Your attention is directed to the "Terms of Use" section of this website.

Annual Environmental and Social Performance Report

Name of Organisation	ReNew Power Ventures Private Limited		
Completed by	Gourav Panwar		
Position in Organization	Assistant Manager - QHSE	Date:	30.09.2015
Reporting Period	1 st April 2014 to 31 st March 2015		

A. Portfolio Information

Report Covering Period	
1 st April 2014	31 st March 2015

For the reporting period, please provide the following information about your portfolio where applicable:

Investment Portfolio

ReNew' s Project Activities	Description	Total Investment Size* (in US\$**)	Status of implementation	Date of commissioning
BHAKRANI 14.40 MW wind power project,	Gross block including land & other assets	12990157	Commissioned	March 2013
BUDH 30 MW wind power project	Gross block including land & other assets	34264152	Commissioned	August 2013 to December 2014
Chikodi 18 MW wind power project	Gross block including land & other assets	19779446	Commissioned	June 2013
DANGRI I 30 MW wind power project	Gross block including land & other assets	28724324	Commissioned	September 2014 to December 2014
Vaspert IV, 49.50 MW wind power project	Gross block including land & other assets	52787750	Commissioned	March 2014 to November 2014
JAMB, 28 MW wind power project	Gross block including land & other assets	27149608	Commissioned	April 2013 to June 2013
JASDAN, 25.20 MW wind power project	Gross block including land & other assets	21954320	Commissioned	March 2012
JAIH, 84.65 MW wind power project	Gross block including land & other assets	91230977	Commissioned	September-2012 to August-2013
PRATAPGARH, 51 MW wind power project	Gross block including land & other assets	50258622	46.50 MW commissioned, 4.50 is under process	March 2015

RPVPL SKF, 0.86 MW rooftop solar power project	Gross block including land & other assets	812934	Commissioned	March 2015
Sandhar 0.30 MW rooftop solar power project	Gross block including land & other assets	219286	Commissioned	July 2014
TADAS, 50.40 MW wind power project	Gross block including land & other assets	46034230	Commissioned	December-2012 to May-2013
VASPET I, 45 MW wind power project	Gross block including land & other assets	47607606	Commissioned	September 2012 to August 2013
VASPET II&III, 49.50 MW wind power project	Gross block including land & other assets	50737975	Commissioned	April 2013 to August 2013
WELTURI – I, 50.40 MW wind power project	Gross block including land & other assets	51772202	Commissioned	September 2013 to March 2014
WELTURI 2, 23.10 MW wind power project	Gross block including land & other assets	24608373	Commissioned	March 2014

*Investment figure reported in the above table is the investment done in particular project till 31st March 2015.

**31st March 2015 currency exchange rate is used (1 USD = 62.53 INR)

B. Environmental and Social Management System (ESMS)

Policies & Processes	Yes/No	
Has your organization developed and implemented an ESMS	Yes	ESMS manual was developed in June 2014
Is there an ESMS already in place, have there been any updates to the ESMS or policy and procedures adopted by your organization during the reporting period?	No	
Has senior management signed off the updated policy / procedures	Yes	ReNew Chairman & CEO Mr. Sumant Sinha has signed the QHSE policy on 1.10.2013
Has your organization appointed staff tasked to implement the ESMS	Yes	One dedicate resource is appointed in September 2014. moreover QHSE and project team are also supporting in ESMS implementation
Please provide details of any transactions rejected due to environmental and/or social concerns	No	No such rejection took place in the reporting period
Please state any difficulties and/or constraints related to implementation of the ESMS	Yes	Resource constraint was there in early stages of adoption of ESMS, now dedicated resource

