Executive Summary

The Environmental Clearance for 118 MW Nikachhu Hydropower Project was accorded on July 01, 2015. With the receipt of clearance construction of access roads were awarded in November 2015 pre-construction works including access road construction was awarded in November 2014 followed by water supply arrangement, construction power supply arrangement and contractor construction facilities.

The main package works have not yet been awarded and project is still under pre-construction phase due to which the impact experienced is minimum. THyE has been monitoring all aspects of Environment and Social well being in line with the EMP and RP approved by ADB. No major environmental and social issues were experienced except at those areas were inevitable.

The main construction work has not begun, however, implementation of relevant Environment Management Plans and Resettlement Plans have been carried out. Environmental Management Plan (EMP) is based on the analysis of project activity interactions with the baseline features in the project area. The EMP reflects all identified impacts and required mitigation measures, as well as monitoring programs, in conformity with the requirements of the Royal Government of Bhutan, while also being compliant with the Environmental Safeguard Policies of ADB. The Environment Management Plan for following items, during pre-construction phase was proposed:

- Land Acquisition (temporary and permanent);
- Mobilization of equipment;
- Influx of workers;
- Fuel storage;
- Biodiversity and Wildlife management;
- Solid waste management;
- Project water supply system;
- Construction work management;
- Fisheries development plan;
- Catchment Management Plan;
- Transmission line alignment.

Some of the items like mobilization of equipment, influx of workers and fuel storage are not highlighted at this stage since the main contract package has not been awarded. All the management plans that are to be implemented at site were complied and some plans such as Biodiversity Management and Catchment Management involving government counter-parts are at the finalization stage.

1.0. Introduction

1.1. Brief Project Description

Tangsibji Hydro Energy Ltd (THyE) fully owned by Druk Green Power Corporation Limited was incorporated, on April 25, 2014, as a Special Purpose Vehicle to develop 118 MW Nikachhu Hydropower Project. The 118 MW Nikachhu Hydro Power Project was identified in the updated Power System Master Plan (PSMP) of Bhutan (2004). The Pre-Feasibility Study (PFS) that was completed on 31 December, 2011 followed by Feasibility Study in September 2012. The Detailed Project Report was completed in September 2013.

Bhutan Consultants & Research (BHUCORE) carried out Environmental and Social Impact Assessment (ESIA) of the Nikachhu project on June 1, 2012, and revisions to the ESIA report have been made by PWC India consultants under the technical assistance of Asian Development Bank (ADB). The report constitutes three parts comprising ESIA, Environment Management Plan (EMP) and Resettlement Plan (RP)

With an estimated energy generation of 491.52 MU, 85 % shall be exported which will not only enable revenue generation for the nation but reduces Green House Gas emission in the neighbouring country by replacement of fuel by clean and renewable energy, hydropower. Further, the outflow of Nikachhu into Mangechhu reservoir provides additional 323.77 MU to Mangdechhu Hydro Electric Project

.

Nikachhu Hydropower Project is located in Trongsa and stretches over 25 km from Dam, at Lorim, to Power House, at Norbuodi with 12.14 km Head race Tunnel (HRT) having five intermediated tunnels, ADITs. With the construction of 38 m high dam, 12.28 acres of land will be impounded by 810 m water back-flow.

1.2. Project Progress Status and Implementation Schedule

During this pre-construction stage, infrastructure facilities such as access road of 17.411 km, about 8 km construction power line, water supply arrangement, residential, labour camps and offices were constructed. The detail is as provided below in the Table 1.1.

2.0. Compliance to National Regulations

2.1. Terms and Conditions of Environmental Clearance

Table 2.1 compliance with Environment Clearance

Sl.no	Reference to Environmental Clearance	Relevant Condition	Compliance
1	Clause 9	The holder shall ensure that the implementation of the proposed project is strictly confined within the allocated area.	Complied.
2	Clause 15	The holder shall ensure that local residents, households, communities, public, private parties and religious, cultural, historical and ecologically important site are not adversely affected by the construction of proposed project.	Complied, except for the household below the access road of Adit-III, which has been damaged by falling rock. However, a

