

# Social Safeguard Monitoring Report

---

Project No. 43281-013  
Semestral Report  
January 2018

## Nepal: Tanahu Hydropower Project

Prepared by Nepal Electricity Authority and Tanahu Hydropower Limited - Environment and Social Management Unit for the Asian Development Bank.

This social safeguard monitoring report is a document of the borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff, and may be preliminary in nature.

In preparing any country program or strategy, financing any project, or by making any designation of or reference to a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area.

2990/2991-Nepal

## Revised Social Safeguard Monitoring Report

---

**Semi Annual Report: July to December 2017**  
**Date: January 2018**

### Nepal: Tanahu Hydropower Project

**Prepared by:**

Nepal Electricity Authority and Tanahu Hydropower Limited of the Government of Nepal - Environment and Social Management Unit (ESMU) for Asian Development Bank

**Supported by:**

Project Supervision Consultants (PSC)  
Lahmeyer International GmbH in association with Manitoba Hydro International

This social safeguard monitoring report is a document of the borrower and made publicly available in accordance with ADB's Public Communications Policy 2011 and the Safeguard Policy Statement 2009. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff.

## 0. EXECUTIVE SUMMARY

This Executive Summary selects the key aspects and status of major items of the monitoring reporting period, and does not claim to provide a complete picture of the details given in this revised Social Safeguard Monitoring Report (SSMR).

### Chapter 1 - Introduction

Like the previous SSMR, also this one has its focus on preparatory construction works of the pre-construction phase concerning access roads, camp site, sub-station as well as reservoir and dam area, as they required high attention during this 1<sup>st</sup> half-year of 2017 combined with the efforts of THL to achieve progress on land acquisition and compensation, which is partly a precondition for the Project's construction phase.

### Chapter 2 - Project Status

The status of the project implementation also remains unchanged, with a confirmed end of pre-construction phase in 2018. A detailed schedule of project overall activities and specific land acquisition, resettlement and compensation (LARC) activities will be provided in the SSMR of 1<sup>st</sup> half-year 2018, when the Draft Updated Resettlement and Indigenous People Plan Pre-Construction Phase will be available, and therefore avoiding duplication of work in this topic.

### Chapter 3 - Monitoring and Evaluation

The **Performance Status** of the Project made significant progress on the following items:

- **PRE-CONSTRUCTION WORKS:** The two access roads with a total length of 5.5kmas well as the sub-station 33/11KV have been completed. The camp site has been completed to 70%.
- **PAYMENT OF COMPENSATION:** During 2<sup>nd</sup> half of year 2017 for (i) 110 AHs in the camp area and access roads, and (ii) 137 AHs from the reservoir area, a total NRs 151,030,880.32 equivalent to about U\$ 1,482,148 was paid as compensation.
- **AFFECTED HOUSEHOLDS (AHS) AND FURTHER PAYMENTS:** The compensation payments for two access roads, THL camp, and sub-station are completed except for extra allowances to be paid vulnerable and indigenous people, which are underway during this reporting period. Concerning the reservoir area, the determination of the compensation calculation has been completed with ongoing payments, also excluding support for vulnerable and indigenous people which can be initiated after the results of the socio-economic census will be available during 1<sup>st</sup> quarter 2018.
- **INCOME RESTORATION AND REHABILITATION:** The first vocational training started on 02 November 2017. The Rural Training Centre (RCT), a training wing of the Council for Technical Education and Vocational Training (CTEVT) Bhimad is currently conducting the certified level-1 skill development training to 60 affected peoples (APs) on (i) building and electricity, and (ii) plumbing. The other areas of vocational training to be offered in this context beside these two are (iii) masonry, (iv) off-season vegetable production, and (v) community livestock assistance.
- **CONSTRUCTION PHASE ACTIVITIES:** Nothing to report

The Project has a **Compliance Status** which can be highlighted as follows:

- **LEGAL AND POLICY REQUIREMENTS:** The covenants to the financing agreement with ADB are complied with by THL.

- **RESETTLEMENT PLANNING REQUIREMENTS:** THL follows strictly the compensation and mitigation measures as outlined in the Draft RIPP 2012. This will be verified through the Draft Updated RIPP Pre-Construction Phase to be finalized in the 1<sup>st</sup> quarter 2018.
- **DUE DILIGENCE OF COMPENSATION:** THL engaged the NGO “Rural Empowerment Society Demauli Tanahu Nepal” during 1<sup>st</sup> half-year 2017 to verify the undertaken payment and receipt process for the camp site and access roads, for which 15hectares of land were acquired, of which 7.5 hectares were owned and/or used by 150 AHs. The Due Diligence Report confirmed that not only the formal procedures and transparent grievance redress procedures as defined in the Land Acquisition Act 2034 (1977) were correctly applied, but also the consultation took place in public meetings, and each AH actively participated. During the reporting period, ADB approved the Due Diligence Report after final clarification from THL on 14 December 2017, and issued the procurement contract summary sheet to reimburse the compensation amount of NRs 398,912,367.36 equivalent to US\$ 3,869,345.56.

The Project’s **Status on Impacts and Mitigation Measures** can be described as follows:

- **SOCIO-ECONOMIC CENSUS:** The tools for the socio-economic census of AHs have jointly been prepared by ESMU, its contracted Bridging Consultant (Social Safeguard Specialist) with the support from the Nepal Resident Mission of ADB. This currently conducted survey of AHs will update the PPTA related survey of AHs from 2011/12. The updated census which was started in May 2017, completed 205 questionnaires until June2017. During the reporting period further 227 surveys of AHs are managed so that a total of 432 household questionnaires were completed by December 2017. The results of this updated survey will be used for (i) describing impact and baseline situation of AHs, (ii) categorizing AHs (vulnerability, others), (iii) profiling APs for mitigation measures (livelihood support, AP profiles for job opportunities, training requirements, etc.

#### Chapter 4 - Grievance Redress Mechanism

The Grievance Redress Mechanism (GRM) procedures for land acquisition and compensation are integrated into the land acquisition process as defined by the Land Acquisition Act 2034 (1977), and are composed of 5 steps, viz. (1) The Beginning, (2) Initial Process, (3) Notice to Acquisition, (4) Compensation, Eligibility and Procedure, and (5) Grievance Addressal. The GRM for non-land related issues are aiming at mutual agreements among complainants first at village, district and/or municipal levels. At all levels the active involvement of the Project proponent THL is possible. Only if no satisfactory solution can be agreed and implemented, further steps at higher administrative level might be necessary leading to the ministerial or national intervention levels as latest options. Two specific events occurred during the reporting period are listed below:

- During the previous reporting period two committees, namely “Hydropower Direct Affected Area Concerned Committee” and “Direct Concerned Reservoir Area Conservation Committee” had on behalf of reservoir relate APs submitted a 26-point demand letter over compensation rate for land acquisition in the inundation area to THL, on 20 November 2016. Through a sequence of interactions with these committees regarding the increase on compensation rate, compensation for partial land remaining and unidentified impacts, additional compensation for landless persons, and skill training plan, an agreement on 21 points (there were 26 points, but based on a mutual understanding, decreased to 21 points as a result of discussions between the parties) was achieved on 28 October 2017, which facilitated progress on compensation during last quarter of 2017.
- THL with its ESMU continued its coordination and cooperation with local authorities and administration during the 2<sup>nd</sup> half of 2017. This includes consultation with newly elected

Mayor, Deputy Mayor of Vyas and Bhimad Municipality, but also the chairperson and vice Chairperson of Myagde and Rising Rural Municipality. THL and/or ESMU staff also regularly consulted other district line agencies (District Administrative Office, District Forest Office, District Education Office, District Land Revenue office, District Land Measurement Office, and others. THL was informed about grievances to be addressed and efforts were made with the active involvement of LCFs to achieve consensus in particular concerning compensation issue related to the reservoir area. The registered private grievances during the reporting period cover mainly quantity and value of assets.

