Global Environmental Objectives

Global Environmental Objective (from Project Appraisal Document)

The Project development objectives are: (a) to enhance capacity and awareness at key national agencies and at local levels, to respond to climate variability and change; and (b) to better equip local communities to cope with climate change through the conservation and use of agro-biodiversity.

Has the Project Development Objective been changed since Board Approval of the Project?

Component(s)

Component Name	Component Cost
Agro-biodiversity and Local Knowledge Utilization and Assessment	0.37
Climate Modeling and Capacity Building	0.60
Integrating Climate Change into Rainfed Agriculture	2.80
Project Management, Coordination, Monitoring and Evaluation	0.23

Implementation Status Overview

This ISR update is based on a desk review and phone consultations to comply with the Regional requirement of not exceeding 6 months between two consecutive ISRs. It is also prepared to record the significant event in the life of the project that occurred recently with the Suspension of Disbursements under the Yemen Bank portfolio effective July 28, 2011 (see memo attached). The Yemen Agro-biodiversity Climate Adaptation Project (ACAP) became effective on August 31, 2010. Its implementation was launched in late September 2010, with its core Project team (Project Director, Procurement and FM) promptly put in place - building on the project team of the Groundwater and Soil Conservation/GSCP project.

However, further implementation progress has stalled since early 2011 because of the prolonged socio-political turmoil and deteriorating security situation the country is facing and that are way beyond the control of the project and its implementing agency.

The next supervision mission is being contemplated as soon as Bank missions are allowed to resume in the country.
