India: Tripura Power Distribution Strengthening and Generation Efficiency Improvement Project

Project Name	Tripura Power Distribution Strengt	thening and Generation Efficiency Improvement Project			
Project Number	51308-009				
Country / Economy	India				
Project Status	Approved				
Project Type / Modality of Assistance	Loan				
Source of Funding / Amount	Loan 4248-IND: Tripura Power Distribution Strengthening and Generation Efficiency Improvement Project				
	Ordinary capital resources		US\$ 220.00 million		
Strategic Agendas	Environmentally sustainable growth Inclusive economic growth				
Drivers of Change	Gender Equity and Mainstreaming Governance and capacity development				
Sector / Subsector	Energy / Electricity transmission and distribution - Energy efficiency and conservation				
Gender Equity and Mainstreaming	Effective gender mainstreaming				
Description	The project is aimed at improving energy security, quality of supply, efficiency, and resilience of power sector in Tripura. The project will finance the replacement of aging Rokhia power plant with a highly efficient and state of the art power plant that will reduce greenhouse gas emission through fuel saving, together with investments in the power distribution network to increase generation capacity, efficiency, and resilience of the power sector against climate change and natural disasters. The project will also support to strengthen the institutional capacity and overall business process of the project executing agencies and promote gender equality through pilot testing of gender and socially inclusive workplace practices.				
Project Rationale and Linkage to Country/Regional Strategy	The project will improve the financial sustainability of Tripura State Electricity Corporation Limited (TSECL) and Tripura Power Generation Limited (TPGL). The key elements will include (i) reducing electricity costs through (a) completion of a highly efficient combined cycle gas turbine (CCGT) plant and (b) reduction of AT&C losses through smart metering and distribution strengthening; and (ii) increasing revenues through (a) reduction of commercial losses by implementing smart metering and (b) improved collection of accounts receivables. The completion of the CCGT plant in particular will significantly improve the financial position of both utilities and reduce the carbon footprint by increasing the efficiency of power generation and facilitating renewable energy integration. A comprehensive financial management action plan (FMAP) containing actions to be taken to improve the financial governance and sustainability of TSECL and TPGL has been prepared by ADB. Key elements of the plan that will help improve the financial sustainability of TSECL and TPGL has been prepared by ADB. Key elements of the plan that will help improve the financial sustainability of TSECL and TPGL has been prepared by ADB. Key elements of the plan that will satements through implementation of enterprise resource planning, enabling the timely submission of tariff and true-up petitions , the release of government subsidies, and a reduction in the ACSARR gap to zero; (ii) improving the timeliness and quality of financial statements through implementation of enterprise resource planning, enabling the timely submission of tariff and true-up petitions; (iii) preparing a road map for administrative and financial separation of TPGL from TSECL; (iv) improving the management of fixed assets; and (v) supporting the implementation of RDSS.				
Impact		ilience of power sector in Tripura improved (24X7 Power for All Tripura) ate action plan on climate change)			
Project Outcome					
Description of Outcome		Efficiency and reliability of power supply to consumers in Tripura improved.			
Progress Toward Outcome					
-					
Implementation Progress Description of Project Outputs		Generation Capacity of Rokhia power plant increased. Distribution network strengthened, modernized and climate proofed. Smart meters and advanced metering infrastructure established. Institutional capacity of utilities for planning, implementation, financial managemen mainstreaming improved. Gender- and socially inclusive energy-based livelihood activities promoted.	t, and gender		
Implementation Progress Description of Project Outputs	ess (Outputs, Activities, and Issues)	Distribution network strengthened, modernized and climate proofed. Smart meters and advanced metering infrastructure established. Institutional capacity of utilities for planning, implementation, financial managemen mainstreaming improved. Gender- and socially inclusive energy-based livelihood activities promoted.	t, and gender		
Implementation Progress Description of Project Outputs	255 (Outputs, Activities, and Issues)	Distribution network strengthened, modernized and climate proofed. Smart meters and advanced metering infrastructure established. Institutional capacity of utilities for planning, implementation, financial managemen mainstreaming improved. Gender- and socially inclusive energy-based livelihood activities promoted.	t, and gender		
Implementation Progress Description of Project Outputs Status of Implementation Progr	ess (Outputs, Activities, and Issues)	Distribution network strengthened, modernized and climate proofed. During Project Desig	n		
During Project Imple	mentation		
Business Opportunit	ies		
Consulting Services	Three consultancy firms are expected to be engages. The firms will support (i) Implementation and monitoring of the project; (ii) preparing distribution sector roadmap for TSECL; and (iii) preparing a financial roadmap for TSECL and TPGL		
Procurement	Estimated about 7 procurement packages. This includes six packages for distribution components and one for generation.