## **Chapter 5 - Consultation and Participation**

ESMU is regularly conducting consultative activities including informal and formal discussions and meeting with APs, district line agencies, local representative and concerned committees. Consultations are conducted with stakeholders throughout the pre-construction phase including the reporting period. It serves ESMU to understand concerns of APs and communities, and to elicit their suggestions on the Project in a regular and transparent manner. The community consultation in the Project area mainly focused on (i) compensation (determination procedure, evaluation criteria/basis and rates, and distribution procedure), (ii) people grievance on compensation, (iii) additional assistance, (iv) reinstatement of affected community properties, (v) livelihood restoration and enhancement provision for displaced and vulnerable people, and (vi) possible community support program to affected people.

THL's practical approach for information disclosure has improved through the establishment of two Information Centers, beside the other means of communication and media (newspaper and FM radio). The frequent use of these PICs proved to be supportive and helpful for both the Project and the communities to interact in any Project matter, such as provision of information, enquiries, problems, clarification and any other item. Currently the major topics of interest remain unchanged in 2017 and mainly includes entitlements, project impact, compensation payment schedule and process, and income generation trainings. The PICs are responsible for dissemination of information related to project pre-construction activities including safeguard aspects to APs.

## **Chapter 6 - Other Activities**

The THL/ESMU team continued facilitating regularly project site visits of individuals, delegations, teams and missions. The notable one during the reporting period was the ADB Mission on environmental and social safeguard during 13-17 November 2017. In general, site visits serve various purposes and include topics land acquisition, compensation, consultation, technical coordination, and grievances.

## **Chapter 7 - Conclusion**

The current status of the pre-construction phase can be summarized as follows:

- The preparatory construction work shows significant progress.
- Social safeguard activities are following principles as agreed in the Project's Resettlement Framework. THL puts its emphasis on acquisition of assets (land, structures, and trees) and payments of compensation to AHs for their loss of assets but also related allowances.
- The appointment of the ESMSP is underway, as the notice of EoI has been published on 07 November 2017. It is expected that the mobilization of ESMSP will take place by the end of 3<sup>rd</sup> quarter 2018. The important tasks for ESMSP with unchanged priorities will be the preparation of (i) an Income Restoration and Rehabilitation Plan, (ii) a Stakeholder

Engagement Plan, (iii) a Community Development Plan, and (iv) thematic maps based on baseline and impact survey data.

- The preparation of a Draft Updated RIPP started in November 2017 and will be completed end of 1<sup>st</sup> quarter 2018.
- Other ADB reporting requirements to be reviewed and incorporated in next SSMR.

## 1. INTRODUCTION

### 1.1 Scope of Report

This Social Safeguard Monitoring Report (SSMR) covers the period July to December, the second half of the year 2017 as the reporting period.

This SSMR has its focus on preparatory construction works of the pre-construction phase such as the access roads, camp site, sub-station as well as acquisition and compensation for those areas and the reservoir area including dam site, as they continuously require high attention throughout 2017 combined with the efforts of THL to achieve progress on land acquisition and compensation, which is partly a precondition for the Project's construction phase. This SSMR also includes chapter-wise the topics monitoring & evaluation, grievance redress mechanism and consultation.

### 1.2 Brief Project Description

Compared with the SSMR for the 1<sup>st</sup> half-year 2017, there is nothing new to report for the 2<sup>nd</sup> half-year 2017 concerning the **sections 1.2.1** Project Area, **1.2.2** Technical Features and **1.2.3** Institutional Aspects.

## 2. PROJECT STATUS

### 2.1 Project Implementation Phases

The Project's history starts in 1999 with first studies followed by a PPTA and in parallel detail engineering design and tender document preparation until 2015. The loan agreement between Government of Nepal and Asian Development Bank was signed on 22 April 2013 and became effective on 29 August 2014. Therefore the first date can be taken as the start of the ongoing pre-construction phase, which is approaching its completion in 2018.

### 2.2 Schedule of Activities

It is planned to provide a detailed schedule of project overall activities and specific LARC activities in the next reporting period January to July 2018 avoiding duplication of work in this topic, as then the content of a Draft Updated RIPP Pre-Construction Phase can be incorporated, as the preparation of this updated resettlement document will be completed during the 1<sup>st</sup> quarter 2018.

## 3. MONITORING AND EVALUATION

The monitoring and evaluation (M&E) of social safeguard activities has been conducted through internal and external monitoring. As during the 1<sup>st</sup> half-year 2017, the M&E activities of THL during the 2<sup>nd</sup> half-year 2017 concerned:

- Internal Monitoring:

THL staff and its ESMU both in Kathmandu and at Project site continued with their monitoring of valuation of the land and distribution of the compensation to the APs. In detail it concerns (i) land acquisition procedures in the reservoir area, and (ii) compensation payment ongoing for the reservoir area and remaining vulnerable allowances for the camp/access road. They have also been involved in the implementation of the resettlement activities in accordance with the Draft RIPP 2012. The internal monitoring also verifies consultation, livelihood restoration, and effectiveness of the grievance redressed mechanism. During the 4<sup>th</sup> quarter PSC has supported ESMU in its efforts on internal monitoring.

- External Monitoring:

In general, the external monitoring can be carried out in two corresponding ways, (i) regular independent reviews through a social safeguard expert as member of a Panel of Expert, and (ii) through an on-request contracting of independent monitoring organizations. The latter has been performed through the independent NGO “Rural Empowerment Society Damauli Tanahun Nepal (RESDTN)” on compensation payment verification and applied procedures both concerning the access road and camp area. It concerns the due diligence which has been completed during the reporting period (see **Section 3.2.4**).

### 3.1 Performance Monitoring

The Project’s verification on scheduled activities and comparing them with actually performed activities is termed performance monitoring. Review of the status of activities will not only have to document the current status, but also to explain reasons for the status and to adjust the schedule if necessary. The Project currently documents the social safeguard activities and mitigation measures, in a descriptive way so that corrective planning can be considered in the next revised schedule of social safeguard activities followed by their implementation. The next SSMR will include a schedule comparing planned with actually executed activities to allow a better overview and interpretation about the performance status of social safeguard activities.

#### 3.1.1 Pre-construction Phase Activities

This section provides an overview about the performed activities of THL on land acquisition and compensation (LAC).

##### A. Construction of Access Roads

The construction of about 5.5 km access road have been completed in November 2017. It concerns the road from the RCC Bridge towards powerhouse access tunnel and further to the tailrace outlet, and the access road from Chapaghat to the Seti Bridge.

##### B. Construction Power Sub-Station 33/11 kV

The construction of a 33/11 kV sub-station nearby the camp site has been completed, including latest work on a6/8 MVA power transformer and its accessories, two 33 kV and 11 kV panel boards, and conductor stringing work of the 11 kV line.

##### C. Construction of Camp Facilities

As of December 2017, the construction has progressed up to 70%. All together 33 buildings (2 office buildings for employer and consultants, 2 residential building of type A, 12 residential building of type B, 10 residential building of type C, 2 dormitories, 1 guest house, 1 health post, 2 restaurants and 1 guard house) are to be constructed as camp facilities.

