NC	:	Not Connected
NGO	:	Non-Government Organization
NRRDA	:	National Rural Road Development Agency
NREGP	:	National Rural Employment Guarantee Program
PIU	:	Project Implementation Unit
PIC	:	Project Implementation Consultants
PFR	:	Periodic Finance Request
PMGSY	:	Pradhan Mantri Gram Sadak Yojana
RCIP	:	Rural Connectivity Investment Programme
ROW	:	Right-of-Way
RRP	:	Report and Recommendation of the President
RRSIP II	:	Rural Roads Sector II Investment Program
SRRDA	:	State Rural Road Development Agency
ST	:	Scheduled Tribes
TA	:	Technical Assistance
TOR	:	Terms of Reference
TSC	:	Technical Support Consultants
UG	:	Upgradation
WHH	:	Women Headed Households

GLOSSARY

Affected Persons (APs): Affected persons are people (households) who stand to lose, as a consequence of a project, all or part of their physical and non-physical assets, irrespective of legal or ownership titles.

Encroacher: A person, who has trespassed government land, adjacent to his/her own land or asset, to which he/she is not entitled, by deriving his/her livelihood there. Such act is called "Encroachment."

Pallisabha Resolution: A resolution drawn up by the collective decision of villagers. The resolution drawn up for the purpose of the project refers to identification of the affected persons, extent of their losses by unique identification and signed consent of the affected persons to donate voluntarily the identified assets for the project purpose. The resolution is also signed by the village sarpanch, village president and other villagers including senior citizens of the village.

Panchayat: An institution (by whatever name called) of self-government for rural areas constituted at the village, intermediate, and district levels under article 243B of the Constitution of India. The three levels of panchayat comprise gram panchayat at village level, intermediate panchayat at block level, and zilla panchayat at district level.

Village level mechanism for grievance redress: village committees were in place comprising the village sarpanch, village president and senior citizens for the purpose of redressal of grievances

Sarpanch: Elected head of the Gram Panchayat

Zilla : A district which is the first administrative division at the state level.

NOTE

In this report, \$ refers to US Dollars

I. CONTEXT AND PURPOSE OF THE REPORT

A. Introduction

1. Pradhan Mantri Gram Sadak Yojana (PMGSY) aims to provide all-weather road connectivity to currently unserved habitations in India's rural areas, where 70% of the population live. Government of India (GOI) launched "The Pradhan Mantri Gram Sadak Yojna (PMGSY) in year 2000. The objective of PMGSY is to provide all-weather road connectivity to all rural habitations with a population of more than 500 persons in plains and and 250 persons in hill states. This program is being implemented through National Rural Road Development Agency (NRRDA) under ministry of rural development (MORD) at central level and through state rural road development authority/agencies (SRRDA) at state level.

2. The Second Rural Connectivity Investment Program (RCIP-2) Is continuation of Rural Connectivity Investment Program (RCIP) and is a Multi-Tranche Financing Facility (MFF) that is being implemented in the states of Assam, Chhattisgarh, Orissa, Madhya Pradesh and West Bengal. Investments In rural roads will improve connectivity, cut transport costs, and provide enabling infrastructure to areas currently with poor access to markets and urban towns, and thus contribute to growth and equity in the country's largest sector.

3. The Government is now planning to submit to ADB the second Periodic Finance Request (PFR) that includes the proposal for about 2859.09 km of rural roads in the state of Madhya Pradesh. The preparatory works for Tranche 2 sub projects have been completed for the state. As per the requirements of ADB, it is mandatory that the subprojects under the previous Tranche of projects comply with ADB's social safeguards. This report is prepared to serve the purpose for compliance with ADB's safeguards on involuntary resettlement and indigenous peoples during implementation of Second RCIP Tranche 1 roads in the project states of Assam, Chhattisgarh, Madhya Pradesh, Odisha and West Bengal.

B. Social Safeguards in the Program

4. The project adopts the following strategy to address the social safeguards and other social risks in the Program:

1. Participatory Project Planning and Voluntary Land Donation and Resettlement

5. The Community Participation Framework (CPF) establishes guidelines supplemental to the PMGSY guidelines for community consultation that comply with ADB social safeguards requirements. The CPF details the procedural steps and requirements to be followed for all subprojects to be included under the Second Rural Connectivity Investment Program (RCIP) to be financed under ADB Loans. **Appendix-1** to this chapter presents the Outline Community Participation Framework and the mitigation measures matrix adopted for the project by SRRDAs in project states.

6. The PMGSY employs a bottom-up approach for project planning and preparation. The Core Network, from which the roads to be improved are selected, is prepared at the block level in consultation with the concerned *Panchayats* and consolidated at the district level. The list of roads to be taken up in each yearly allocation is first prepared by the PIU, approved by the *Zilla Parishad*, and then forwarded to the state government for further approval.

7. In the preparation stage, the alignment of PMGSY roads is finalized through community consultation. The PMGSY guidelines require the PIU to conduct Transect Walk along project roads before finalizing the alignment, to ensure active community participation, select the alignment that best suits the community's needs and minimizes adverse social and environmental impacts of the proposed improvement.

8. Under the PMGSY, the existing revenue tracks are taken up for construction to the standards in the Rural Roads Manual and other relevant specifications. The available width of the existing tracks is not always sufficient to accommodate the proposed improvements, as a result requiring additional land. Voluntary land contribution by affected households is provided as an option to meet the requirement for improvements and/or upgrading of rural roads (e.g. shoulder adjustment, drainage and road safety measures). The extent of impacts on land, structures and livelihood sources is expected to be minimal, as the road improvements are generally carried out along the existing tracks/roads. In the project states Madhya Pradesh and Chhattisgarh where the project roads were under PMGSY 2 programme, the project Second RCIP included improvement of rural roads; generally a combination of existing BT roads, CC roads in habitation areas and earthen roads to a carriage way standard of 3.75m to 7.5m while in other states the carriage way standards remained at 3.75 m.

9. Additional land required for road improvement including requirements to address road safety, bridge approaches and short-term construction-related requirement under the PMGSY has been provided through voluntary donation by the land/asset owners. The CPF establishes the guidelines to ensure that donation is voluntary and the negative social and economic impacts due to the project will be avoided or minimized. The community consultation processes for subproject preparation result in a set of documents that collectively serve as a plan for mitigating likely negative impacts of each subproject. This process follows the ADB social safeguard requirements mentioned below for projects involving voluntary donations:

- (i) full consultation with landowners and any non-titled people on site selection;
- (ii) voluntary donations do not severely affect the living standards of APs and are directly linked to benefits, with community sanctioned measures to replace any losses that are agreed through verbal and written record by affected people; and
- (iii) Voluntary donations are confirmed through verbal and written record and verified and adopted through constitutional process.
- (iv) Adequate grievance redress mechanisms are in place.

10. In the CPF, Vulnerable households are defined as (i) those headed by women, (ii) Scheduled Tribes (ST), (iii) Scheduled Castes (SC), (iv) Disabled persons, (v) Households Below Poverty Line (BPL) as per the state poverty line for rural areas, (vi) Households who are or will become BPL as result of loss to assets and / or livelihoods and (vii) Households losing structures. Vulnerable APs are identified through census survey and support and additional assistance provided to them in the form of linking them with existing government and state rural development programmes.

11. The Community Participation Framework (CPF) adopted for the project provides specific formats and timeframes for undertaking monitoring of implementation of social safeguards. The Project Implementation Consultant (PIC) appointed by the SRRDA conducts the monitoring activities on all the subproject roads at the start of the project implementation for each Tranche of roads approved under Multi Tranche Financing (MFF). This process is repeated every month for the roads where any identified issue still remains pending to be addressed during the initial monitoring.

2. Gender Action Plan and other social issues

12. In addition to the implementation of the CPF and social safeguards and in line with ADB's gender inclusiveness policy, a generic Gender Action Plan has been designed for the project under Second RCIP. The GAP is provided in **Appendix -2** to this Chapter.

