## RFI Ticket - Request Resolved

Dear Alessandro Ramazzotti,

We have analyzed your request and would like to provide you with the following information:

Please see the answer below and hope this answers your inquiry.

In hydrogen jargon, if you say low-carbon hydrogen, you may be considering hydrogen from natural gas in which carbon emissions are being captured, utilized, or stored (CCUS). So if there is CCUS involved it can be assumed that in such a case it would be low emissions.

We would appreciate if you would share your opinion on how we are doing, by answering the questions in this link:

### TICKET DETAILS

**Short description**

Ticket Web - PIC20230815074644

**Description**

To whom it may concern: Does the term "low carbon strategies" include natural or petroleum gas? Do the operations to improve energy efficiency include gas? Thank you in advance for your help.