Photo Documentation No.1: Pre-construction Works – Status October 2017	
	
Camp site, power sub-station and access road	Road between Chapaghat and Seti bridge

#### D. Payments of Compensation and Other Support

After 503 cases of receiving compensation payments of an amount of NRs 441,504,685.16 equivalent to rounded US\$ 4,228,952 during the 1st half-year 2017, further compensation and allowance payments to AHs were completed for another 247 cases of a total of NRs.151,030,880.32 equivalent to about U\$ 1,482,148. Based on the recommendation made by the sub-committee (formed by Compensation Determination Committee (CDC) for its support), CDC of Tanahu District fixed the compensation rates of private land, structure and trees dated 7 February 2017. According to the sub-committee's report 62.1 ha (1,186 Ropani) land of 336 AHs need to be acquired in the reservoir area. Type of payments, number of AH recipients and amounts are shown in **Table 1**, whereas details are listed in **Annex 1**.

Table 1: Overview of Payments to AHs

Type of Payment Made during 2 <sup>nd</sup> half of the Year 2017	AHs	Amount
	[no]	[NRs]
<b>Camp Site and Access Road</b>		
Compensation for structure	1	67,131.24
Allowances to vulnerable AHs	98	5,390,000.00
Allowance for displaced AHs	4	860,000.00
Payment for unexpected damage to crops caused by road construction work	7	151,291.32
<b>Subtotal Camp</b>	<b>110</b>	<b>6,468,422.56</b>
<b>Reservoir</b>		
Compensation for land	62	141,267,266.67
Compensation for structure	5	1,547,409.54
Compensation for tree	66	1,587,781.55
Allowances for landless AHs	4	160,000.00
<b>Subtotal Reservoir</b>	<b>137</b>	<b>144,562,457.76</b>
<b>Total</b>	<b>247</b>	<b>151,030,880.32</b>

Compensation payments to AHs concerning access roads, THL camp and substation have been completed except for remaining supports for vulnerable and indigenous people. During this reporting period vulnerable assistance has been provided for (i) 93 case as Indigenous People, (ii) 4 cases as Dalit, and (iii) 1 case as women headed, all adding to 98 vulnerable AHs each receiving NRs 55,000 equivalent to about US\$ 534. Other cases of vulnerability will be known after the result of the socio-economic survey will be available during 1<sup>st</sup>quarter 2018. For the reservoir area the determination of the compensation calculation has been completed and compensation payments are also ongoing except for additional support to vulnerable and indigenous people. For further access roads, Contractor's site installation and disposal areas, final land requirements will have to be decided at the beginning stage of the construction phase depending mainly on proposed and finally chosen alignments as proposed by the contractor's construction design.

An update about land acquisition and compensation payment will be prepared by the Draft UpRIPP Pre-Construction Phase and then be included in the next SSMR. The status of Preparatory Pre-Construction Works and Compensation Payments is shown in **Table 2**.

Table 2: Status of Preparatory Pre-Construction Works and Compensation Payments

SN	Item	Status	
		Completed	Ongoing
1	THL campsite and access roads (7.7ha, 150 HHs)	<ul style="list-style-type: none"> <li>➤ Determination of compensation rate;</li> <li>➤ Distribution of compensation of structure, land and tress (100%)</li> <li>➤ Distribution of displacement allowance (100%); and</li> <li>➤ Payment verification by NGO through Due Diligence Report.</li> <li>➤ Acceptance of DDR and reimbursement of compensation costs from ADB to THL.</li> </ul>	<ul style="list-style-type: none"> <li>➤ Vulnerable allowance; and</li> <li>➤ Skill development training.</li> </ul>
2	Reservoir area including dam (62 ha, 336 HHs)	<ul style="list-style-type: none"> <li>➤ Determination of compensation.</li> </ul>	<ul style="list-style-type: none"> <li>➤ Distribution of compensation of structure, land and tress (89% based on number of affected HHs);</li> <li>➤ Distribution of displacement allowance (83%);</li> <li>➤ Additional assistance to non-titleholder (85%);</li> <li>➤ Vulnerable allowance dependent on currently conducted SESA; and</li> <li>➤ Skill development training</li> </ul>
3	Access roads	<ul style="list-style-type: none"> <li>➤ Under the process of final site inspections, then</li> <li>➤ Detailed measurement surveys to be done.</li> <li>➤ Most access roads construction design by the civil contractor are pre-condition for any verifications, site inspections, DMS and land acquisition.</li> </ul>	
4	Installation site and disposal areas		

## E. Income Restoration and Rehabilitation

Among others, the first tasks of the ESMSP will be the preparation of a detailed Income Restoration and Rehabilitation Plan although this component is at its very initial stage, there are the following items to be documented.

### E-1 Skill Development Training

After the Board Approval THL contracted the Rural Training Centre (RCT), a training wing of the Council for Technical Education and Vocational Training (CTEVT) Bhimad for conducting certified level-1 skill development training to APs. As reported in the previous reporting period, the registration for vocational training was completed in the 3 quarter 2017, so that a 3 months training session for 60 AHs (see **Annex 2**) could start on 2nd November 2017. It is composed of two courses for building electrician for 40 and one for plumbing for 20 participants with a total of 390 lesson hours. This is the first Project's support to AHs through training, which will also serve as lesson learnt for next training sessions, about which the next SSMR will report.

The training has its focus on following areas on (a) building electricity, (b) masonry, (c) plumbing, (d) off-season vegetable production, and (e) community livestock assistance.

The skill development training will support the APs for their livelihood restoration and enhancement. The area of training can be modified to other fields such as masonry, off-season vegetable production and community livestock assistance after reacting on demands of participating APs. The priority for placement in training will be given to AHs in general, and in particular to permanently displaced people, vulnerable and indigenous people during selection of participants.

Photo Documentation No.2: Vocational Training for AHs – Status October 2017	
	
<b>Inauguration</b>	<b>Training session</b>

## E-2 Current Livelihood Situations

It should be noted that this situation will remain the same for the current pre-construction but also for most of the construction phase. No AH had experienced a forced loss of income, access to income sources or other source of livelihood, as they were permitted to use their compensated assets as long as possible until the actual use of the acquired land along the access road and camp site by THL. This applies to a much bigger scale and extent to AHs of the reservoir area, where the APs can use the land, houses and trees, for which they have already received or will receive their preferred in-cash compensation, over the coming years in agreement with THL, so that there is no immediate adverse impacts on their livelihood. Thus, AHs have actually and individual flexibility how and when to react on the known changes. This offers a several year-long period for planning, preparing and implementing a livelihood and income restoration program.

### 3.1.2 Construction Phase Activities

Nothing to report

## 3.2 Compliance Monitoring

The Project needs to confirm the satisfactory implementation of agreed activities termed Compliance Monitoring. Routine-wise collected information showing non-compliance would be expected to result into clarification between the project partners for further implementation of agreed activities and measures.

Compared with the SSMR for the 1<sup>st</sup> half-year 2017, there is nothing new to report for the 2<sup>nd</sup> half-year 2017 concerning the **sections 3.2.1** Legal and Policy Requirements, **3.2.2** Social safeguards, **3.2.3** Resettlement Planning Requirements, and **3.2.4** Independent Compensation Verification through NGO.

## 3.3 Impact and Mitigation Monitoring

### 3.3.1 Need for Data and Information Collection

Compared with the SSMR for the 1<sup>st</sup> half-year 2017, there are no specific items to report about for the 2<sup>nd</sup> half-year 2017.