		is hired to ensure the implementation of ESMS
Please describe how you ensure that your subproject companies and their subprojects are operated in compliance with national laws and regulations and applicable ADB requirements	-	Sub project companies are 100% subsidiaries of ReNew Power and in complete control of ReNew Power. All projects are managed by ReNew power team.
Please give details of any material social and environmental issues associated with project companies during the reporting period in particular	-	There was no major risk observed in the Environmental and Social Impact assessment of projects in the reporting period
In case the existing ESMS is not fully functional, what is the action plan being implemented by your organization	-	ESMS is not fully functional in all sites because of resource constraints, now ReNew has addressed that issue and is in process the implement the system in all sites. We are implementing ESMS in one new site in Rajasthan, India and ReNew is planning to implement ESMS in all remaining sites before 31.03.2016
Capacity		
Please provide the name and contact information of the ESHS Manager who has the overall responsibility for the implementation of ESMS	Yes	Mr. Gourav Designation: Assistant Manager - QHSE M: +91 9718285894 Email: gourav.panwar@renewpower.in
Please provide current staffing of other core ESMS persons in the organization involved with ESMS implementation	Yes	One and details are Mr. Gourav Designation: Assistant Manager - QHSE M: +91 9718285894 Email: gourav.panwar@renewpower.in
What was the budget allocated to the ESMS and its implementation during the year	Yes	For FY-2015-16 allocated budget for ESMS activities is around 2,04,701.74 USD*
Monitoring		
Do you receive environmental and social monitoring reports from project companies that you finance	No	We are monitoring HSE performance of each site on monthly basis. Contractor HSE team based at site in each project is responsible for HSE

		<p>compliance at site. ReNew has developed project level ESMS to monitor the environmental and social performance of projects.</p> <p>ReNew has implemented ESMS in two projects and monitoring is being done in both sites. ReNew is planning to monitor all parameters as proposed in project specific Environmental and Social Management Plan (ESMP) and will start monitoring ESMP in all projects before 31.03.2016</p>
Do you check ongoing compliance of your project companies with national regulations and any other requirements	Yes	We do conduct biannual HSE audit of each site and check the compliance of project with applicable acts and regulations
Please describes how you monitor the project company and their social and environmental performance	-	We are in process to develop a system to monitor the environmental and social performance of the company
<ul style="list-style-type: none"> - Please provide details of any accidents/litigation/complaints regulatory notices and fines imposed on the fund or on the project company as a result of; - Any incidents of non-compliance with the applicable environmental and social requirements - Any non-compliance with covenants/conditionalities 	-	There is no accidents/litigation/complaints/regulatory notices and fines imposed on the fund or on the project company
Reporting		
Is there an internal process to report on social and environmental issues to senior management?	Yes	We highlight the risks identified in Environmental and Social Impact Assessment study before management on regular basis
Do you prepare any social and environmental reports: <ul style="list-style-type: none"> - For other multilateral agencies - Other stakeholders - E&S reporting in the annual report - Sustainability reports 	Yes	Annual reporting is done to Global Environment Fund, which is an investor in ReNew Power Ventures Pvt. Ltd.

*31st March 2015 currency exchange rate is used

C. Investment using ADB funds

Please provide information about all planned ReNew's project using ADB funds approved during this monitoring period.

Name of the company	Description of project activities	Total contract amount (US\$ mn)	Safeguard category			Any outstanding environmental and IR and IP issues during reporting period and actions taken to address the issues

	Environmental and Social Impact Assessment as per the ADB safeguard policy and ESMS guidelines. We are in process to implement Environmental and Social Management Plan in all sites by 31.03.2016

Report on Compliance with ADB's Social Protection Requirements	
Does the ReNew carry out its activities consistent with the intent of ensuring legally permissible equal opportunity, fair treatment and non-discrimination in relation to recruitment and hiring, compensation, working condition and terms of employment for its workers (including prohibiting any form of discrimination against woman during hiring and providing equal work for equal pay for men and women?)	ReNew follow the equal opportunity, fair treatment and non-discrimination policy in relation to recruitment, hiring, compensation working conditions and terms of employment. ReNew has also set up a committee under the "The Sexual Harassment of Women at Workplace (Prevention, Prohibition and Redressal) Act, 2013" to ensure the safety of women employees.
Does ReNew not restrict its worker from developing a legally permission means of expressing their grievance and protecting their rights regarding working conditions and terms of employment?	Not applicable, ReNew does not hire workers/labours
Does ReNew engage contractors and other providers of goods and services (i) Who do not employ child labour or forced labour (ii) Who have the appropriate management systems that will allow them to operate in a manner which is consistent with the intent of (A) ensuring legally permissible equal opportunity and fair treatment and non-discrimination for their workers and (B) not restricting their worker from developing a legally permissible means of expressing their grievances and protecting their rights regarding working conditions and terms of employment; and (iii) Whose subcontractors contain provision which are consistent with paragraphs (i) and (ii) above.	Yes, ReNew puts contractual obligations on all its contractor to ensure the compliances of all applicable legal acts.

