

India: Madhya Pradesh Urban Services Improvement Project

Project Name	Madhya Pradesh Urban Services Improvement Project								
Project Number	42486-016								
Country	India								
Project Status	Approved								
Project Type / Modality of Assistance	Loan Technical Assistance								
Source of Funding / Amount	<table border="1"> <tr> <td colspan="2">Loan: Madhya Pradesh Urban Services Improvement Project</td> </tr> <tr> <td>Ordinary capital resources</td> <td>US\$ 275.00 million</td> </tr> <tr> <td colspan="2">TA: Capacity Development of Institutions in the Urban Sector in Madhya Pradesh</td> </tr> <tr> <td>Technical Assistance Special Fund</td> <td>US\$ 1.00 million</td> </tr> </table>	Loan: Madhya Pradesh Urban Services Improvement Project		Ordinary capital resources	US\$ 275.00 million	TA: Capacity Development of Institutions in the Urban Sector in Madhya Pradesh		Technical Assistance Special Fund	US\$ 1.00 million
Loan: Madhya Pradesh Urban Services Improvement Project									
Ordinary capital resources	US\$ 275.00 million								
TA: Capacity Development of Institutions in the Urban Sector in Madhya Pradesh									
Technical Assistance Special Fund	US\$ 1.00 million								
Strategic Agendas	Environmentally sustainable growth Inclusive economic growth								
Drivers of Change	Partnerships Private sector development								
Sector / Subsector	Water and other urban infrastructure and services - Urban policy, institutional and capacity development - Urban sanitation - Urban water supply								
Gender Equity and Mainstreaming	Effective gender mainstreaming								
Description	The proposed Project will support government in improved and sustainable urban services to approximately 1.3 million people in selected towns of the State (geographic coverage), improved institutional and financial management capacity of benefitting urban local bodies, and the development and operationalization of the Madhya Pradesh Urban Development Company Limited . The proposed Project will be implemented over 5 years from 2017 through 2022 (time slice).								
Project Rationale and Linkage to Country/Regional Strategy	The Madhya Pradesh Urban Services Improvement Project, the Project, contributes to the state government project for improving urban services in the urban local bodies across the state. The proposed Project will provide improved and sustainable urban services (defined as water supply, sanitation and solid waste management) to approximately 1.3 million people in the state of Madhya Pradesh (approximately 6% of the state's urban population), and enhance capacity and strengthen institutional systems of the state to deliver sustainable access to quality urban services. The project is included in the country operations business plan and required project preparatory technical assistance.								
Impact	Economic growth and urban living conditions improved, and infant mortality reduced in Madhya Pradesh (Twelfth Five-Year Plan and Madhya Pradesh Vision 2018)								

Project Outcome

Description of Outcome	Quality, coverage, efficiency, and sustainability of urban service delivery improved in Madhya Pradesh
Progress Toward Outcome	

Implementation Progress

Description of Project Outputs	Water supply infrastructure in 64 project towns and integrated storm water and sewage infrastructure in two tourist towns improved Systems to ensure sustainable urban infrastructure operation and management in all the project towns established. Capacity of MPUDC, ULBs, and consumers in 64 project towns improved
Status of Implementation Progress (Outputs, Activities, and Issues)	

Safeguard Categories

Environment	B
Involuntary Resettlement	B
Indigenous Peoples	B

Summary of Environmental and Social Aspects

Environmental Aspects	No significant environmental impacts are anticipated. All the visited project sites are located outside sensitive areas and any impacts during construction and operation can be avoided and/or mitigated through proper design and good high-quality construction and operations and maintenance practices.
Involuntary Resettlement	Construction of facilities (treatment plants and pipes) will be on government owned land and reticulation systems would be along the right of way with minimal disturbance to livelihoods.
Indigenous Peoples	Although the state has a substantial proportion of ST population (21%), the concentration is very low in urban areas (5.18%). Especially in urban environments, there is heterogeneity of population composition; hence, there is no potential issue specifically affecting indigenous people.

Stakeholder Communication, Participation, and Consultation

During Project Design	The stakeholders were involved in developing the project through discussions on-site and public consultation at several places in the town, after which views expressed were incorporated into the project and in the planning and development of the project. The project will be made available at public locations and will be disclosed to a wider audience via the ADB, MPUDC and PMU websites. The consultation process will be continued and expanded during project implementation to ensure that stakeholders are fully engaged in the project and have the opportunity to participate in its development and implementation. Measures were taken to include and promote gender equality and women's empowerment in the design of the Project so that women have equitable opportunities for access to and use of relevant services, resources, assets, or opportunities and participation in decision-making process.
During Project Implementation	The public consultation and disclosure program is a continuous process throughout the project implementation, including project planning, design and construction. The Project will ensure participation of all stakeholders, which will strengthen inclusiveness. A constant communication will be established with the affected communities to redress the environmental issues likely to surface during construction phases and also regarding the grievance redress mechanism. ULB/PIU and PMC will organize public meetings and will appraise the communities about the progress on the implementation of project. Meeting will also be organized at the potential hotspots/sensitive locations before and during the construction.

Business Opportunities

Consulting Services	The proposed Project will exclude procurement of services that constitute high-value contracts and such activities will be excluded while defining the proposed Project scope.
Procurement	All procurement under the proposed Project shall be carried out using country systems based on the commonly accepted good practice principles embodied in ADB's Procurement Guidelines and Guidelines on the Use of Consultants.

Responsible Staff

Responsible ADB Officer	Huang, Jingmin
Responsible ADB Department	South Asia Department
Responsible ADB Division	Urban Development and Water Division, SARD
Executing Agencies	<i>Urban Development and Housing Department Govt. of Sikkim, NH 31A Gangtok-797101, India</i>