			new house had been constructed with better facilities and handed over to the owner.
3	Clause 18	The holder shall ensure that the implementation of the proposed project, except the Dam, does not lead to blockage, storage or diversion of river, stream, irrigation channel, waterfall and underground water source.	Complied.
4	Clause 19	The holder shall ensure that a buffer of at-least 100 ft is maintained between the project activities and water streams.	Maintaining buffer from streams were not practical where the road alignment has to cut the water body. However, mitigation measures, for elimination of impact on water, such as causeways, and hume pipes were constructed.
5	Clause 21	The holder shall ensure Biodiversity Management Plan and Compensatory Afforestation Program are implemented in co ordination with the DoFPS to minimize biodiversity impacts.	Complied.
6	Clause 22	The holder shall ensure that the construction works at Adit-II are not carried out from 10 pm to 6 am.	Complied.
7	Clause 24	The holder shall ensure that felling of trees if required are done only upon obtaining approval from DoFPS and as per the conditions of the approval.	Complied.
8	Clause 28	The holder shall ensure that Environment Friendly Road Construction techniques are adopted for construction of access roads.	Complied.
9	Clause 29	The holder shall ensure that the bio engineering practices are adopted on all road side slopes.	Complied.
10	Clause 30	The holder shall ensure construction of side drains, cross drains, causeways, and other supporting structures are required to prevent soil erosion, improve usability and sustainability of road .	Complied.
11	Clause 36	The holder shall ensure that no raw materials of any kind, machineries, plants and equipments and excavated	Not Complied due to space constraint at the access road

		materials are staked along the highway.	side.
12	Clause 37	The holder shall ensure safe and smooth flow of traffic along the highway.	Complied.
13	Clause 40	The holder shall ensure dusts are suppressed.	Complied.
14	Clause 46	The holder shall ensure that dump sites are stabilized with appropriate protection measures	Complied.
15	Clause 52	The holder shall ensure that waste generated from the labour camps and work sites are managed as required under WPMA of Bhutan.	Complied.
16	Clause 59	The holder shall ensure that safety gadgets are provided to all workers and any person entering the worksite.	Complied.
17	Clause 66	Ensure that signboard are erected at the starting point of the project area	Complied

3.0. Compliance to Environmental Covenants from the ADB Loan Agreement

3.1. Schedule 5 Environment (prepare a matrix to show how compliance was achieved)

Table 3.1 Compliance to Environmental Covenants

Sl.No	Relevant Condition	Reference	Compliance status
1	The Beneficiary shall ensure, or cause DGPC and THyE to ensure, that the preparation, design, construction, implementation, operation of the Project and all Project facilities comply with (a) all applicable laws and regulations of the Beneficiary relating to environment, health, and safety; (b) the Environmental Safeguards; (c) the EIAs; and (d) all measures and requirements set forth in each EIA and EMP, and any corrective or preventative actions set forth in a Safeguards Monitoring Report.	Financing Agreement, Schedule 5, Paragraph 3	Complied.
2	The Beneficiary shall ensure, and cause DGPC and THyE to ensure, that(a) there are no measurable adverse impacts on critical habitat that could impair its ability to function; (b) there is no reduction in the population of any recognized endangered or critically endangered species; and (c) any lesser impacts are mitigated. Without limiting the generality of the foregoing, the Beneficiary shall cause DGPC and THyE to establish a biodiversity management committee acceptable to ADB that (a) shall be	Financing Agreement, Schedule 5, Paragraph 4	Complied.