D. Sustainable Finance (subprojects with environmental and social benefits)

ReNew develops only clean energy projects and investment details are provide above. ReNew has invested around 71,965.46 USD \$ in FY 2014-15 under corporate social responsibility and community development activities

Sustainable finance		
Have you made any Investment in ReNew that have social and environmental benefits such as investing in management systems, energy efficiency, renewable energy, cleaner production, carbon finance, pollution abatement and control, sustainable supply chain, corporate social responsibility, community development etc.?. please list in the format below		
Sub Project Name	Value financed by Financial Institute (US \$ million)	Type of social and environmental benefits
NA	NA	NA

E. **Employment generation** – ReNew Power operations created plenty jobs in supporting industries. As per ReNew experience, In a 50 MW wind power project around 200 personnel which includes workers, executives and technicians get employment during construction phase and in operation phase around 25 personnel get employment which continues for 25 years

F. CSR activities-

ReNew Power Ventures Pvt. Ltd, an Independent Power Producer (IPP) company, is committed to leading a change in the country's current energy portfolio by delivering cleaner and smarter energy choices and thereby reducing India's carbon footprint. ReNew Power's mission is to play a pivotal role in meeting India's growing energy needs in an efficient, sustainable and socially responsible manner.

Corporate Social Responsibility (CSR) has been akin to ReNew's core business of clean energy generation. It aims to provide access to resources required for better standard of living to people in and around its area of operations. ReNew Power CSR initiatives focus on empowering communities through education, health & well-being, women empowerment and sustainable environment. Community is the most important stakeholder for ReNew Power, with whom it has built strong partnerships through a well-structured community development program.

Under the ambit of ReNew India Initiative (RII), the company's CSR focus is based on three broad indicators of development: Human, Social and Natural capital

Human capital: Under this, we primarily focus on inherent human abilities like talent, skill, knowledge, potential that can be leveraged to make them self-reliant

Social capital: Creation of social wealth & sustainable livelihood for the communities we operate in

Natural capital: To integrate the values of nature Into all the major declslons affecting the environment and human well-being

Some of the Key programs are:

a) **Community development:**

The impact of development is often most felt on socially and economically marginalized communities, who are vulnerable to environmental changes due to their direct dependence on natural resources for sustaining their livelihoods.

ReNew's community development activities focuses on areas of basic infrastructure development, education, community health and medical care, sanitation, capacity building, women empowerment, etc. which are based on specific local requirements, as per the findings of the need assessment reports. As a practice we conduct need assessment of all the project site to design the need based program for the intervention community. In addition, consultations through various participative forums like Village Development Committee (VDC), School Management Committees (SMC) are conducted. Engagement of community in acceptance of specific CSR initiatives instils a sense of ownership among people and plays a vital role in smooth and successful implementation of programs.

b) Drinking Water & Sanitation

Recognizing that the availability of potable drinking water is a clearly identified need in many villages of rural India, ReNew has been taking up a number of programmes in this direction. Construction of borewells, tubewells, Taankas, hand pumps, rain water harvesting structure, well recharging, overhead tanks as well as storage facilities etc. are some of initiatives undertaken by the company. ReNew has taken up frontal projects for improving local hygiene and sanitation practices with the construction of toilets in schools and improvement of health and hygiene in the school environment in particular by doing plantation drive awareness campaign on regular basis. Various competitions in schools for students like essay, painting, debate and clean school competitions to improve the skills and participation in the school activities. ReNew also conducts school level health and hygiene related awareness programmes using charts and handbills and audio-visual instruments.

S.No	Area	Highlights
1.	Women Empowerment	<ul style="list-style-type: none"> 70 Self-help groups (SHGs) formed covering 40 villages and more than 700 women are member of these SHGs 22 SHGs have started their income generation activities taking

		<p>the IGP like Goat rearing, poultry, stitching & tailoring etc.</p> <ul style="list-style-type: none"> • On an average these women are earning Rs. 3500-4000 per month through these income generation programs
2.	Education	<ul style="list-style-type: none"> • Toilet construction in 14 schools • Remedial centres for 500 children covering 17 villages • 100% children enrolled in schools and no drop out reported in the year 2014 in 17 villages in the states of Maharashtra • 40-50 % increase in examination performance in comparison to previous year exam
3.	Health	<ul style="list-style-type: none"> • 4800 benefited through different health camps in last year • More than 70,000 people have access to a healthier life due to different health camps and referral services
4.	Animal Husbandry	<ul style="list-style-type: none"> • 2500 cattle vaccinated through camps • Cattle care Awareness camp every month benefiting 150 cattle
5.	Others	<ul style="list-style-type: none"> • Cleanliness drive across all the project location targeting 70,000 population • Planted 400 trees in the project of Maharashtra and Rajasthan and Madhya Pradesh

c) Health and Medical care:

