB's SPS (2009) and ADB practice for application	Republic of Uzbekistan	Reconciliation Needs
5. Procedural mechanisms	A. Information disclosure. Resettlement-related documents to be timely disclosed in the AP language.	A. Information disclosure. No disclosure requirement exists.	A. Different in principle and application. <u>Already reconciled for adb projects.</u>
	B. Public consultation. Meaningful public consultations are to be held with the APs. APs should be informed about their entitlements and options, as well as resettlement alternatives	B. Public consultation. Matters of local importance to be publicly discussed with local authorities. But no requirement to consult directly the APs	B. Same in principle but different in application. Already reconciled for ADB projects. <u>Better application needed.</u>
	C. Grievance procedure. A Grievance Redress Mechanism (GRM) is to be established for each project. Information on GRM to be communicated to the APs	C. Grievance Procedures. Each state agency/ministry must follow to detail instructions (approved by government) on registering and reviewing the concerns and claims from citizens.	<u>C. No reconciliation is needed</u>
	D. Asset acquisition conditions. Property can be acquired only after full compensation is paid to the APs	D. Asset acquisition conditions. Property can be acquired only after full compensation is paid to APs	D. Same in principle, but unsystematic in application. <u>Application to be improved.</u>
6. Assistance to vulnerable and severely affected AP	A. These APs are to be identified and special assistance is provided to restore/ improve their pre-project level of livelihoods.	A. There are no special laws or regulations for livelihood restoration due to land acquisition and involuntary resettlement impact. However, there are a number of legislative documents related to social support and livelihood improvement measures considered by the government of Uzbekistan to consider social allowances and needy families through two Cabinet of Ministers resolutions (#350, 12 December 2012 and #44, 15 December 2013) and to consider disabled people through the Law on social protection of disabled people (#422-XII, 18 November 1991). Thus, support of vulnerable segments of the population is provided on the regular base by the Government on central and local levels and does not require additional payments in connection with the project implementation.	A. Critically different in application. <u>Formal reconciliation of the application mechanisms details may be needed.</u> To be elaborated in a Decree for ADB projects.

6.5 Core LAR Policy Principle for the Project

114. Based on the above and in case if after completion of detailed design any LAR impact is found, the core involuntary resettlement principles to be applied to the project are as follows:

- (i) land acquisition, and other involuntary resettlement impacts will be avoided or minimized through all viable alternative project designs;
- (ii) construction schedule shall be matched with off-the agricultural season for construction of water pipeline so that loss of crops can be avoided
- (iii) land for land compensation will be opted for permanent land acquisition
- (iv) consultation with APs on compensation, disclosure of resettlement information to APs, and participation of APs in planning and implementing sub-projects will be ensured;
- (v) vulnerable and severely affected APs will be provided special assistance;
- (vi) non-titled APs (e.g., informal dwellers or squatters, or APs without registration details) will receive a livelihood allowance in lieu of land compensation and will be fully compensated for losses other than land;
- (vii) Draft RDD needs to be finalized and updated following the detailed design;
- (viii) LARP will be prepared if any LAR impact is found after completion of detailed design;
- (ix) Relevant information from the LARP will be disclosed to the APs in the local language;
- (x) Payment of compensation, resettlement assistance and rehabilitation measures will be fully provided prior to the contractor taking physical acquisition of the land and prior to the commencement of any construction activities on a particular package;
- (xi) All compensation will be paid and other resettlement entitlements will be provided before physical or economic displacement. However, transmission and distribution subprojects, being liner in nature, will adopt, phase wise approach for construction and the contractor can start the construction on that particular stretch where compensation has been paid. This is only applicable for transmission and network pipeline.
- (xii) Appropriate grievance redresses mechanisms will be established to resolve APs' grievances, if they occur.
- (xiii) The land needs to be restored to previous use and the farmers shall be allowed to continue their cultivation prior to start of civil work;
- (xiv) People moving in the project area after the cut-off date will not be entitled to any assistance.

VII. ELIGIBILITY AND ENTITLEMENT

7.1 Eligibility

115. APs, if such are identified after detailed design or there is unanticipated impact during construction, below are those who are eligible for compensation or at least for assistance provisions under the project:

- owners of land who lose all or part of their land, building or property owned by them;
- persons who are not owners of land or property, however livelihood funds of which directly depend on the land or property, but this land or property is necessary for project implementation (for example, private land plots);
- owners of land.
- informal users of land
- owners of informal structures impacted by the project

7.2 Cut-off-Date

116. Compensation eligibility will be limited by a cut-off- date which will be the start of final AP census following the detailed design. The cut-off-date will be published and communicated to APs by the CSA prior to the start of final AP census survey during detailed design exercise. Consultations will be carried out at each Hokimiyat office with prior notice so that affected people can participate in the consultation to know about the land acquisition and resettlement process and procedure including the broad eligibility and entitlement. The project's final design and alignment will be shared with the people and the tentative date of carrying out final DMS and final AP census surveys will be communicated where the cut-off-date will be declared as the end of AP census surveys. APs who settle in the affected areas after the cut-off date will not be eligible for compensation. They however, will be given sufficient advance notice prior to construction.

7.3 Compensation and Valuation of Assets

117. Valuation of assets, including real estate property, business etc., shall be carried out on the basis of the law of the Republic of Uzbekistan No. 811-I dated 19 August, 1999 "On valuation activity", decrees and resolutions of the President and the government state standards, departmental regulations and other provisions of national legislation.

7.3.2 Compensation for Land

118. Land in the country is owned by the State. Compensation for agriculture land will be on a "land for land" basis, with land being provided to land user by the District Hokimiyat following assessment by the Land Acquisition and Resettlement Committee (LARC). Land development cost will also be included for example; such land will be of equal value/productivity in a nearby location and with comparable associated services/ facilities, or compensation to provide such services. The project will pay the cost to the local Hokimiyat. In addition to this, the APs will be provided with transitional allowance in terms of loss of income equivalent to 4 years of net average income. Transaction costs, registration fees, if any, will be borne by the project. In cases where in all or parts of the lease holding become unviable, unaffected portions of a plot will also be compensated.

119. Alternatively, cash compensation for agricultural land at replacement cost will also be provided in case the AHs refuses land to land compensation. The compensation for the permanent loss of land use rights over the affected agricultural land will be compensated equivalent to 4 years net average income of the past 3 years (of the affected annual crop). In

cases wherein all or parts of lease holding become unviable, unaffected portions of a plot will also be compensated.

120. In the case of severe impact, where 10% or more of a productive asset (leased and unleased land) is to be acquired, a severe impact allowance will be paid. This will be equal to the net income from an annual crop production (inclusive of winter and summer crop in addition to standing crop compensation). This is in addition to the land to land compensation.

121. Alternatively, monetary compensation for residential, commercial and agricultural land at replacement cost will also be provided to those AHs losing a small proportion of land holding and not wanting replacement land in lieu for the same.

7.3.3 Compensation for Structures

122. Buildings will be compensated at replacement cost irrespective of the title. For partial impacts (structure wall, fences, etc.), cash compensation at replacement rates will be paid to restore the remaining structure to its original state. Unaffected portions of a structure will also be compensated if they become unlivable after impact occurs.

7.3.4 Compensation for Crops and Trees

123. Loss of income from crops planted on the affected land will be compensated at replacement cost based on 1 year of production cost (inputs) plus an allowance equivalent to 1 year average net income computed based on the average income over the past 3 years. Loss of income from fruits trees will be compensated based on the average annual income for the past 3 years multiplied by 4 times to reflect the duration from planting to reach the productive stage. In the case of loss of timber trees, compensation will be based on the market value of their dry wood volume. The compensation for trees will be free of deduction for the value of the wood left to the AH.

7.3.5 Loss of Income/Livelihood

124. No loss of business has been reported during the survey carried out during feasibility study. However, for the future eventuality, affected household losing business will be compensated for the period of business interruption up to 6 months, or 6 months compensation in case of permanent closure of business. This will be calculated based on the estimated average monthly income in the past 3 years multiplied by the number of months of business interruption. Workers from the affected businesses will be paid for lost wages for the duration of business interruption up to 3 months. In case of agricultural workers/laborers losing their employment as a result of land acquisition, compensation corresponding to their salary for the remaining part of the agricultural year or contractual period whichever is higher, will be paid. Based on the Labor Code of 1996, last amended on 2015 (Article 67) loss of employment is to be compensated with 2 months average salary plus a severance pay of a maximum of 1 month average salary depending on the length of the employment lost. Also, according to the Civil Code (Article 14), all losses (including real damage, lost profits) are to be compensated.

125.

7.3.6 Shifting and Relocation Allowances

126. As mentioned earlier, the project will not cause any physical displacement. However, during the detailed and final design, if this becomes unavoidable then shifting and relocation allowances will be paid by the project to the affected household. Affected households losing structures/ buildings who need to relocate will each be provided with a relocation allowance and shifting allowance.

127. According to clause 8 of the Regulations, approved by the governmental resolution #97 dated 29.05.2006 provision to the citizens of a land plot for individual housing construction within the limits of stipulated norms with the provision of temporary housing on the conditions of lease agreement for the period of land plot utilization for up to two years with compensation, in full volume, the cost of demolished houses (apartments), buildings, structures and plantings;

128. According to clause 19 of the Regulations approved by the governmental resolution #97 dated 29.05.2006 transportation of belongings of the owner of the demolished residential house (apartment) to the new apartment shall be done for the account of a property developer or land owner (land user, leaseholder) to whom withdrawn land plot is allocated. All costs connected with relocation and restoration at a new place of residential, production and other buildings and structures, lease of temporary dwellings, transportation of belongings of citizens and legal persons to the temporary dwellings and also from the temporary dwellings to the restored at a new place a residential house, building and structure shall be done by decision of Khokimiats of relevant districts (towns) at the expense of land developer or land owner (land user, leaseholder), to whom withdrawn land plot is allocated. Relocation to a new place of equal residential, production and other buildings and structures beneficially owned by a legal person, shall be done only after reaching agreement on type of compensation, amount and period of reimbursement.

7.3.7 Allowances for Vulnerable Households

129. Vulnerable households will be provided with a one-time additional allowance equivalent to 3 months minimum wage income in accordance with proof provided by Makhalla. In addition, willing members of vulnerable households will also be prioritized in project related employment. The Makhallas and district government have a record of all households in the communities and will be tapped in identifying and certifying vulnerable households. Vulnerable households include those belong to women headed household, poor household, household headed by elderly with no support and household having physically challenged people.

7.3.8 Common Properties

130. Any impact to the social infrastructures of local communities will be rehabilitated and restored as of pre-project condition.

7.3.9 Loss of Crops Due to Temporary Land Acquisition Along the Right of Way of Trunk Main and Water Networks Pipeline

131. Affected households will be compensated at replacement cost for primary (and secondary crops if any) on affected land based on 1 year of production costs (inputs) plus an allowance equivalent to 1 year average net income based on the average income over the past 3 years. Advanced notice will be served to APs to harvest the crops if possible prior to construction. Where feasible, the schedule of construction will be adjusted to avoid the crop season. Restoration of land will be done by contractor to previous use and farmers will be allowed to continue their

cultivation post the construction. Duration of construction shall not exceed more than one crop season at that particular stretch.

7.4 Entitlement Matrix

132. Based on the above, a detailed entitlement matrix is presented in Table 7.1. The entitlement matrix is broad and all the likely losses as mentioned in the entitlement matrix shall be applied in order to address any future unanticipated impacts during detailed design, the same may be triggered.