	responsible for implementation monitoring and evaluation of the biodiversity conservation and biodiversity management plan as outlined in the relevant EMP and (b) shall ensure that the Project facilities are constructed and operated in a manner consistent with the JSW National Park Management Plan		
3	The Beneficiary shall cause DGPC and THyE to (a) assess on a continuous basis, in accordance with the relevant EMP, the minimum environmental water flow requirements during the operation of the Project facilities; and (b) ensure a minimum water flow, at a level acceptable to ADB, so as to minimize downstream impacts and make sure there is no net loss of downstream aquatic biodiversity arising from the operation of hydropower facilities in the Mangdechu river basin, including from the Project facilities and the Mangdechu Hydroelectric project. The Beneficiary shall cause DGPC to establish a funding mechanism or internal resources to ensure integrated water resources management for the Mangdechu river basin, including compliance with the minimum environmental water flow requirements as set out in the preceding sentence	Financing Agreement, Schedule 5, Paragraph 5	Not relevant at this stage of project phase.
4	The Beneficiary shall ensure, or cause DGPC and THyE to ensure, that all land and all rights-of-way required for the Project, and all Project facilities are made available to the Works contractor in accordance with the schedule agreed under the related Works contract and all land acquisition and resettlement activities are implemented in compliance with (a) all applicable laws and regulations of the Beneficiary relating to land acquisition and involuntary resettlement; (b) the Involuntary Resettlement Safeguards; and (c) all measures and requirements set forth in the RP, and any corrective or preventative actions set forth in a Safeguards Monitoring Report.	Financing Agreement, Schedule 5, Paragraph 6	Complied.
5	Without limiting the application of the Involuntary Resettlement Safeguards, and the RP, the Beneficiary shall ensure or cause DGPC and THyE to ensure that no physical or economic displacement takes place in connection with the Project until (a) compensation and other entitlements have been provided to affected people in accordance with the RP; and (b) a comprehensive income and livelihood restoration program has been established in accordance with the RP	Financing Agreement, Schedule 5, Paragraph 7	Complied.
6	Submit quarterly Environmental Safeguards Monitoring Reports and semi-annual Involuntary Resettlement Safeguards Monitoring Reports to ADB	Financing Agreement, Schedule 5,	Complied.

	during construction of the Project facilities and annual Environmental Safeguards Monitoring Reports during operation of the Project facilities, and disclose relevant information from such reports to affected persons promptly upon submission;	Paragraph 11, bullet 'a'	
7	If any unanticipated environmental and/or social risks and impacts arise during construction, implementation or operation of the Project that were not considered in the relevant EIA, EMP or the RP, promptly inform ADB of the occurrence of such risks or impacts, with detailed description of the event and proposed corrective action plan;	Financing Agreement, Schedule 5, Paragraph 11, bullet 'b'	Complied.
8	No later than 31 March 2015 engage a panel of experts to monitor and report upon Project implementation, and facilitate the carrying out of any monitoring activities by such panel; and	Financing Agreement, Schedule 5, Paragraph 11, bullet 'c'	Complied.
9	Report any actual or potential breach of compliance with the measures and requirements set forth in the relevant EIA, EMP or the RP promptly after becoming aware of the breach.	Financing Agreement, Schedule 5, Paragraph 11, bullet 'd'	Complied.

4.0. Compliance to Environmental Management Plan

4.1. Biodiversity Management Committee

To constitute Biodiversity Management Committee (BMC) for effective implementation of Biodiversity Conservation Programme enlisted in EMP, besides THyE other members include from National Biodiversity Center (NBC), Royal Society for Protection of Nature (RSPN), Department of Forest and Park Services (DoFPS), Department of Livestock (DoL), and Dzongkhag Administration, Trongsa. The reports received from NBC are attached as **Annexure-I.**

4.2. Biodiversity Conservation Programme

A Memorandum of Understanding (MoU) was signed between NBC and THyE for rescue of rare endangered species, from Nikachhu project site, on December 08, 2014. Till date survey and rescue was carried out thrice as detailed below:

Table 4.1 Details of floral survey and rescue

Survey/Rescue	Date	Remarks
1st survey and rescue	February 26-March 06, 2015	Documentation of existing floral diversity of the Nikachu hydropower project sites.
2nd survey and rescue	April 09- 13, 2015	Rescued 14 species of Orchids.
3rd survey and rescue	August 19-30, 2015	18 plant species were collected and rescued.

The MoU was signed to augment baseline floral data in the project area and to rescue threatened species, if any, to prevent being destroyed during the main project construction.

Figure 1.1 Floral species rescued from project sites

In total 32 plants species were rescued from all the project sites. The rescued floral species are conserved ex-situ as living collection at the Royal Botanical Garden, Serbithang, Thimphu.

Figure 1.2 Orchid species conserved in Orchidarium at Serbithang, Thimphu.

THyE has approved contribution of Nu. 3.6 million to Forest Territorial Division, Zhemgang, for Botanical Garden construction at Tingtibi during the 15th Board Meeting on October 30, 2015

.

4.3. Human-Wildlife Conflict Management

Wild bores are the main predator to the crops of farmers. In view of the difficulty faced by the farmer, THyE had discussion with the Geog Administration on electric fencing agriculture lands. During a meeting on October 27, 2015 it was mutually agreed between the Forest Territorial Division, Dzongkhag and Geog Administration that electric fencing system shall be implemented by Department of Forest and Park Services for which Nu.1.5 million was approved.