13. The social assessment conducted during the design phase of the Program indicated that the risk of the spread of sexually transmitted diseases (STI) and HIV/AIDS as a result of the project is relatively low. Moreover, it showed that damaging labor practices to be a risk (discriminatory practices, child labor, and forced labor). Measures have thus been integrated into the project design to mitigate these risks. Contractors have a responsibility to conduct STI and HIV/AIDS awareness sessions to their laborers and the PIU/PIC to facilitate similar sessions to the communities along the roads. Moreover, the bidding documents issued to the contractors have special clauses to minimize negative social impacts (e.g. equal pay for equal work to male and female workers, non-employment of child labour, setting up of construction camps away from the habitation areas and health related issues like sanitation, HIV/AIDS etc.).

3. Social Safeguard Covenants

14. The specific loan covenants for the project related to social safeguard issues include the following:

Particulars	Agency Responsible
Land Availability	
<ul style="list-style-type: none"> Each state shall ensure that the respective IA implements the provisions of the CPF for all Subprojects as agreed upon with ADB and in conformity with all relevant applicable laws and regulations of the Borrower/respective State. 	STATES
<ul style="list-style-type: none"> Each State shall ensure that the respective IA shall, subject to compliance with the relevant provisions of the CPF and EAF/ECOP and in accordance with all relevant applicable laws and regulations of the Borrower/respective State, acquire or make available the land and rights to land free from any encumbrances, clear the utilities, trees and any other obstruction from such land, required for commencement of construction activities in accordance with the schedule agreed under the related civil works contract. 	STATES
<ul style="list-style-type: none"> Each State shall ensure that the respective IA shall (i) carry out the community consultation process for all Subprojects in accordance with the PMGSY Guidelines as supplemented by the CPF, (ii) disseminate the information on process of land transfer/availability as the case may be support/assistance provisions and grievance procedures to the Project affected communities in a timely manner so that all related issues are resolved before awarding civil work contracts, and (iii) ensure that in case of voluntary land donations/transfer there are undertaken in a transparent manner under proper documentation and avoid any kind of coercion or forced donations/transfer; and in this regard shall not exercise any eminent domain or related mechanisms that may be deemed to be compulsory acquisition of land. 	STATES

Particulars	Agency Responsible
<ul style="list-style-type: none"> Each State shall ensure that the details of land made available in accordance with the procedures prescribed in the PMGSY Guidelines, are reflected in the local land records in a timely manner, to avoid any disputes. 	STATES
<p>Social Impacts</p> <ul style="list-style-type: none"> Each State shall ensure through specific provisions in the bid documents and the civil works contracts financed under the Project that the contractors shall; (i) disseminate information at work sites on the risk of sexually transmitted diseases and HIV/AIDS as part of the health and safety measures for those employed during construction; (ii) follow legally mandated provisions on health, welfare, sanitation, and appropriate working conditions, including accommodation, where appropriate, for construction workers at camp sites; (iii) comply with all applicable labour laws, not employ child labour for construction and maintenance activities, and provide appropriate facilities for children of labour in construction camp sites; (iv) provide equal opportunity for women for road construction activities, and not differentiate wages for men and women for work of equal value. Each State shall ensure that compliance with provisions in clause (a) of this paragraph is monitored by the respective IA. The civil works contracts shall also provide for their termination by the employer for breach of any provision. Each State shall ensure acceptance of the Project through effective community participation in selecting and implementing Subprojects in accordance with the PMGSY Guidelines as supplemented by the CPF. In case of any significant impacts on Scheduled Tribes under any additional Subproject these shall follow the requirements as set out in the CPF as agreed by ADB. As also laid down in the CPF, for any impact on land involving traditional and tenure rights of the Scheduled Tribes, the legal provisions laid down by the Borrower and the related State pertaining to land transfer shall be followed. 	<p>MORD/ STATES</p> <p>STATES</p> <p>STATES</p> <p>MORD</p>

APPENDIX 1: OUTLINE COMMUNITY PARTICIPATION FRAMEWORK

1. The proposed multitranchise financing facility (MFF) will finance the construction and upgrading of rural roads eligible for Pradhan Mantri Gram Sadak Yojana (PMGSY), the Prime Minister's Rural Roads Program, in the selected states (initially Assam, Odisha, and West Bengal, and any other states meeting the requirements in the Framework Financing Agreement). The criteria for subproject selection, social assessment, and review procedures are provided here.

A. Social Criteria for Subproject Selection

2. Criteria include the following:

- (i) adequate land width availability as specified in the Rural Roads Manual, Specification for Rural Roads 2004 and PMGSY Operations Manual 2005;
- (ii) the proposed alignment involves limited land loss, and the remaining land and or/structures remain viable for continued use;
- (iii) if impacts are unavoidable, the impacts will be minimized through one or more of the following mechanisms: (a) design modifications by reducing land width, shifting the alignment, modifying cross-sections, etc., to the extent required by safety considerations; (b) voluntary donation of land/assets by the land/asset owner by means of memorandum of understanding (MOU) or other documentation acceptable to ADB; and (c) provision of support and assistance to vulnerable affected people¹ through gram panchayat² and rural development schemes and agreed mitigation matrix; and
- (iv) roads with no scope for addressing social impacts through any of the mechanisms above will not be taken up under the MFF for that particular year. Such roads will be taken up after the social issues are resolved by the community.

B. Social Assessment Requirement

3. After subproject selection (para. 2), the following processes will be undertaken and documented in specified formats:

4. **Planning.** This involves the following activities:

- (i) Disseminate project information to (a) sensitize the communities on project related issues, and (b) articulate community expectations of the proposed project and the mechanism for beneficiaries' land contribution.
- (ii) Finalize alignment through community planning: (a) transect walk conducted by the PIU, panchayat, and local community; (b) joint on-site inventory, crosschecking, verification of alignment, and transfer of information on revenue maps; (c) Identification and redress of grievances; (d) initiation of the process of land transfer; (e) Identification of vulnerable³ people affected by the project

¹Affected people are defined as people (households) who stand to lose, as a consequence of the project, all or part of their physical and nonphysical assets irrespective of legal or ownership titles.

² A panchayat is a body of directly elected people responsible for development of activities in an area. The three levels of panchayat comprise gram panchayat at village level, intermediate panchayat at block level, and zilla panchayat at district level.

³Vulnerable people affected by the project are defined as (i) households living below the poverty line as per the state poverty line for rural areas; (ii) households who will lose income and move below the poverty line as a result of loss to assets and/or livelihoods; (iii) households losing structure, households headed by women, scheduled caste, scheduled tribe, or the disabled.

- identified; (f) Community acceptance of the project and road alignment; (g) voluntary land donations made through MOU or other documentation acceptable to ADB; and (h) Adjustment of community/panchayat land to mitigate severe livelihood disturbances arising from land donations.
- (iii) The PIU/gram panchayat consults with people affected by the project after 15 days of the transect walk to (a) disseminate information and data on how the concerns of affected people (AP) are incorporated in design modifications; (b) describe procedures to be adopted for land transfer; (c) outline entitlement provisions for vulnerable affected people for targeted support/assistance through linkages with rural development schemes, civil support mechanisms, or cash assistance; (d) describe disbursal procedures to vulnerable AP; and (e) outline inputs required from the community: construction labor, temporary use of land for diversion.
 - (iv) Develop a profile of AP: the PIU and gram panchayat will (a) survey AP to estimate asset ownership, sources of livelihood, and lost assets and livelihood; and (b) identify vulnerable AP to provide targeted support/assistance based on their vulnerability (living below the poverty line; households moving below the poverty line; scheduled tribes; scheduled castes; households headed by women; handicapped people suffering losses of their land, shelter, or source of livelihood).
 - (v) Disseminate the process of land transfer and finalize entitlement provisions.
 - (vi) Form village and district land management committees⁴ and grievance redress committees to resolve grievances, if any.
 - (vii) Submit MOU or other documentation acceptable ADB to panchayati raj institution (PRI) and documentation of structure losses that are to be replaced by the PIU, state, and/or panchayat.

5. **Mitigation Measures Matrix.** Voluntary land donation system is an option provided for the project in recognition of the effectiveness of the system for rural roads development in India. The project will also ensure that (i) there is full consultation with landowners and any nontitled people on site selection (ii) voluntary donations do not severely affect the living standards of affected people and are directly linked to benefits for the affected people, with community sanctioned measures to replace any losses that are agreed through verbal and written record by affected people; (iii) any voluntary donation will be confirmed through verbal and written record, and verified by an independent third party; and (iv) adequate grievance redress mechanisms are in place.

