**Mr Farid Fezoua**

Global Director for Disruptive Technologies, Services and Funds  
International Finance Corporation (IFC)

November 07, 2025

**Re: Proposed US\$ 30 million Investment in Lakeshore Capital III, LP**

Dear Mr Fezoua,

The **Asia for Animals Coalition** is a network of local and international animal protection and advocacy organizations, and the largest of its kind in the world.

We are writing to express our concern about your proposed investment in Lakeshore Capital III LP, a private equity fund managed by Lakeshore Capital Asia Ltd (the Financial Intermediary, or FI).<sup>1</sup> We are concerned about the Financial Intermediary investing in particular companies – such as the operator of a popular steakhouse franchise in Thailand, and a Thai brand offering a wide range of processed pork products – that are likely to increase the demand for meat in a region where its consumption is already growing exponentially.<sup>2</sup>

Many studies, including the World Bank's [Recipe for a Liveable Planet](#), highlight the need to reduce meat consumption if we are to tackle climate change. The [Economics of the Food System Transformation](#) states that middle-income regions need to reduce their per capita intake of animal-sourced food by 62% by 2050 to tackle what it refers to as “the global climate, nature, and health emergencies.” We are concerned about the suitability of IFC’s proposed investment, not least in the light of the Compliance Advisor Ombudsman (CAO)’s 2024 [advisory opinion](#) highlighting significant misalignments between the IFC’s current policies and their implementation and the Paris Agreement’s 1.5°C climate target.

As recognized in CAO’s July 2025 monitoring [report](#) on IFC investments in FIs:

*FI investments carry particular environmental and social risks for IFC because they involve primary clients such as banks, private equity, and insurance institutions that then invest in companies or projects. These IFC sub-projects can be large in number, geographically dispersed and difficult to*

---

track with IFC relying on the FI client to assess, mitigate and report any sub-project related E&S risks and impacts.

CAO's July 2025 monitoring [report](#) also concluded that:

*In most cases, in CAO's view, FI client reporting obligations are insufficient for IFC to adequately monitor and IFC monitoring does not adequately demonstrate that its funds were used for their intended purpose.*

Our colleagues at Stop Financing Factory Farming (S3F) have written to you separately requesting further information about the companies in which the Financial Intermediary intends to invest the proposed \$30 million and signalling that certain civil society actors intend to reach out to you to express their concerns about the Financial Intermediary.<sup>3</sup>

Disclosure of the requested information is mandated by the "IFC Access to Information Policy":

*Taking into account its roles and responsibilities, IFC makes available information concerning its activities that would enable its clients, partners and stakeholders (including Affected Communities), and other interested members of the public, to understand better, and to engage in informed discussion about, IFC's business activities, the development outcomes and other impacts of its activities, and its overall contribution to development.*<sup>4</sup>

Disclosure of the requested information would also be consistent with the IFC's ongoing improvements in transparency as noted in CAO's July 2025 monitoring [report](#):

*CAO notes continued improvements in transparency, access to, and knowledge of [...] IFC FI E&S resource allocation. In particular:*

- *IFC has improved its disclosure of FI sub-projects. IFC now discloses sub-projects financed by private equity fund clients [...]*
- *IFC committed to disclose sub-project name, sector, and location for private equity fund and some commercial bank clients.*

In light of the above, the undersigned organizations from around the globe, on behalf of the many millions of members they represent, respectfully ask that you withhold approving this proposed investment, or, if approval has already been granted, that you suspend implementation, until we and other stakeholders have received the requested further information and had an opportunity

---

to engage in informed discussion with you.

We would also be grateful to receive a copy of the FI's Environmental and Social Management System (ESMS), which all FI clients are required to establish and implement, and which we note was due to be updated by August 31, 2025.<sup>5,6</sup>
