# Semi-annual Environment & Social Monitoring Report (June to December 2014)

April 2015

GEO: Adjaristsqali Hydropower Project

Annexes 1-5

Prepared by Adjaristsgali Georgia LLC

The Environmental and Social Performance Report is a document of the borrower. The views expressed herein do not necessarily represent those of ADB's Board of Directors, Management, or staff, and may be preliminary in nature. Your attention is directed to the "Terms of Use" section of this website.

In preparing any country program or strategy, financing any project, or by making any designation of or reference to a particular territory or geographic area in this document, the Asian Development Bank does not intend to make any judgments as to the legal or other status of any territory or area."

# Annex 1

AGL HSE Policy

#### Shuakhevi Hydropower Project

Section	Created by	Jeff Terry
1. Administration Procedures	Review by	Paul Blanchard
Sub-Section 4. Occupational Health, Safety & Environment	574	Paul Blanchard
	Date	1st January 2015
Standing Procedure  1. HSE Policy		

Purpose:	The Company (AGL) recognises its responsibility to ensure safety for all employees and members of the community.
Extent:	This Sub-Section applies to all persons employed directly or indirectly by AGL
Responsibility:	Personnel must conduct themselves in such a way that does not have an adverse effect on others

#### **Policy Specifics**

Adjaristsqali Georgia LLC (AGL) is committed to providing a safe and healthy workplace and ensuring that our business activities are conducted in a manner that protects the environment. We believe that the health and safety of our employees, subcontractors and suppliers as well as responsible stewardship of the environment are essential to the successful conduct and future growth of our business and are in the best interests of our shareholders.

Our corporate Health, Safety & Environmental (HSE) policy is based on the following principles:

- Identification and evaluation of all HSE hazards or aspects and the management of their risks or impacts to acceptable levels
- Compliance with all applicable HSE legislation
- Prevention of accidents, injuries and pollution
- · Intolerance of the conditions and behaviors that contribute to incidents or injuries
- · Reduction of waste and conservation or resources
- Recording and communicating HSE performance throughout the company
- Continual improvement of HSE performance

The AGL HSE Director and senior management shall visibly uphold these principles and the management and supervisory personnel at each business unit and location shall be

1.4.1 HSE Policy

responsible for implementing and maintaining an HSE management system necessary to ensure compliance with these principles on a daily basis.

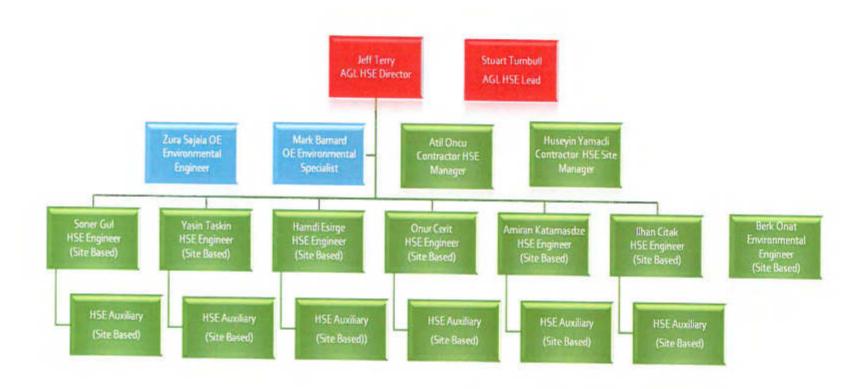

AGL is committed to educate and train each employee in safe work practices and will provide supplies, tools, equipment, and to the maximum extent, a hazard-free environment to ensure all tasks can be safely completed. No person shall be required or instructed to work in surroundings or under conditions that are unsafe or dangerous to his or her health. Each individual employed must take responsibility to become aware of the hazards associated with their workplace and tasks they are to perform.

Each worker is responsible to complying with applicable safety requirements, wearing prescribed safety equipment, and preventing avoidable accidents. Each employee has a duty to report workplace conditions or practices that pose a safety hazard or threaten the environment and to take reasonable actions to alleviate such risks.