### 3.3.2 Project Impacts

As per Draft RIPP dated 2012, the Project requires 112 ha private land for construction of access road, camp site and reservoir area. A total of 758 households will be affected including 86 households being permanently displaced of which some are non-titleholder. The detail of project

impacts remain the same as shown in the SSMR for the 1st half-year 2017, there is nothing new to report for the 2nd half-year 2017 PSC.

In this context, should be noted that the preparation of a Draft UpRIPP Pre-Construction Phase has started in October mainly with reviewing available and new data, and continued in November and December with data compiling and inputting. This will be completed in January 2018 so that the specific tables required for ADB resettlement plans can be prepared. The preparation of the updated resettlement document will be finalized in the 1<sup>st</sup> quarter 2018. This will then also provide updated data instead of those in the Draft RIPP 2012 being still used in the SSMR.

### **3.3.2 Census Survey**

The checklist and questionnaire for the census survey of AHs have jointly been prepared by ESMU, its contracted Bridging Consultant (Social Safeguard Specialist) with the support from the Nepal Resident Mission of ADB. The socio-economic census of the AHs in 2017 will update the survey results of AHs conducted in 2011/12 during the PPTA which served as basis to prepare the Draft RIPP dated December 2012. The updated census started in May 2017, completed 205 questionnaires until June 2017. During the reporting period further 227 surveys of AHs are managed so that a total 432 household questionnaires were completed by December 2017. The results of this updated survey will be used for (i) describing impact and baseline situation of AHs, (ii) categorizing AHs (vulnerability, others), (iii) profiling APs for mitigation measures (livelihood support, AP profiles for job opportunities, training requirements, etc.) and (iv) others.

### **3.4 Livelihood Support**

There is nothing to report under this heading. First, the income restoration and rehabilitation component will be updated including monitoring tools for as they intend to maintain or improve quality of life for APs. The SSMRs will thereafter highlight and discuss the nature and scope of the livelihood restoration programs including overview about eligible APs, expected and occurring benefits, and other aspects.

## **4. COMPLAINTS AND GRIEVANCE REDESS MECHANISM**

### **4.1 Key Steps of GRM**

The GRM procedures for land acquisition and compensation are integrated into the land acquisition process as defined by the Land Acquisition Act 2034 (1977). This SSMR lists again the five steps, as detailed in **Table 3** with actions and responsibilities, similar to the presentation given in the Project's Resettlement Framework.

### **4.2 Implementation Status of GRM**

Taking into consideration of the range of grievances, the most significant ones in terms of complainants and issues have been included below, as they are representing the most frequent topics raised throughout the year of 2017.

Table 3: Land Acquisition Process

Steps & Detailed Action	Responsibility
<p><b>I The Beginning</b></p> <ul style="list-style-type: none"> <li>▪ Sectoral agency decides to execute a development project of public interest at a particular location</li> <li>▪ The Agency requests the Government to acquire land specifying objectives and committing payment of compensation and other expenses</li> <li>▪ The Government approves and orders to initiate acquisition process specifying the Officer in Charge to initiate the process</li> <li>▪ Compensation Fixation Committee activated as per LA 2034</li> </ul>	<p>Sectoral agency</p>
<p><b>II Initial Process</b></p> <ul style="list-style-type: none"> <li>▪ Public notification is issued at public places in the proposed project area, respective VDC Office, and to the affected households.</li> <li>▪ Necessary basic surveys Investigations including boundary demarcations are done after 3 days of the issuance of notification.</li> <li>▪ Any damage/losses of crop, structures, trees incurred during preliminary investigations, are compensated by the officer designated. APs can file complaint, if not satisfied with the compensation paid by officer designated, within 15 days of the fixation of compensation, to Chief District Officer (CDO).</li> <li>▪ CDO addresses the grievances and its decision is final.</li> <li>▪ The officer designated (Project Chief, in this case) submits report to CDO (Local government Officer) on total area required. This report contains the loss details and the compensation amount determined for payment. The task of preliminary investigation should be completed within 15 days of the initiation of surveys</li> </ul>	<p>Chief District Officer (CDO)/ Compensation Fixation Committee.</p>
<p><b>III Notice of Acquisition</b></p> <ul style="list-style-type: none"> <li>▪ CDO issues notice of land (and asset) acquisition including details like location, plots with area, owner, and boundary together with the purpose of acquisition. The timeframe to transport salvage material or other assets are also specified in the notification.</li> <li>▪ All land transactions within the notified area are banned.</li> <li>▪ Legally, this is the cutoff date.</li> </ul>	<p>Chief District Officer (CDO)/ Compensation Fixation Committee.</p>
<p><b>IV Compensation, Eligibility and Procedure</b></p> <ul style="list-style-type: none"> <li>▪ Land and asset valuation and negotiation process takes final shape.</li> <li>▪ Asset owners fill-up forms to claim entitlement with documents within 15 days of notification (as of 9 above).</li> <li>▪ Compensation payment takes place.</li> </ul>	<p>Sectoral agency Chief District Officer (CDO)/ Compensation Fixation Committee.</p>
<p><b>V Grievance Addressal</b></p> <ul style="list-style-type: none"> <li>▪ The APs can file complaint within 7 days of notification excluding travel days to Government of Nepal through CDO.</li> <li>▪ The government i.e., Ministry of Home Affairs, will address the grievances within 15 days of the receipt of complaint. The Home ministry is endowed with legal power as of District Court.</li> <li>▪ The appeals if any, are addressed by the government or after lapse of such time frame final compensation payment and acquisition takes place.</li> <li>▪ If APs are not satisfied with resolution from government of Nepal i.e., Ministry of Home Affairs they can go to the formal court of appeal</li> </ul>	<p>Chief District Officer (CDO) Government of Nepal (Ministry of Home Affairs)</p>

#### 4.2.1 Complainants from two AP Representing Committees

These complaints have been part of the ADB Review Missions in March and November 2017, which were then followed up jointly by ADB Nepal Resident Mission and THL, and documented in the Aide Memoires of ADB missions.

As documented in the previous SSRM, this complaint started already in last quarter 2016, when two committees, namely “Hydropower Direct Affected Area Concerned Committee” and “Direct Concerned Reservoir Area Conservation Committee” on behalf of reservoir related APs submitted a 26-point demand letter to THL on 20 November 2016 over compensation rate for land acquisition in the inundation area. THL provided its responses to each of the 26 demands on 11 January 2017 and on 10 February 2017, those two committees issued a press release, stating that the compensation rates for land acquisition in the inundation area were not determined in a fair and transparent manner. The major concerns raised by the committees are about lack of participation of the APs in the CDC and non-satisfactory compensation rate for land.

During the current reporting period, THL continued discussions through regular consultation and meetings on compensation rate, compensation for partial land remaining and unidentified impacts, additional compensation for landless persons, and skill training plan etc. Finally, an agreement among THL, the “Hydropower Direct Affected Area Concerned Committee” and the “Direct Concerned Reservoir Area Conservation Committee” was concluded on 28 October 2017 on 21 points (there were 26 points, but based on a mutual understanding, decreased to 21 points as a result of discussions between the parties) leading to a status of satisfied clarification and achieved solutions as documented in **Annex 4**. This consensus has supported the progress in compensation and allowance payments. This agreement addressed almost all grievances mentioned in **Table 4**.

