

Kazakhstan: Preparing the Livestock Value Chain Development

Project Name	Preparing the Livestock Value Chain Development		
Project Number	53069-002		
Country	Kazakhstan		
Project Status	Proposed		
Project Type / Modality of Assistance	Technical Assistance		
Source of Funding / Amount	TA: Preparing the Livestock Value Chain Development		
	Technical Assistance Special Fund		US\$ 500,000.00
Strategic Agendas	Inclusive economic growth		
Drivers of Change			
Sector / Subsector	Agriculture, natural resources and rural development - Livestock		
Gender Equity and Mainstreaming			
Description	The transaction TA will help the government of the Republic of Kazakhstan prepare the project. Particularly, the TA will help with: (i) preparation of the project feasibility study (including all required due diligence), (ii) relevant costs related to project processing by ADB and the government, and (iii) implementation start-up support.		
Project Rationale and Linkage to Country/Regional Strategy	Around 44.5% of agricultural GDP is generated from livestock. The sector has experienced steady growth in recent years in both animal numbers and production. Compared with 2011, by January 2018 cattle numbers had increased by 8.3%, horses by 28.7%, sheep by 1.5%, and poultry by 8.3%. Despite increasing outputs, Kazakhstan remains a net importer of meat and milk. Livestock numbers are projected to continue to increase over the period 2019-2022, reflecting the government's aim of increased national self-sufficiency. Women and men are evenly represented in agriculture, however, the number of women employed in agriculture has declined by 34% between 2006 and 2016. The government regards improving the population's access to livestock products as a means of improving standards of human nutrition and food security.