4.4. Augmentation of Baseline Surveys

To augment baseline data of fish survey carried out in 2012, THyE has approved the proposal for aquatic survey by the College of Natural Resource, Lobesa. The proposal covers fish, butterfly and micro-invertebrate survey during the lean season. The survey shall be conducted from November to December, 2015.

4.5. Compensatory Afforestation

Of the 239. 802 acres of land acquired for project, only about 47 acres by the access road and about 8 acres for contractor construction facility have been cleared. However, Compensatory afforestation was initiated from the project site with plantation of 3,000 seedlings along the slopes of access road side at Surge Shaft and Power House. THyE has also planted 8,000 seedlings in the community forests of Tangsibji and Tshangkha in collaboration with respective community forest group members and Geog forest office.

Figure 1.3 Plantation at Community Forests

THyE has also approved contribution of Nu. 7.5 million to Department of Forest and Park Services for compensatory afforestation.

4.6. Catchment Management

The EMP requires various catchment management program comprising rapid classification of micro-watershed, assessment of critical micro-watershed and implementation of management plans. To implement the plan, THyE had discussion with Watershed Management Division (WMD) under DoFPS and found out that World Wildlife Fund (WWF) has already signed a project with the Department to carry out catchment management along Nikachhu, which also includes the project area of Nikachhu Hydro Power Project. WMD has been carrying out rapid assessment of watershed along Nikachhu from September 2015.

4.7. Panel of Expert

To monitor implementation of EMP an Environmental Expert and Social Development Expert was appointed. They serve as an independent consultant to THyE and back up Environment Unit for any environmental and social issues. The Panel of Experts (PoEs) visited site from February 26-28, 2015 for familiarization of site and from April 19-25, 2015 for consultation and monitoring project sites. The Experts also visited from November 15-22, 2015. The reports have positive feedback about the project.

Figure 1.4 Consultations by PoE

4.8. Aquatic Specialist

National Centre for Riverine and Lake Fisheries (NCRLF), Haa, under the DoL was approved to be appointed as the aquatic specialist to THyE due their expertise and availability of required equipments and man-power. THyE shall be signing MoU with the Centre for duration of six years.

4.9. Air and Water Quality Monitoring

After the award of pre-construction work, air and water quality and noise level were monitored on 15-16 July, 2015. The air quality parameters were all found within the standard while water quality parameters such as PH is 8.68 and 7.50 TU upstream of Dam which may be due to heavy rainfall that the catchment of Nikachhu is experiencing and 8.44 PH and 10.50 TU downstream of dam which may be contribution from road cutting as well. To mitigate any impact from project site the site engineer of contractor was asked to prevent falling of boulders and soil into the river. Monitoring was also done to prevent muck disposal into the river. During the monsoon, run-off from the slope of roads is inevitable. The quality monitoring report is attached as **Annexure-II.** The standard of water quality is attached as **Annexure-II (a)**.

4.10. Bio-Engineering

Although road works have not been completed, few bio-engineering works were done along the slopes of access road to power house and surge shaft to maintain stability. The works included plantation of seedlings and grass seed broadcasting. However, due to slide in many areas the growths of seeds were hampered. Therefore, it is planned to carry out the activities in the next season in collaboration with Department of Forest and Park Services. THyE has already approved Nu. 1.5 million from land management in the project site by DoFPS.

Figure 1.5 Seed broadcasting

4.11. Waste Management

For proper waste management around project area, cleaning campaign and waste seggregation was carried out from View Point till Tsheringma Drupchhu, in collaboration with Tshangkha Central School, on June 05, 2015.

Figure 1.6 Cleaning Campaign

Further, contribution of 25 nos. of garbage bins to Dzongkhag Administration, for waste management, was approved by the management. The Dzongkhag Administration shall be distributing to respective sectors.

For solid waste during the construction phase, THyE have asked Geog Administration to identify suitable area for landfill development in co-ordination with Forest Office. At the initial phase of project, THyE shall be using landfill at Chujapang owned by Dzongkhag Administration. The Procurement of Garbage Compactor Truck was also approved for collection of waste from community as well as from project sites.