6. To mitigate the possible adverse impacts of the subprojects, the community participation framework (CPF) lists various types of impact categories and mitigation measures which would apply to sample as well as additional subprojects, based on the specific project impacts.

Mitigation Measures Matrix

Impact Category	Mitigation Measures	Responsibility
Loss of Agricultural Land	Land donation by means of memorandum of understanding (MOU) or other documentation acceptable to ADB 2. Advance notice to harvest standing crops 3. For vulnerable affected people (AP), assistance/support by means of (i) alternate land sites provided by gram panchayat, or (ii)	Gram panchayat, Project implementation unit (PIU), and state government

⁴A land management committee will be formed by the gram panchayats consisting of all gram panchayat members.

Impact Category	Mitigation Measures	Responsibility
	<p>cash assistance as per replacement cost⁵ by gram panchayat to meet loss of land; and inclusion as beneficiaries in the existing poverty reduction/livelihood restoration programs</p> <p>4. For land involving traditional and tenurial rights, the legal provisions applicable of the central and state governments pertaining to transfer of land will be followed; existing customary rights of tribal communities on various categories of land will be taken into account during the process of land transfer</p>	
Loss of Structure	<p>5. Provision of an alternate plot of land and structure of equivalent quality and value to be provided as per AP's choice, or cash assistance by gram panchayat to meet the loss of land and structure allowing AP to purchase land and rebuild structure of an equivalent standard</p> <p>6. For loss of boundary walls, fences, and other structures, cash assistance at replacement cost by gram panchayat to meet the loss of such structures, or provision of materials and/or labor by gram panchayat to allow AP to replace/rebuild the same</p> <p>7. For vulnerable AP, inclusion as beneficiaries in the rural development programs/housing schemes</p> <p>8. For tenants, assistance to find alternative rental arrangements by gram panchayat, or cash assistance equivalent to advance payments made to the owner</p> <p>9. For squatters, provision of alternative relocation site, or cash assistance as per replacement cost, or provision of building material and/or labor by gram panchayat, or inclusion as beneficiaries in the rural development programs/housing schemes</p> <p>10. For land and structure involving traditional and tenurial rights, the legal provisions applicable of the central and state governments pertaining to transfer of land will be followed; existing customary rights of the tribal communities on various categories of land shall be taken into account during the process of land transfer</p>	Gram panchayat, PIU, and state government
Loss of Livelihood	<p>11. For vulnerable AP, inclusion as beneficiaries in the existing poverty reduction/livelihood restoration programs; in case of non-inclusion in such programs, cash assistance to meet the loss of income during transitional phase and for income restoration</p> <p>12. Assistance for asset creation by community and gram panchayat</p>	Gram panchayat and PIU
Loss of Assets Such as Trees, Well, and Ponds	<p>13. Cash assistance at replacement cost (wells, ponds, lost incomes from fruit producing/productive trees) by gram panchayat to meet the loss of such assets, or where applicable provision of materials and or labor by gram panchayat to allow AP to replace or rebuild the same</p> <p>14. For vulnerable affected people, assistance for the loss of these assets through inclusion as beneficiaries in the existing poverty reduction/livelihood restoration programs; in case of non-inclusion in such programs, cash assistance by gram panchayat to meet the loss of assets and income</p>	Gram panchayat, PIU, and state government

⁵ Replacement cost means the "cost" to replace the lost asset at current market value or its nearest equivalent, plus any transaction costs such as administrative charges, taxes, and registration and titling costs allowing the individual/community to replace what is lost and their economic and social circumstances to be at least restored to the pre-project level.

Impact Category	Mitigation Measures	Responsibility
Loss of Community-Owned Assets (such as temple, wells, ponds, grazing land, etc.)	15. Relocation or construction of assets by gram panchayat with technical inputs from the PIU 16. Consultations with the concerned section of the community in the case of grazing land, etc.	Gram panchayat, and PIU
Temporary Impacts during Construction	17. Civil works contract conditions to include provisions to obligate the contractor to implement appropriate mitigation measures for the temporary impacts including disruption of normal traffic, increased noise levels, dust generation, and damage to adjacent parcel of land due to movement of heavy machinery.	PIU
Other Impacts not Identified	18. Unforeseen impacts will be documented and mitigated based on the principles in this framework.	

7. Implementation. The following activities will be undertaken:

- (i) For the implementation of civil works, the states will acquire or make available on a timely basis the land and rights in land, free from any encumbrances.
- (ii) The PIU will facilitate enrollment of vulnerable AP in rural development schemes with prior disclosure of information of the process and schedule.
- (iii) Entitlements will be disbursed through civil support mechanism by gram panchayat or any other agency that holds jurisdiction over such disbursement.
- (iv) For lands involving traditional tenurial rights, the PIU and gram panchayat, through consultations, will assess the impacts of such land donations and the extent of dependence of the local community on such land.
- (v) For loss of other assets (wells, ponds, trees, etc.) cash assistance at replacement cost by gram panchayats or relocation/construction by gram panchayat/community with technical inputs from the PIU.
- (vi) Grievances will be resolved through the land management committee and grievance redress committees.
- (vii) The PIU takes physical possession of land.
- (viii) Temporary use of land during construction will be through written approval of the landowner or the panchayati raj institution. Contractor will bear the costs of any impact on structure or land due to movement of machinery and other construction-related reasons. Construction camp will to be sited in consultation with local community and panchayati raj institution.

APPENDIX 2: SECOND RCIP GENDER ACTION PLAN

Activities	Indicators and Targets ^a	Responsibility	Time Frame
Output 1. Selected priority rural roads prioritized by PMGSY for 2012 sanction are constructed/ upgraded into all-weather standard			
1.1. Hire women workers for skilled and unskilled work in road construction and maintenance. Ensure equal wages for equal work done to both male and female skilled and unskilled labor in project works.	At least 33% of workers hired in road construction works through MGNREGA are women, who receive the same wages as their male counterparts.	PIU/ Contractor	Y1 – onwards
1.2. Ensure that contract documents prohibit the hiring of child labor.	Explicit provision prohibiting child labor is evident in project contracts.	PIU/ contractor	Y1 - onwards
1.3. Ensure that impact on vulnerable female-headed households due to road construction is mitigated.	All affected FHH directly benefit from appropriate mitigation measures, and/or linked to poverty alleviation/livelihood restoration programs	PIU/PIC. TSC will monitor	-Y1 - onwards
Output 2. Quality of design of RCIP roads is improved			
2.1. Involve women from the local communities in project areas in the identification of road alignment and decision making during the transect walk.	a. 100% of all affected communities along Project 1 roads (at least 30% women) are consulted in the design process b. Women are represented in Grievance Reddressal Committees (GRCs)	PIU (AE/JE) PIC, ZP, GP, PRI	Y1
Output 3. Maintenance of RCIP roads is improved and sustainable			
3.1 Engage women as road maintenance workers or supervisors for road maintenance. (This activity will be undertaken under MNREGA especially in the states of Chhattisgarh and West Bengal.)	At least 33% of road maintenance workers/ hired for strengthening of earthen shoulders, tree plantation along the shoulders for a forestation and prevention of erosion of shoulders are women.	PIU/PIC	Y2 – Y4
3.2 Ensure the engagement of women in each of the RRNMUs to be established in each state	At least 25% of the staff in each RRNMU in each of the 5 states is women.	PIU	Y1 - onwards
Output 4. Road safety measures are incorporated into the lifecycle of roads in RCIP states			
4.1 Consider the specific needs of vulnerable users (elderly, women, children, and disabled) in the design and modification of roads, wherever applicable.	Road safety design features installed in rural roads, e.g., speed bumps, rumble strips, zebra crossings, cautionary/ informative signages, guard stones, shoulders used as safe sidewalks, etc.	PIC,TSC, PIU	Y1
4.2 Ensure women's participation in community orientation and road safety awareness campaigns	At least 30% female participation in road safety orientation and awareness training programs.	PIU,PIC.,TSC	Y1 – Y3
Output 5. Qualification and skills of PMGSY engineers, technicians, site supervisors, concerned staff of PRI, design consultants and contractors in RCIP states is improved and maintained			