Table 7.1: Entitlements Matrix

TYPE	SPECIFICATIONS	ENTITLED PERSONS	ENTITLEMENT
IMPACT ON LAND (PERMANENT LAND ACQUISITION)			
1. Agricultural land/Orchard Land	All land losses independent of impact severity (due to construction of WTP, WDC and any other primary structures, etc.)	Concerned Government Agency responsible for land development	<ul style="list-style-type: none"> Land for land compensation with plots of equal value/productivity class, comparable location, and agricultural support services which includes land development cost to be paid to develop new lands or through irrigation and agro-irrigation activities to raise the productivity of existing lands in accordance with the unit rate set by Cabinet of Minister Resolution # 146.
		Leaseholders/Land user having user permit	<ul style="list-style-type: none"> Land for land compensation with plots of equal value/productivity class, comparable location and agricultural support services (or compensation to provide such services); Compensation for loss of land in terms of loss of income equivalent to 4 years of net average income of the affected crops from the affected agricultural land. Unaffected portions of an affected arable plot will also be compensated, if the same becomes unviable after impact. Transaction cost, registration fee, related to new plot allotted, to be will be borne by CSA.
	Additional provision in case of severe impacts (10% or more loss of productive assets)	Leaseholders	<ul style="list-style-type: none"> Severe impact allowance equal to the net income from annual crop production (inclusive of winter and summer crop in addition to standing crop compensation)
2. Unregistered agricultural land	Land loss	Unregistered lessee but willing to pay unpaid land taxes and become a leaseholder.	<ul style="list-style-type: none"> All entitlements for agricultural land losses as stated above for lease holder.
3. Unregistered agricultural land	Land loss	Non-titled or non-legalizable affected household	<ul style="list-style-type: none"> Non legalizable affected households will be entitled for compensation for non-land assets
4. Residential land	Land loss	APs who has right on lifelong inheritable	<ul style="list-style-type: none"> Land for land compensation through provision of a plot comparable in

TYPE	SPECIFICATIONS	ENTITLED PERSONS	ENTITLEMENT
		possession/permanent possession	<p>value/location to the plot lost including services (or compensation to provide such services) to plots lost</p> <ul style="list-style-type: none"> • Transaction cost, registration fee, related to new plot allotted, to be will be borne by CSA • Unaffected portions of an affected arable plot will also be compensated, if the same becomes unviable after impact.
5. Commercial land	Loss of place to rent	Tenant	<ul style="list-style-type: none"> • New lease by landlord or 3 months' cash equivalent of existing lease to allow for a new lease to be found and signed. • Compensation for lost rent paid in advance. The time is to be established by the independent valuer. • Tenant who has lost the rent and need to relocate will each be provided with shifting allowances to hire vehicle for transportation of the family members, goods and chattels tone lease sites. • Tenant without formal notarized lease to show proof or evidence in order to claim compensation.
IMPACT ON LAND (TEMPORARY LAND ACQUISITION)			
1. Agricultural land/Orchard Land	All land losses independent of impact severity (due to construction of Trunk Mains and Water Networks along the Right of Way)	Concerned Government Agency responsible for land development (in case there is damage to associated services such as irrigation facilities and other existing services)	<ul style="list-style-type: none"> • Land development cost for restoring the existing facilities and providing required services
IMPACT ON STRUCTURES			
Structures	Full or partial loss of structures if to be displaced	All affected households irrespective of title and irrespective of nature of impact whether permanent land acquisition or temporary acquisition	<ul style="list-style-type: none"> • Compensation at full replacement cost for affected structure/fixed assets free of depreciation and transaction cost • APs must have right to salvage materials • Household losing structures/buildings who need to relocate will each be provided with a relocation allowance while the new house or building is being erected and Shifting allowances to hire vehicle for transportation of the family members, goods and chattels to temporary and permanent relocation sites. • In case of partial impacts on structures (structure wall, fences etc.), cash compensation at replacement rates to restore the remaining structure. • Household losing structures/buildings who need to relocate will each be

TYPE	SPECIFICATIONS	ENTITLED PERSONS	ENTITLEMENT
			provided with a temporary housing on the conditions of lease agreement or rental allowance in cash for the period of land plot utilization for up to two years while the new house or building is being erected.
D. IMPACT ON CROPS AND TREES			
Agriculture land, orchard, within residential complex	Loss of crops for permanent land acquisition	All affected Households	<ul style="list-style-type: none"> • Compensation at replacement cost for primary (and secondary crops if any) on affected land based on 1 year of production costs (inputs) plus an allowance equivalent to 1 year average net income based on the average income over the past 3 years. • Advanced notice to harvest the crops • Schedule of construction to avoid crop season
	Loss of standing crops along the right of way of transmission and distribution networks	All affected Households	<ul style="list-style-type: none"> • Compensation at replacement cost for primary (and secondary crops if any) on affected land based on 1 year of production costs (inputs) plus an allowance equivalent to 1 year average net income based on the average income over the past 3 years. • Advance notice to harvest the crops • Schedule of construction to avoid crop season • Restoration of land to previous use and farmers will be allowed to continue their cultivation post the construction • Duration of construction shall not exceed more than one crop season at that particular stretch.
	Loss of fruit Trees	All Affected Households (including non-leased land owner)	<ul style="list-style-type: none"> • Compensation for fruit trees will be based on the average annual income for past 3 years multiplied by 4 times (years) to reflect the duration from planting to reach the productive stage • Felled fruit trees will be kept by the AHs.
	Loss of timber trees	All Affected Households	<ul style="list-style-type: none"> • Compensation for timber trees will be compensated based on market value of dry wood volume. • Felled trees will be kept by the AHs.
IMPACT ON INCOME AND LIVELIHOOD			
1. Employment from affected agricultural land	Loss of employment from affected agricultural land	Agricultural workers losing their contract	<ul style="list-style-type: none"> • Compensation corresponding to their salary (in monetary terms or in kind) for the remaining part of the agricultural year/or contractual period whichever is higher in monetary value • In case of informal agricultural workers those work without any agreement will be paid an allowance equivalent to 3 months of minimum wage.

TYPE	SPECIFICATIONS	ENTITLED PERSONS	ENTITLEMENT
VULNERABLE HOUSEHOLDS			
1. Vulnerable Affected Households	All Impacts	Women headed household, Low Income household, household headed by elderly with no support and household having physically challenged people	<ul style="list-style-type: none"> One-time additional allowance equivalent to 3-month minimum wage income Priority for employment in project-related jobs, training opportunities, self-employment and wage employment assistance.
IMPACT ON COMMUNITY STRUCTURES AND ASSETS			
1. Community Structures and Assets	Loss or damage to public infrastructure and utility	Community owned Assets	<ul style="list-style-type: none"> Rehabilitation/replacement of affected structures/utilities (i.e. roads, pavements, pipelines) to pre-Project level.
TEMPORARY IMPACTS DURING CONSTRUCTION			
1. Temporary impact on private or public Land, assets and/or Income	Due to construction	All affected households and assets	<ul style="list-style-type: none"> CSA will ensure that any kind of temporary impact on private and public assets during project implementation for civil work purposes will be compensated by contractor based on replacement value for structures, rentals for land use, replacement value for crop and tree loss as stated above in the entitlement matrix.
I. ANY UNANTICIPATED IMPACTS			
Any unanticipated impacts identified during Project implementation will be compensated in full at replacement cost and the entitlement matrix shall be revised if required in case major unanticipated impacts occur during detailed and final design.			

VIII. INSTITUTIONAL ARRANGEMENTS

8.1 General

133. This section describes institutional arrangements for preparing, implementing and monitoring involuntary land acquisition and resettlement activities for the project including description of organizational procedures for delivering entitlements, implementation process, including how resettlement preparation, approval, and implementation will be linked to contract awards and commencement of the project civil works.

134. The main institutions that will be involved in to LAR activities, if any, are Communal Services Agency - the executing agency (EA), Project Coordination Unit, Project Management Consultant, TN, Contracting Company, Design Company, local authorities, the State Committee on Land Resources, Geodesy, Cartography and State Cadastre (SCLRGCS) at republic and district levels.

135. CSA as the executing agency will be responsible for implementation of the WUWSSD project with due participation and coordination from TN which will be acting as implementing agency related to construction. However, CSA will be responsible for land acquisition and resettlement (LAR) activities, if any identified after completion of detailed design. PCU which is already exists under CSA will be responsible for overall implementation of the project including LAR activities. The PCU already has a safeguards specialist who is responsible for ensuring that all the activities related to involuntary land acquisition and resettlement are being followed and implemented in accordance with Uzbekistan's legislation and policies and ADB's SPS 2009 requirements. The safeguards specialist of the PCU will ensure that this LARF is updated after completion of detailed design. If any LAR is identified at that moment then a LARP will be prepared and implemented prior to start of civil works. The PCU will be supported by Project Management Consultant which is international consulting firm. A Project Management Consultant will have international and national resettlement specialists in its contract to support the PCU's safeguards specialist. There will be several other government agencies that will also be responsible for LAR activities such as (i) hokimiyats and (ii) State Committee on Land Resources, Geodesy, Cartography and State Cadastre (SCLRGCS) at district level. There will also be independent valuation firms, local self-government body representatives to be involved in to the LAR activities.

8.2 Executing Agency (EA)

8.2.1 Communal Services Agency “Kommunkhizmat” (CSA) under the Ministry of Housing and Communal Services of the Republic of Uzbekistan (MHCS)

136. As the project's EA, tasks of the Communal Services Agency under newly established (in 18.04.2017) Ministry of Housing and Communal Services Ministry of Uzbekistan related to implementation of LAR activities will cover the following: (i) engagement of PMC composed of international and national consultants with clear description of skills, numbers and period of recruitment, (ii) identification of subprojects; (iii) approval of adequate budgetary support upon closing of the agreement with representatives of Farming Association, Nature Conservation Inspection and the Council of Rural Citizens on land allocation, and release of funds for implementation of LAR activities by PCU prior to marking of land boundaries, (iv) facilitate coordination by PCU with the SCLRGCS of Karakalpak Republic and its district offices on LAR activities; and (v) endorsement of LARP which will be developed after detailed design completion and which will be submitted to ADB for review and approval.

8.2.2 Project Coordination Unit (PCU)

137. As the executing arm of the CSA for the project, the PCU will be headed by the national project director who will be assisted by a team of assigned staff and consultants. The PCU responsibilities include: (i) assist the CSA in identifying and processing of the project and other subprojects; (ii) contracting a Project Management Consultant – an international consulting firm with international social safeguards consultant and local resettlement specialist for preparation of final LARF (and/or LARP) and its implementation during the whole project implementation period; (iii) advance informing of APs (in case of LARP) on land acquisition and initiating public consultations and information dissemination; (iv) filing application on land acquisitions with SCLRCGCSC of Karakalpak Republic and its district branches; (v) facilitating transfer of funds from the EA to authorized bank for payment of compensations to APs; (vi) coordination with district administrations in temporary land allocation bringing to pre project condition; (vii) design and implementation of internal monitoring for LARP implementation (if prepared based on detail design findings); (viii) submission of report to ADB upon completion of LARP implementation; (ix) assist external monitoring agent during the process of monitoring of LARP compliance; (x) coordination on the status of LARP compliance to facilitate request to ADB for release of relevant subproject loan; (xi) day to day management of the project including cross-agency coordination, and compensation and disbursement for LARP implementation and monitoring.

138. The international and national resettlement experts of Project Management Consultant contracted by PCU will be directly involved in all LAR related activities including planning, implementation, inter-agency coordination, monitoring and reporting. They will have sufficient qualification and enough number of inputs. They will receive supports from relevant project officer and consultants and benefit from inputs from the Design Institute, district executive authorities and SCLRCGCSC as appropriate.

8.2.3 Project Management Consultant (PMC)

139. PCU will be supported with Project Management Consultant which will be responsible for consultancy support to EA/PCU during the project implementation period. The PMC will have international social safeguards and resettlement and national resettlement expert in the contract. The experts of the PMC will work closely with the engineering team and will collect all the necessary information to update the LARF and prepare LARP if necessary based on detailed designs and will support PCU's safeguard specialist. The work for resettlement specialists of the PMC will be broadly segregated in two parts such as updating of draft LARF or prepare a LARP based on detailed design and in case of LARP, assisting the implementation of a LARP including preparation of monitoring reports. The resettlement specialists of PMC will assist EA in the overall supervision of the project and ensure that LAR activities are implemented in a smooth and timely manner in accordance with the provisions of the LARP. They will closely work with PCU to ensure impacted persons are compensated before start of construction works, including ongoing rehabilitation measures.

8.3 Design Company

140. The Design Company, local or international, will be contracted by PCU to elaborate the design and construction documents for the project. It will collaborate and work closely with the PCU/PMC to:

- (i) look for measures and alternatives to avoid and minimize land acquisition and resettlement impacts during detail design;
- (ii) assemble all documents required for compensation if any impact is determined during detail design;

- (iii) carry out topographic surveys of the expropriated land and replacement lands, if any;
- (iv) elaborate layouts indicating the location of worksites, permanent infrastructures and perimeter of required surfaces differentiating the land use patterns in the areas being occupied to serve as a base for the selection of compensation land;
- (v) conduct land marking and pegging of the land assigned for temporary use of land acquired, if any.

