Description	Subproject 3 will support enhancement of financial mechanisms for developing climate actions of DMCs. Expected outputs will include: (i) improved DMC knowledge on public and private sources of climate finance, and (ii) innovative financing mechanisms to develop DMC climate actions identified.					
Project Rationale and Linkage to Country/Regional Strategy	The Climate Change Operational Framework 2017-2030: Enhanced Actions for Low Greenhouse Gas Emissions and Climate-Resilient Development (CCOF2030), approved by the President on 4 July 2017, provides the broad direction and guidance for enhancing resilience and strengthening climate actions in ADB's operations and business processes. The knowledge and support technical assistance (TA) cluster on Supporting the Implementation of ADB's Climate Change Operational Framework 2017 2030 (CCOF2030) was approved by the President on 7 December 2018. The TA cluster will help boost the capacity of developing member countries (DMCs) for meeting their climate objectives by (i) assisting in refining and translating nationally determined contributions (NDCs) into climate investment plans, which may be implemented with assistance from the Asian Development Bank (ADB); (ii) improving DMCs' access to external public and private climate finance, including support for innovative financing mechanisms; and (iii) developing methods and approaches to establish baselines and monitoring tools for indicators to measure and gauge DMC progress on climate actions and ADB's contribution to these actions. The TA cluster is strongly aligned with Strategy 2030, which highlights tackling climate change, building climate and disaster resilience and enhancing environmental sustainability as one of ADB's operational priorities, i.e., operational priority 3.

## Business Opportunities

Consulting Services The TA subproject will engage 24 person-months of international inputs (senior climate finance specialist, senior project finance - infrastructure finance specialist); and 48 person-months of national inputs (senior project coordination specialist, and senior country researchers). ADB will engage consultants using individual consultant selection method, as the TA subproject requires a mix of expertise covering various sectors, finding a firm that carries all expertise may be difficult and can cause unnecessary delays; and following the ADB Procurement Policy (2017, as amended from time to time) and its associated project administration instructions and/or staff instructions. Aside from the stated international and national consultants, resource persons and English translators may also be engaged for the training workshops. Selected reports will be published as knowledge products in English and the local language, as needed, with limited print copies prepared and disseminated to workshop participants from DMCs.