Activities	Indicators and Targets ^a	Responsibility	Time Frame
5.1 Ensure the engagement and training of women in all aspects of rural road network management and development in the PIUs, and Panchayat Raj Institutions through RCTRC's.	At least 30% of PIU staff and PRI embers trained in all aspects of Rural Road Network Management Unit (RRNMU) are women	SRRDA/PIU	Y1
5.2 Develop and utilize social- and gender-sensitive training modules on the design, construction, and maintenance of rural roads, for staff, including design consultants, contractors and Panchayat Raj Institutions.	At least two social- and gender-sensitive training modules (one for consultants, contractors and project staff of PIUs and one for the PRIs) developed and utilized	RCTRC's with support from PIU	Y1-Y4
5.3 Train design consultants, contractors and PRIs on the social- and gender-sensitive design, construction and maintenance of rural roads	All project design consultants and contractors, and at least 10 PRIs capacitated on social- and gender-sensitive design, construction, and maintenance of rural roads	RCTRC's with support from PIU	Y1
Output 6. Effective project management provided			
6.1 Collect sex-disaggregated data during the baseline survey and conduct a gender analysis during preparatory surveys, feasibility studies, assessments and reports.	Reports on the baseline survey, feasibility studies especially poverty and social assessment study and assessments include clear gender analyses with sex-disaggregated data.	PPTA consultants, PIU (AE/JE) PIC, ZP, GP, PRI	Y1 - onwards
6.2 Include social and gender indicators in the PMIS for the implementation of RCIP and systematically monitor its progress with the regular collection of sex-disaggregated data.	Select gender specific indicators and target monitored and regularly updated with sex-disaggregated data	PIU, PIC, TSC	Y1 – Y4.
6.3 Appoint a social and gender officer at the PIU or PIC level	Effective social and gender officer engaged at the PIC level.	PIU	Y1

AE = Assistant Engineer, FHH = female-headed households, GP = Gram Panchayat, IAY = Indira Awaas Yojana, JE = Junior Engineer, PIC = Project Implementation Consultants, PIU = project implementation unit, PRI = Panchayat Raj Institution, RCIP = Rural Roads Connectivity Improvement Project, RCTRC = Rural Connectivity Training and Research Centre, RRNMU = Rural Road Network Management Unit, SRRDA = State Rural Roads Development Authority, TSC = Technical Support Consultants, ZP = Zilla Parishad

^a Quantitative targets will be refined at project onset in consultation with the EAs and IAs based on the results of the baseline survey and impact monitoring.

II. DUE DILIGENCE OF SOCIAL SAFEGUARDS COMPLIANCE – TRANCHE-I, SECOND RURAL CONNECTIVITY INVESTMENT PROGRAM: ASSAM

A. Status of Second RCIP Tranche I in Assam

15. The state under Second RCIP Tranche1 (Loan 3611-IND) had 303 roads totaling 977.177 km (Refer Annexure 1 and 2 for the details). A summary of district wise subproject roads in Assam under Second RCIP Tranche1 is as under:

Particulars	Tranche1
No. of districts where subprojects are located	15
Total no.of roads in the Tranche	303
Total no.of packages in the Tranche	303
Total length of roads (Km)	977.177

16. Till April 2018, 64 out of the 303 packages have been awarded in the state. Most of the civil works activities in the packages already awarded are at an early stage and contractors are in the process of carrying out the initial activities.

B. Findings

1. Implementation of the Community Participation Framework (CPF)

17. Social safeguards implementation in Assam is conducted by the PIUs at the district level coordinated through the SRRDA social officer stationed at the state head quarter. The SRRDA is assisted by the PIC social safeguards experts and a team of PIC social safeguards assistants. Their work is guided and monitored by the TSC team.

18. During preparation of the subprojects, all the major activities have been carried out to comply with CPF requirements.

19. The PIUs assisted by the DPR consultants and the PIC, conducted transect walks in all the subproject roads and held meetings attended by the panchayat officials and land owners/ non-titled persons on site selection. Various stakeholders from the government (EE/AE of PIUs, Revenue officials), Panchayati Raj Institutions (PRIs), and the local community participated in the transect walk. The rural roads proposed under this project follow existing alignments and no new alignment was proposed for any subproject road. Certificates of land availability from revenue officials were obtained by the PIUs before start of the transect walk. The PIUs also obtained certificates from the gram panchayat signed by the sarpanch confirming conduct of the transect walk, land availability and identification of affected persons through the process.

20. The consultation with the community also focused on avoiding/ minimizing displacement due to the sub-project road. Inside habitation areas and in village sections the road width has been restricted (in some cases to less than 6 m) to avoid damage to residential or commercial structures. At the habitation areas, it has been proposed to construct CC roads for their longer durability and lesser disruption to traffic for maintenance.

21. Subsequent to the transect walks, the PIUs with help of Gram Panchayats conducted formal consultation with all those persons likely to get affected as a result of the road improvement. "Gramsabha" meetings were held at Gram Panchayat level attended by the sarpanch, other elected members, senior citizens of the village and the village community

including all the APs and the PIU officials. During the conduct of the transect walks, all APs were identified, fully consulted on the voluntary donation process. Vulnerable APs were also identified during the surveys, as the CPF sets out special assistance measures to them.

22. In the CPF, Vulnerable households are defined as (i) those headed by women, (ii) Scheduled Tribes (ST), (iii) Scheduled Castes (SC), and (iv) Disabled persons, (v) Households Below Poverty Line (BPL) as per the state poverty line for rural areas, (vi) Households who are or will become BPL as result of loss to assets and / or livelihoods and (vii) Households losing structures. Vulnerable APs were identified through census survey and support/ assistance to the APs were finalized in consultation with the community through the village panchayat in case of all the subproject roads.

23. The PIU/PIC have identified a total of 632 Affected Persons (APs), among whom 404 qualify as Vulnerable Affected Persons for Tranche 1. **Appendix 2** shows detailed information on these findings.

24. All the VAPs identified have been linked up to benefits from rural development schemes.

25. Overall, transect walks have been conducted for all project roads. A total of 2,398 people participated to the transect walks conducted for Tranche 1. Out of the participants in the transect walk 30.65% were women.

APs and VAPs identified under Tranche 1

	APs	VAPs		Transect walk participants
		Identified	Linked to benefits from RD schemes	
Tranche 1	632	404	78	2398

2. Implementation of the Gender Action Plan (GAP) and other social safeguards

26. Implementation of the Gender Action Plan: The PIC has been collecting secondary and primary information related to the indicators given in the GAP. A separate report on the GAP implementation in the rural road projects under ADB financing in the state is prepared every quarterly by the PIC and submitted to NRRDA for disclosure on ADB website.

27. The process to award contracts under Second RCIP tranche 1 is ongoing and till April 2018, 64 out of the 303 packages have been awarded in the state. The contractors have just started the initial construction activities. PIC will be carrying out the GAP implementation monitoring and report on the achievement for the various indicators on a quarterly basis.

3. Grievance Redressal Mechanism

28. In case of all the subproject roads, village grievance redress committees were in place comprising the sarpanch, other elected representative of the gram panchayat and prominent citizens of the village for the purpose of redressal of grievances. As the site selection process involved participation and full consultation with the community, there has been no formal complaint received by any of these village committees. PIU staff is in regular contact with the village community and community leaders to facilitate resolving any grievance that may arise.

C. Social Safeguards Due Diligence of Tranche 1 undertaken by the TSC

29. NRRDA at the central level has recruited the Technical Support Consultants (TSC). The TSC is at the mobilization stage for providing their services for Second RCIP. TSC will carry out review of social safeguard implementation in Second RCIP through field checks and submit their reports to NRRDA for disclosure in ADB website.

D. Institutional and Monitoring arrangements

30. The PIC is in place to assist the PIUs in addressing the safeguard issues in the project. At the project preparation stage ADB consultants and TSC imparted training on safeguard documentation as per CPF and ECOP adopted for the project and subsequently the TSC experts continued the training process to the PIC. Meetings were held with the concerned PIUs for their cooperation in involving the revenue and other line department officials in the transect walk and obtaining official documents needed for meeting CPF requirements. This helped in better communication with the stakeholders including the villagers as updated revenue records are generally not readily available on demand. The TSC also had a number of meetings with PIU officials in improving the social safeguard documentation.

31. The PIUs at district level are assisted by the **Project Implementation Consultants (PIC)** recruited at SRRDA level for monitoring the implementation of the Community Participation Plan (CPP) and the Gender Action Plan. The PIC has Social Community Participation Experts and field staff for subproject level monitoring.