4.12. Private Land

Most of private lands acquired for project construction are under Tsangkha Chiwog. Although only 3.577 acres of private land belonging to 11 households and One Community Primary School were indentified during the project planning stage, five additional households were affected during the actual road construction works as detailed below:

Table 5.1 Additional Affected Persons

Sl.No.	Name	Affected by	Plot No.	Area affected
1	Sumchokmo	Access road to Adit-I	TAN-3253	0.406

4	Pelden		TAN-1907	0.362
5	Rinzin Wangmo	Access road to Power House	TAN-1876	0.152
TOTAL				**1.596**

Consultations with the additional affected household were carried out and meeting done with them in presence of Geog administration to brief them on the type of compensation they are entitled to. Since the access roads are temporary, it was agreed to provide their land on lease for duration of project completion at the rate prescribed in the Land Lease Rule of Bhutan, 2009. A copy of letter of agreement is attached as **Annexure-III.** However, the PAP at Power House has asked for land compensation. Cadastral surveys are being carried out from October 5, 2015 to verify the actual impact of road construction to private lands that were already compensated. The detail is as shown below:

THyE after receiving survey reports from Dzongkhag Administration shall process for compensation as per the Land Act of Bhutan and ADB Safeguard Policies.

Figure 1.7 Consultation with PAPs

As identified in the Environment Impact Assessment Report, the 132 kV transmission line shall require acquiring 0.6 acres of private land at Drakten and Langthil. Since the work is scheduled to commence in June 2016, THyE has requested Dzongkahg Administration to process for land replacement which will be awarded as deposit work.

4.13. Government Reserve Forest Land

THyE has leased 195.262 acres of GRF land from the National Land Commission (NLC) with lease agreement signed on May 01, 2015. The leased land does not include access

roads which was agreed to be leased only after completion. Till date only about 47 acres for road and 8 acres for contractor construction facilities were used.

4.14. NamgayChholing CPS

Access road to Adit-III takes-off from a point at the farm road to Tangsibji village belonging to Namgay Chholing Community Primary School. 0.44 acres of land was affected by road construction for which land development cost, Nu. 75,000/acre, as provisioned in Resettlement Plan was provided. However, the Geog Administration requested for cash compensation and THyE shall disburse the amount as soon as the office receives letter from Geog.

4.15. Private House

At about 165 meters of access road to Adit-III from the take-off, a house was damaged due to a falling boulder from the access road. However, the mishap occurred only after the completion of all formation cutting of the roads and not during the work. The two storied house belong to Ms. Karma at Tangsibji Chiwog. Several discussions were held with the contractor, Affected Person (AP) and Geog Administration for compensation. It was agreed that the contractor shall re-build a new house for AP and the contractor has replaced all the household items that were damaged.

The new constructed house was handed over to the owner on December 30, 2015 and built in a better condition and improved facilities than earlier, with improved toilet and kitchen provision.

Figure 1.8 Reconstruction of affected house

4.16. Community Development Programme

Community Development Programmes (CDP) were enlisted in the Resettlement Plan (RP) in consultation with PAP and Geog and approved by ADB, DGPC and the Royal Government of Bhutan amounting Nu. 16.40million, excluding 10% contingencies. The programme includes blacktopping of Tangsibji Farm road from national highway till NamgayChholing CPS, which has been completed as part of infrastructure work. The estimated cost for the work is Nu. 10.00 million. Therefore, the balance amount for CDP is Nu. 6.40 million only. However, the Geog Administration has proposed for additional development programme, amounting Nu. 27.00 million which was revised by THyE and was approved in the 15th Board Meeting amounting Nu. 15.15 million. The additional development programmes includes Blacktopping of additional 2.5 km Tangsibji farm road, construction of Temple, study tour for geog officials involved in project service, an ambulance and establishment of Tsogpas' offices.

4.17. Blacktopping of Tangsibji Farm road

Tangsibji Farm road is used by over 77 households. During the mass public consultation meeting on December 27, 2014 for 118 MW Nikachhu Hydropower Project, it was agreed to Blacktop Tangsibji Farm road till Namgay Chholing Community Primary School. The prgramme is therefore listed as one of the Community Development Programmes in the Resettlement Plan (RP). Accordingly, the blacktopping of 2.8 km road was awarded as a package to Adit-III access road construction and has been completed.

