Dear Alessandro Ramazzotti, Thank you for your information request on Project IFC-47227 Pearl Dairy IV. The Project has not been approved and the Board date has not been set. We will update the disclosure page once we have more information.

This is a Category B project according to IFC's 2012 Policy on Environment and Social (E&S) Sustainability. The proposed project will have limited adverse E&S impacts that will be site specific, largely reversible and can be addressed through existing mitigation measures and the application of good international industry practices (GIIPs). With regards to the documents you request, the project has an ESRS, an ESAP and a Stakeholder Engagement Plan which are available on the IFC website (<https://disclosures.ifc.org/project-detail/ESRS/47227/pearl-dairy-iv>). The ESIA was disclosed with the previous investment Project-33405 Pearl Dairy I and whose link is referred in the project description section of the current project (<https://disclosures.ifc.org/project-detail/ESRS/33405/pearl-dairy>).

Pearl Dairy plays an important role in supporting the farming communities where it operates through the Dairy extension program. The IFC team carefully assessed the community implications of the project and determined this does not qualify for Broad Community Support evaluation. More details about the stakeholder engagement are also included in the IFC website (link above).

Best regards. IFC Public Affairs.

Regards,

IFC Corporate Relations