32. **Technical Support Consultants (TSC)** appointed at the national level by NRRDA undertakes sample review of the monitoring carried out by the PICs periodically as per the work progress under each Tranche of roads.

E. Conclusion

33. The review of CPF documentation revealed that:

- i) People agreed to voluntarily contribute their land for the road construction, and this was confirmed through verbal and written records and verified by Gram Panchayats; Revenue Officials
- ii) There was full consultation with landowners and non-titled people;
- iii) Grievance redress mechanisms have been fulfilled by the GPs.
- iv) As per social safeguard policy of ADB compliance has been made to provide assistance.

34. It could be concluded that the social safeguard measures covered by the CPF and the institutional arrangement of SRRDA with support from PIC are able to safeguard the project.

APPENDIX 1: RCIP – DISTRICTWISE DISTRIBUTION OF ROADS – ASSAM**Tranche 1**

III. DUE DILIGENCE OF SOCIAL SAFEGUARDS COMPLIANCE – TRANCHE-I, SECOND RURAL CONNECTIVITY INVESTMENT PROGRAM: CHHATTIGARH

A. Status of Second RCIP Tranche I in Chhattisgarh

35. The state under Second RCIP Tranche1 (Loan 3611-IND) had 80 roads totaling 1001.08 km (Refer Annexure 1 and 2 for the details). A summary of district wise subproject roads in Chhattisgarh under Second RCIP Tranche1 is as under:

Particulars	Tranche1
No. of districts where subprojects are located	10
Total no.of roads in the Tranche	80
Total no.of packages in the Tranche	42
Total length of roads (Km)	1001.08

36. Most of the civil works activities for tranche 1 are at an early stage and contractors are in the process of carrying out the initial activities. All the 42 packages in the tranche have been awarded and the contractors were mobilized in March 2018.

B. Findings

1. Implementation of the Community Participation Framework (CPF)

37. Social safeguards implementation in Chhattisgarh is conducted by the PIUs at the district level coordinated through the SRRDA social officer stationed at the state head quarter. The SRRDA is assisted by the PIC social safeguards experts and a team of PIC social safeguards assistants. Their work is guided and monitored by the TSC team.

38. During preparation of the subprojects, all the major activities have been carried out to comply with CPF requirements.

39. The PIUs assisted by the DPR consultants and the PIC, conducted transect walks in all the subproject roads and held meetings attended by the panchayat officials and land owners/ non-titled persons on site selection. Various stakeholders from the government (AGM/AE of PIUs, Revenue officials), Panchayati Raj Institutions (PRIs), and the local community participated in the transect walk. The rural roads proposed under this project follow existing alignments and no new alignment was proposed for any subproject road. Certificates of land availability from revenue officials were obtained by the PIUs before start of the transect walk. The PIUs also obtained certificates from the gram panchayat signed by the sarpanch and the secretary confirming conduct of the transect walk, land availability and identification of affected persons through the process.

40. The consultation with the community also focused on avoiding/ minimizing displacement due to the sub-project road. Inside habitation areas and in village sections the road width has been restricted (in some cases to less than 6 m) to avoid damage to residential or commercial structure. At the habitation areas, it has been proposed to construct CC roads for their longer durability and lesser disruption to traffic for maintenance.

41. Subsequent to the transect walks, the PIUs with help of Gram Panchayats conducted formal consultation with all those persons likely to get affected as a result of the road improvement. "Gramsabha" meetings were held at Gram Panchayat level attended by the

sarpanch, secretary, senior citizens of the village and the village community including all the APs and the PIU officials. During the conduct of the transect walks, all APs were identified, fully consulted on the voluntary donation process. Vulnerable APs were also identified during the surveys, as the CPF sets out special assistance measures to them.

42. In the CPF, Vulnerable households are defined as (i) those headed by women, (ii) Scheduled Tribes (ST), (iii) Scheduled Castes (SC), and (iv) Disabled persons, (v) Households Below Poverty Line (BPL) as per the state poverty line for rural areas, (vi) Households who are or will become BPL as result of loss to assets and / or livelihoods and (vii) Households losing structures. Vulnerable APs were identified through census survey and support/ assistance to the APs were finalized in consultation with the community through the village panchayat in case of all the subproject roads.

43. The PIU/PIC have identified a total of 133 Affected Persons (APs), among whom 129 qualify as Vulnerable Affected Persons for Tranche 1. **Appendix 2** shows detailed information on these findings.

44. All the VAPs identified have been linked up to benefits from rural development schemes.

45. Overall, transect walks have been conducted for all project roads. A total of 4,351 people participated to the transect walks conducted for Tranche 1. Out of the participants in the transect walk 30% were women.

APs and VAPs identified under Tranche 1

	APs	VAPs		Transect walk participants
		Identified	Linked to benefits from RD schemes	
Tranche 1	133	129	129	4351

2. Implementation of the Gender Action Plan (GAP) and other social safeguards

46. Implementation of the Gender Action Plan: The PIC has been collecting secondary and primary information related to the indicators given in the GAP. A separate report on the GAP implementation in the rural road projects under ADB financing in the state is prepared every quarterly by the PIC and submitted to NRRDA for disclosure on ADB website.

47. Till March 2018, all the 42 contract packages in the tranche have been awarded and the contractors have just started the initial construction activities. PIC will be carrying out the GAP implementation monitoring and report on the achievement for the various indicators on a quarterly basis.

3. Grievance Redressal Mechanism

48. In case of all the subproject roads, village grievance redress committees were in place comprising the sarpanch, panchayat secretary and other prominent citizens of the village for the purpose of redressal of grievances. As the site selection process involved participation and full consultation with the community, no formal complaint was received by any of these village committees. PIU staff is in regular contact with the village community and community leaders to facilitate resolving any grievance that may arise.

C. Social Safeguards Due Diligence of Tranche 1 undertaken by the TSC

49. NRRDA at the central level has recruited the Technical Support Consultants (TSC). The TSC is at the mobilization stage for providing their services for Second RCIP. TSC will carry out review of social safeguard implementation in Second RCIP through field checks and submit their reports to NRRDA for disclosure in ADB website.

D. Institutional and Monitoring arrangements

50. The PIC is in place to assist the PIUs in addressing the safeguard issues in the project. At the project preparation stage ADB consultants and TSC imparted training on safeguard documentation as per CPF and ECOP adopted for the project and subsequently the TSC experts continued the training process to the PIC. Meetings were held with the concerned PIUs for their cooperation in involving the revenue and other line department officials in the transect walk and obtaining official documents needed for meeting CPF requirements. This helped in better communication with the stakeholders including the villagers as updated revenue records are generally not readily available on demand. The TSC also had a number of meetings with PIU officials in improving the social safeguard documentation.

51. The PIUs at district level are assisted by the **Project Implementation Consultants (PIC)** recruited at SRRDA level for monitoring the implementation of the Community Participation Plan (CPP) and the Gender Action Plan. The PIC has Social Community Participation Experts and field staff for subproject level monitoring.

52. **Technical Support Consultants (TSC)** appointed at the national level by NRRDA undertakes sample review of the monitoring carried out by the PICs periodically as per the work progress under each Tranche of roads

D. Conclusion

53. The review of CPF documentation revealed that:

- i) People agreed to voluntarily contribute their land for the road construction, and this was confirmed through verbal and written records and verified by Gram Panchayats; Revenue Officials
- ii) There was full consultation with landowners and non-titled people;
- iii) Grievance redress mechanisms have been fulfilled by the GPs.
- iv) As per social safeguard policy of ADB compliance has been made to provide assistance.

54. It could be concluded that the social safeguard measures covered by the CPF and the institutional arrangement of SRRDA with support from PIC are able to safeguard the project.

APPENDIX 1: RCIP – DISTRICTWISE DISTRIBUTION OF ROADS – CHHATTISGARH**Tranche 1**

IV. DUE DILIGENCE OF SOCIAL SAFEGUARDS COMPLIANCE – TRANCHE-I, SECOND RURAL CONNECTIVITY INVESTMENT PROGRAM: MADHYA PRADESH

A. Status of Second RCIP Tranche I in Madhya Pradesh

55. The state under Second RCIP Tranche1 (Loan 3611-IND) had 169 roads totaling 2081.82 km (Refer Annexure 1 and 2 for the details). A summary of district wise subproject roads in Madhya Pradesh under Second RCIP Tranche1 is as under:

Particulars	Tranche1
No. of districts where subprojects are located	29
Total no.of roads in the Tranche	169
Total length of roads (Km)	2081.82

56. Most of the civil works activities for tranche 1 are at an early stage and contractors are in the process of carrying out the initial activities. Out of the 132 packages, 84 were awarded in January 2018 and 23 in February 2018.