Access to good health care is a precondition for social prosperity. Health care expenses in India, particularly in rural area is one of the major cause for increase in poverty. We found the marginal farmers and landless labourers less concerned about their health; especially women and children are deprived of the health facilities. Providing integrated rural health services in partnership with public and private health care providers is one of the important activities undertaken by ReNew Power. With the support of different NGOs¹, ReNew Power is providing free primary healthcare and works on the awareness, referral and cure model (A-R-C Model). The project is being implemented in 47 villages around its seven project sites in the states of Maharashtra, Rajasthan, Madhya Pradesh and Gujarat. These villages are located far from the Primary Health Centre (PHC) or Community Health Centre (CHC) and access to basic health care is a challenge from these communities. More than 70,000 people have access to a healthier life due to this initiative and we are expanding these activities to other villages covering a wider geography.

¹ NGOs names are mentioned in the note at the end of report

[Handwritten signature]

d) Women Empowerment:

Women are the backbone of families in rural areas and villages. They not only shape the families but also earn money to meet the daily needs of the family. Different research studies reveal that rural women typically work longer hours than men. Unfortunately we have also seen most of the women have shouldered all the responsibilities of the families due to addicted and unemployed husbands. Now, as per constitutional right 50% of the decision is shared with women have also proved their capacity and status through Self-Help-Groups (SHGs). It is now becoming people's movement and working as pressure group to safeguard women from harassment violence and other physical and mental assault. Through empowerment and gender sensitization, women have become aware of her rights. They are also taking up the responsibility of family to support it financially through SHGs, federation and cooperatives models. Considering the impacts of SHGs as one of the most powerful tool to empower rural women, ReNew Power has taken up the women empowerment program through SHGs process across all the project locations.

So far, we have formed 70 SHGs covering 40 villages across five states. More than 700 women are members of these SHGs and counting. Through this intervention, women can now get finance with minimum interest. These women are also sensitised about children education, their future support and other family needs. This intervention has been initiated with the objective to capacitate the community women and facilitate them in understanding the concept of holistic development for their empowerment, according to the need of the villages.

Outcome:

- o 70 SHGs formed covering 40 villages across five states and more than 700 women are member of these SHGs
- o 22 SHGs have started their income generation activities taking the IGP like Goat rearing, poultry, stitching & tailoring etc.

- On an average these women are earning Rs. 3500-4000 per month through these income generation programs
- Number of community initiatives has taken shape to plan the project activity as well as budget preparation.
- Social accountability of the utilized funds by presenting an annual report to maintain transparency.
- Strong and positive relationship with Govt. officials being established to ensure benefits of all government schemes is made available to the rural poor.

e) Community cleanliness drive:

Issues: community living conditions are not hygienic leading to poor health

Action:

Under this program, we are carrying out community cleaning drive regularly in various villages across all our project locations with the help of active employee volunteering. To support the CSR activities at ReNew Power, we have formed an employee volunteering team called REEJOYS. The REEJOYS team at ReNew Power participates in various initiatives from time-to-time.

Cleanliness drive is a planned activity for all the 47 villages where ReNew is currently implementing CSR projects. During the cleanliness drive, the community members are sensitised on the importance of keeping not only their homes clean but also the surrounding areas. The employees lead by example by picking up garbage and collecting it in the dustbins, encouraging villagers to follow suit. Villagers who are participating in these actions are then trained and encouraged to act as peer educators to spread awareness about the importance of cleanliness. With an average population of 2000 per village the peer educators have managed to sensitise 20 villagers under Swachh Bharat Abhiyan per village.

[Handwritten signature]

In addition, to further facilitate the cleanliness program, we have placed dustbins in public places like temples, schools, community centres, clubs, etc. These bins are maintained by the peer educators and other volunteers in the community.

f) Education:

Education is the foundation for building an inclusive, equitable and sustainable society. It's the best investment for the future. Keeping in view, the requirements of a first generation learner, who needs support for better performance at school education facilitation centres (remedial classes), ReNew Power has started these centres in the community as a pilot project to see the impacts of this intervention. Initially only 88 school children were enrolled for additional academic coaching on regular basis. Now we are running 23 remedial centres covering 23 schools in 23 villages. In addition, through our NGO partners we are also a member of the SMC (School Management Committee) in all the 23 schools to monitor the drop-out rates and take necessary steps to arrest that.