8.4 Departments of State Committee on Land Resources, Geodesy, Cartography and State Cadastre for Karakalpak Republic and project districts.

141. This is a permanent committee at Karakalpak Republic and district level. However, it plays an enhanced role throughout implementation. It is responsible for: (i) identifying land losses incurred by land owners and land users plus agricultural output losses; (ii) determining the degree and area of land restitution, including removal and temporary storage of productive soil layer; (iii) determining the need for protective sanitary and water protection zones around constructions; (iv) preparing proposals on allocation of land plots of equal value under land for land; (v) investigating alternatives to acquiring currently used land through developing unused land; (vi) amending government edicts on land use and land ownership as well as other cadastre documents.

8.5 The Council of Ministers of the Republic of Karakalpakstan and district hokimiyats (local governments)

142. The Council of Ministers of the Republic of Karakalpakstan and district hokimiyats will be closely involved in implementation of LARP, if prepared based on detail design. Hokimiyats are local government bodies. Their role will include but not limited to: (i) review and ratify design documents, LARP and other project documents as needed; (ii) make a decision on acquisition of land plots with indication: a. to whom, for what purposes and what terms a land plot is seized and also name of owners, users and tenants whose land plots are seized; b. total area of allocated land plots according to its owners, users and tenants and also quality of seized land plots; c. the amount of losses that should be compensated to owners, users and tenants of land plots; d. the amount of losses of agricultural and forestry production; e. necessity of reclamation of a land plot, the order of its return to owners, users and tenants whose land plots will be seized; (iii) make a decision on structures to be affected with indication: a. to whom they belong, reason, scope and during which period they will be impacted; b. total number of affected structures according to its owners; c. the amount of losses due to impact on structures; d. necessity of removing/reinstalling or rebuilding the affected structures; e. measures for compensations for affected structures and reinstalling/rebuilding affected structures; g. safety protection, environmental, fireproof, sanitary and other requirements; (iv) establish special commissions such as Commission on Land Acquisition and Evaluation Commission which will be closely involved during implementation of land acquisition and resettlement process and which include representatives of different relevant offices; (v) other roles and responsibilities deriving from nature and functions of hokimiyats.

8.6 Self-Government Representatives

143. Self-government representatives will be involved in to resettlement activities to ensure the rights and interests of affected households. Implementation of LARP will require close coordination with the local makhallas and farmers council. This coordination will help EA in the following: (i) dissemination of information related to LARP; (ii) checking timely disbursement of compensation to affected households and (iii) obtaining early warnings on the grievances of APs, (iv) verifying as to whether the vulnerable households were identified according to requirement

laid down in LARP; and (v) obtaining information regarding any unexpected impacts, if any, being incurred by affected households.

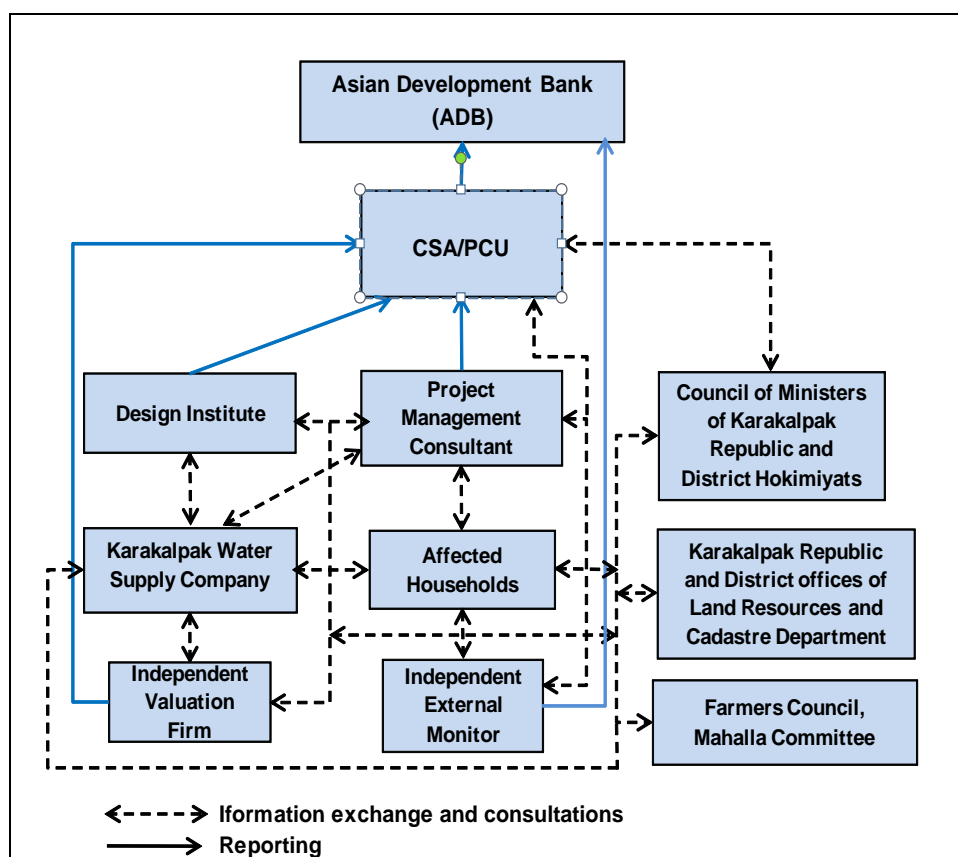

8.7 Independent Valuation Firms

144. Independent Valuation Firms will comprise of an accredited private firm with valid license for valuation activities. These firms will be involved both by affected households and if required by the PCU to estimate the replacement cost of the affected assets.

8.8 Independent External Monitor

145. If a LARP will be prepared based on detailed design, then implementation of the LARP will be subject to verification by independent external monitoring expert. This independent monitoring will be conducted by a qualified Resettlement Consultant to be engaged by the PCU as per the Terms of Reference, which should be reviewed by ADB.

Figure 8.1. Institutional arrangements diagram

IX. IMPLEMENTATION SCHEDULE

146. This section includes a detailed, time bound, implementation schedule for all key land acquisition and resettlement activities synchronized with the project schedule of civil works construction.

147. A timeline for updating the LARF, LARP preparation if necessary, implementation of LARP and post implementation is summarized in the below table.

Table 9.1: Implementation schedule

Step	Action	Responsibility	Timing
A.	UPDATING OF LARF		
1.	Detailed design for water supply facilities, transmission mains and networks	Contractor's design group, PCU Team	January, 2019
2.	Updated impacts as a result of finalization and alignments and any changes to design	Resettlement Consultant of PMC	February, 2019
3.	Consultation with affected peoples/affected households, if any	Resettlement Consultant of PMC	February, 2019
4.	Update LARF or prepare LARP (if any impact is determined) and submission to ADB for approval	PCU	February, 2019
B.	LARP IMPLEMENTATION (IF DURING UPDATE OF LARF ANY IMPACT IS FOUND)		
5.	Preparation of plan for payment of each affected asset	PMC/PCU	March, 2019
6.	Public consultation and information sharing on LAR activities	PMC/PCU	March, 2019
7.	Detailed schedule for compensation action plan	PMC/PCU	March, 2019
8.	Disbursement of compensation payments for AH	PMC/PCU	March, 2019
9.	Independent review of LARP Implementation through submission of a compliance report	PCU in consultation with Independent Monitoring Consultant	April, 2019
10.	No objection notice from ADB if LARP implementation found to be satisfactory	ADB	April, 2019
11.	Notice to proceed for civil works is issued	ADB/CSA	April, 2019
C.	ITERATIVE TASKS		
12.	Internal monitoring. Quarterly reporting to ADB	PCU	continuous
13.	Inter-agency coordination and communication with AP	PCU-CSA	continuous

X. MONITORING AND REPORTING

10.1 General

148. While effective institutional arrangements can facilitate implementation, effective monitoring ensures that implementation progress continues as originally planned. Monitoring is important to ensure that unforeseen impacts related to land acquisition activities can be identified and appropriate measures to address the same can be taken in a timely manner. The below monitoring and reporting actions will be implemented if a LARP will be prepared based on detailed design findings or change of project design.

149. The monitoring mechanism for LARP shall comprise of both internal and external monitoring. While internal monitoring as a mechanism will be carried out in parallel to project implementation and at different stages respectively, external monitoring will be carried out by an external monitoring specialist to verify the effective implementation of the LARP as well as the monitoring data collected by the PCU. The specific details of internal and external monitoring are summed up below.

150. Implementation of LARP will be monitored by resettlement specialist of PMC under direct supervision of safeguards specialist of PCU and in close coordination with local hokimiyats and branches of TN. Independent external resettlement consultant will verify the results of the internal monitoring.

10.2 Internal Monitoring

151. Internal monitoring will be the responsibility of safeguards specialist of the PCU. The indicators for internal monitoring will be subject related to immediate activities for LARP implementation and its outputs and results. This information will be collected directly from the field and from the District Land Acquisition Committee. It will be used to assess the progress and results of LARP implementation, and to adjust the work program, if necessary. The quarterly reports will be incorporated in the standard supervision reports to ADB. These monitoring activities will continue until land acquisition is completed. Internal monitoring will need to be carried out continually after completing LARP implementation, and prepare the first semi-annual report, and the second and all subsequent semi-annual reports that will be submitted to the EA, IA management and ADB. The specific monitoring milestones will be:

- (i) Information disclosure to AH;
- (ii) Status of land acquisition and payments of compensation for land
- (iii) Compensation for affected structures and other assets;
- (iv) Payments for loss of assets.

10.3 Independent External Monitoring

152. In order to ensure that all affected households are compensated prior to commencement of project civil works, an Independent monitoring will be undertaken for the LARP. The Independent external monitoring expert will undertake verification of LARP implementation and prepare the LARP compliance report to record whether the LARP has been implemented and all affected HHs have been compensated. The expert will monitor and verify LARP implementation to determine whether resettlement goals have been achieved, livelihood and living standards have been restored. A Compliance Report will be submitted to ADB and EA. Assessment of the independent monitor on the compliance of LARP implementation will be the basis of CSA to request ADB for its "No objection" for the start of civil works under awarded contracts.

153. The independent monitoring expert will provide monitoring and evaluation report covering the following:

- (i) whether the resettlement activities have been completed as planned and budgeted

- (ii) the extent to which the specific objectives and the expected outcomes/results have been achieved and the factors affecting their achievement or non-achievement
- (iii) the extent to which the overall objective of the LARP and the desired impact of improving living standards, income earning capacity and production levels or at least restoring them to pre-project levels, have been achieved and the reasons for achievement/non-achievement.
- (iv) major lessons learnt.
- (v) key risk factors.
- (vi) recommendations.

10.4 Reporting

154. Communal Services Agency through its Project Coordination Unit will be responsible for managing and maintaining database of affected persons, if any, including documenting the final results of the affected person census based on final design. Monitoring reports documenting progress on land acquisition and resettlement implementation and LARP completion reports will be provided by CSA through its PCU to ADB for review semi-annually. The monitoring reports will be posted to ADB website.

ANNEX 1 OUTLINE OF RESETTLEMENT PLAN

1. The comprehensiveness of a resettlement plan would be according to the potential involuntary resettlement impacts/ risks and size of the project. The resettlement plan must adequately addresses all involuntary resettlement issues pertaining to the project, describes specific mitigation measures that will be taken to address the issues and outlines institutional requirement and resources required to implementation of the RP. The following outline of RP is suggested for the present project.

A. Executive Summary

2. This section provides a concise statement of project scope, key survey findings, entitlements and recommended actions.

B. Project Description

3. This section provides a general description of the project, discusses project components that result in land acquisition, involuntary resettlement, or both and identify the project area. It also describes the alternatives considered to avoid or minimize resettlement. Include a table with quantified data and provide a rationale for the final decision.

C. Scope of Land Acquisition and Resettlement

4. This section:
- (i) discusses the project's potential impacts, and includes maps of the areas or zone of impact of project components or activities;
 - (ii) describes the scope of land acquisition (provide maps) and explains why it is necessary for the main investment project;
 - (iii) summarizes the key effects in terms of assets acquired and displaced persons; and
 - (iv) provides details of any common property resources that will be acquired.

