

Viet Nam: Urban Environment and Climate Change Adaptation Project

Project Name	Urban Environment and Climate Change Adaptation Project	
Project Number	43237-013	
Country	Viet Nam	
Project Status	Approved	
Project Type / Modality of Assistance	Grant Loan	
Source of Funding / Amount	<p>Grant 0462-VIE: Urban Environment and Climate Change Adaptation</p> <p>Urban Climate Change Resilience Trust Fund under the Urban Financing Partnership Facility US\$ 4.00 million</p> <p>Loan 3340-VIE: Urban Environment and Climate Change Adaptation Project</p> <p>Ordinary capital resources US\$ 100.00 million</p>	
Strategic Agendas	Environmentally sustainable growth Inclusive economic growth	
Drivers of Change	Governance and capacity development Knowledge solutions Partnerships Private sector development	
Sector / Subsector	Water and other urban infrastructure and services - Other urban services - Urban policy, institutional and capacity development - Urban sewerage - Urban water supply	
Gender Equity and Mainstreaming	Effective gender mainstreaming	
Description	The proposed project will construct and upgrade the infrastructure facilities to improve urban environmental conditions in three coastal cities of Dong Hoi (Quang Binh province), Hoi An (Quang Nam province), and Sam Son (Thanh Hoa province). The improved urban environment is expected to strengthen the municipal financial bases in the project cities through an increase of tax revenues from the appreciation of land values and the tourism industry.	
Project Rationale and Linkage to Country/Regional Strategy	The proposed project is in line with the Viet Nam's Socio-Economic Development Plan (SEDP), 2011_2015, which aims to create a foundation for the country to be an industrialized country by 2020. The SEDP accords high priority to construction of urban infrastructure, taking into account environmental protection, in which special importance is attached to traffic networks, water supply systems and sewerages, waste and water treatment facilities, facilities for collection, transport, treatment and burial of waste, especially hazardous waste in urban areas and industrial zones. The water supply and other municipal infrastructure services is one of the key priority areas identified in the Asian Development Bank's (ADB) country and partnership strategy (CPS), 2012_2015. The CPS emphasizes the need for environmental improvement of secondary cities through a decentralized approach. The project is consistent with the priorities set forth in the assessment, strategy, and roadmap (ASR) for urban development sector and water and sanitation sector. The project falls under one of the three priority support areas of the urban development sector ASR, i.e., development of secondary cities as regional economic hub to foster balanced regional development and strengthen rural-urban linkage. The water and sanitation ASR accords high priority to the urban sanitation programs as part of comprehensive socio-economic development in secondary cities which are likely to be affected by climate change. The proposed project also falls under the priority areas identified under the ADB's draft Urban Operational Plan under Strategy 2020 and Water Operational Plan 2011_2020. The former supports developing green and competitive cities that are resilient to climate change and provide incentives for employment generating investments, and the latter emphasizes the need to expand wastewater management in the developing member countries and support the public-private partnership.	
Impact	Urban environment in Dong Hoi and Hoi An improved.	

Project Outcome

Description of Outcome	Greater access to improved urban services in Dong Hoi and Hoi An.
Progress Toward Outcome	
Implementation Progress	
Description of Project Outputs	<ol style="list-style-type: none">1. New and improved climate change resilient urban infrastructure in Dong Hoi constructed2. New and improved climate change-resilient urban infrastructure in Hoi An constructed3. Improved competencies in urban environmental management and climate change adaptation4. Solid waste collection and treatment facilities are provided.5. Institutional capacity of EAs and IAs are strengthened.