Our achievements-

- Facilitation of administration to school- well-structured SMCs to strengthen education system at grassroots level
- Arrangement of school kits and books for the economically weaker classes
- Infrastructure support to govt. school – particularly construction of toilets, provision of safe drinking water and library
- Remedial classes for weaker students

- Increased educational awareness in the community

Immediate impacts:

- 100% children enrolled in schools and no drop out reported in the year 2014 in 17 villages in the states of Maharashtra
- 40-50 % increase in examination performance in comparison to previous year exam
- 100% increase in the participation of parents in the SMCs (school management system)
- Seasonal migration has drastically come down due to increased educational awareness

g) Green Village:

The consumption of Non-ReNewable sources of energy has caused more environmental damage than any other single human activity in the last century. Over dependence on fossil fuels such as coal and crude oil, which have been used for electricity generation, etc., has led to high concentrations of harmful gases in the atmosphere; the detrimental effects of which are seen today as global warming and climate change.

With this backdrop, ReNew Power has designed the program of green village. The objective is to create a more socially, economically and ecologically sustainable village. This will be united by shared ecological, socio-economic and cultural values. Under this, the effort is to create alternatives to ecologically destructive electrical, water, transportation, and waste-treatment systems, as well as the larger social systems that reflect and support them.

[Handwritten signature]

Following are some of the important activities we have undertaken covering five villages in the states of Maharashtra, MP and Rajasthan as a part of **Green village program**.

- Community solar plant
- Bio-gas from human, animal and agri-waste which is abundantly available in villages
- Water conservation through rain water harvesting, check dams etc.
- Alternate energy- Solar home and street lighting systems
- Soil biotechnology, social forestry and plantation
- Organic farming
- Waste management
- Household sanitation

h) Animal protection project:

Improved animal welfare relates to greater yield and efficiency, food safety and economic benefits for the food chain. Keeping this in view, ReNew in partnership with local NGOs and the Department of Animal Husbandry is implementing the program focusing on animal care and adopting the following strategies:

- Participatory Rapid Appraisal (PRA)
- Formation of village development committees (VDC)
- Establishing institutional mechanism and preparation of livestock vaccination and treatment calendars
- Awareness generation sessions with livestock owners, capacity building in vaccination skills through demonstrations, obtaining vaccines, drugs and other input supply from government departments
- Community mobilization and behavior change communication, preparation of a group of village level vaccinators and volunteers, organizing livestock vaccination and treatment camps
- Para vet training for the unemployed youth to address the community need with regards to animal care
- Educate modern techniques through exposure visit in every quarter for maintenance of livestock available in the Community

i) Employee volunteering:

ReNew Power has conducted several employee volunteering activities where employees took part in the CSR activities. Some of the activities included The rice bucket challenge where ReNewers contributed rice for the poor and ReNew Power matched the employees' contribution. ReNewers participated in the Delhi half marathon to promote the cause of Prayas (NGO). ReNewers also donated food and clothes for J&K flood victims. ReNewers celebrated Christmas with children at the NGO Prayas. ReNew Power held Diwali and Holi melas where NGOs participated and sold their produced goods to the employees from Renew as well as other organizations.

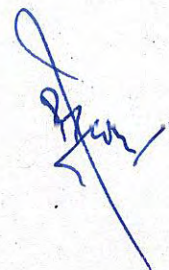

j) Monitoring & Evaluation:

Effectiveness of the program is assessed through a two-tier monitoring mechanism involving external as well as internal evaluation. There is regular monitoring at sites and corporate office with monthly and quarterly reporting format. ReNew has developed a CSR and sustainability index to measure the impact of every activity. Full-fledged internal audit is also carried out to ensure effective implementation. Transparent assessment/evaluation is planned this year through reputed agencies for gauging the impact of ReNew Power CSR initiatives.

Note-1:

NGO Partners: All the above said programs implemented by our different NGO partners. The NGOs partners we have on board now are the following:

- Gramin Vikas Vigyan Samiti,
- Mahila Shram Sewa Nyas,
- Yerala Projects Society,
- Social Action for Manpower Creation
- Sambhav Social Service Organization

Pvt. Ltd.	MW rooftop solar power project