D. Methodology for Impact Assessment

5. This section outlines the methodology and tools adopted for:
- (i) resettlement screening
 - (ii) land acquisition planning
 - (iii) socioeconomic survey
 - (iv) census survey or inventory of assets and livelihood loss
 - (v) consultation with stakeholders

E. Socioeconomic Information and Profile

6. This section outlines the results of the social impact assessment, the census survey, and other studies, with information and/or data disaggregated by gender, vulnerability, and other social groupings, including:

- (i) define, identify, and enumerate the people and communities to be affected;

- (ii) describe the likely impacts of land and asset acquisition on the people and communities affected taking social, cultural, and economic parameters into account;
- (iii) discuss the project's impacts on the poor, indigenous and/or ethnic minorities, and other vulnerable groups; and
- (iv) identify gender and resettlement impacts, and the socioeconomic situation, impacts, needs, and priorities of women.

F. Stakeholders Consultation and Participation

7. This section:
- (i) identifies project stakeholders, especially primary stakeholders;
 - (ii) describes the consultation and participation mechanisms to be used during the different stages of the project cycle;
 - (iii) summarizes the results of consultations with affected persons (including host communities), and discusses how concerns raised and recommendations made were addressed in the resettlement plan; and
 - (iv) describes the process for consultation with affected persons during project implementation.

G. Legal Framework

8. This section:
- (i) describes national and local laws and regulations that apply to the project and identify gaps between local laws and ADB's policy requirements; and discuss how any gaps will be addressed.
 - (ii) describes the legal and policy commitments from the executing agency for all types of displaced persons;
 - (iii) outlines the principles and methodologies used for determining valuations and compensation rates at replacement cost for assets, incomes, and livelihoods; and set out the compensation and assistance eligibility criteria and how and when compensation and assistance will be provided.
 - (iv) describes the land acquisition process and prepare a schedule for meeting key procedural requirements.

H. Entitlements, Assistance and Benefits

9. This section:
- (i) defines displaced persons' entitlements and eligibility, and describes all resettlement assistance measures (includes an entitlement matrix);
 - (ii) specifies all assistance to vulnerable groups, including women, and other special groups; and.
 - (iii) outlines opportunities for affected persons to derive appropriate development benefits from the project.

I. Relocation of Housing and Settlements

10. This section:

- (i) describes options for relocating housing and other structures, including replacement housing, replacement cash compensation, and/or self-selection (ensure that gender concerns and support to vulnerable groups are identified);
- (ii) describes alternative relocation sites considered; community consultations conducted; and justification for selected sites, including details about location, environmental assessment of sites, and development needs;
- (iii) provides timetables for site preparation and transfer;
- (iv) describes the legal arrangements to regularize tenure and transfer titles to resettled persons;
- (v) outlines measures to assist displaced persons with their transfer and establishment at new sites;
- (vi) describes plans to provide civic infrastructure; and
- (vii) explains how integration with host populations will be carried out.

J. Income Restoration and Rehabilitation

11. This section:

- (i) identifies livelihood risks and prepare disaggregated tables based on demographic data and livelihood sources;
- (ii) describes income restoration programs, including multiple options for restoring all types of livelihoods (examples include project benefit sharing, revenue sharing arrangements, joint stock for equity contributions such as land, discuss sustainability and safety nets);
- (iii) outlines measures to provide social safety net through social insurance and/or project special funds;
- (iv) describes special measures to support vulnerable groups;
- (v) explains gender considerations; and
- (vi) describes training programs.

K. Resettlement Budget and Financing Plan

12. This section:

- (i) provides an itemized budget for all resettlement activities, including for the resettlement unit, staff training, monitoring and evaluation, and preparation of resettlement plans during loan implementation.
- (ii) describes the flow of funds (the annual resettlement budget should show the budget-scheduled expenditure for key items).
- (iii) includes a justification for all assumptions made in calculating compensation rates and other cost estimates (taking into account both physical and cost contingencies), plus replacement costs.
- (iv) includes information about the source of funding for the resettlement plan budget.

L. Information Disclosure

13. This section:

- (i) describes the activities undertaken to disseminate project and resettlement information during project design and preparation for engaging stakeholders;
- (ii) confirms disclosure of the draft resettlement plan to affected persons and includes arrangements to disclose any subsequent plans; and

- (iii) describes the planned information disclosure measures (including the type of information to be disseminated and the method of dissemination) during project implementation.

M. Grievance Redress Mechanisms

14. This section describes mechanisms to receive and facilitate the resolution of affected persons' concerns and grievances. It explains how the procedures are accessible to affected persons and gender sensitive.

N. Institutional Arrangements

15. This section:
- (i) describes institutional arrangement responsibilities and mechanisms for carrying out the measures of the resettlement plan;
 - (ii) includes institutional capacity building program, including technical assistance, if required;
 - (iii) describes role of NGOs, if involved, and organizations of affected persons in resettlement planning and management; and
 - (iv) describes how women's groups will be involved in resettlement planning and management,

O. Implementation Schedule

16. This section includes a detailed, time bound, implementation schedule for all key resettlement and rehabilitation activities. The implementation schedule should cover all aspects of resettlement activities synchronized with the project schedule of civil works construction, and provide land acquisition process and timeline.

P. Monitoring and Reporting

17. This section describes the mechanisms and benchmarks appropriate to the project for monitoring and evaluating the implementation of the resettlement plan. It specifies arrangements for participation of affected persons in the monitoring process. This section will also describe reporting procedures.

ANNEX 2: DETAILED DESCRIPTION OF PROJECT WORKS

I. DETAILS OF CONSTRUCTION AND RECONSTRUCTION WORKS ON WATER SUPPLY FACILITIES

Name of structure or Water Distribution Center	Description of project works	
	Construction	Reconstruction
AMUDARYA DISTRICT		
Water Intake Facility "Mangit"		
Water Intake Facility "Mangit"	Raw water PS (New WTP)	
	Pipeline from RWPS to Contact chamber	
	Contact chamber	
		Rehabilitation of 2 x 50,000 m ³ settlement ponds
	Inlet chamber	
	Filter station	
	Process water reservoir & PS	
	Chemical plant	
	Transformer substation	
	Internal piping	
	Landscaping and fence	
	2 Clear water reservoir 2,000 m ³	
	2nd lift PS	
	Electrolysis plant	
	Transformer substation	
	Internal piping	
	Internal power supply networks, out-site power supply. Lighting	
	Water supply & sewerage network	
	Checkpoints (2 pcs)	
	Toilet	
	Housing for operators (2)	
	Landscaping, planting and fencing	
	Repair workshop including	
	Laboratory – dispatching office	
	Repair-mechanical workshop	
	Warehouse	
	Carport for 2 vehicles	
WDC "Kuyukkupir" (new construction)		
WDC "Kuyukkupir" (new construction)	2,000 m ³ potable water reservoir	
	Pumping station. Electrolysis unit in pumping station (basic)	
	Checkpoint	
	Toilet	
	Transformer substation	
	Internal piping	
	Internal power supply networks, out-site power supply. Lighting	

Name of structure or Water Distribution Center	Description of project works	
	Construction	Reconstruction
	Landscaping, planting and fencing, entrance and access road	
Wellfield and WDC “Urazbaev” (reconstruction)		
Wellfield and WDC “Urazbaev”	Drilling of 3 wells	
	3 pump stations of I lift	
	Pipeworks D=300mm, L=450 m	
		2 clear water reservoirs 250 m ³ . Installation of filter absorber, ladder and soil cover
Wellfield and WDC “Urazbaev”		II lift pump station. Electrolysis in pumping station working on tank-stored liquid hypochlorite.
	Checkpoint	
	Toilet	
	Transformer substation	
	Internal power supply networks. Networks of lighting	
	Fences, gates	landscaping
BERUNIY DISTRICT		
WDC “RU-1” (reconstruction)		
WDC “RU-1” (reconstruction)	Clean water reservoir 1000 m ³	Clean water reservoirs 250 m ³ -2 units.
		Pumping station including electrolysis plant (basic)
	Checkpoint	
	Toilet	
	Internal piping	
	Transformer substation	
	Lightings	
	Internal power supply networks	
		landscaping, planting, fencing gates and access road
WDC “Shimom” (newconstruction)		
WDC “Shimom” (newconstruction)	2 clean water reservoirs 1000 m ³ each	
	Pumping station. Electrolysis plant working on tank-stored liquid hypochlorite.	
	Checkpoint	
	Toilet	
	Transformer substation	
	Internal piping	
	In site power supply network. Lightings	
	Landscaping, planting and fencing, gates to driveway	
WDC NRS-15 (reconstruction)		

Name of structure or Water Distribution Center	Description of project works	
	Construction	Reconstruction
WDC NRS-15 (reconstruction)	2 clean water reservoirs 500 m ³	2 clean water reservoirs 250 m ³ each. Installation of filter-absorber, ladder and soil cover
	Electrolysis plant in pumping station.	Pump station, installation of technology and load lifting equipment
		Checkpoint
	Toilet	
	Internal piping	
	Internal power supply networks, lightings	Transformer 100/5/0,4
	Landscaping, planting and partial replacement of fencing, gates to driveway	
WDC NRS-17 (reconstruction)		
WDC NRS-17 (reconstruction)		2 clean water reservoirs 700 m ³ each. Installation of filter-absorber, ladder and soil cover
		Pump station, installation of technology and load lifting equipment
		Chlorination plant working on liquid chlorine
		Checkpoint
	Toilet	
	Internal piping	
	In-site and out-site power supply networks. Lightings.	
	Landscaping, planting and fencing, gates to driveway	
WDC “Bodombosh (new construction)		
WDC “Bodombosh (new construction)	2 clean water reservoirs 500 m ³ each.	
	Pumping station including electrolysis unit working on tinkered liquid hypochlorite	
	Checkpoint	
	Toilet	
	Transformer substation	
	Internal piping	
	Internal power supply networks, out-site power supply. Lighting	
	Landscaping, planting and fencing, gates to driveway	
KARAUZAK DISTRICT		
WDC “Karauzak” (reconstruction)		
WDC “Karauzak” (reconstruction)	Clean water reservoirs 2x500 m ³	Clean water reservoir 500m ³ ; Installation of filter absorber 2x100, ladder and soil cover

Name of structure or Water Distribution Center	Description of project works	
	Construction	Reconstruction
		Reconstruction of pumping station
		Chlorination plant working on liquid chlorine
	Checkpoint	
	Toilet	
	Transformer substation	Transformer substation
	Power line 10 kV, 1 km	
	Internal piping	Rehabilitation of internal piping
	Lightings	In-site and out-site power supply networks.
	Landscaping, planting, fencing and driveway	
	Repair workshop	
	Laboratory dispatching center	
	Mechanical workshop	
	Warehouse	
	Carport for 2 vehicles	
WDC “Koratal” (reconstruction)		
WDC “Koratal” (reconstruction)		Clean water reservoirs 2x500 m ³ . Installation of filter absorber, ladder and rehabilitation of soil cover
	Installation of electrolysis equipment (basic) in pumping station	Pumping station
	Toilet	
	Lightings, Measurement and automation networks	
	Checkpoint	
		Transformer substation
	Internal piping	Rehabilitation of internal piping
		In-site power supply networks, out-site power supply
	Landscaping, planting and fencing	
WDC “Samat” (reconstruction)		
WDC “Samat” (reconstruction)	Clean water reservoir 300 m ³	Clean water reservoirs with capacity 2x75. Installation of filter absorber, ladder and soil cover
	Pumping station. Electrolysis unit in pumping station working on tank-stored liquid hypochlorite	
	Checkpoint	
	Toilet	
	Transformer substation	
	Internal piping	
	In-site and out-site power supply networks. Lightings.	
	Landscaping, planting, fencing and driveway	

