

Regional: Promoting Sustainable Energy for All in Asia and the Pacific - Project Development and Investment Facilitation (Subproject D)

Project Number Agional	Project Name	Promoting Sustainable Energy for All in Asia and the Pacific - Project Development an Facilitation (Subproject D)	d Investment	
Project Status	Project Number	48435-005		
Project Type / Modality of Assistance	Country	Regional		
Assistance Source of Funding / Amount TA 8954-REG: Promoting Sustainable Energy for All in Asia and the Pacific - Project Development and Investment Facilitation (Subproject D) Government of Austria TA 8954-REG: Promoting Sustainable Energy for All in Asia and the Pacific - Project Development and Investment Facilitation (Subproject D) (Supplementary) Strategic Agendas Environmentally sustainable growth Inclusive economic growth Orivers of Change Governance and capacity development Partnerships Sector / Subsector Energy - Energy sector development and institutional reform Effective gender mainstreaming Asia and the Pacific is the region with the majority of the energy poor globally. The International Energy Agency estimates that around 600 million people or half of people without access to electricity globally live in the region. The region also has the highest number of people who are dependent on traditional solid fuels for cooking _ 1.8 billion out of a global total of 2.6 billion. Dependence on burning traditional solid rules has dramatic impacts on the health of the people, particularly women and children. SE4ALL was launched by the United Nations Secretary General in September 2 sortices; (2) Doubling the global rate of improvement in energy efficiency; and (3) Doubling the share of renewable energy in the global rate of improvement in energy efficiency; and (3) Doubling the share of renewable energy in the project Rationale and Linkage to Country/Regional Strategy Project Rationale and Linkage to Country/Regional The Asia and the Pacific region faces the twin challenges of energy security and climate change challenges which ADB's 2009 Energy Policy discusses at length and outlines ADB's response of broadening support for, and accelerating development of, clean energy: renewables and energy efficiency, ADB, through its Clean Energy Program and Energy for All Program has been supporting its Developing Member Countries (DMCs) in promoting renewable energy, energy efficiency	Project Status	Active

Environmentally sustainable growth Inclusive economic growth Drivers of Change Governance and capacity development Partnerships Sector / Subsector Energy - Energy sector development and institutional reform Gender Equity and Mainstreaming Effective gender mainstreaming Description Asia and the Pacific is the region with the majority of the energy poor globally. The International Energy Agency estimates that around 600 million people or half of people without access to electricity globally live in the region. The region also has the highest number of people who are dependent on traditional solid fuels for cooking _ 1.8 billion out of a global total of 2.6 billion. Dependence on burning traditional solid fuels has dramatic impacts on the health of the people, particularly women and children. SE4ALL was launched by the United Nations Secretary General in September 2011 to achieve three inter-related goals by 2030: (1) Ensuring universal access to modern energy services; (2) Doubling the global rate of improvement in energy efficiency; and (3) Doubling the share of renewable energy in the global rate of improvement in energy efficiency; and (3) Doubling the share of renewable energy in the global rate of support for, and accelerating development of, clean energy: renewables and energy efficiency. ADB, through its Clean Energy Program and Energy for All Program has been supporting its Developing Member Countries (DMCs) in promoting renewable energy, energy efficiency and energy access in terms of stakeholder engagement, capacity building, and investment facilitation. ADB's annual investment for clean energy has been over \$2 billion since 2011. The TA aims to support the promotion of renewable energy, energy efficiency and energy access in terms of stakeholder engagement, capacity building, and investment facilitation. ADB's annual investment for clean energy has been over \$2 billion since 2011. Service	ے د

The TA will mainly finance consulting services and other capacity building activities as well as some small pilots that may be essential to test the model and enhance investor confidence. The TA will require 30 person-months of international and 65 person-months of national consulting services in the areas of technologies, project development, communications etc. Individual consultants will be engaged to be flexible and timely fielded. Some international and national consultants will be engaged in long-term support roles as individual consultants. Engagement of experts will follow ADB's Guidelines on the Use of Consultants (2013, as amended from time to time). Partnership with other agencies such as Private Financing Advisory Network, New Ventures, USAID, GiZ etc. will be established.

Procurement

All procurement under the TA will be carried out in accordance with ADB's Procurement Guidelines (2015, as amended from time to time). The disposal of all equipment procured under the TA will follow ADB disposal procedures. Output-based or lump sum contracts will be considered as appropriate where possible to reduce administrative burden and improve efficiency and economy. Disbursements under the TA will be performed in accordance with ADB's Technical Assistance Disbursement Handbook (2010, as amended from time to time).

Responsible Staff

Responsible ADB Officer	Zhai, Yongping
Responsible ADB Department	Sustainable Development and Climate Change Department
Responsible ADB Division	SDSC
Executing Agencies	Asian Development Bank 6 ADB Avenue, Mandaluyong City 1550, Philippines