B. Findings

1. Implementation of the Community Participation Framework (CPF)

57. Social safeguards implementation in Madhya Pradesh is conducted by the SRRDA social officer, two PIC social safeguards experts and a team of 6 PIC social safeguards assistants. Their work is guided and monitored by the TSC team.

58. During preparation of the subprojects, all the major activities have been carried out to comply with CPF requirements.

59. The PIUs assisted by the DPR consultants and the PIC, conducted transect walks in all the subproject roads and held meetings attended by the panchayat officials and land owners/ non-titled persons on site selection. Various stakeholders from the government (AGM/AE of PIUs, Revenue officials), Panchayati Raj Institutions (PRIs), and the local community participated in the transect walk. The rural roads proposed under this project follow existing alignments and no new alignment was proposed for any subproject road. Certificates of land availability from revenue officials were obtained by the PIUs before start of the transect walk. The PIUs also obtained certificates from the gram panchayat signed by the sarpanch and the secretary confirming conduct of the trasect walk, land availability and identification of affected persons through the process.

60. The consultation with the community also focused on avoiding/ minimizing displacement due to the sub-project road. Inside habitation areas and in village sections the road width has been restricted (in some cases to less than 6 m) to avoid damage to residential or commercial structure. At the habitation areas, it has been proposed to construct CC roads for their longer durability and lesser disruption to traffic for maintenance.

61. Subsequent to the transect walks, the PIUs with help of Gram Panchayats conducted formal consultation with all those persons likely to get affected as a result of the road improvement. "Gramsabha" meetings were held at Gram Panchayat level attended by the sarpanch, secretary, senior citizens of the village and the village community including all the APs and the PIU officials. During the conduct of the transect walks, all APs were identified, fully

consulted on the voluntary donation process. Vulnerable APs were also identified during the surveys, as the CPF sets out special assistance measures to them.

62. In the CPF, Vulnerable households are defined as (i) those headed by women, (ii) Scheduled Tribes (ST), (iii) Scheduled Castes (SC), and (iv) Disabled persons, (v) Households Below Poverty Line (BPL) as per the state poverty line for rural areas, (vi) Households who are or will become BPL as result of loss to assets and / or livelihoods and (vii) Households losing structures. Vulnerable APs were identified through census survey and support/ assistance to the APs were finalized in consultation with the community through the village panchayat in case of all the subproject roads.

63. The PIU/PIC have identified a total of 492 Affected Persons (APs), among whom 110 qualify as Vulnerable Affected Persons for Tranche 1. **Appendix 2** shows detailed information on these findings.

64. Out of the 110 VAPs, 78 already benefited government livelihood scheme at the time of their identification, and 32 were linked up to these schemes as a result of the project. All the VAPs have been linked up to benefits from rural development schemes.

65. Overall, transect walks have been conducted for all project roads. A total of 4,921 people participated to the transect walks conducted for Tranche 1. Out of the participants in the transect walk 23.96% were women.

APs and VAPs identified under Tranche 1

	APs	VAPs			Transect walk participants
		Identified	Already linked up	Linked by RCIP	
Tranche 1	492	110	78	32	4921

2. Implementation of the Gender Action Plan (GAP) and other social safeguards

66. Implementation of the Gender Action Plan: The PIC has been collecting secondary and primary information related to the indicators given in the GAP. A separate report on the GAP implementation in the rural road projects under ADB financing in the state is prepared every quarterly by the PIC and it is disclosed on ADB website.

67. The contracts under Second RCIP tranche 1 has been awarded in the months of January and February 2018 and the contractors have just started the initial construction activities. PIC will be carrying out the GAP implementation monitoring and report on the achievement for the various indicators on a quarterly basis.

3. Grievance Redressal Mechanism

68. In case of all the subproject roads, village grievance redress committees were in place comprising the sarpanch, panchayat secretary and other prominent citizens of the village for the purpose of redressal of grievances. As the site selection process involved participation and full consultation with the community, no formal complaint was received by any of these village committees. PIU staff is in regular contact with the village community and community leaders to facilitate resolving any grievance that may arise.

C. Social Safeguards Due Diligence of Tranche 1 undertaken by the TSC

69. The TSC randomly selected a sample of 29 roads (covering 17.16% of the 169 roads in 29 districts) under Tranche 1 covering at least one subproject from each district. The desk review comprised review of project documents, files, correspondences, progress reports, and data of the SRRDA/PIUs. During field visits by the TSC experts consultations with the village community, focus group discussions, and individual interviews were carried out involving officials of SRRDA/PIUs, project affected families, village sarpanch, panchayat secretary and members of village panchayats, eminent citizens, community leaders, members of women groups in project area. The APs were also enquired about their consent for voluntary land donation

1. Road Selection and consultation with landowners and any non-titled people

70. Census survey of the APs was carried out for all the roads reviewed, needing voluntary land donation and/or loss of structures. Interaction of TSC experts with the Panchayat and PIU officials revealed that the PIUs are in close consultation with the *Gram Panchayats* for provision of assistance and support to the vulnerable APs to ensure that they are not adversely affected by the Project. The consultation process supplemented by distribution of information booklets in Hindi (local language) has made the APs aware of their special entitlement in view of their vulnerability.

71. Out of the 29 subproject roads reviewed under Tranche 1, 20 roads already had adequate RoW for the construction purpose and were free of encumbrances. The direct impacts were limited to narrow strips of land along the existing alignment, shifting of temporary boundary walls/fences and/or affecting the veranda (*chabutara*) without affecting any of the residential structures. In case of some roads, for example, the Bakayan-Futera-Magron Road in Bhatiyagr block of Damoh district, minor portion of the verandahs / platforms will be affected without affecting the structure of the residence thus not requiring dislocation of the APs. However, as per the criteria of the CPF, these APs were deemed vulnerable and they were included for benefits under MGNREGA as per the recommendation of the Gram Panchayat. Two temporary shops also on the same road were affected but there was sufficient land behind the shops to shift them without affecting their structure. None of the subproject roads impacted other structures or Common Property Resources (CPRs) like community land, places of worship etc. In case of the roads in which APs are identified, the village community has been consulted in this regard and the community has agreed for voluntary donation of required land for the construction of the roads.

72. Out of the 29 sample roads of Tranche 1 reviewed, 9 roads had 57 APs and 6 roads had 13 VAPs. Details of sub project road wise vulnerable APs and the impact are presented below in Table 1.

73. The Panchayats have taken steps to include the names of all the poor/vulnerable APs for issuance of BPL (Below Poverty Line) cards that would entitle these APs to receive essential commodities e.g food grains, sugar, kerosene fuel etc. through government programmes like Public Distribution System (PDS) at subsidized rates. All vulnerable APs have been provided job cards under the *Mahatma Gandhi National Rural Employment Guarantee Act* (MGNREGA) Programme that guarantees employment under programs like road construction works in panchayat roads; tree plantation works etc. for a minimum of 100 days period in a financial year.

2. Voluntary donations do not severely affect the living standards of APs and are directly linked to benefits, with community sanctioned measures to

replace any losses that are agreed through verbal and written record by affected people

74. It was evident from the consultations on the roads that vulnerable APs had agreed for voluntarily donating their land for the proposed road improvement. Based on the assessment, the voluntary donation has marginal impact on temporary fences, *kutch*a veranda and on agricultural lands. It is important to note that no AP has been relegated to BPL category as a result of the project. All those belonging to the BPL category have long been there prior to the impact of the project. No AP had lost more than 5% of his/her asset as a result of the project.

Table 1: Sample Roadwise Details of APs and the Impact

SI No	Name of District	Road Name	Length (Km)	Total APs	No. of Vulnerable APs	Category wise Break up of Vulnerable APs	Impact on total land (%)

3. Voluntary donations are confirmed through verbal and written record and verified and adopted through constitutional process.

