

## Kyrgyz Republic: Preparing the Naryn Rural Water Supply and Sanitation Development Program

Project Name	Preparing the Naryn Rural Water Supply and Sanitation Development Program
Project Number	52256-002
Country	Kyrgyz Republic
Project Status	Approved
Project Type / Modality of Assistance	Technical Assistance
Source of Funding / Amount	<b>TA: Preparing the Naryn Rural Water Supply and Sanitation Development Program</b> Technical Assistance Special Fund US\$ 700,000.00
Strategic Agendas	Environmentally sustainable growth Inclusive economic growth
Drivers of Change	Governance and capacity development Knowledge solutions Partnerships
Sector / Subsector	<b>Agriculture, natural resources and rural development</b> - Rural sanitation - Rural water supply services
Gender Equity and Mainstreaming	Gender equity
Description	The proposed project will support the government's efforts to improve water supply and sanitation infrastructure and services in rural communities of Naryn Oblast, the Kyrgyz Republic. The indicative program scope will include: (i) development and rehabilitation of water supply networks and related infrastructure; (ii) piloting of non-networked sanitation solutions; and (iii) establishment of sustainable operational models, including development of local professional and vocational capacity and community-based operational management.
Project Rationale and Linkage to Country/Regional Strategy	The Drinking Water Supply, Wastewater Disposal and Sanitation Strategy until 2026 of the Kyrgyz Republic has set ambitious targets for increasing access to potable water supply and improved sanitation. In rural areas, the goal is to reach 90% coverage for water services and 70% coverage for sanitation systems by 2026. A countrywide assessment indicates that 651 out of 1,805 villages require new water supply systems, while 760 villages require substantial investments for system rehabilitation and expansion. Investment needs were estimated to be \$600 million for water supply alone. Capital investments required to achieve sanitation coverage expansion targets have not yet been reliably estimated and will depend largely upon the adopted approach for promoting rural sanitation development.
