

CONTRIBUTION TO THE ADB RESULTS FRAMEWORK

No.	Results Framework Indicators	Targets	Methods Used
1	Installed energy generation capacity (MW equiv.)	41	Measured capacity of diesel generators and solar PV systems installed
2	Transmission lines installed or upgraded (km)	0	No transmission voltages are used in outer islands
3	Distribution lines installed or upgraded (km)	500	Measured on physical construction of distribution lines
4	New households connected to electricity (number)	0	Maldives is already 100% electrified
5	Greenhouse Gas Emission Reduction (tCO ₂ -equiv/yr)	80,000	Difference in diesel consumption due to replacement of inefficient generation with efficient generators and solar PV systems

ADB = Asian Development Bank, km = kilometer, PV = photovoltaic, tCO₂-equiv/yr = tons of carbon dioxide equivalent per year.
