

India: IND: CLP WIND FARMS PRIVATE LIMITED (CWFPL) - Samana Phase II and the Saundatti Project)

Project Name	IND: CLP WIND FARMS PRIVATE LIMITED (CWFPL) - Samana Phase II and the Saundatti Project)		
Project Number	42902-024		
Borrower/Company			
Country	India		
Location	Samana, Gujarat, India; and Saundatti, Karnataka, India		
Approval Number	7727/2417		
Type of ADB Assistance / Amount	7727/2417	-1	USD 0.00 Approved
Strategic Agendas			
Drivers of Change			
Sector / Subsector	Energy - Renewable energy generation		
Gender Equity and Mainstreaming			
Responsible ADB Department	Private Sector Operations Department		
Responsible ADB Division	Infrastructure Finance Division 1		
Responsible ADB Officer	ADB Disclosure		
Project Sponsor(s)			
Description	The benefits of the proposed loan include (i) addition of 132.8 MW (50.4 MW for Samana - Phase II, and 82.4 MW for Saundatti) of power generating capacity to help reduce the growing supply deficit in India; (ii) development of new renewable energy sources, which will decrease fossil fuel consumption and reduce the emission of greenhouse gases and other pollutants; (iii) and demonstration of the successful implementation of large-scale wind power projects by the private sector.		
Objectives and Scope			
Linkage to Country/Regional Strategy	<p>The loan is consistent with ADB's India Country Partnership Strategy (CPS), which emphasizes infrastructure development, private sector participation, and renewable energy development in the country. Specifically in the power sector, policy dialogue by the South Asia Regional Department has focused on: (i) supporting sector reform and restructuring; (ii) enhancing energy efficiency and clean energy development; and (iii) promoting balanced physical infrastructure development. The ADB loan is in line with these strategies and dovetails efforts including ongoing dialogues with the Government under public sector operations. The Project has been contributing in meeting the significant energy and power shortages in the state of Gujarat.</p> <p>The loan is consistent with ADB's energy sector policy. It also forms a part of ADB's clean energy and environment program, which was launched in response to the communique by the Group of 8 Gleneagles Summit in July 2005. ADB's energy policy states that ADB will promote the development of renewable energy sources in developing member countries, and that ADB will also assist in implementing such projects, preferably through private sector involvement to ensure their sustainable long term operations. The clean energy and environment program includes implementation of renewable energy investment opportunities. The Project may also benefit from assistance from ADB's Asia Pacific Carbon Fund for upfront financing of future revenues from certified emission reduction units (CERs).</p>