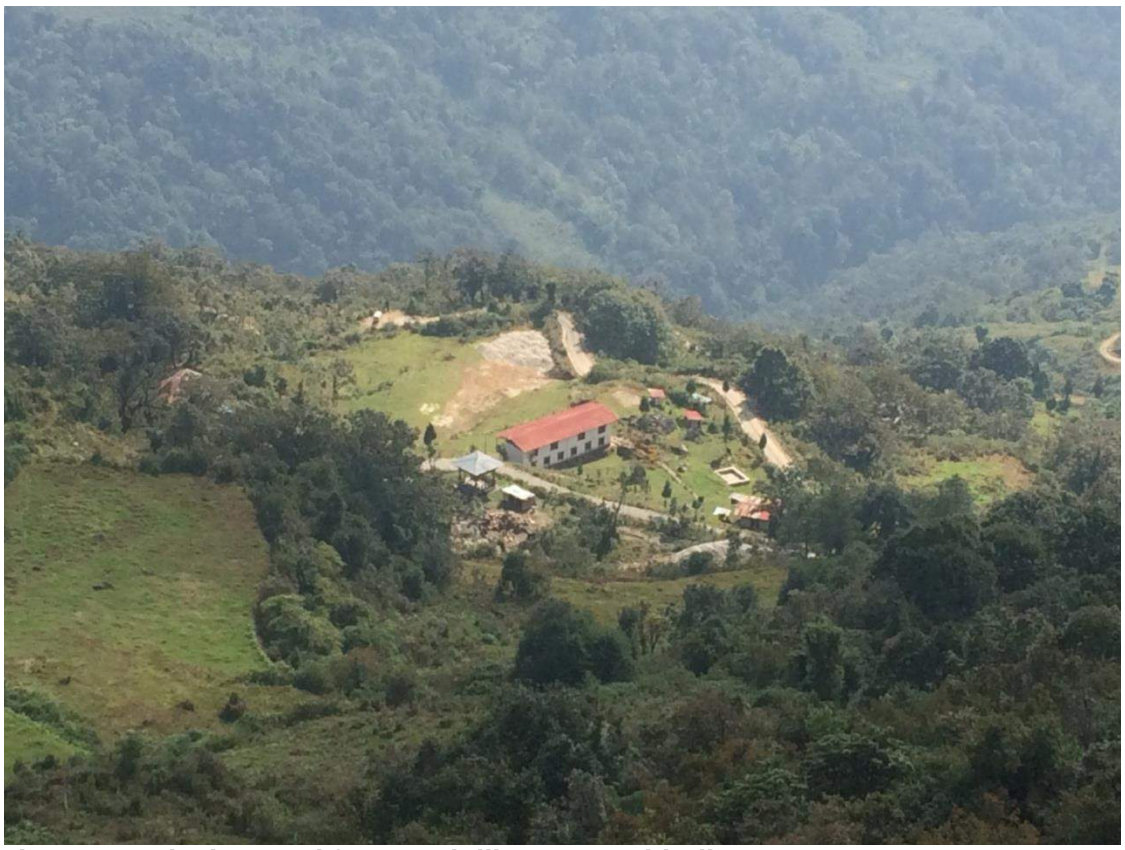

Figure 1.9 Blacktopped farmroad till NamgayChholing

THyE has also approved to continue Blacktopping for additional 2.5 km fully connecting the Highway with Tangsibji Village.

4.18. Income of Affected Persons (APs)

Tshangkha Chiwog has 25 households and almost every household has a nursery each. The main income is from the nursery and also from cash crop, potatoes. To enhance income generation, THyE have purchased over 10,000 seedlings from the APs which were planted in their community forest and also in the project area.

Further, while planting seedlings in the project area and also during the survey works, PAPs were hired to cater labour and earn income, thus, providing employment to them.

4.19. Aesthetics

THyE, with the assistance from contractors, contributed 30 cement bags to Tshangkha Central School to develop Botanical Park in the school campus for aesthetic and educational purpose. The cements shall be used for constructing footpaths and flower pots.

5.0. Safeguards Monitoring Results and Unanticipated Impacts

All the parameters of Environment Management Plan were complied. Besides THyE, the parameters are also monitored by DoFPS and National Environment Commission (NEC).

Unanticipated impacts have not occurred except at Adit-III access road construction. A boulder has damaged a two stored house at Tangsibji However, the house has been rebuilt with better facilities and improved condition. Household items were provided to the house owner. The new house has toilet, kitchen and water supply inside the house and also approached with an access road.

