Description	The Luganville Project Readiness Financing (PRF) facility will (i) help the government undertake baseline investigations and prepare bas designs, detailed designs, and associated specifications for the Luganville Urban Water Supply and Sanitation Project (LUWSSP), (ii) support due diligence and start-up activities for LUWSSP and other ensuing urban development projects in Luganville; and (iii) support t project's implementing agencies in early LUWSSP implementation activities.
Project Rationale and Linkage to Country/Regional Strategy	Low levels of readiness for Asian Development Bank (ADB) projects in Vanuatu have contributed to implementation delays and cost overruns in recent years, leading to shortfalls in the delivery of the targeted outputs and intended outcomes of ADB operations. New AD projects need robust preparation to reduce these risks and assist the Government of Vanuatu to achieve the sustainable and inclusive growth targets of Vanuatu's National Sustainable Development Plan 2030 (NSDP 2030). The proposed Luganville PRF facility will strengthen the design and implementation readiness of priority infrastructure projects in Luganville and is expected to reduce the time between the feasibility studies and the award of civil works contracts.