#### 4.2.2 Elected Local Level representatives

In the previous reporting period, THL with its ESMU team held a consultation meeting on 25 May 2017 with newly elected Mayor, Deputy Mayor of Vyas and Bhimad Municipality, Chairperson and Vice Chairperson of Myagde and Rising Rural Municipality. THL informed about the latest progress of the Project and emphasized on formation of Local Consultative Forum (LCF). THL also consulted with APs, along with CDO, Chief of Vyas Municipality and project affected Ward Chairperson of Vyas Municipality - 5 regarding the case filled at district court against THL by an AP concerning the access road from Chapaghat to the Seti Bridge.

During the current reporting period, the direct communication with the local authorities continued. LCF meetings at Vyas Municipality and Bhimad Municipality were conducted on 21 July 2017 and 23

July 2017 respectively in the presence of respective Mayor, Deputed Mayor of those Municipalities. Similarly LCF meetings at Rising Rural Municipality and Myagde Rural Municipality were conducted on 07 August 2017 and 09 August 2017 respectively in the presence of respective Chairperson and Vice Chairperson of those Rural Municipalities. In general, THL emphasized for the supportive and active involvement of LCFc to solve grievances, in particularly, concerning compensation issues. The meetings are documented in **Annex 3**.

#### 4.2.3 Local People’s Complaints

The THL Project site office registered 36 grievances raised by AHs. An updated summary presenting overview of grievances has been prepared under **Table 4**. ESMU with the supports of LCFs is making efforts to address them as far as possible. Further, THL and/or ESMU staff regularly consulted the district line agencies (District Administrative Office, District Forest Office, District Education Office, District Land Revenue Office, District Land Measurement Office, Office of Vyas Municipality etc.) regarding those issues.

Table 4: Issues and Status of Registered Complaints

Ser. No.	Relation to “21 Points List”	Topic/Issue of Complaint	Cases	Action	Status
1	Item 4	No counting and valuating of trees	15	To prepare inventory	To do
2		No valuation of structure	4	To verify	To do
3	n.a.	Remain of less than 1 ropani of an affected plot of land	6	To prepare inventory	Completed
4	Item 4	Low valuation of structure	4	None	Values are defined by CDC. Landless AHs are receiving additional support.
5	Item 1	No counting and valuating of private trees on public land adjacent to the affected private land	6	To verify	To do
6	Item 13	Request of issuing a status identification as affected household	All AHs	To prepare	In process

In general, the raised grievances will be discussed during meetings of the Local Consultative Forums (LCFs). After reviewing the grievances LCFs forward with recommendations for actions to be taken in order to address them.

## 5. CONSULTATION AND PARTICIPATION

### 5.1 Stakeholder Engagement Process

Compared with the SSMR for the 1<sup>st</sup> half-year 2017, there is nothing new to report.

### 5.2 APs’ Communication and Involvement

Compared with the SSMR for the 1st half-year 2017, there is nothing new to report. However, the Draft RIPP is being implemented in close consultation with the key stakeholders. Women’s and other vulnerable group’s participation has been ensured by involving them in public consultations at various levels and stages of project preparation, which enhances their ability to attend such

meetings. THL ensures that views of any AP related to the resettlement process are taken into account duly for addressing them. Various communication techniques are applied, as necessary, at different types of meetings, such as individual, family and focus group meetings.

### 5.3 Information Disclosure

The information is being disseminated through the Information Centers of THL, local media (newspaper and FM radio) as well as national media. The topics include mainly entitlements, project impact, compensation payment schedule and process. THL has already established two Public Information Centers (PICs), one integrated into the THL Project site office and one in Rising Patan. They are operated by ESMU full-time staff to provide Project related information to AHs and other key stakeholders. During the reporting period, it became obvious that APs appreciate for establishments of these physical points of contact for information dissemination of the project including safeguard aspects.

Photo Documentation No.4: Impressions from consultation and coordination meetings	
	
<b>Project Information Center in Rising Patan</b>	<b>Meeting of APs with THL and ADB in PIC</b>

The Executive Summary of the Draft RIPP 2012 has been translated in Nepali and is made available to the AHs. Hard copies of the RIPP are also made available at Public Information Centers and in Offices of the LCFs.

## 6. OTHER ACTIVITIES

### 6.1 Project Site Visits

THL and its ESMU continued, during the reporting period, its facilitation of site visit and field work for different teams including officials, ADB, PSC, and others. The notable one during the reporting period was the ADB Mission on environmental and social safeguard during 13-17 November 2017.

- Compensation determination procedure;
- Compensation evaluation criteria/basis;
- Compensation rate;
- Compensation distribution procedure;
- People grievance on compensation;
- Additional assistance;
- Reinstate of affected community properties;
- Livelihood restoration and enhancement provision for displaced and vulnerable people; and
- Possible community support program to affected people.

## 6.2 Engagement of ESMSP

The notice for Expression of Interest (Eoi) was published on 08 November 2017 for engagement of Environment and Social Management Service Provider (ESMSP). A total of 11 international firms have submitted their Eois within the deadline for submission of Eoi. The evaluation of the Eois are being carried out and it is expected that RFP will be issued to the shortlisted firms by the end of February 2018.

## 6.3 Engagement of NGO for Preparation of DDR

An agreement was signed with Rural Empowerment Society, Damauli on 07 November for preparation of following DDR reports regarding verification of the compensation payment in different areas of the project:

- Supplementary DDR covering vulnerable allowances in access road and camp sites;
- DDR for land acquisition and allowances distribution in Reservoir area;
- DDR for land acquisition allowances distribution in access road to dam site and camp facilities at Betini; and
- DDR for land acquisition allowances distribution in rest of access road, if any.

The NGO will submit the inception report in the first quarter of 2018.

## 7. CONCLUSION

### 7.1 Current Status

The Project is in its pre-construction phase. The current status can be summarized as follows:

- The preparatory construction work is progressing, as the sub-station and access roads have been completed, and the camp reaches a 70% completion status;
- Social safeguard activities are following principles as agreed in the Project's Resettlement Framework. THL puts its emphasis on acquisition of assets (land, structures, trees) and payments of compensation to AHs for their loss of assets and related allowances. Social safeguards will be for THL one of the topics requiring most attention in 2018; and
- It is expected that the ESMSP will be mobilized in the 3rd quarter of 2018. The important tasks of ESMSP with unchanged priorities will be the preparation of (i) an Income Restoration and Rehabilitation Plan (ii) a Stakeholder Engagement Plan including communication strategies (iii) a Community Development Plan and (iv) thematic and map based preparation of baseline and impact survey data.

### 7.2 Updating Resettlement Data/Information and Document

In general, the situation did not change in 2017. The currently applied resettlement plan document is the Draft RIPP prepared as part of the PPTA and based on a land requirement assessment and socio-economic surveys conducted in 2011 and 2012. As the Project is in its pre-construction phase and THL has already started the land acquisition and compensation payments since 2012, there is a need to prepare a pre-construction phase related Up RIPP.

Progress has been achieved during 4<sup>th</sup> quarter 2017, where data from surveys (DMS, Socio-economic survey of affected households, consultation, others) have been verified on completeness and quality controlled, before used for specific formatted tables required as standards for ADB resettlement plans. The preparation of the Draft Updated RIP Pre-Construction Phase will be finalized in 1<sup>st</sup> quarter 2018.

### **7.3 Expected Major Items for Next Reporting Period**

The expected major items for the next reporting period are as follows:

- The feedback of Skill development training should be available in the first quarter of 2018;
- Socio-economic survey of AHs will be completed in by February 2018 and the data will be analyzed and used for next reporting period;
- Consultation and information dissemination has been retrospectively summarized in tabular forms for the Draft UpRIPP Pre-Construction Phase and will be included in next SSMR;
- Other topics, such as livelihood restoration planning, community development strategy, communication planning, rural development and electrification and others will require first verification and updating, before actions can be defined and only then reporting is possible and
- Other ADB reporting requirements are to be reviewed and incorporated in next SSMR.

