

Indonesia: IKK Water Supply Sector Project

Environmentally sustainable growth Inclusive economic growth Drivers of Change Governance and capacity development Sector / Subsector Water and other urban infrastructure and services - Urban water supply services Water and other urban infrastructure and services - Urban water supply Gender Equity and Mainstreaming Description The project will provide piped water supply to about 200,000 poor people in peri-urbanized and poor areas in Indonesia. This will be done by (i) financing and constructing water intake and treatment facilities; (ii) building the capacity of local government and community organizations and associated agencies, to design, finance, operate and maintain the distribution system; and (iii) raising awarenes with poor communities on the health benefits of piped and treated water supply to raise demand for piped water supply systems. Strategic focus. The project contributes to the Indonesia Country Partnership Strategy, 2012 - 2014, which is under preparation, and is included in the Country Operations Business Plan, 2012-2014 for approval in 2014. ADB will support government efforts to achieve more inclusive growth by upgradin infrastructure, strengthening the delivery of local government services, and trageting poor population The project is in line with ADB's Water Oprational Plan, 2011-2020, which recognizes the lact of accease to safe water and inappropriate hygiene practices as major barriers to improving general health and widening access to education among the most vulnerable communities. The project aslo addresses to issues raised in the Water Supply and Sanitation Sector Assessment, Strategy and Roadmap for Indonesia (foodnote 1) since it will (i) adopt a community based approach, (ii) increase investment levels required to connect more households to piped water supply, (iii) stimulate sub-national politics will to improve water services, (iv) stimulate cross-sectoral policy coordination on the provision of improved water supply facilities, and (v) increase community awareness of the	Project Name	IKK Water Supply Sector Project

Status of Implementation Progress (Outputs, Activities, and Issues)

Geographical Location Kalimantan, Sulawesi

Summary of Environmental and Social Aspects

Environmental Aspects

Involuntary Resettlement

Indigenous Peoples

Stakeholder Communication, Participation, and Consultation

During Project Design The executing agency is the Directorate General for Human Settlement (DGHS) of the Ministry of

Publich Works, which will establish a project management unit. The implementing agencies will be the provincial agencies in charge of water supply. Local project management units will be

established.

During Project Implementation The executing agency is the Directorate Geeral for human Settlements (DGHS) of the Ministry of

Public Works, which will establish a project management unit. The implementing agencies will be the provincial agencies in charge of water supply. Local project management units will be established. Project implementation assistance will be provided through a consultancy contract with a firm, while individual consultants will be considered for specific tasks. Procurement will follow ADB's Procurement Guidelines. Advance action for consultant recruitment will be applied as much as

possible.

Business Opportunities

Consulting Services

ADB will contract a consulting firm to provide the requested services. The consultants will be engaged by ADB in accordance with the Guidelines on the Use of Consultants (2013, as amended from time to time), using the Quality-Cost Based (80/20) selection method with simplified technical proposals and contracted on a lump-sum

basis.