75. Voluntary donations are confirmed through written record and verified and adopted through constitutional process during the village level meetings in the presence of 'Sarpanch', 'Panchayat Secretary' and the PIU officials in case of all the subproject roads having APs. The gram Sabha resolution identified the APs by category of loss and written consent of the APs for voluntary land donation was obtained. The resolutions also had signature of other attendants of the village community in the meeting including the sarpanch and the Panchayat Secretary. Need for land requirement and status of MOU with the APs are presented below in *Table 2* for the sample roads reviewed.

Table 2: Sample Roadwise Need for Land and Status of MOU with Aps

C. Institutional and Monitoring arrangements

76. The following arrangements to design, implement and monitor the social activities related to the project, namely the compliance with the CPF, consultations, the monitoring of the implementation of the Gender Action Plan (GAP) and the HIV/AIDS and human trafficking awareness activities are conducted by the following actors:

77. The **DPR consultants** appointed by the SRRDA assisted the PIUs to conduct Transect Walk along project roads before finalizing the alignment, to ensure active community participation, select the alignment that best suits the community's needs and minimizes adverse social and environmental impacts of the proposed improvements. The DPR consultants have Social Community Participation Experts, environmental experts and field staff for conducting the transect walk, community consultations and preparation of the Community Participation Plans at subproject level.

78. The PIUs at district level in Madhya Pradesh are assisted by the **Project Implementation Consultants (PIC)** recruited at SRRDA level for monitoring the implementation of the Community Participation Plan (CPP) and the Gender Action Plan. The PIC has Social Community Participation Experts and field staff for subproject level monitoring.

79. **Technical Support Consultants (TSC)** appointed at the national level by NRRDA undertakes sample review of the monitoring carried out by the PICs periodically as per the work progress under each Tranche of roads.

80. The ADB staffs and TSC imparted training on safeguard documentation as per CPF and ECOP adopted for the project and subsequently the TSC experts continued the training process to the DPR consultants and the PIC. Meetings were held with the concerned PIUs for their cooperation in involving the revenue and other line department officials in the transect walk and obtaining official documents needed for meeting CPF requirements. This helped in better communication with the stakeholders including the villagers as updated revenue records are generally not readily available on demand. The TSC also had a number of meetings with PIU officials in improving the social safeguard documentation

D. Conclusion

81. The review of CPF documentation revealed that:

- i) People agreed to voluntarily contribute their land for the road construction, and this was confirmed through verbal and written records and verified by Gram Panchayats; Revenue Officials
- ii) There was full consultation with landowners and non-titled people;
- iii) Grievance redress mechanisms have been fulfilled by the GPs.
- iv) As per social safeguard policy of ADB compliance has been made to provide assistance.

82. It could be concluded that the social safeguard measures covered by the CPF and the institutional arrangement of SRRDA with support from PIC are able to safeguard the project.

V. DUE DILIGENCE OF SOCIAL SAFEGUARDS COMPLIANCE – TRANCHE-I, SECOND RURAL CONNECTIVITY INVESTMENT PROGRAM: ODISHA

A. Status of Second RCIP Tranche I in Odisha

83. The state under Second RCIP Tranche1 (Loan 3611-IND) had 390 roads totaling 1560.0 km (Refer Annexure 1 and 2 for the details). A summary of district wise subproject roads in Odisha under Second RCIP Tranche1 is as under:

Particulars	Tranche 1
No. of districts where subprojects are located	26
Total no.of roads in the Tranche	390
Total no.of packages in the Tranche	376
Total length of roads (Km)	1560.0

84. Most of the civil works activities for tranche 1 are at an early stage and contractors are in the process of carrying out the initial activities. Out of the 376 packages, 220 were awarded till April 2018.

B. Findings

1. Implementation of the Community Participation Framework (CPF)

85. Social safeguards implementation in Odisha is conducted by the PIUs at the district level coordinated through the SRRDA social officer stationed at the state head quarter. The SRRDA is assisted by the PIC social safeguards experts and a team of PIC social safeguards assistants. Their work is guided and monitored by the TSC team.

86. During preparation of the subprojects, all the major activities have been carried out to comply with CPF requirements.

87. The PIUs assisted by the DPR consultants and the PIC, conducted transect walks in all the subproject roads and held meetings attended by the panchayat officials and land owners/ non-titled persons on site selection. Various stakeholders from the government (EE/AE of PIUs, Revenue officials), Panchayati Raj Institutions (PRIs), and the local community participated in the transect walk. The rural roads proposed under this project follow existing alignments and no new alignment was proposed for any subproject road. PIUs confirmed of land availability with revenue officials and the gram panchayat and signed certificates were obtained from the sarpanch confirming conduct of the transect walk, land availability and identification of affected persons through the process.

88. The consultation with the community also focused on avoiding/ minimizing displacement due to the sub-project road. Inside habitation areas and in village sections the road width has been restricted (in some cases to less than 6 m) to avoid damage to residential or commercial structure. At the habitation areas, it has been proposed to construct CC roads for their longer durability and lesser disruption to traffic for maintenance.

89. Subsequent to the transect walks, the PIUs with help of Gram Panchayats conducted formal consultation with all those persons likely to get affected as a result of the road improvement. "Gramsabha" meetings were held at Gram Panchayat level attended by the sarpanch, senior citizens of the village and the village community including all the APs and the

PIU officials. During the conduct of the transect walks, all APs were identified, fully consulted on the voluntary donation process. Vulnerable APs were also identified during the surveys, as the CPF sets out special assistance measures to them.

90. In the CPF, Vulnerable households are defined as (i) those headed by women, (ii) Scheduled Tribes (ST), (iii) Scheduled Castes (SC), and (iv) Disabled persons, (v) Households Below Poverty Line (BPL) as per the state poverty line for rural areas, (vi) Households who are or will become BPL as result of loss to assets and / or livelihoods and (vii) Households losing structures. Vulnerable APs were identified through census survey and support/ assistance to the APs were finalized in consultation with the community through the village panchayat in case of all the subproject roads.

91. The PIU/PIC have identified a total of 67 Affected Persons (APs), among whom 34 qualify as Vulnerable Affected Persons for Tranche 1. **Appendix 2** shows detailed information on these findings.

92. All the VAPs identified have been linked up to benefits from rural development schemes.

93. Overall, transect walks have been conducted for all project roads. A total of 19,155 people participated in the transect walks conducted for Tranche 1. Out of the participants in the transect walk 35.85% were women.

APs and VAPs identified under Tranche 1

	APs	VAPs		Transect walk participants
		Identified	Linked to benefits from RD schemes	
Tranche 1	67	34	34	19155

2. Implementation of the Gender Action Plan (GAP) and other social safeguards

94. Implementation of the Gender Action Plan: The PIC has been collecting secondary and primary information related to the indicators given in the GAP. A separate report on the GAP implementation in the rural road projects under ADB financing in the state is prepared every quarterly by the PIC and submitted to NRRDA for disclosure on ADB website.

95. Till April 2018, out of the 376 packages, 220 were awarded and the contractors have just started the initial construction activities. PIC will be carrying out the GAP implementation monitoring and report on the achievement for the various indicators on a quarterly basis.

3. Grievance Redressal Mechanism

96. In case of all the subproject roads, village grievance redress committees were in place comprising the sarpanch, panchayat secretary and other prominent citizens of the village for the purpose of redressal of grievances. As the site selection process involved participation and full consultation with the community, no formal complaint was received by any of these village committees. PIU staff is in regular contact with the village community and community leaders to facilitate resolving any grievance that may arise.

C. Social Safeguards Due Diligence of Tranche 1 undertaken by the TSC

97. NRRDA at the central level has recruited the Technical Support Consultants (TSC). The TSC is at the mobilization stage for providing their services for Second RCIP. TSC will carry out review of social safeguard implementation in Second RCIP through field checks and submit their reports to NRRDA for disclosure in ADB website.

D. Institutional and Monitoring arrangements

98. The PIC is in place to assist the PIUs in addressing the safeguard issues in the project. At the project preparation stage ADB consultants and TSC imparted training on safeguard documentation as per CPF and ECOP adopted for the project and subsequently the TSC experts continued the training process to the PIC. Meetings were held with the concerned PIUs for their cooperation in involving the revenue and other line department officials in the transect walk and obtaining official documents needed for meeting CPF requirements. This helped in better communication with the stakeholders including the villagers as updated revenue records are generally not readily available on demand. The TSC also had a number of meetings with PIU officials in improving the social safeguard documentation.