**Myagde Rural Municipality, 09 Aug. 2017**

## **ANNEX 3-4.4: Minute of Meetings concerning LFCs and their Committees Myagde Rural Municipality, 09 Aug. 2017**

### **Summary**

#### **Background**

In the presence of participating affected people a meeting has been called in by Myagde Rural Municipality as one of the affected local region chaired by Myagde Rural Municipality Chairperson for the proposed formation of a Local Consultative Forum (LCF) as per the provision of RIPP of Tanahu Hydropower Project under Tanahu Hydropower Limited dated on 9 August 2017.

#### **Numbers of Participants**

63 participants composed of affected persons, rural municipality representatives, local social worker, THL staff, and line agencies under Rising Rural Municipality.

#### **Outcomes**

Establishing Local Consultative Forum (LCF) under Myagde Rural Municipality as per the provision of the Draft RIPP of Tanahu Hydropower Project.

Committee of LCF: Composed of 11 members.

Chairman of LCF: Mayor of Myagde Rural Municipality Mrs. Maya Rana.

**ANNEX 4-1.1: Agreement of Understanding between THL and Committees (repr. AHs)**

**An Agreement understood between THL and Direct Affected Areas Concerned Committee” & “Direct Concern Reservoir Area Conservation Committee” in 21 point on October 28, 2017.**

एसियाली विकास बैंक, नेपालबाबासीयकार्यालयकाप्रतिनिधिको उपस्थितिमातनहुँजलविद्युतकम्पनी (तनहुँजलविद्युतवायोजना) र प्रत्यक्ष सरोकार हुवान क्षेत्र संरक्षण समिति, तनहुँतथातनहुँजलविद्युतप्रत्यक्षप्रभावित क्षेत्र सरोकार समितिबीचवायोजनाको साइट कार्यालय दमौली, तनहुँमामिति २०७४/०७/११ शनिबार भएका सहमतितथा निर्णयहरु In the presence of Representative of Asian Development Bank Nepal Resident Mission, Tanahu Hydropower Limited (Tanahu Hydropower Project), Direct Concerned Reservoir Area Conservation Committee, Tanahu and TanahuHydropower Direct Affected Area Concerned Committee have made an agreement on October 28, 2017, Saturday at site office, DamauliTanahu. Agreements and decisions are as follows:

S.N	Demand	Agreements and decisions
1	हुवानमा पर्ने ऐलानीभएपनिव्यक्तिले संरक्षण गरी हुकाएकाबोटविरुवाको क्षतिपूर्ति पाउनु पर्ने । Compensation should be paid for the trees that have been planted and conserved by title holders even in the public land to be inundated.	हुवानमा पर्ने दता भएको जग्गाको साँघसँगजोडिएको जग्गामाव्यक्तिले लगाई संरक्षण गरी हुकाएकाबोटविरुवाको यकिन गरी आयोजनाले क्षतिपूर्ति उपलब्ध गराउने । तर, साँघसँगजोडिएको त्यस्तो जग्गाघनीले भने क्षतिपूर्ति पाउने छैनन् । Compensation would be provided after verifying for the trees that are planted and conserved by title holders only in those public land to be inundated, which are touched with the boundary of their land.
2.	खेत र पाखो जग्गाको हकमापाँचवर्ष सम्मको हुने आम्दानीप्रतिरोपनी खेतको रु १,००,०००/- र पाखोको हकमा रु ८०,०००/- नोक्सानीवापतउपलब्ध गराउनु पर्ने । Compensation amounting NRs. 100,000 per ropani per year in case of irrigated cultivated land andNRs. 80,000 per ropani per year in case of non-irrigated cultivated land for total should be provided.	जिल्ला कृषिविकास कार्यालय तनहुँले उपलब्ध गराएको दर अनुसार, वार्षिक उत्पादकत्वलाई धोक अधिकतमबजार मूल्यले गुणा गरी हुनआउने मूल्यको आधारमावार्षिक तीनवालीलाई ( अधिकतमफसलदिने वाली) उत्पादनहुने वालीमानी सोहीआधारमाहिसाब गरी हुनआउने रकमप्रभावितलाई जीविकोपार्जन तथाआयआर्जन सुविधाउपलब्ध गराउने । यस अनुसार, पाखो वारी र खेतकालागिप्रति रोपनीपाँचवर्षको हुनआउने जम्मा रकमक्रमशः रु ६३,०८३/- (त्रिसठी हजार वियासी रुपैयाँमात्र) र रु ९२,५९०/- (वियानब्बे हजार पाँच सयनब्बे रुपैयाँमात्र) का दरले उपलब्ध गराउने । यस्तो सुविधापुर्नस्थापनाहुनलग्ने पाँचवर्ष मानी एकमुष्टरूपमा एक पटक मात्रै उपलब्ध गराउने । The compensation amount as the livelihood restoration and income generation to the affected people will provided based on the yearly productivity (three crops with maximum productivity) and the rate as provided by the District Agriculture Office, Tanahu. Accordingly, the lump sum amount NRs 63,068 per ropani and NRs 92,590 per ropani for irrigated cultivated land

**ANNEX 4-1.2: Agreement of Understanding between THL and Committees (repr. AHs)**

		and non-irrigated cultivated land per ropani for five years will be compensated with consideration of the total five years as cultivation restoration periods,
3	<p>पूजा नभएका तर कमाई गरी आएका जग्गाको पनि माघि उल्लेखित २ नम्बर बुँदा अनुसार उपलब्ध गराउनु पर्ने । Those affected people not having land ownership certificate but farming on the land should also be compensated as per decision no 2.</p>	<p>त्यस्ता जग्गाहरु दर्ता गरी प्रमाण पेश गरेमा हाल जग्गा क्षेत्रको जग्गा कालागि निर्धारण गरिएको मूआब्जा दर बितरण गरिने । साथै उनीहरुलाई निर्णय नम्बर २ मा उल्लेख भएको थप सहायत समेत उपलब्ध गराइने छ । यस सम्बन्धमा प्रभावित परिवारले स्थानीय परामर्श मन्चमा गुनासो दर्ता गर्ने र उक्त मन्चले छनविन गरी आयोजना समक्ष पेश गर्ने । If those affected people submit the land owner certificate after registration their land, then they would be provided the compensation for the land at the rate fixed for the land of reservoir area. Moreover, they would be provided additional assistance as mentioned on decision no 2. For this issue, the affected household should register their grievances on the Local Consultative Forums (LCFs) and after studying, the LCFs would forward the same to the project for further action.</p>
4.	<p>सावजनिक संस्थालाई रकम बुझाई बसोवास गर्नेहरू कालागि जो जसको जति रकम बुझाएको प्रमाण हेरी परेको रकम फिर्ता गर्नु पर्ने । If affected people are living without no legal rights of land after paying certain amount to the public entities, such amount should be refunded based on the their proof.</p>	<p>आयोजनाले यस अघि नै अन्यत्रकहीं घर जग्गा नभएकालाई घडेरीबाट एकमुष्ट रूपमा रु ४,००,०००/- (रु चार लाख) दिने निर्णय गरिसकेको र त्यस्तो जग्गा मानेका संरचनाको क्षतिपूर्ति समेत दिने निर्णय गरिसकेकाले केही गर्नु नपर्ने । तर, छुटफुट भएको अवस्थामा पुनः नापजाच गरी क्षतिपूर्ति उपलब्ध गराउने । As the project has already made the decision to pay the lump sum amount of NRs. 400,000 to each household, who have no legal rights of land but has been living with their houses and has no legal land ownership title (even the single family member) elsewhere in addition to the compensation for the structures, no further action will be required for such cases. But, in case such of any left over for those compensations, compensation amount could be provided after re-measurement.</p>
5.	<p>एउटै साँघसिमानामा फरक मूल्याङ्कन भएकोमा जग्गा एकै न गरी फरक परेमा बराबरी गर्ने । If lands in the same boundary lines have different valuations, same compensation amount should be made for such cases after scrutinizing.</p>	<p>एउटै साँघसिमानामा फरक मूल्याङ्कन भएको लागेमा त्यस्ता जग्गा घनीले किताखुलाई स्थानीय परामर्श मन्चको कार्यालयमा निवेदन दिने । उक्त मन्चले आवश्यक कारवाही कालागि आयोजना समक्ष पेश गर्ने । If land owners find different valuations for lands in the same boundary lines, they can submit their grievances on the Local Consultative Forums (LCFs) with details of land parcels. The LCFs will forward such grievances to the project for the</p>