Name of structure or Water Distribution Center	Description of project works	
	Construction	Reconstruction
KUNGRAD DISTRICT		
WDC “Kungrad” (reconstruction)		
WDC “Kungrad” (reconstruction)		Pumping station including basic electrolysis. Installation of 2 group of pumps
		Installation of level and pump switch gauge in clean water reservoirs 2x3000 m ³ .
		In-site piping
		Landscaping
Water Intake facility “Altinkul” (reconstruction)		
Water Intake facility “Altinkul”	1,000 m ³ potable water reservoir (2 pces)	
	Internal piping	
	Improvement works	
WDC “Akhunbabaev” (reconstruction)		
WDC “Akhunbabaev” (reconstruction)	500 m ³ 2,000 m ³ potable water reservoir	Clean water reservoirs 2x 250 m ³ . Installation of filter absorber, ladder and soil cover recovery.
		Pumping station including electrolysis unit working on tinkered liquid hypochlorite. Installation of pumping equipment.
	Checkpoint	
	Toilet	
		Transformer substation is in working condition
		Internal piping
	Lightings	In-site power supply networks, external power supply.
	Landscaping, planting, fencing and driveway	
WDC “Khorezm” (reconstruction)		
WDC “Khorezm” (reconstruction)		Clean water reservoirs 3x500 m ³ . Installation of filters absorbers, ladders (inside clean water reservoir)
		Pumping station. Electrolysis unit in pumping station working on tank-stored liquid hypochlorite
	Checkpoint	
	Toilet	
	Internal piping	
		Transformer substation is in working condition

Name of structure or Water Distribution Center	Description of project works	
	Construction	Reconstruction
	Lighting	In-site power supply networks, external power supply. In working condition
	Landscaping, planting and fencing access road	
WDC ‘Ustyurt’ (reconstruction)		
WDC ‘Ustyurt’ (reconstruction)		Clean water reservoirs 2 x 250 m ³ . Installation of filters absorbers, ladder (inside clean water reservoir)
	Installation of pumping equipment in pumping station	Pumping station. Electrolysis unit in pumping station working on tank-stored liquid hypochlorite.
	Checkpoint	
		Toilet
	Transformer substation	
	Internal power supply networks, external power supply. Lighting	
	Landscaping, planting and fencing	
WDC “Kanjigali” (reconstruction)		
WDC “Kanjigali” (reconstruction)		Dismantling of existing water tower 25 m ³ . Installation of water tower 25 m ³ (on existing WDC)
		Pumping station
		Checkpoint
		Toilet
		Transformer substation
		Internal piping
		In – site power supply networks.
		Landscaping, planting and fencing
WDC “Kizilkush” (reconstruction)		
WDC “Kizilkush” (reconstruction)		Dismantling of existing water tower 25 m ³ . Installation of water tower 25 m ³ (on existing WDC)
		Pumping station
		Checkpoint
		Toilet
		Transformer substation
		Internal piping
		In-site power supply networks, external power supply. Lighting
		Landscaping, planting and fencing

Name of structure or Water Distribution Center	Description of project works	
	Construction	Reconstruction
MUYNAC DISTRICT		
WDC “Muynak” (reconstruction)		
WDC “Muynak” (reconstruction)		Clean water reservoirs 2x1000 m ³ , 1x2500. Installation of filters absorbers
		Installation of pumping equipment in pumping station
	Checkpoint	
	Toilet	
		Landscaping
		Laboratory – dispatching office – capital repair. New laboratory equipment
	Repair workshop	
	Warehouse shed	
	Carport for 2 vehicles	
WDC “Uchsay” (reconstruction)		
WDC “Uchsay” (reconstruction)	Clean water reservoirs 2x 100 m ³	
	Pumping station including electrolysis unit	
	Checkpoint	
	Toilet	
	Transformer substation	
	Internal piping	
	In-site power supply networks. Out-site power supply. Lighting	
	Landscaping, planting, fencing and driveway	
WDC “Shagirlik” (new construction)		
WDC “Shagirlik” (new construction)	Clean water reservoirs 2x1000 m ³	
	Pumping station including electrolysis unit (basic)	
	Checkpoint	
	Toilet	
	Transformer substation	
	Internal piping	
	In-site power supply networks. Out-site power supply. Lighting	
	Landscaping, planting, fencing and driveway	
WDC “Shege” (reconstruction)		
WDC “Shege” (reconstruction)	Clean water reservoirs 2x300 m ³	
	Pumping station. Electrolysis unit in pumping station working on tank/stored liquid hypochlorite	
	Checkpoint	
	Toilet	
	Transformer substation	

Name of structure or Water Distribution Center	Description of project works	
	Construction	Reconstruction
	Internal piping	
	In-site power supply networks. Out-site power supply. Lighting	
		Landscaping, planting, fencing and driveway
NUKUS DISTRICT		
WDC “Nukus” (reconstruction)		
		Pumping station. Installation of two pumps. Reconstruction of internal piping with valve
		Internal piping
WDC “Madaniyet” (reconstruction)		
WDC “Madaniyat” (reconstruction)	Clean water reservoir 1000 m ³	Clean water reservoir 1000 m ³ . Soil cover. Ladder inside reservoir. Installation of filters absorbers
	Pumping station including electrolysis unit (basic)	Dismantling of existing pump station
	Checkpoint	
	Toilet	
	Transformer substation	
	Internal piping	
	Internal power supply networks, out-site power supply. Lighting	
	Landscaping, planting, fencing and driveway	
	Repair workshop	
	Laboratory-dispatching center	
	Mechanical workshop	
	Warehouse shed	
	Carport for 2 vehicles	
WDC “Kerder” (reconstruction)		
WDC “Kerder” (reconstruction)		Clean water reservoirs 2x 500 m ³ . Rehabilitation of soil cover. Installation of ladder inside reservoir. Installation of filters absorbers
		Pumping station including electrolysis unit working on tinkered liquid hypochlorite.
	Checkpoint	
	Toilet	
		Transformer substation
		Internal piping
	Internal power supply, out-site power supply. Lighting	
	Landscaping, planting, fencing and driveway	

Name of structure or Water Distribution Center	Description of project works	
	Construction	Reconstruction
WDC “Abadan” (reconstruction)		
WDC “Abadan” (reconstruction)	Clean water reservoir 500 m ³	Clean water reservoirs 1x 500 m ³ . Rehabilitation of soil cover. Installation of ladder inside reservoir. Installation of filters absorbers
		Pumping station including electrolysis unit working on tinkered liquid hypochlorite.
	Checkpoint	
	Toilet	
		Transformer. Rural type transformer
		Internal piping
	Lighting	Internal power supply, out-site power supply. Lighting
	Landscaping, planting, fencing and driveway	

II. CONSTRUCTION AND RECONSTRUCTION OF TRUNK MAINS AND WATER NETWORKS AND POPULATION&SETTLEMENTS TO BE COVERED

	District	Trunk mains to be constructed and reconstructed, km	Trunk mains and water networks to be constructed and reconstructed, km	Number of households to be covered	Population to be covered by the project
1	Amudarya district	54.3	236.5	15 238	78 587
2	Beruniy district	43	221	17 463	95 937
3	Karauzak district	52	88.6	6 141	31 342
4	Kungrad district	66	180,2	18 809	94 876
5	Nukus district	39	127.4	6610	33 052
6	Muynak district	61	67,3	4 647	23 683
	TOTAL	315.3	921	68908	357477

Annex 2. Copies of Certificates of Deputy Hokims of Amudarya, Beruniy, Karauzak, Kungrad, Nukus and Muynak Districts Confirming that Implementation of WUWSSD Project Components will not entail any LAR Impact and their Translations

“ТАСДИКЛАЙМАН”
Амударё тумани ҳокими
биринчи ўринбосари М. Нодиров

Мангит шаҳри

ДАЛОЛАТНОМА

Биз, қуйида имзо чекувчилар, ушбу далолатномани туздиқ шу ҳақдаки, Осиё тараққиёт банки маблағлари ҳисобидан амалга ошириладиган “Қорақалпоғистон Республикаси Амударё, Беруний, Қораўзак, Қўнғирот, Нукус ва Мўйноқ туманлари ичимлик суви тизимини ривожлантириш” лойиҳаси доирасида реконструкция қилинадиган ва янгидан қуриладиган қуйидаги объектларни ўрганиб чиқдик.

I. Реконструкция қилинадиган ва янгидан қуриладиган 160 – 350 мм.лик ичимлик сувини узатиш қувурлари трассалари:

1. РУ-1 ичимлик сувини таъминлаш иншоатидан “Қуюққўпир” сувни тақсимлаш иншоатигача, 10,8 км.;
2. “Амударё” сув тозалаш иншоатидан РУ-1 сув тақсимлаш иншоатигача, 3,9 км.;
3. “Қуюққўпир” сув тақсимлаш иншоатидан Қизил чоли қишлоқ аҳоли пунктигача, 6 км.;
4. “Қуюққўпир” сув тақсимлаш иншоатидан Сейтовул қишлоқ аҳоли пунктигача, 3,5 км.;
5. “Қуюққўпир” сув тақсимлаш иншоатидан Жумуровул қишлоқ аҳоли пунктигача, 3,4 км.;
6. “Қуюққўпир” сув тақсимлаш иншоатидан Хитой қишлоқ аҳоли пунктигача, 3,5 км.;
7. “Ўрозбоев” сув станциясидан Қиличбой қишлоқ аҳоли пунктигача, 3,5 км.;
8. “Амударё” сув тозалаш иншоатидан Юсуф Хожа қишлоқ аҳоли пунктигача, 2,4 км.

II. Қуйидаги қишлоқ ва шаҳар аҳоли пунктларида реконструкция қилинадиган ва янгидан қуриладиган 75 – 250 мм.лик ичимлик сувини тарқатиш тармоқлари трассалари, жами 279 км.:
Ариабўйи, Бужук қўл, Жамол хўжа, Қизил чоли, Нукус овул, Сейт овул, Хитой з.п, Эшон овул, Хитой ш., Ўрта қалъа, Озидлик, Бирлашган, Юкори тувлуга, Нўғай эшон, Қора қипчоқ, Шайх қалъа, Ос овул, Юсуф Хожа, Қиличбой ш., Аёкчи, Иккинчи қишлоқ, Жумураул, Қорамон, Мангит ш.

III. Реконструкция қилинадиган “И. Ўрозбоев” сув станцияси.

IV. Янгидан қуриладиган қуйидаги ичимлик сувини таъминлаш объектларининг жойлашиш участкалари:

1. “Амударё” сувни тозалаш иншоати;
2. “Қуюққўпир” сувни тарқатиш иншоати.

Юқорида зикр этилган реконструкция қилинадиган ва янги қуриладиган ичимлик суви қувурлари трассаларини, реконструкция қилинадиган ва янги қуриладиган ичимлик сувини таъминлаш объектларини ўрганиш натижасида шунини аниқладик.

Реконструкция қилинадиган ва янги қуриладиган сув узатиш магистрал қувурлар, аҳоли пунклари ичидидаги сув тарқатиш тармоқлари трассалари ва хонадонлар уламиниш учун мўлжалланган колодезлар туман ҳокимияти қарамоғида бўлган йўлларда ва шу йўлларнинг ажратилган минтақаси ҳудудида жойлашади.

Янги “Амударё” сувни тозалаш иншоати ва “Қуюққўпир” сувни тақсимлаш иншоати қурилиш участкалари Тўямуюн-Нукус минтақалараро сув қувиридан фойдаланиш бошқармаси Амударё тумани “Сув тармоқлари” филиалига тегишли ҳудудларда жойлашган.

Мазкур қурилиш ишларини амалга ошириш натижасида:

1. Фермер ва уй хўжалиқларига тегишли бўлган экин ерларига таъсир этилмайди;
2. Маҳаллий аҳолига ва тadbиркорлик субъектларига тегишли бино ва иншоатларга зарар етмайди;
3. Дарахтлар кесилмайди.
4. Tadbиркорлик субъектларининг иш олиб боришлари учун қўшимча қўйишлар тўғдирилмайди.

Ушбунини тўғри деб тасдиқладик:

1. Амударё тумани ҳокимияти мутахассиси
2. Амударё тумани бош архитектори
2. Амударё тумани “Ер-мўлқ” кдастри бошлиғи
- Амударё тумани “Сув тармоқлари” филиали бошлиғи

А. Ражапов

«APPROVE»

Deputy Hokim of Amudarya
District Mr. U.Polvanov

Mangit city

22 May, 2017

C E R T I F I C A T E

We, the undersigned, prepared this certificate confirming that we surveyed the following water supply facilities to be reconstructed and newly constructed under water supply systems development project in Amudarya, Beruniy, Karauzak, Nukus and Muynak districts of Karakalpakstan funded by Asian Development Bank:

I. Alignments of trunk mains to be reconstructed and newly constructed D=160 – 350 mm:

1. From RU-1 water supply facility to “Kuyukkupir” water distribution center, 10,8 km.;
2. From “Amudaryo” water treatment plant to RU-1 water distribution center, 3,9 km.;
3. From “Kuyukkupir” water distribution center to Kizil Choli rural settlement, 6 km.;
4. From “Kuyukkupir” water distribution center to Seytovul rural settlement, 3,5 km.;
5. From “Kuyukkupir” water distribution center to Jumurovul rural settlement, 3,4 km.;
6. From “Kuyukkupir” water distribution center to Hitoy rural settlement, 3,5 km.;
7. From “Urozboev” water supply facility to Kilichboy rural settlement, 3,5 km.;
8. From “Amudaryo” water treatment facility to Yusuf Khodja rural settlement, 2,4 km.