#### 1. Executive Summary:

On the 16th September, an electrician received severe injuries to his left foot due to contact with a jumbo drill rig. The accident happened as a result of the injured person (IP) slipping, allowing his left to become trapped under the front wheel of the rig. The injuries were so severe to the bone, nerves and blood flow that 8 days after the injury (24th September) was sustained the foot required amputation to prevent the spread tangerine to sections of his leg and body.

## შპს აგე ბათუმი

The IP was first treated in the Shuakhevi Hospital, then Batumi Hospital on the 16th September 2014. On the 17th September the IP was taken by road ambulance to a Turkish hospital in Riza, Turkey for specialist care. Specialists attempted to recover the nerves, repair the bones, veins and arteries in his foot for 8 days but failed.

### Accident Description: Full description of accident / incident:

At 19:00 on the 16th September 2014, a Tuirkish worker was gathered at the portal of the Bifurcation tunnel to recieve work instruction for the night shift. The drill operator was assigned his normal duties on a 25 tonne Sandvik DD421-60C and proceeded to carry out his tasks as normal duties.

The IP, being an electrician, had various duties that meant he was regualarly entering and exisiting the tunnel area as a lone worker. The IP had been working as a site electrician for 3 months on the Project as was familiar with the tunnel system and safe working practices. Some of the IP's responsibilities dictated that he connect the jumbo drill rig the 415v power supply to allow the drilling of the face to facilitate the blast pattern.

At approximately 04:40 he noticed the drill rig manouveering to the electricity power supply point. The IP walked towards the power point and stood still inpreparation to connect the power supply to the rig for the immenent tunnel face drilling operation, while the drill rig was travelling towards him. The drill rig operator and the IP had direct eye contact, as the drill rig came to within 1.5m of the power point the IP became startled by the size of the plant, tried to move back but slipped on loose ground. The result of the slip exposed his left foot to the moving plant resulting the crushing of the front of the left foot.

The IP was recovered from under the drill rig and removed from the workplace in an AGE site minibus to the Shuakhevi Hospital at 05:00. The AGE shift supervisor was not inside the tunnel at the time of the accident, upon notification of the accident the AGE shift supervisor contacted the AGE main camp doctor who arrived at the Shuakhevi Hopstial to assist. At 05:45 the IP was taken to the main Batumi Hospital for further treatment in the AGE site Ambulance.

At 13:30 on the 17th septemebr 2014, the IP was taken the University Hospital in Riza, Turkey for specialist treatment in an attempt to repair the bone structure and main Dorsal Pedis Artery to replenish the blood flow in his left foot. Medical treatment was administered in an internsive care unit but to no avail. After 8 days of treatment the medical specialists advised the IP that amputation was required as they could not contain the meamroging and repair the artery..

The hospital advised his family and the AGE doctor on site at the main camp late in the morning on the 14th september 2014.

The amputation was carried out without issue and the IP left intensive care unit on the morning of the 25th september and is currently recovering in the same hospital.

#### 3. Conclusions:

The immediate cause of the accident was the interaction of personnel and plant in a confined space and failure to follow established safe working practices. Underlying causes are:

- The drill rig operator manoeuvred the drill rig towards the IP even though the IP had no route of escape behind him
- 2. The IP positioned himself between the tunnel wall and the drill rig
- 3. Excessive speed to complete tasks
- 4. Lack of due care and attention
- 5. Perceived pressure to complete tasks

#### 4. Recommendations to Prevent Re-occurrence:

- Plant operator must never operate plant towards personnel that have no means of escape
- Plant remain static whilst personnel are within 10m of the operating equipment
- Personnel must never position themselves in pinch points with walls and equipment
- Risk assessments and method statement must be adhered to, especially with high risk activities in high risk areas
- Greater discipline is required from operators and plant to prevent recurrence
- The tunnel risk assessment AGE-HSE-RA-007 has received a thorough review for pertinence and will be redelivered to tunnel personnel

#### 5. Closing remarks:

On the 25th September 2014 the Contractor's HSE team commenced a 3 day site wide safety toolbox talk on safe distances between personnel and plant and the tunnel risk assessment. Machine operators were advised that travelling towards or operating their items of plant whilst personnel are within 10m is strictly forbidden.