99. The PIUs at district level are assisted by the **Project Implementation Consultants (PIC)** recruited at SRRDA level for monitoring the implementation of the Community Participation Plan (CPP) and the Gender Action Plan. The PIC has Social Community Participation Experts and field staff for subproject level monitoring.

100. **Technical Support Consultants (TSC)** appointed at the national level by NRRDA undertakes sample review of the monitoring carried out by the PICs periodically as per the work progress under each Tranche of roads.

E. Conclusion

101. The review of CPF documentation revealed that:

- v) People agreed to voluntarily contribute their land for the road construction, and this was confirmed through verbal and written records and verified by Gram Panchayats; Revenue Officials
- vi) There was full consultation with landowners and non-titled people;
- vii) Grievance redress mechanisms have been fulfilled by the GPs.
- viii) As per social safeguard policy of ADB compliance has been made to provide assistance.

102. It could be concluded that the social safeguard measures covered by the CPF and the institutional arrangement of SRRDA with support from PIC are able to safeguard the project.

APPENDIX 1: RCIP – DISTRICTWISE DISTRIBUTION OF ROADS – ODISHA**Tranche 1**

VI. DUE DILIGENCE OF SOCIAL SAFEGUARDS COMPLIANCE – TRANCHE-I, SECOND RURAL CONNECTIVITY INVESTMENT PROGRAM: WEST BENGAL

A. Status of Second RCIP Tranche I in West Bengal

103. The state under Second RCIP Tranche1 (Loan 3611-IND) had 55 roads totaling 271.255 km (Refer Annexure 1 and 2 for the details). A summary of district wise subproject roads in Odisha under Second RCIP Tranche1 is as under:

Particulars	Tranche 1
No. of districts where subprojects are located	3
Total no.of roads in the Tranche	181
Total no.of packages in the Tranche	151
Total length of roads (Km)	597.5

104. Most of the civil works activities for tranche 1 are at an early stage and contractors are in the process of carrying out the initial activities. Out of the 151 packages, 50 were awarded till April 2018.

B. Findings

1. Implementation of the Community Participation Framework (CPF)

105. Social safeguards implementation in Odisha is conducted by the PIUs at the district level coordinated through the SRRDA social officer stationed at the state head quarter. The SRRDA is assisted by the PIC social safeguards experts and a team of PIC social safeguards assistants. Their work is guided and monitored by the TSC team.

106. During preparation of the subprojects, all the major activities have been carried out to comply with CPF requirements.

107. The PIUs assisted by the DPR consultants and the PIC, conducted transect walks in all the subproject roads and held meetings attended by the panchayat officials and land owners/ non-titled persons on site selection. Various stakeholders from the government (EE/AE of PIUs, Revenue officials), Panchayati Raj Institutions (PRIs), and the local community participated in the transect walk. The rural roads proposed under this project follow existing alignments and no new alignment was proposed for any subproject road. PIUs confirmed of land availability with revenue officials and the gram panchayat and signed certificates were obtained from the sarpanch confirming conduct of the transect walk, land availability and identification of affected persons through the process.

108. The consultation with the community also focused on avoiding/ minimizing displacement due to the sub-project road. Inside habitation areas and in village sections the road width has been restricted (in some cases to less than 6 m) to avoid damage to residential or commercial structure. At the habitation areas, it has been proposed to construct CC roads for their longer durability and lesser disruption to traffic for maintenance.

109. Subsequent to the transect walks, the PIUs with help of Gram Panchayats conducted formal consultation with all those persons likely to get affected as a result of the road improvement. "Gramsabha" meetings were held at Gram Panchayat level attended by the

sarpanch, senior citizens of the village and the village community including all the APs and the PIU officials. During the conduct of the transect walks, all APs were identified, fully consulted on the voluntary donation process. Vulnerable APs were also identified during the surveys, as the CPF sets out special assistance measures to them.

110. In the CPF, Vulnerable households are defined as (i) those headed by women, (ii) Scheduled Tribes (ST), (iii) Scheduled Castes (SC), and (iv) Disabled persons, (v) Households Below Poverty Line (BPL) as per the state poverty line for rural areas, (vi) Households who are or will become BPL as result of loss to assets and / or livelihoods and (vii) Households losing structures. Vulnerable APs were identified through census survey and support/ assistance to the APs were finalized in consultation with the community through the village panchayat in case of all the subproject roads.

111. The PIU/PIC have identified a total of 2443 Affected Persons (APs), among whom 955 qualify as Vulnerable Affected Persons for Tranche 1. **Appendix 2** shows detailed information on these findings.

112. All the VAPs identified have been linked up to benefits from rural development schemes.

113. Overall, transect walks have been conducted for all project roads. A total of 2,505 people participated in the transect walks conducted for Tranche 1. Out of the participants in the transect walk 16.65% were women. The gram panchayats confirmed during the transect walk to link all the identified VAPs with RD schemes to receive benefits on priority. The GPs have annual targets during the financial year for achievement under various RD schemes where beneficiaries are already identified for the year. Some of the VAPs identified but pending to be included in the RD schemes will be covered during the current financial year and the process is ongoing.

APs and VAPs identified under Tranche 1

	APs	VAPs		Transect walk participants
		Identified	Linked to benefits from RD schemes	
Tranche 1	2443	955	Ongoing	2505

2. Implementation of the Gender Action Plan (GAP) and other social safeguards

114. Implementation of the Gender Action Plan: The PIC has been collecting secondary and primary information related to the indicators given in the GAP. A separate report on the GAP implementation in the rural road projects under ADB financing in the state is prepared every quarterly by the PIC and submitted to NRRDA for disclosure on ADB website.

115. Till April 2018, out of the 151 packages, 50 were awarded and the contractors have just started the initial construction activities. PIC will be carrying out the GAP implementation monitoring and report on the achievement for the various indicators on a quarterly basis.

3. Grievance Redressal Mechanism

116. In case of all the subproject roads, village grievance redress committees were in place comprising the sarpanch, panchayat secretary and other prominent citizens of the village for the purpose of redressal of grievances. As the site selection process involved participation and full consultation with the community, no formal complaint was received by any of these village

committees. PIU staff is in regular contact with the village community and community leaders to facilitate resolving any grievance that may arise.

F. Social Safeguards Due Diligence of Tranche 1 undertaken by the TSC

117. NRRDA at the central level has recruited the Technical Support Consultants (TSC). The TSC is at the mobilization stage for providing their services for Second RCIP. TSC will carry out review of social safeguard implementation in Second RCIP through field checks and submit their reports to NRRDA for disclosure in ADB website.

G. Institutional and Monitoring arrangements

118. The PIC is in place to assist the PIUs in addressing the safeguard issues in the project. At the project preparation stage ADB consultants and TSC imparted training on safeguard documentation as per CPF and ECOP adopted for the project and subsequently the TSC experts continued the training process to the PIC. Meetings were held with the concerned PIUs for their cooperation in involving the revenue and other line department officials in the transect walk and obtaining official documents needed for meeting CPF requirements. This helped in better communication with the stakeholders including the villagers as updated revenue records are generally not readily available on demand. The TSC also had a number of meetings with PIU officials in improving the social safeguard documentation.

119. The PIUs at district level are assisted by the **Project Implementation Consultants (PIC)** recruited at SRRDA level for monitoring the implementation of the Community Participation Plan (CPP) and the Gender Action Plan. The PIC has Social/Community Participation Experts and field staff for subproject level monitoring.

120. **Technical Support Consultants (TSC)** appointed at the national level by NRRDA undertakes sample review of the monitoring carried out by the PICs periodically as per the work progress under each Tranche of roads.

H. Conclusion

121. The review of CPF documentation revealed that:

- ix) People agreed to voluntarily contribute their land for the road construction, and this was confirmed through verbal and written records and verified by Gram Panchayats; Revenue Officials
- x) There was full consultation with landowners and non-titled people;
- xi) Grievance redress mechanisms have been fulfilled by the GPs.
- xii) As per social safeguard policy of ADB compliance has been made to provide assistance.

122. It could be concluded that the social safeguard measures covered by the CPF and the institutional arrangement of SRRDA with support from PIC are able to safeguard the project.