6.0. Implementation of Grievance Redress Mechanism and Complaints Received from Stakeholders

The Grievance Redress Committee with members from Dzongkhag Administration, THyE and Geog Administration was formed to address Grievance Redress Mechanism. Till date the committee did not receive any complaints from the stakeholders.

7.0. Conclusion and Recommendations

The project being in pre-construction phase does not have much environmental impact due to Environment Friendly Road Construction Method followed by THyE. The environment aspects are also strictly monitored by Forest Territorial Division and National Environment Commission.

For all social aspects, people do not have any grievance towards the project and indeed happy for the land development cost freedom to choose substitute land provided to them in addition to land replacement. The project has benefited Tangsibji community in terms of development, income (through rents, nurseries and livestock product) and employment.

Tour Report.

Rescue of plants and rapid assessment of the floral diversity in the Nikachu Hydropower project

Date and duration

- **26th February to 6th March 2015**
- **09th to 13th April 2015.**

Team Members (26th February to 6th March 2015)

1. Nima Gyeltshen, RBGS.
2. Pema yangdon, RBGS.
3. Tshering Wangmo, RBGS.
4. Dupchu Wangdi, RBGS

Team Member (09th April to 12th April 2015)

1. Nima Gyeltshen , RBGS
2. Kezang Tobgay, RBGS
3. Tsheringla, RBGS
4. Alexandra Davey, Royal Botanic Gardens, Kew Wakehurst Place(UK)
5. Kartherian, Royal Botanic Gardens, Kew Wakehurst Place (UK)

Aims and objectives of the tour.

1. Documentation of existing floral diversity of the Nikachu hydropower project sites.
2. To rescue prioritized plant species from the project sites for ex situ conservation at the Royal Botanical garden, Serbithang
3. To explore possibility of seed banking of the floral species of Nikachu hydropower project sites for ex situ conservation.

Introduction.

Rescue, rehabilitation and ex-situ conservation of plant diversity are some of the main objectives of the Royal Botanical Garden, National Biodiversity Centre, Serbithang. Therefore, in line with objectives, National Biodiversity has initiated a joint rescue and restoration collection program for the threatened and rare plant species from the Nikachu hydropower project sites.

During the first trip to Nikachu hydropower project sites, in line with the annual workplan, documentation of floral diversity in different Adits, Surge shaft and Dam sites were carried out. Further, few species which were recue-able were also rescued and conserved ex-situ as living collection at the Royal Botanical Garden, Serbtihang. List of floral diversity documented as well as list of species conserved as living collections are provided as annexes. During 2nd field trip, exploration and documentation of the floral diversity as well as exploration of species for seed banking were continued. Two expertis from the Millennium Seed Bank, Royal Botanical Garden, Kew, UK joined the field work, specifically to explore seed banking opportunities.

Conclusion.

14 live orchid species are collected and rescued from the project sites during the 1st trip to Nikachu hydropower project sites, while a total of 221 species of plants were documented from the Nikachu hydro project sites during first and second trip. However, in order to capture the full diversity, exploration and documentation has to be carried out in different season.

2nd Tour Report

Rescue of plants and rapid assessment of the floral diversity in the Tangsibji Hydropower Project

Date and duration

- **19th August to 30th August 2015**

Team Members

1. Sangay Dema
2. Nima Gyeltshen
3. Wangmo
4. Kezang Tobgay
5. Tsheringla
6. Kezang Gyelpo

Aims and objectives of the tour.

1. Documentation of existing floral diversity of the Tangsibji hydropower project sites.
2. To rescue prioritized plant species from the project sites for ex situ conservation at the Royal Botanical garden, Serbithang

Introduction

Rescue, rehabilitation and ex-situ conservation of plant diversity are some of the main objectives of the Royal Botanical Garden, National Biodiversity Centre, Serbithang.

Therefore, in line with objectives, National Biodiversity has initiated a joint rescue and collection program for the threatened and rare plant species from the Nikachu hydropower project sites.

During the second diversity assessment trip to Tangsibji hydropower project sites, resurvey and documentation was carried out in different parts of Adits, Surge shaft and Dam sites, which were missised during the first survey. Further, additional species which were recueable were also collected for ex-situ conservation as living collection at the Royal Botanical Garden, Serbtihang.