**ANNEX 4-1.3: Agreement of Understanding between THL and Committees (repr. AHs)**

		further necessary action.
6.	<p>डुवान क्षेत्रका प्रभावितलाई प्राथमिकताका आधारमा क्षमतादक्षता अनुसार रोजगारी दिनु पर्ने । Affected People from the inundation area should be provided employment opportunities on basis of their capacity and skill on priority basis.</p>	<p>डुवान क्षेत्रका प्रभावितलाई क्षमता र दक्षता आधारमा आयोजनाको प्रावधान र नीति अनुसार नै प्राथमिकताका आधारमा रोजगारी दिइने छ । According to the provision and policy of the project, affected people will be provided employment opportunities as per their capacity and skill on priority basis.</p>
7.	<p>निर्माण कार्यमा स्थानीय स्तरबाट गर्न सक्ने स्थानीयलाई दिइनु पर्ने । The construction works, which can be done by local levels, should be given to locals.</p>	<p>सावजनिक खरिद ऐन तयानियमावलीमा भएको व्यवस्था र मुख्य ठेकेदारसंगको सम्झौताको परिधिमा रहेर आयोजनाले स्थानीय स्तरबाट गर्न सक्ने निर्माण कार्यलाई स्थानीयलाई उपलब्ध गराउन सिफारिस गर्ने । According to the provisions of Public Procurement Act and Regulations and within the provision of the contract agreement with the main contractor, the project will recommend to mobilize capable locals in construction works.</p>
8.	<p>८ जलाशयले ढाकिने क्षेत्रको मात्र मुआब्जा दिँदा आउँको जग्गामा खेती गर्न जोखिम हुने भएकाले ५ मिटर थप गरी मुआब्जा दिनु पर्ने । Compensation should be provided to additional five meters land beyond the boundary of reservoir level as there will be risks for farming on the lands close to the reservoir.</p>	<p>आयोजनाले प्राविधिक रूपमा अध्ययन गरी जलाशयले क्षति पुर्याउने ठाउँको आवश्यक संरक्षण गर्ने र संरक्षण गर्न असम्भव भई व्यक्तिको जग्गामा क्षति तथा असर पुग्ने भएमा जग्गा अधिग्रहण गर्ने । जग्गा अधिग्रहण गर्दा हाल डुवान क्षेत्रको जग्गाको लागि निर्धारण गरिएको मुआब्जा दर दिइने छ । After technical study, the project will carry out necessary protection works for the potential risk areas and if the lands cannot be protected thereby causing harm to the people's land, the project will acquire such lands. In case, if the project acquires such lands in future, compensation will be provided on basis of the same rate fixed for the reservoir area.</p>
9.	<p>जलाशय नजिक जोखिममा रहेका संरचनाको मूल्याङ्कन गरी क्षतिपूर्ति दिइनु पर्ने । Compensation should be provided to the risky structures nearby the reservoir after valuation.</p>	<p>जोखिममा पर्ने संरचनाको पुनर्निर्माण गर्ने वा क्षतिपूर्ति दिइने छ । The project will reconstruct or provide compensation for the structures that are in risk zones.</p>
10.	<p>हाल मोटर मार्ग संचालन भैरहेका स्थानमा जलाशयको कारणले अवरोध पुर्याएमा मोटर ररेबल पुल बनाइ दिनु पर्ने । If existing road access are disturbed because of the</p>	<p>म्याग्दे र रिसिङ गाउँपालिका जोड्ने गरी सेती नदीमा र बाइटाङ खोला तथा फेदी खोलामा प्राविधिक रूपले सम्भाव्य देखिएमा आयोजनाले मोटर ररेबल पुल बनाइ दिने । Based on the technical viability, the project will construct bridges on Seti River to join Myagde</p>

**ANNEX 4-1.4: Agreement of Understanding between THL and Committees (repr. AHs)**

	reservoir, motorable bridges should be constructed.	and Rising Rural Municipality, on Wangtang Khola and Phedi Khola.
11.	हुवान क्षेत्रका समुदायकामानिसहरुलाई आयआर्जनमूलकव्यवसाय संचालन गर्न तालिम तथा विडपूजिाको व्यवस्थामिलाउनु पर्ने । Entrepreneurship development Trainings as well as seed money should be provided for affected people of inundation area to operate income generation businesses.	आयोजनाप्रभावितव्यक्तिहरुलाई व्यवसायीकतालिम सञ्चालन गर्न तथाप्रभावित परिवारलाई आर्थिक आयआर्जनको व्यवसाय संचालनका सामुदायिकविकास कार्यक्रममाउल्लेख भएअनुसार गर्ने । Entrepreneurship development training will be conducted for the project affected people of inundation areas. The affected household would be provided further facilities as mentioned on Community Development Programme for operating income generation businesses.
12.	जलाशयको कारणबाट हुवानमा पर्ने फोलुङ्गे पुल सम्भाव्य स्थानमा स्तरीय (सस्पेण्डेड) पुलवनाउनु पर्ने । जलाशयको कारणबाट स्थानीयवासीलाई आवतजावतमा सहजताल्याउन आवश्यक स्थानमा फोलुङ्गे पुलवनाउनु पर्ने । Suspension bridges, which will be inundated by the reservoir should be reconstructed at feasible locations. Suspension bridges should also be constructed at required places in case the movement of local people would be affected due to reservoir.	जलाशयको कारणबाट हुवानमा पर्ने फोलुङ्गे पुलको लागि स्थानीयवासीलाई आवतजावतमा सहजहुने गरी प्राविधिकरूपमा सम्भाव्य स्थानमा सामुदायिकविकास कार्यक्रममाउल्लेख भएअनुसार गर्ने । As per the provision of Community Development Programme, the project will construct suspension bridges on the technically feasible locations to facilitate movement of local people.
13.	प्रभावितलाई परिचयपत्रदिइनु पर्ने । Provide Identity Cards to affected people.	आयोजनाबाट प्रभावितलाई प्रभावित परिचयपत्रदपलब्ध गराउने । The project will provide the identity cards to affected people.
14.	खहरे खोलाको पुर्याउने क्षतिव्यवस्थापनगर्नु पर्ने । Damages to be caused by by ravines shall be managed.	खहरे खोलाबाटहुन सक्ने क्षतिको प्राविधिकअध्ययनपश्चातएकिन गरी आयोजनाले व्यवस्थापनगर्ने । After the technical study, the project will manage the damages to be caused by ravines.
15.	एडीबीको सुरक्षण नीतिअनुसार 'ख'बर्गको जग्गाधनीलाई मुआब्जादिनु पर्ने । Compensation should be provided to 'B' category landowners as per the ADB Safeguard Policy.	जग्गाधनीले लालपुर्जा पेश गरेमाआयोजनाले मुआब्जाउपलब्ध गराउने छ । The project will provide compensation if the landowners present their land ownership certificates.
16.	भौगर्भिक अध्ययनगर्ने । Geological study shall be conducted.	जलाशयका कारण जोखिममा पर्ने स्थानको आयोजनाले भौगर्भिक अध्ययनगर्ने छ । The project will conduct geological study of risk