II. Alignments of water networks in rural and urban settlements to be reconstructed and newly constructed D=75 – 250 mm., total 279 km.:

Arnabuyi, Bujuk Kul, Jamol Khuja, Kizil Choli, Nukus Ovul, Seyt Ovul, Hitoy z.p, Eshon Ovul, Hitoy town, Urta Kala, Ozidlik, Birlashgan, Yukori Tuvulga, Nugay Eshon, Kora Kipchok, Shayh Kala, Os Ovul, Yusuf Khodja, Kilichboy, Ayokchi, Ikkinchi Kishlok, Jumurovul, Koramon, Mangit city.

III. Water facility “Urozboev” to be reconstructed.**IV. Construction sites of the following new water supply facilities:**

1. “Amudaryo” water treatment plant;
2. “Kuyukkupir” water distribution center.

Based on the survey of abovementioned alignments of drinking water supply pipelines to be constructed or reconstructed, drinking water supply facilities to be reconstructed and newly constructed we found out the following.

Alignments of trunk mains, water networks to be reconstructed and newly constructed within settlements and house connection offtake manholes will be located on roads and right-of-ways of these roads which are under management of the district hokimiyat.

Construction sites of new water treatment plant “Amudaryo” and water distribution center “Kuyukkupir” are located on territories belonging to Amudarya district branch of the Department for Operation of Tuyamuyun-Nukus Inter-Regional Trunk (TN).

These construction works will not entail:

1. Impact on to agricultural lands of farm enterprises and households;
2. Impact on to buildings and structures of people and businesses;
3. Cut of trees;
4. Difficulties for businesses to implement their activities.

In witness whereof the undersigned:

1. Officer of Amudarya district Hokimiyat
2. Engineer of Amudarya district architecture department
3. Chief engineer of Amudarya district land cadaster department
4. Director of Amudarya district branch of TN

Беруний шахри

ДАЛОЛАТНОМА

Биз, қуйида имзо чекувчилар ушбу далолатномани туздик шу ҳақдаки, Осиё тараққиёт банки маблаглари ҳисобидан амалга ошириладиган “Қорақалпоғистон Республикаси Амударё, Беруний, Қораўзак, Қўнгирот, Нукус ва Мўйноқ туманлари ичимлик суви тизимини ривожлантириш” лойиҳаси доирасида реконструкция қилинадиган ва янгидан қуриладиган қуйидаги объектларни ўрганиб чиқдик.

I. Реконструкция қилинадиган ва янгидан қуриладиган 160 – 350 мм.лик ичимлик сувини узатиш қувурлари трассалари:

1. Магистрал қувурдан РУ-1 сув тақсимлаш иншоотига, L-3,62 км.;
2. РУ-1 сув иншоотидан “Шимом” сув тақсимлаш иншоотига (СТИ), L-9,83 км.;
3. СТИ “Саркоп” дан Бодамбош кишлоқ аҳоли пунктига булган, L-4,25 км.;
4. РУ-1 сув тақсимлаш иншоотидан НРС-15 сув ҳайдаш насос станциясига L-22,52 км.;
5. “Шимом” сув тақсимлаш иншоотидан Беруний шахрига L – 2,57 км.

II. Қуйидаги кишлоқ ва шаҳар аҳоли пунктларида реконструкция қилинадиган ва янгидан қуриладиган 75 – 250 мм.лик ичимлик сувини тарқатиш тармоқлари трассалари:

Маданият, Пахтакор, Тоза бог, Ундириш, Тоза нур, Илғорлар, Бодамбош, Тинчлик, Бийбозор, Намуна, Ёшлик, Найман, Мехнаткаш, Навоний, Қаншартал, Беруний ш.

III. Реконструкция қилинадиган қуйидаги сув таъминлаш объектлари:

1. РУ-1 “Беруний”, “Беруний” НРС-15 ва НРС-17 сув олиш ва тақсимлаш иншоотлари.

IV. Янгидан қуриладиган қуйидаги ичимлик сувини таъминлаш объектларининг жойлашиш участкалари: “Шимом” ва “Бодамбош” сувни тақсимлаш иншоотлари.

Юқорида зикр этилган реконструкция қилинадиган ва янги қуриладиган ичимлик суви қувурлари трассаларини, реконструкция қилинадиган ва янги қуриладиган ичимлик сувини таъминлаш объектларини ўрганиш натижасида шунини аниқладик.

Реконструкция қилинадиган ва янги қуриладиган сув узатиш магистрал қувурлар, аҳоли пунктлари ичидаги сув тарқатиш тармоқлари трассалари ва хонадонлар уланиши учун мўлжалланган қолдонишлар туман ҳокимияти қарамоғида бўлган йўлларда ва шу йўлларнинг ажратилган минтақаси ҳудудларида жойлашади.

Мазкур қурилиш ишларини амалга ошириш натижасида:

1. Фермер ва уй ҳўжаликларига тегишли бўлган экин ерларига таъсир этилмайди;
2. Аҳоли ва тадбиркорлик субъектларига тегишли бино ва иншоотларга зарар етмайди;
3. Аҳолига тегишли дарахтлар кесилмайди;
4. Тадбиркорлик субъектларининг иш олиб боришлари учун ноқулайчиликлар тугдирилмайди.

Янги “Шимом” ва “Бодамбош” сувни тақсимлаш иншоотларини қуриш учун танланган ерлар кишлоқ ҳўжалиги учун ярамайди ва Беруний тумани давлат ер захираси балансига тегишли бўлиб Туямуён-Нукус минтақалараро сув қувуридан фойдаланиш бошқармаси Беруний тумани сув қувурлари филиалига ўрнатилган тартибда ажратиб берилади.

Ушбунни тўғри деб тасдиқладик:

1. Беруний тумани ҳокимлиги мутахассиси
2. Беруний тумани архитектура бошқармаси мутахассиси
3. Беруний тумани “Ер-мулк” кадастри бош муҳаррири
4. Беруний тумани сув тармоқлари филиали директори

«APPROVE»
Deputy Hokim of Beruniy
District Mr. G. Yuldashev
5 June, 2017

Beruniy city

C E R T I F I C A T E

We, the undersigned, prepared this certificate confirming that we surveyed the following water supply facilities to be reconstructed and newly constructed under water supply systems development project in Amudarya, Beruniy, Karauzak, Nukus and Muynak districts of Karakalpakstan funded by Asian Development Bank.

I. Alignments of trunk mains to be reconstructed and newly constructed D=160 – 350 mm:

1. From main transmission main to RU-1 water distribution center, L-3,62 km.;
2. From RU-1 water distribution center to “Shimom” water distribution center, L-9,83 km.;
3. From WDC “Sarkop” to rural settlement “Bodambosh”, L-4,25 km.;
4. From RU-1 water distribution center to NRS-15 pumping station, L-22,52 km.;
5. From “Shimom” water distribution center to Beruniy city, L – 2,57 km.

II. Alignments of water networks in the following rural and urban settlements D=75-250 mm:

Madaniyat, Pakhtakor, Toza Bog, Undirish, Toza Nur, Ilgorlar, Bodambosh, Tinchlik, Biybozor, Namuna, Yoshlik, Nayman, Mehnatkash, Navoiy, Kanshartal, Beruniy city.

III. The following water distribution centers to be reconstructed:

1. “RU-1 Beruniy”, “Beruniy” water intake facility, NRS-15 and NRS-17 water distribution centers.

IV. Construction sites of the following new water supply facilities: “Shimom” and “Bodombosh” water distribution centers.

Based on the survey of abovementioned alignments of drinking water supply pipelines to be constructed and reconstructed, drinking water supply facilities to be reconstructed and newly constructed we found out the following.

Alignments of trunk mains, water networks to be reconstructed and newly constructed within settlements and house connection offtake manholes will be located on roads and right-of-ways of these roads which are under management of the district hokimiyat.

The abovementioned construction works will not entail:

1. Impact on to agricultural lands of farm enterprises and households;
2. Impact on to buildings and structures of people and businesses;
3. Cut of trees of people;
4. Difficulties for businesses to implement their activities.

Lands selected for construction of new water distribution centers “Shimom” and “Bodombosh” are not suitable for agriculture and belong to Beruniy district land reserve and will be allocated to Beruniy district branch of the Department for Operation of Inter-Regional Trunk Main Tuyamuyun-Nukus (TN) as per established procedure.

In witness whereof the undersigned:

1. Specialist of Beruniy district hokimiyat
2. Specialist of Beruniy district architecture department
3. Chief engineer of Beruniy district land cadaster department
4. Director of Beruniy district branch of TN

Қораўзақ тумани

1 июнь 2017 йил

ДАЛОЛАТНОМА

Биз, қуйида имзо чекувчилар ушбу далолатномани туздик шу ҳақдаки, Осиё тараққиёт банки маблаглари ҳисобидан амалга ошириладиган "Қорақалпоғистон Республикаси Амударё, Беруний, Қораўзақ, Қўнгирот, Нукус ва Мўйноқ туманлари ичимлик суви тизимини ривожлантириш" лойиҳаси доирасида реконструкция қилинадиган ва янгидан қуриладиган қуйидаги объектларни ўрганиб чиқдик.

I. Реконструкция қилинадиган ва янгидан қуриладиган 160 – 350 мм.лик ичимлик сувини узатиш қувурлари трассалари:

1. РУ-1 сув тақсимлаш иншоатидан "Бирдам" сув тақсим. насос станциясигача, L-24,6 км.;
2. РУ-1 сув тақсимлаш иншоатидан "Қорақўл" сув тақсимлаш иншоатигача, L-11,6 км.;
3. ВС-1 сув тақсимлаш иншоатидан "Темирхон" қишлоқ аҳоли пунктигача, L-8,9 км.;
4. РУ-1 сув иншоатидан Маданият қишлоқ аҳоли пунктигача L-6,92 км.;

II. Қуйидаги қишлоқ ва шаҳар аҳоли пунктларида реконструкция қилинадиган ва янгидан қуриладиган 75 – 250 мм.лик ичимлик сувини тарқатиш тармоқлари трассалари:

Акбеткей, Қошқарбай, Самат овул, Тоza овул, Қорамўйин, Бугежейли, Тойберган, Бирдем, Қоримли, Костамғали, Шайханақўприк, Сағаной, Дилеке шоқай аул, Шитли, Қият, Қоратол, Қозоқ жилға, Ирғакли, Қорақўл, Темирхон, Қирик, Кандекли, Маденият орайи, Қорамўйин, Ҳаким, Акбетли, Қурбон, Қораўзақ ш.

III. Реконструкция қилинадиган қуйидаги сув таъминлаш объектлари:

1. "Самат", "Қоратол" ва "Қораўзақ" сув тақсимлаш иншоатлари.

Юқорида зикр этилган реконструкция қилинадиган ва янги қуриладиган ичимлик суви қувурлари трассаларини, реконструкция қилинадиган ва янги қуриладиган ичимлик сувини таъминлаш объектларини ўрганиш натижасида шунни аниқладик.

Реконструкция қилинадиган ва янги қуриладиган сув узатиш магистрал қувурлар, аҳоли пунктлари ичидаги сув тарқатиш тармоқлари трассалари ва хонадонлар уланиши учун мўлжалланган колодезлар туман ҳокимияти қарамоғида бўлган йўлларда ва шу йўлларнинг ажратилган минтақаси ҳудудларида жойлашади.

Мазкур қурилиш ишларини амалга ошириш натижасида:

1. Фермер ва уй хўжаликлариға тегишли бўлган экин ерларига таъсир этилмайди;
2. Маҳаллий аҳолиға ва тадбиркорлик субъектларига тегишли бино ва иншоотларға зарар етмайди;
3. Дарахтлар кесилмайди;
4. Тадбиркорлик субъектларининг иш олиб боришлари учун ноқулайчиликлар туғдирилмайди.