Results and observations

18 plant species were collected and rescued from Tangsibji hydropower project sites as living collection, based on the quantitative vegetation data from eight sites (5 Adits, Dame Site, Surge-Shaft and Power house). A total of 402 species belonging to 106 families were recorded. The tree vegetation belonged to 106 families (95 Angiospermous and 4 of Gymnospermous) and the rest comprised 37 orchid species, 6 bamboo species and 264 other herbaceous and shrubs species. During this second floral diversity assessment, additional 201 plant species was recorded form the project sites.

List of floral diversity documented form each sites along with result of the rapid assessment of the percent cover of each species, list of additional plant species documented from project site and the list of species conserved as living collections are provided as annexes.

Observation: The team observed that the revegetation on the sides of road towards Power house was done using conifer species (*Cupressus* species). As the sites fall in warm broad leaved forest zone, it is recommended that revegetation be done using the natives species of the locality such as *Erythrina* species, *Rhus* sp, *Alnus* etc

36	Floating Materials such as wood, plastic, rubber, excreta, garbage etc	Absent	Absent	-

NOTE:

A: (Very good)
Drinking water source without conventional treatment, but after disinfection whenever necessary.

B: (Good)
Drinking water source with conventional treatment.

C: (Moderate)
Uses for irrigation, industrial cooling etc.
**To achieve the drinking quality standard, disinfection/ boiling of the water is recommended. The total coliform may be high due to their*

contribution from natural sources like soil, litter etc. which does not relate to pathogen. If MPN of total coliform is noticed to be more than the limit suggested, then regular tests should be carried out. The criteria would be satisfied if during a period not more than 5% samples show greater than prescribed limit.

Aronyms:

SAR:	Sodium Absorbtion Ratio;
PAH:	Poly Aromatic Hydrocarbon;
MPN:	Most Probable Number;
PCB:	Poly Chlorinated Biphenyle;
BOD:	Biochemical Oxygen Demand;
DO:	Dissolved Oxygen

2) Industrial Effluent Discharge Standards (September 2010)

32	Zinc total (Zn)	**3.0**		2.0	2.0		

NOTE:

The generic standard will apply unless otherwise stated.
All units in mg/L unless otherwise stated

* For color and odor, it is recommended that, as far as practicable, color and unpleasant odor should be absent in the samples.
** Temperature of the receiving water bodies shall not exceed 3 degree Celsius from the ambient in any section of the streams within 15 m downstream from the point of effluent discharge.

3) Standard for final effluent from Sewerage Treatment Plant (STP)

Sl #	Parameters (Max Permissible Limit)	Concentration not to exceed
1	BOD(mg/L)	30
2	TSS(mg/L)	100
3	Fecal Coliform(MPN/100 ML)	1000

4) Ambient Air Quality Standards (Maximum Permissible Limits in $\mu g/m^3$

Parameter	Industrial Area	Mixed Area*	Sensitive Area**
Total Supended Particulate matter			
24 Hour Average	500	200	100
Yearly Average	360	140	70
Respirable Particulate Matter (PM 10)			
24 Hour Average	200	100	75

Horizontal/Rotary Kiln, Vertical Shaft Kiln and other Kiln	150	100	100	50
Other Technologies: for sectors that are not covered in the above sections	150	100	100	50

6) Workplace Emissions for 8 hour average

Parameter	Standard
Total Suspended particulate	10mg/m3
Respirable Particulate Matter	5mg/m3
Sulfur Dioxides	1mg/m3
Nitrogen Oxides	1mg/m3
Carbon Monoxide	5mg/m3

7) Vehicle Emission Standards

Fuel Type	Vehicles registered prior to 1 Jan 2005	Vehicles registered after 1 Jan 2005	Type Approval
Petrol (%CO)	4.5	4	Euro II
Diesel (% HSU)	75	70	

Note: Two strokes Engine banned from Import

8) Noise Level Limits

Industrial Area		Mixed Area		Sensitive Area	
Day*	Night*	Day	Night	Day	Night
75dB(A)	65dB(A)	65dB(A)	55dB(A)	55dB(A)	45dB(A)

Note: All the values are maximum values

* *Day time is from 0600 hours to 2200 hours (human activities)*

** *Night time is from 2200 hours to 0600 hours (no human activities)*

Maximum value allowed in workplace in any point of time is 75dB(A)