**ANNEX 4-1.5: Agreement of Understanding between THL and Committees (repr. AHs)**

		prone areas within the reservoir.
17.	स्वास्थ्यजाँच गर्नु पर्ने । Health check-up should be carried out.	आयोजनाको प्रावधानभित्र भएको र पूर्णरूपमा कार्यान्वयन गरिने छ । It is included within the project health and safety policy and the project will implement entire provisions.
18.	कार्यालय उपलब्ध गराउनु पर्ने । Office should be provided.	आयोजनाकार्यान्वयन समन्वय समिति गठन गर्ने र उक्त समितिको लागि आयोजनाले कार्यालय कक्ष उपलब्ध गराउने । Project Implementation Co-ordination Committee shall be formed and the project will provide office to that committee.
19.		आयोजनाप्रभावित परिवारलाई आयोजना सञ्चालनमा आएपछि प्राप्त हुने रोयल्टी बाँड्न प्राप्त हुने रकमबाट प्रभावितलाई पेन्सन व्यवस्था हुन उच्चतहमा लैजान सरोकार समितिहरूबाट अनुरोध भएको । The concerned committees further requested to raise the issues for the provision of pension to the project affected households from the royalty of the project after its operation to the higher levels.
20.		स्थानीय जन गुनासोहरू स्थानीय परामर्श मञ्चमा पेश गर्ने र उक्त मञ्चले आवश्यक कार्यका लागि आयोजना समझसिफारिस गर्ने । Local grievances would be submitted to the Local Consultative Forums (LCFs) and the LCFs will recommend the project for the necessary readdress.
21.		आयोजना र प्रत्यक्ष सरोकार डुवान क्षेत्र संरक्षण समिति, तनहुँ तथा तनहुँ जलविद्युत प्रत्यक्ष प्रभावित क्षेत्र सरोकार समिति बीच भएको माथि उल्लेखित सहमतितथा निर्णयहरू कार्यान्वयन गर्ने निर्णय गरियो । साथै आयोजनाको डुवान क्षेत्रको जग्गाकालागि मूआब्जानिर्धारण समितिले मिति २०७३/१०/२३ गते निर्धारण गरेको दर अनुसार मूआब्जा बुझिलिन र बुझ्न बाँकीलाई मूआब्जालिनकालागि आग्रह गर्ने समेत निर्णय भयो । The project, Direct Concerned Reservoir Area Conservation Committee, Tanahu and Tanahu Hydropower Direct Affected Area Concerned Committee are agreed to implement above mentioned decisions and agreement. Likewise, the three parties jointly appeal the affected people to receive the compensation fixed by the Compensation Determination Committee on February 5, 2017.

### **Extract on compliance to social safeguard covenants**

Extract of:

“Tanahu Hydropower Project. Final Report on Verification of Compensation Payment for the Campsite and Access Road of Tanahu Hydropower Project; by Rural Empowerment Society Damauli Tanahu in cooperation with Tanah Hydropower Limited; September 2017”:

#### **Section F-8 Summary:**

23. Following are some of the key findings derived from site visit and discussion with different stakeholders;

- Compensation rate for the affected assets was fixed by the Compensation Determination Committee (CDC) chaired by the Chief District Officer (CDO) in accordance to the process as stipulated in Land Acquisition Act 1977.
- Compensation rate was fixed on replacement cost calculating the local market price, type of land and other assets, location of land, Government rate and consultation with local community including the affected households of each location.
- Each and every affected households were given opportunity to share their realistic opinion while fixing the land price.
- A final fixation rate for compensation was submitted to CDO for approval only after consensus of each affected households.
- Affected households were made aware about the total compensation they were entitled for.
- The displaced households were found satisfied with compensation they received from the project.
- Project or the Government did not deduct any tax or registration fees from the amount compensated to displaced households.
- Displaced households were given full opportunity to express their opinion on the compensation rate and submit their grievances with regard to acquisition and compensation.
- The compensation payment and receipt process were carried out appropriately as per the predetermined procedure set by the CDC.
- The households having impact on their structures have been found shifted to their new houses constructed after receiving compensation from the project.

#### **Section H. Conclusion and Recommendations:**

41. The payment verification shows that compensation for land acquisition and relocation costs has been distributed to 150 HHs in access road and campsite area. In addition, all total 28 displaced families have received the relocation allowances in the form of housing displacement allowance, rental allowance and transfer of materials allowance as provisioned in RIPP.

42. It is verified that the compensation payment to all affected HHs was distributed in a transparent way. The key entitlement provisions for compensation were replacement rates while compensating for land and structures and for the loss of crops and trees etc. The compensation rate was determined as replacement cost based on negotiation with the affected households. As the due considerations were given to the government rate, the prevalent market rate and the expected rate of the APs along with the consensus from the local political parties while determining the compensation rate, the compensation rate of acquired land seems to be high in comparison to expected productive value and is suitable in accordance to local market conditions. The entire acquisition and compensation activities was processed through involvement of multi sector stakeholders (e.g. District Administration Office, District Land Survey Office, District Land Revenue Office and other district and local level representing institutions etc.) and closely observed by the civic society of project affected areas and local journalists.

## **ANNEX 5-1.2: DDR Campsite/Access Road**

### **Extract on compliance to social safeguard covenants**

43. The grievance redress mechanism was followed in accordance to the provision made in Land Acquisition Act 1977. Almost all displaced households have been resettled in the same area and those who have received relatively heavy compensation have also been found maintaining their settlement even beyond the project districts as additional assets. The entire acquisition process has followed the existing administrative arrangements and fund channeling mechanism. Any transaction related risks are not likely to arise as the entire acquisition and compensation was supported by sound monitoring and evaluation arrangements from the District Administration Office with the support of other relevant stakeholders.

44. The compensation payment to affected HHs for land acquisition and resettlement costs in access road camp site area made before the loan effectiveness date but not earlier than 12 months before the loan signing date was NRs. 392,892,367.36, which is found to be eligible for Retroactive Financing from the ADB as provisioned in the Amendment to loan agreement dated 08 September 2016. Further, the compensation payment as relocation allowances to displaced HHs after the date of loan effectiveness was NRs. 6,020,000, which is found to be eligible for Normal Financing from the ADB as provisioned in the loan agreement dated 22 April 2013. Hence, the total amount of compensation payment eligible to be reimbursement from ADB amounts to NRs. 398,912,367.36 (USD 3,871,432.14 as of Exchange Rate of 06 July 2017).

45. As all the key reimbursement related eligibility criteria as set forth in Project Administrative Manual (PAM) and the amendment to loan agreement for retroactive financing are fulfilled and other requirements of RIPP and ADB safeguard Policy Statement are complied, it is recommended that ADB should make reimbursement of total amount of NRs. 398,912,367.36 to THL as compensation payment made to affected HHs for land acquisition and resettlement costs in the access road and camp site area.