Ушбуни тўғри деб тасдиқладик:

1. Қораўзақ тумани ҳокимлиги мутахассиси

2. Қораўзақ тумани архитектура ва қурилиш бошқармаси муҳандиси

3. Қораўзақ тумани "Ер-мулк" кадастри бошлиғи

4. Қораўзақ тумани сув тармоқлари филиали бошлиғи

“APPROVE”
Deputy Hokim of Kungrad District
A. Kosimbetov

Kungrad city

5 June, 2017

C E R T I F I C A T E

We, the undersigned, prepared this certificate confirming that we surveyed the following water supply facilities to be reconstructed and newly constructed under water supply systems development project in Amudarya, Beruniy, Karauzak, Nukus and Muynak districts of Karakalpakstan funded by Asian Development Bank.

A. Alignments of trunk mains to be reconstructed and newly constructed D=160 – 350 mm:

1. From trunk main “Takhiatash – Kungrad” to Kungrad city, 6,8 km.
2. From trunk main “Kungrad – Raushan” to settlement Raushan 7,68 km.
3. From “Kungrad” water distribution center to Kungrad city and adjacent settlements 20,16 km.

B. Alignments of water networks in the following rural settlements and Kungrad city D=75-250 mm:

Khorezm, Ashamayli, Suenli, Ustyurt, Shomanay, Jalpaktil, Ornek, Kiyot, Kitay, Tirkosh, Bostanlik, Adabiyot, Nauriz, Kizil Kush, Kanjigali, Hakke Avul, Koris Avul, Shamra Avul, Kanli Avul, Ayran Avul and Kungrad city.

C. The following water distribution centers to be reconstructed:

“Khorazm”, “Ustyurt”, “Okhunboboev” water distribution centers, “Kizil Kush”, “Kanjigali” water towers, “Kungrad” water intake facility.

Based on the survey of abovementioned alignments of drinking water supply pipelines to be constructed or reconstructed, drinking water supply facilities to be reconstructed and newly constructed we found out the following.

Alignments of trunk mains, water networks to be reconstructed and newly constructed within settlements and house connection offtake manholes will be located on roads and right-of-ways of these roads which are under management of the district hokimiyat.

These construction works will not entail:

1. Impact on to agricultural lands of farm enterprises and households;
2. Impact on to buildings and structures of people and businesses;
3. Cut of trees of people;
4. Difficulties for businesses to implement their activities.

In witness whereof the undersigned:

ДАЛОЛАТНОМА

Биз, қуйида имзо чекувчилар ушбу далолатномани туздик шу ҳақдаки Осиё тараққиёт банки маблағлари ҳисобидан амалга ошириладиган “Қорақалпоғистон Республикаси Амударё, Бөрүнйй, Қораўзақ, Қўнгирот, Нукус ва Мўйнок туманлари ичимлик суви тизимини ривожлантириш” лойихаси доирасида реконструкция қилинадиган ва янгидан қуриладиган қуйидаги ичимлик сувини таъминлаш объектларини ўрганиб чиқдик.

I. Реконструкция қилинадиган ва янгидан қуриладиган 160 – 350 мм.лик ичимлик сувини узатиш қувурлари трассалари:

1. “Нукус” сув тақсимлаш иншоатидан Оқмангит район марказигача, L-9,77 км.;
2. Оқмангит район марказидан “Маденийт” сув тақсимлаш иншоатигача, L-7,3 км.;
3. “Маденийт” сув тақсимлаш иншоатидан “Абадан” сув тақсимлаш иншоатигача, L-6,65 км.;
3. “Абадан” сув тақсимлаш иншоатидан Кердер киш. аҳоли пунктигача, L-6,95 км.;
4. “Оқмангит аул” қувиридан “Шортанбай” сув тақсимлаш насос станциясигача, L-3,22 км.;
5. Оқмангит район марказига узатадиган сув узатиш қувиридан “Қўтонқўл” сув тақсимлаш насос станциясигача, L-3,64 км.;
6. “Нукус” сув тақсимлаш иншоатидан Каттағар қишлоқ аҳоли пунктигача, L-2,6 км.;

II. Қуйидаги қишлоқ ва шаҳар аҳоли пунктларида реконструкция қилинадиган ва янгидан қуриладиган 75 – 250 мм.лик ичимлик сувини тарқатиш тармоқлари трассалари:

Тарлы, Қус ферма, Токтау, Мақсум қала, Хожя қала, Жаманша Қутанқул, Ажим ауыл, Тоқумбет, Оқмангит р/м, Шой тас, Ушағаш, Мамикши, Маденийт, Абадан, Кердер, Ақмангит аул, Палуаниязов, Шортанбай, Қалмен, Досимбет, Сағир, Қазақ, Қттағар, Узун қул, Саманбай.

III. Реконструкция қилинадиган қуйидаги сув таъминлаш объектлари:

1. “Маденийт”, “Нукус”, “Абадан” ва “Кердер” сув тақсимлаш иншоатлари.

Юқорида зикр этилган реконструкция қилинадиган ва янги қуриладиган ичимлик суви қувурлари трассаларини, реконструкция қилинадиган ва янги қуриладиган ичимлик сувини таъминлаш объектларини ўрганиш натижасида шунн аниқладик.

Реконструкция қилинадиган ва янги қуриладиган сув узатиш магистрал қувурлар, аҳоли пунктлари ичидаги сув тарқатиш тармоқлари трассалари ва хонадонлар уланиши учун мўлжалланган колодезлар туман ҳокимияти қарамоғида бўлган йўлларда ва шу йўлларнинг ажратилган минтақаси ҳудудларида жойлашади.

Маъқур қурилиш ишларини амалга ошириш натижасида:

1. Фермер ва уй хўжалиқларига тегишли бўлган экин ерларига таъсир этилмайди;
2. Маҳаллий аҳолига ва тадбиркорлик субъектларига тегишли бино ва иншоотларга зарар етмайди;
3. Дарахтлар кесилмайди;
4. Тадбиркорлик субъектларининг иш олиб боришлари учун ноқулайчиликлар туғдирилмайди.

Ушбунн тўғри деб тасдиқладик:

1. Нукус тумани ҳокимлиги мутахасиси
2. Нукус тумани архитектура бошлиғи
3. Нукус тумани “Ер-мулк” кадастри бошлиғи
4. Нукус тумани сув тармоқлари филиали директори

Deputy Hokim of Nukus District
Mr. M.Uzakbergenov

Okmangit city

2June, 2017

C E R T I F I C A T E

We, the undersigned, prepared this act certifying that we surveyed the following water supply facilities to be reconstructed and newly constructed under water supply systems development project in Amudarya, Beruniy, Karauzak, Nukus and Muynak districts of Karakalpakstan funded by Asian Development Bank:

A. Alignments of trunk mains to be reconstructed and newly constructed D=160 – 350mm:

1. From water distribution center “Nukus” to district center Okmangit, L-9,77 km.;
2. From Okmangit district center to “Madeniyat” water distribution center, L-7,3 km.;
3. From “Madeniyat” water distribution center to “Abadan” water distribution center, L-6,65 km.;
3. From “Abadan” water distribution center to Kerderrural settlement, L-6,95 km.;
4. From “Okmangit aul” trunk main to “Shortanbay” water distribution station, L-3,22 km.;
5. From trunk main to Okmangit district center to “Kutonkul” water distribution station, L-3,64 km.;
6. From “Nukus” water distribution center to Kattagar rural settlement, L-2,6 km.;

II. Alignments of water networks in the following villages and Muynak city D=75-250 mm:

Tarly, Kus Ferma, Toktau, Maksim Kala, Hoja Kala, Jamansha Kutankul, Ajim Aul, Tokumbet, Okmangit d/c, Shom Tas, Ushagash, Mamikshi, Madeniyat, Abadan, Kerder, Akmangit aul, Paluaniyazov, Shortanbay, Kalmen, Dosimbet, Sagir, Kazakh, Kattagar, Uzun Kul, Samanbay.

III. The following water distribution centers to be reconstructed:

1. “Madeniyat”, “Nukus”, “Abadan” and “Kerder” water distribution centers.

Based on the survey of abovementioned alignments of drinking water supply pipelines to be constructed or reconstructed, drinking water supply facilities to be reconstructed and newly constructed we found out the following.

Alignments of trunk mains, water networks to be reconstructed and newly constructed within settlements and house connection offtake manholes will be located on roads and right-of-ways of these roads.

These construction works will not entail:

1. Impact on to agricultural lands of farm enterprises and households;
2. Impact on to buildings and structures of people and businesses;
3. Cut of trees;
4. Difficulties for businesses to implement their activities.

In witness whereof the undersigned:

1. Officer of Nukus district Hokimiyat
2. Officer of Nukus district architecture department
3. Chief engineer of Nukus district land cadaster department
4. Director of Nukus district branch of TN

Mr. S.Nuratdinov

Мўйноқ шахри

1 июнь, 2017 йил

Биз, қуйида имзо чекувчилар, ушбу далолатномани туздик шу ҳақдаки, Осиё тараққиёт банки маблағлари ҳисобидан амалга ошириладиган “Қорақалпоғистон Республикаси Амударё, Бегуний, Қораўзак, Қўнгирот, Нукус ва Мўноқ туманлари ичимлик суви тизимини ривожлантириш” лойиҳаси доирасида реконструкция қилинадиган ва янгидан қуриладиган қуйидаги ичимлик сувини таъминлаш объектларини ўрганиб чиқдик.

А. Реконструкция қилинадиган ва янгидан қуриладиган 160 – 350 мм.лик ичимлик сувини узатиш қувурлари трассалари:

1. “Қўнгирот-Мўйноқ” магистрал қувурдан Али аул қишлоқ аҳоли пунктигача 11,9 км.;
2. Али аул қишлоқ аҳоли пунктидан Қизил жар қишлоқ аҳоли пунктигача 5,24 км.;
3. “Қўнгирот - Мўйноқ” магистрал қувурдан Дўстлик қишлоқ аҳоли пунктигача 8,43 км.
4. “Қўнгирот - Мўйноқ” магистрал қувурдан Порлитау қишлоқ аҳоли пунктигача 22,4 км.
5. “Мўйноқ” сув тақсимлаш иншоатидан Учсой ОФЙ гача 8,51 км.
6. Учсой ОФЙ дан газоконденсатгача 4,4 км.

Б. Қуйидаги қишлоқ аҳоли пунктларида ва Мўйноқ шахрида реконструкция қилинадиган ва янгидан қуриладиган 75-250 мм.лик ичимлик сувини тарқатиш тармоқлари трассалари:

Али аул, Қизил жар, Дўстлик, Шағирлы, Таллык, Амударья, Қипшак, ШеҒе, Порлитау, Учсой ва Мўйноқ ш.

С. Реконструкция қилинадиган қуйидаги ичимлик сувини тақсимлаш объектлари:
 Мўйноқ, Учсой, ШеҒе.

Д. Янгидан қуриладиган қуйидаги ичимлик сувини таъминлаш объектларининг жойлашши участкалари:

«Шағирлы» сув тақсимлаш иншооти

Юқорида зикр этилган реконструкция қилинадиган ва янги қуриладиган ичимлик суви қувурлари трассаларини, реконструкция қилинадиган ва янги қуриладиган ичимлик сувини таъминлаш объектларини ўрганиш натижасида шуни аниқладик.

Реконструкция қилинадиган ва янги қуриладиган сув узатиш магистрал қувурлар, аҳоли пунктлари ичидаги сув тарқатиш тармоқлари трассалари ва хонадонлар уланиши учун мўлжалланган колодезлар туман ҳокимияти қарамоғида бўлган йўлларда ва шу йўлларнинг ажратилган минтақаси ҳудудларида жойлашади.

Янги “Шағирлы” сувни тақсимлаш иншооти қурилиш участкаси Туямуюн-Нукус минтақалараро сув қувуридан фойдаланиш бошқармаси Мўноқ тумани сув қувурлари филиалига тегишли ҳудудда жойлашган.

Мазкур қурилиш ишларини амалга ошириш натижасида:

1. Фермер ва уй хўжаликларига тегишли бўлган экин ерларига таъсир этилмайди;
2. Аҳолига ва тадбиркорлик субъектларига тегишли бино ва иншоотларга зарар етмайди;
3. Аҳолига тегишли дарахтлар кесилмайди;
4. Тадбиркорлик субъектларининг иш олиб боришлари учун ноқулайчиликлар туғдирилмайди.

Ушбуни тўғри деб тасдиқладик:

1. Мўйноқ тумани ҳокимининг муҳассиси
2. Мўйноқ тумани бош архитектура бошлиғи
3. Мўйноқ тумани “Ер-мулк” кадастри бош муҳандиси
4. Мўйноқ тумани сув тармоқлари филиали директори

“APPROVE”
Deputy Hokim of Muynak
district Mr. T. Mambetmuratov

Muynak city

1 June, 2017

We, the undersigned, prepared this act certifying that we surveyed the following water supply facilities to be reconstructed and newly constructed under water supply systems development project in Amudarya, Beruniy, Karauzak, Nukus and Muynak districts of Karakalpakstan funded by Asian Development Bank:

A. Alignments of trunk mains to be reconstructed and newly constructed D=160 – 350 mm:

1. From trunk main “Kungrad-Muynak” to Ali Aul village 11,9 km.;
2. From Ali Aul village to Kizil Jar village 5,24 km.;
3. From “Kungrad - Muynak” trunk main to Dustlik village 8.43 km.
4. From “Kungrad - Muynak” trunk main to Porlitau village 22,4 km.
5. From “Muynak” water distribution center to Uchsoy rural community 8,51 km.
6. From Uchsoy rural community to gas processing plant 4,4 km.

B. Alignments of water networks in the following villages and Muynak city D=75-250 mm:

Ali Aul, Kizil Jar, Dustlik, Shagirli, Tallyk, Amudarya, Kipshak, Shege, Porlitau, Uchsoy and Muynak city.

C. The following water distribution centers to be reconstructed:

Muynak, Uchsoy, Shege.

D. Construction sites of the following new water supply facilities:

«Shagirli» water distribution center

Based on the survey of abovementioned alignments of drinking water supply pipelines to be constructed or reconstructed, drinking water supply facilities to be reconstructed and newly constructed we found out the following.

Alignments of trunk mains, water networks to be reconstructed and newly constructed within settlements and house connection offtake manholes will be located on roads and right-of-ways of these roads which are under management of the district hokimiyat.

Construction site of new water distribution center “Shagirli” is located on territory belonging to Muynak district branch of the Department for Operation of Tuyamuyun-Nukus Inter-Regional Trunk (TN).

These construction works will not entail:

1. Impact on to agricultural lands of farm enterprises and households;
2. Impact on to buildings and structures of people and businesses;
3. Cut of trees of people;
4. Difficulties for businesses to implement their activities.

In witness whereof the undersigned:

Объявление

УВАЖАЕМЫЕ ЖИТЕЛИ НУКУСКОГО, БЕРУНИЙСКОГО, МУЙНАКСКОГО, КУНГРАДСКОГО, АМУДАРЬЯНСКОГО И КАРАУЗЬЯНСКОГО РАЙОНОВ!

В рамках реализации Постановления Президента Республики Узбекистан №171-П от 18.01.2017 г. "О государственной программе по развитию регионов Приаралья на 2017-2021 годы" проводится работа по подгоне Технико-экономического обоснования проекта "Развитие и модернизация системы водоснабжения Нукусского, Берунийского, Муйнакского, Кунградского, Амударьинского и Караузынского районов" при финансовой поддержке Азиатского Банка Развития.

В рамках проведения этической оценки планируется проведение общественных слушаний с привлечением всех заинтересованных сторон. На слушаниях будут представлены основные результаты проведенной экологической оценки водоснабжения проекта на текущую среду в проектных районах. Также на слушаниях будут обсуждены вопросы социальной защиты, связанные с вынужденным переселением.

Общественные слушания будут проводиться по следующему графику:

- 26 мая 2017 г. в 9:00 — для жителей Нукусского района в зале районного хакимията.
- 26 мая 2017 г. в 19:00 — для жителей Караузынского района в зале хакимията.
- 27 мая 2017 г. в 10:00 — для жителей г. Муйнак и поселка Учсай Муйнакского района в зале хакимията.
- 27 мая 2017 г. в 15:00 — для жителей ССГ Бозатау (п/п Талпык, Кышкак, Шеге), ССГ Мадели (п/п Шеге, Порлытау) Муйнакского района в здании школы №10 Кышкакдарья аула ССГ Бозатау.
- 29 мая 2017 г. в 10:00 — для ССГ Хакимията (п/п Али аул, Кызыл жар, Дослык аул) Муйнакского района в здании школы №17 Али аула.
- 29 мая 2017 г. в 15:00 — для жителей Кунградского района в зале хакимията.
- 30 мая 2017 г. в 10:00 — для жителей Амударьинского района в зале хакимията.
- 30 мая 2017 г. в 15:00 — для жителей Берунийского района в зале хакимията.

Для участия в общественных слушаниях приглашаются все заинтересованные лица.

АДМИНИСТРАЦИЯ МЕЖРЕГИОНАЛЬНОГО ВОДОПРОВОДА "ТУРМУЧОН-НУКУС".

ООО "QORALPOQ MULK MARKAZI" приглашает на открытые аукционные торги, которые состоятся 7 июня 2017 года в 12.00 в зале заседаний ООО "Каракалпак мультимаркет" при участии аукционной комиссии. В порядке последовательного роста начальных цен повторно выставляются нижеследующие имущества:

- 1. На основании исполнительного письма Хозяйственного суда Республики Каракалпакстан от 16.02.2015 года и от 23.11.2015 года арестованные Ходжабайсейтов районным отделом по исполнению судебных решений, принадлежащие в АМТП "Каракалпак" Ходжабайсейтова района:
 - 1. Трактор марки "ТТЗ-100", 1997 года выпуска, заводской №000724. Начальная цена: 36014685 сумов.
 - 2. Трактор марки "ТТЗ-100", 1997 года выпуска, госномер 78-73 ЖУ. Начальная цена: 42017133 сум.
- 2. На основании исполнительного письма Хозяйственного суда Республики Каракалпакстан от 23.02.2016 года арестованные Берунийским районным отделом по исполнению судебных решений, принадлежащие и хранящиеся в ЧП "Мадания Аркада":
 - 3. Автомобиль марки "GAZ-5549", 1988 года выпуска, госномер 23A7330. Начальная цена: 2824205 сумов 98 т.
 - 3. Автомобиль марки "GAZ-5320", 1987 года выпуска, госномер 23A765. Начальная цена: 2582726 сумов 76 т.
- 3. На основании исполнительного письма Хозяйственного суда Республики Каракалпакстан от 13.07.2009 года №23-0905/3961 арестованные Берунийским районным отделом по исполнению судебных решений, принадлежащая МТП "Ниско" Берунийского района автомобиль марки "AT-M320GA3-52", 1995 года выпуска, госномер 23A3-930. Начальная цена: 688732 сум 76 т.
- 4. На основании исполнительного письма Хозяйственного суда Республики Каракалпакстан от 13.07.2009 года №23-0905/3961 арестованные Берунийским районным отделом по исполнению судебных решений, принадлежащие в МТП "Янгибод Найман" Берунийского района:
 - 1. Автомобиль марки "GAZ-685", 1983 года выпуска, госномер 23A2653. Начальная цена: 417478 сумов 84 т.
 - 2. Автомобиль марки "GAZ-685", 1984 года выпуска, госномер 23A2193. Начальная цена: 417478 сумов 84 т.
 - 3. Трактор марки "Т-4А", 1989 года выпуска. Начальная цена: 2804348 сумов 85 т.
 - 4. Трактор марки "Т-4А", 1989 года выпуска. Начальная цена: 4405500 сумов 21 т.
- 5. На основании исполнительного письма Хозяйственного суда Республики Каракалпакстан от 11.12.2009 года №23-0907-11775 арестованные Берунийским районным отделом по исполнению судебных решений, принадлежащие ООО "Остийей МТП" Берунийского района и временно хранящиеся на этом же предприятии:
 - 1. Трактор марки "Т-4А", 1986 года выпуска. Начальная цена: 3450155 сумов 44 т.
 - 2. Трактор марки "Т-4А", 1993 года выпуска. Начальная цена: 4546049 сумов 44 т.

На основании исполнительного письма Хозяйственного суда Республики Каракалпакстан от 24.03.2008 года №23-0805/1010 и от 13.07.2009 года №23-0905/3941 арестованный Берунийским районным отделом по исполнению судебных решений, принадлежащий ООО "Беруний-агроуструктурный" Берунийского района и временно хранящийся на этом же предприятии трактор марки "К-701", 1991 года выпуска, заводской №8009107. Начальная цена: 4525330 сумов 35 т.

На основании исполнительного письма Хозяйственного суда Республики Каракалпакстан от 13.12.2009 года №23-0907/11767 арестованный Берунийским районным отделом по исполнению судебных решений, принадлежащий МТП "Беруний" и временно хранящийся на этом же предприятии автомобиль марки "GAZ-330 KC2561", 1988 года выпуска, госномер 06-22 КТМ. Начальная цена: 4393439 сумов 34 т.

На основании исполнительного письма Хозяйственного суда Республики Каракалпакстан от 1.05.2006 года арестованный Берунийским районным отделом по исполнению судебных решений, принадлежащий МТП "Беруний" и временно хранящийся на этом же предприятии:

- 1. Трактор марки "ТТЗ 100К-11", 1997 года выпуска, заводской №002117. Начальная цена: 2384481 сум 68 т.
- 2. Трактор марки "ТТЗ 100К-11", 1997 года выпуска, заводской №000409. Начальная цена: 2622929 сумов 84 т.

На основании исполнительного письма Хозяйственного суда Республики Каракалпакстан от 23.02.2016 года арестованный Берунийским районным отделом по исполнению судебных решений департамент марки "ХУТТЕР М-33 К2", 2008 года выпуска. Начальная цена: 8355563 сум 29 т.

Заказ на участие в аукционных торгах принимается во все дни, кроме субботы и воскресенья, с 10.00 до 18.00 по адресу: г. Нукус, ул. А. Шамуратова, д. №117 "Б". За дополнительной информацией можно обратиться по вышеуказанному адресу. Телефон: 222-84-44.

Translation of notices advertised on local newspapers on 23 May, 2017

DEAR CITIZEN OF NUKUS, BERUNIY, MUNAK, KUNGRAD, AMUDARYA AND KARAUZAK DISTRICTS!

A feasibility study of ADB funded “Nukus, Beruniy, Muynak, Kungrad, Amudarya and Karauzak districts water supply system development” project is being carried out under the Decree of the President of Uzbekistan No.PP-2731 dated 18.01.2017 “About the Government Program on Development of the Aral Sea Region During the Period of 2017-2021”.

It is planned to conduct public consultations with participation of all interested parties within the environmental examination being carried out. Main findings of environmental examination in project districts will be presented during the public consultations.

Also, social-safeguards related to land acquisition and involuntary resettlement will be discussed during public consultation.

Time and venue of public consultations:

26 May, 2017 at 9.00 – public consultations with citizen of Nukus district in the meetings room of district hokimiyat office

26 May, 2017 at 15.00 – public consultations with citizen of Karauzak district in the meetings room of district hokimiyat office

27 May, 2017 at 10.00 – public consultations with citizen of Muynak city and Uchsay village of Muynak district in the meeting room of district hokimiyat office

27 May, 2017 at 15.00 – public consultations with citizen of rural community Bozatau (including villages Tallik, Kipshak, Shege), rural community Madeli (including villages Shege, Porlitau) of Muynak district in the meetings room of school No.10 of Kipshakdarya village

29 May, 2017 at 10.00 – public consultations with citizen of rural community Hakimata (including villages Ali Aul, Kizil Jar) of Muynak district in the meetings room of school No.17 of Ali Aul village.

29 May, 2017 at 15.00 – public consultations with citizen of Kungrad district in the meetings room of district hokimiyat

30 May, 2017 at 10.00 – public consultations with citizen of Amudarya district in the meetings room of district hokimiyat

30 May, 2017 at 15.00 – public consultations for citizen of Beruniy district in the meetings room of district hokimiyat

All interested persons people are invited for participation in public consultations.
